Be it resolved by the People of the State of Missouri that the Constitution be amended:

Article VIII Section 2. <u>Qualifications of voters- Disqualification</u> is revised by deleting the single word " All" and replacing said word with "Only A" such that the first sentence of said section shall read:

Only a citizen of the United States, including occupants of soldiers' and sailors' homes over the age of eighteen who are residents of this state and of the political subdivision in which they offer to vote are entitled to vote at all elections by the people, if the election is one for which registration is required if they are registered within the time prescribed by law, or if the election is one for which registration is not required, if they have been residents of the political subdivision in which they offer to vote for thirty days next preceding the election for which they offer to vote: Provided however, no person who has guardian of his or her estate or person by reason of mental incapacity, appointed by a Court of competent jurisdiction and no person who is involuntarily confined in a mental institution pursuant to an adjudication of a Court of competent jurisdiction shall be entitled to vote, and persons convicted of felony, or crime connected who the exercise of the right of suffrage may be excluded by law from voting.

RE: Petition approval request from Heidi Miller regarding a proposed constitutional amendment to Article IV (2020-059)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Heidi Miller on April 11, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the State of Missouri that the Constitution be amended:

Article IV of the Constitution is revised by adding one new section to be known as Article IV, Section 36(c) to read as follows:

Section 36(c). 1. Notwithstanding any provision of law to the contrary, beginning July 1, 2021, individuals nineteen years of age or older and under sixty-five years of age who qualify for MO HealthNet services under 42 U.S.C. Section 1396a(a)(10)(A)(i)(VIII) and as set forth in 42 C.F.R. 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. Section 1396a(e)(14) and as set forth in 42 C.F.R. 435.603, shall be eligible for medical assistance under MO HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. Section 1396a(k)(1) and any implementing regulations.

3. No later than March 1, 2021, the Department of Social Services and the MO HealthNet Division shall submit all state plan amendments necessary to implement this section to the United States Department of Health and Human Services, Centers for Medicare and Medicaid Services.

4. The Department of Social Services and the MO HealthNet Division shall take all actions necessary to maximize federal financial participation in funding medical assistance pursuant to this section.

5. No greater or additional burdens or restrictions on eligibility or enrollment standards, methodologies, or practices shall be imposed on persons eligible for MO HealthNet services pursuant to this section than on any other population eligible for medical assistance.

6. All references to federal or state statutes, regulations or rules in this section shall be to the version of those statutes, regulations or rules that existed on January 1, 2019.

Change in Missouri Electoral Vote Process

Created by Pauly Lentz 4-10-2019

Background:

In Missouri, as in the majority of other states in America, the electoral college is a winner take all system. Due to the nature of this many people don't vote due to the idea that their vote is useless. By making the area that the votes are used in smaller, a congressional district instead of statewide, many will feel as if they are not wasting a vote if they are in the political minority. It will in turn increase the number of politically involved people in the state. This plan would allow each congressional district to be separate when it comes to voting allocating electoral votes to a presidential candidate. For example, if district 1 voted for the Democratic candidate they would send a Democrat elector to cast their vote. Instead of district 1 sending a Republican if the whole state voted Republican. That would cover 8 electors. The other two would be picked at large by the winning party in the presidential election. For example, if the state votes Republican then the Republican party would pick the other two electors for their state.

Current Statute:

128.010. Electoral districts — number of electors to be chosen. — Hereafter, at all elections held in this state for the offices of president and vice president of the United States, the electoral district shall be the same as the congressional districts into which the state shall be divided, and the same number of electors as there may be districts shall be chosen by the qualified voters, one of whom shall be a resident of each district; and in addition thereto, two electors shall be chosen by the state at large.

Revised Version:

128.010. Electoral districts — number of electors to be chosen. — Hereafter, at all elections held in this state for the offices of president and vice president of the United States, the electoral district shall be the same as the congressional districts into which the state shall be divided, and the same number of electors as there may be districts shall be chosen by the qualified voters, one of whom shall be a resident of each district; and in addition thereto, two electors shall be chosen by the state at large. The electors chosen by the qualified voters shall vote based on the will of those in the district. The majority voted candidate's party will nominate the elector to cast the vote for that district. The remaining two electors shall be nominated by the party whose candidate won the majority vote through the state.

P.S.: I believe this would be an acceptable format to submit this in. If not please let me know what to change though. Have a nice day.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article XIV Section 1 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all of the underlined matters as required pursuant to Section 116.050 RSMo.

Section 1. Missouri Cannabis Restoration and Protection

Controlled Substance List (CSL), Definition as a substance

1. Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug, hence forth by Missouri law, by the passage of this initiative.

Definitions

2. Definition of terms, as used in this Act:
(a) "Controlled Substance List", or "CSL" refers to Missouri's list of controlled substances as pertains to Missouri Statutes.
(b) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(c) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(d) "Personal use" refers to the personal use or consumption of Cannabis.
(e) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(f) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

Personal and Commercial

3. The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivating, harvesting, processing, manufacturing, packaging, distribution, transferal, display or possession of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall in no way impede one's legal right to possess a firearm.

Medical

4. Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending and/or providing Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending and/or providing Cannabis for medical purposes for any creature under their care.
(d) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

Zoning

5. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

Law Enforcement and the Courts

6. Missouri's law enforcement and its courts shall protect Cannabis users and their property without discrimination, and with every bit the effort afforded to every citizen of Missouri and our nation.
(a) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fine(s) when operating or a passenger of a motor vehicle. Stops, charges, fines and arrests shall be the product of visible and/or previously proven non-Cannabis infractions of Missouri law.
(b) No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(c) Asset or Civil Forfeiture shall no longer be used in the state of Missouri through association with Cannabis, Cannabis cultivation, it's use and/or possession, in any way.
(d) Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses, which are no longer illegal in the State of Missouri under this Act, shall be immediately released.
(e) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.
(f) Within 60 days, Missouri's Courts shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

Regarding Federal Law

7. Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

Existing Local, State and Federal Law

8. All provisions of this section shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

Implementation

9. The dictates of this Initiative, unless otherwise indicated by this initiative, shall be implemented no later than **January 31st, 2021.**

[Section 1. Right to Access Medical Marijuana

1. Purposes

This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for non medical purposes. The section does not allow for the pub) ic use of marijuana and driving under the influence of marijuana.

2. Definitions

(1) "Administer" means the direct application of marijuana to a Qualifying Patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products:

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a Qualifying Patient's physician.

(2) "Department" means the Department of Health and Senior Services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Marijuana" or "Marihuana" means ***Cannabis indica, Cannabis sativa,*** **and** ***Cannabis ruderalis,*** hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" or "Marihuana" do not include industrial hemp containing a crop-wide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) "Marijuana-Infused Products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) "Medical Marijuana Cultivation Facility" means a facility licensed by the Department, to acquire, cultivate, process, store, transport, and sell marijuana to a Medical Marijuana Dispensary Facility, Medical Marijuana Testing Facility, or to a Medical Marijuana-Infused Products Manufacturing Facility.

(8) "Medical Marijuana Dispensary Facility" means a facility licensed by the Department, to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a Qualifying Patient, a Primary caregiver, another Medical Marijuana Dispensary Facility, a Medical Marijuana Testing Facility, or a Medical Marijuana-Infused Products Manufacturing Facility.

(9) "Medical Marijuana-Infused Products Manufacturing Facility" means a facility licensed by the Department, to acquire, store, manufacture, transport, and sell marijuana-infused products to a Medical Marijuana Dispensary Facility, a Medical Marijuana Testing Facility, or to another Medical Marijuana-Infused Products Manufacturing Facility.

(10) "Medical Marijuana Testing Facility" means a facility certified by the Department, to acquire, test, certify, and transport marijuana.

(11) "Medical use" means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a Qualifying Patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) "Physician" means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) "Physician certification" means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) "Primary caregiver" means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a Qualifying Patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the Department.

(15) "Qualifying medical condition" means the condition of, symptoms related to, or side- effects from the treatment of:

(a) Cancer:

(b) Epilepsy;

(c) Glaucoma:

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome:

(f) Debilitating psychiatric disorders, including, but not limited to, post-traumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome:

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication: (i) Any terminal illness: or

(i) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) "Qualifying Patient" means a Missouri resident diagnosed with at least one qualifying medical condition.

3. Creating Patient Access to Medical Marijuana

(1) In carrying out the implementation of this section, the Department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section: and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and Qualifying Patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section:

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a Qualifying Patient or Primary Caregiver to ensure that no medical marijuana grown by a Medical Marijuana Cultivation Facility or manufactured by a Medical Marijuana-Infused Products Manufacturing Facility is sold or otherwise transferred except by a Medical Marijuana Dispensary Facility. The Department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of Marijuana and Marijuana-Infused Products. The Department shall certify entities which demonstrate compliance with its transportation standards to transport Marijuana and Marijuana-Infused Products to a Medical Marijuana Cultivation Facility, a Medical Marijuana-Infused Products Manufacturing Facility, a Medical Marijuana Dispensary Facility, a Medical Marijuana Testing Facility, or another entity with a transportation certification. The Department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The Department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the Governor for the efficient discharge of all responsibilities assigned to the Department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following: (i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers: (ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of Qualifying Patients and the community, procedures to be used to prevent diversion, and any plan for making Marijuana available to low-income Qualifying Patients: (iii) site security: (iv) experience in a legal cannabis market: (v) in the case of Medical Marijuana Testing Facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience: (vi) the potential for positive economic impact in the site community: (vii) in the case of Medical Marijuana Cultivation Facilities, capacity or experience with agriculture, horticulture, and health care; (viii) in the case of Medical Marijuana Dispensary Facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients; (ix) in the case of Medical Marijuana-Infused Products Manufacturing Facilities, capacity or experience with food and beverage manufacturing; and (x) maintaining competitiveness in the marijuana for medical use marketplace. In ranking applicants and awarding licenses and certificates, the Department may consult or contract with other public agencies with relevant expertise regarding these factors. The Department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by Qualifying Patients.

(2) The Department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by Qualifying Patients. In developing such rules or emergency rules, the Department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the Department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section:

(b) Specifications of duties of officers and employees of the Department:

(c) Instructions or guidance for local authorities and law enforcement officers:

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the Department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the Medical Marijuana Dispensary Facility, product display and examination by the Qualifying Patient and/or Primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this section, including a fingerprint based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the Department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530:

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the Department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical Marijuana-Infused Products:

(l) The specification of acceptable forms of picture identification that a Medical Marijuana Dispensary Facility may accept when verifying a sale:

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees:

(p) The reporting and transmittal of tax payments:

(q) Authorization for the Department of Revenue to have access to licensing information to ensure tax payment and the effective administration of this section: and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The Department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The Department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The Department shall issue rules or emergency rules to provide for the certification of and standards for Medical Marijuana Testing Facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The Department shall certify, if possible, at least two entities as Medical Marijuana Testing Facilities. No Medical Marijuana Testing Facility shall be owned by an entity under substantially common control, ownership, or management as a Medical Marijuana Cultivation Facility, Medical Marijuana-Infused Product Manufacturing Facility, or Medical Marijuana Dispensary Facility.

(5) The Department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.

(6) Within one hundred eighty days of the effective date of this section, the Department shall make available to the public license application forms and application instructions for Medical Marijuana Cultivation Facilities, Medical Marijuana Testing Facilities, Medical Marijuana Dispensary Facilities, and Medical Marijuana-Infused Products Manufacturing Facilities.

(7) Within one hundred eighty days of the effective date of this section, the Department shall make available to the public application forms and application instructions for Qualifying Patient Qualifying Patient cultivation, and Primary caregiver identification cards. Within two hundred ten days of the effective date of this section, the Department shall begin accepting applications for such identification cards.

(8) An entity may apply to the Department for and obtain one or more licenses to grow marijuana as a Medical Marijuana Cultivation Facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the Department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the Department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the Department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The Department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the Department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three Medical Marijuana Cultivation Facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the Department for and obtain one or more licenses to operate a Medical Marijuana Dispensary Facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The Department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the Department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five Medical Marijuana Dispensary Facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the Department for and obtain one or more licenses to operate a Medical Marijuana-Infused Products Manufacturing Facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The Department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the Department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three Medical Marijuana-Infused Products Manufacturing Facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may pre-file their application fee with the Department beginning 30 days after the effective date of this section.

(12) Except for good cause, a Qualifying Patient or his or her Primary caregiver may obtain an identification card from the Department to cultivate up to six flowering marijuana plants for the exclusive use of that Qualifying Patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The Department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The Department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single Qualifying Patient in a thirty day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a Qualifying Patient with written certification from two independent physicians that there are compelling reasons why the Qualifying Patient needs a greater amount than the limit established by the Department.

(14) The Department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty day supply of dried, unprocessed marijuana, or its equivalent. A Primary caregiver may possess a separate legal limit for each Qualifying Patient under their care and a separate legal limit for themselves if they are a Qualifying Patient.
Qualifying Patients cultivating marijuana for medical use may possess up to a ninety day supply, s iong as the supply remains on property under their control. Any such limit shall not apply to a Qualifying Patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor

to Department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The Department may restrict the aggregate number of licenses granted for Medical Marijuana Cultivation Facilities, provided, however, that the number may not be limited to fewer than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The Department may restrict the aggregate number of licenses granted for Marijuana-Infused Products Manufacturing Facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The Department may restrict the aggregate number of licenses granted for Medical Marijuana Dispensary Facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States Congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on the effective date of this section. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The Department shall begin accepting license and certification applications for Medical Marijuana Dispensary Facilities, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after the effective date of this section. Applications for licenses and certifications under this section shall be approved or denied by the Department no later than one hundred fifty days after their submission. If the Department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the Department to approve or deny the application.

(19) Qualifying Patients under this section shall obtain and annually renew an identification card or cards from the Department. The Department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Upon receiving an application for a Qualifying Patient identification card or Qualifying Patient cultivation identification card, the Department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the Department fails to deny and fails to issue a card to an eligible Qualifying Patient within thirty days, then their physician certification shall serve as their Qualifying Patient identification card or Qualifying Patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a Qualifying Patient identification card or Qualifying Patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain and annually renew an identification card from the Department. The Department shall charge a fee of twenty five dollars per year, with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a Primary caregiver identification card the Department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed Medical Marijuana Cultivation Facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a Medical Marijuana-Infused Products Manufacturing Facility.

(23) The denial of a license, license renewal, or identification card by the Department shall be appealable to the Administrative Hearing Commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the Department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the Department's obligations and activities under this section.

(25) The Department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any Qualifying Patients, or act to undermine the purposes of this section.

4. Taxation and Reporting

(1) A tax is levied upon the retail sale of marijuana for medical use sold at Medical Marijuana Dispensary Facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed Medical Marijuana Dispensary Facility and paid to the Department of Revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the Department of Revenue into the Missouri Veterans' Health and Care Fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri Veterans' Health and Care Fund," which shall consist of taxes and fees collected under this section. The State Treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The Commissioner of Administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the Department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the Department, an amount necessary for the Department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section:

(b) Next, the remainder of such funds shall be transferred to the Missouri Veterans Commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri Veterans Homes, the Missouri Service Officer's Program, and other services for veterans approved by the Commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri Veterans Commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the premises in a readily available format and be made available for review by the Department and the Department of Revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XVI, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.

5. Additional Patient, Physician, Caregiver and Provider Protections

(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the Department, and transportation of marijuana from a Medical Marijuana Dispensary Facility to the Qualifying Patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid Qualifying Patient identification card: a valid Qualifying Patient cultivation identification card; a valid physician certification while making application for an identification card: or a valid Primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a Qualifying Patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri State Board of Registration for the Healing Arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A Medical Marijuana Testing Facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by non-emancipated Qualifying Patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A Primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana Dispensary Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, Qualifying Patients, Primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by Qualifying Patients, Primary Caregivers, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities licensed or registered with the Department, or their employees or agents, as permitted by this section and in compliance with Department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by Qualifying Patients, Primary Caregivers, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by Qualifying Patients, Primary Caregivers, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.

6. Legislation

Nothing in this section shall limit the General Assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of Qualifying Patients to access marijuana for medical use as granted by this section.

7. Additional Provisions

(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence orprofessional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana: or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No Medical Marijuana Cultivation Facility, Medical Marijuana Testing Facility, Medical Marijuana Dispensary Facility, or Medical Marijuana-Infused Products Manufacturing Facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a

violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the Department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The Department may consult with and rely on the records, advice and recommendations of the Attorney General and the Department of Public Safety, or their successor entities, in applying this subdivision.

(3) All Medical Marijuana Cultivation Facility, Medical Marijuana Dispensary Facility, and Medical Marijuana-Infused Products Manufacturing Facility licenses, entities with Medical Marijuana Testing Facility certifications, and entities with transportation certifications shall be held by entities that are majority owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, entities outside the state of Missouri may own a minority stake in such entities.

(4) No Medical Marijuana Cultivation Facility, Medical Marijuana Dispensary Facility, or Medical Marijuana-Infused Products Manufacturing Facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional Department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, in a font size at least as large as the largest other font size used on the package, as containing "Marijuana," or a " Marijuana-Infused Product." Violation of this prohibition shall subject the violator to Department sanctions, including an administrative penalty.

(6) No individual shall serve as the Primary caregiver for more than three Qualifying Patients.

(7) No Qualifying Patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a Medical Marijuana-Infused Products Manufacturing Facility license. Violation of this prohibition shall subject the violator to Department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All Qualifying Patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the Qualifying Patient or by such patients Primary caregiver. Two Qualifying Patients, who both hold valid Qualifying Patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve Qualifying Patient or Primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a Primary caregiver also holds a Qualifying Patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No Medical Marijuana Cultivation Facility, Medical Marijuana Dispensary Facility, Medical Marijuana-Infused Products Manufacturing Facility, Medical Marijuana Testing Facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the Department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new Medical Marijuana Cultivation Facility, Medical Marijuana Testing Facility, Medical Marijuana Dispensary Facility, or Medical Marijuana-Infused Products Manufacturing Facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local government shall prohibit Medical Marijuana Cultivation Facilities, Medical Marijuana Testing Facilities, Medical Marijuana Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a Medical Marijuana Cultivation Facility, Medical Marijuana Testing Facility, Medical Marijuana-Infused Products Manufacturing Facility, Medical Marijuana Dispensary Facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. A Qualifying Patient must obtain a new physician certification at least annually.

(13) A physician shall not issue a certification for the medical use of marijuana for a non-emancipated Qualifying Patient under the age of eighteen without the written consent of the Qualifying Patient's parent or legal guardian. The Department shall not issue a Qualifying Patient identification card on behalf of a non-emancipated Qualifying Patient under the age of eighteen without the written consent of the Qualifying Patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a Primary caregiver for a non-emancipated Qualifying Patient under the age of eighteen. Only the Qualifying Patient's parent or guardian shall purchase or possess medical marijuana for a non-emancipated Qualifying Patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a non-emancipated Qualifying Patient under the age of eighteen

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for Qualifying Patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

8. Severability

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

9. Effective Date

The provisions of this section shall become effective on December 6, 2018.]

JOHN R. ASHCROFT

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Shetova Hayes regarding a proposed statutory amendment to Chapter 558 (2020-056)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Shetova Hayes on April 4, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

INITIATIVE PETITION

To the Honorable John Ashcroft, Secretary of State for the state of Missouri:

We, the undersigned, registered voters of the state of Missouri and _____ County (or city of St. Louis), respectfully order that the following proposed law shall be submitted to the voters of the state of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020, and each for himself or herself says: I have personally signed this petition; I am a registered voter of the state of Missouri and _____ County (or city of St. Louis), my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

RECEIVED

PROPOSED MEASURE

Be it enacted by the people of the state of Missouri:

Section 558.019, RSMo, subsection 3 would be repealed. In lieu of it a new subsection relating to prison commitment terms for first-time dangerous felony offenders and offenders with multiple convictions of dangerous felonies. The current law reads as follows (with the matter to be deleted in [brackets], and the new matter shown underlined):

558.019.1. This section shall not be construed to affect the powers of the governor under article IV, section 7, of the Missouri Constitution. This statute shall not affect those provisions of section 565.020, section 566.125, or section 571.015, which set minimum terms of sentences, or the provisions of section 559.115, relating to probation.

2. The provisions of subsections 2 to 5 of this section shall be applicable to all classes of felonies except those set forth in chapter 579, or in chapter 195 prior to January 1, 2017, and those otherwise excluded in subsection 1 of this section. For the purposes of this section, "prison commitment" means and is the receipt by the department of corrections of an offender after sentencing. For purposes of this section, prior prison commitments to the department of corrections shall not include an offender's first incarceration prior to release on probation under section 217.362 or 559.115. Other provisions of the law to the contrary notwithstanding, any offender who has been found guilty of a felony other than a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve the following minimum prison terms:

(1) If the offender has one previous prison commitment to the department of corrections for a felony offense, the minimum prison term which the offender must serve shall be forty percent of his or her sentence or until the offender attains seventy years of age, and has served at least thirty percent of the sentence imposed, whichever occurs first;

(2) If the offender has two previous prison commitments to the department of corrections for felonies unrelated to the present offense, the minimum prison term which the offender must serve shall be fifty percent of his or her sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first;

(3) If the offender has three or more previous prison commitments to the department of corrections for felonies unrelated to the present offense, the minimum prison term which the offender must serve shall be eighty percent of his or her sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.

[3. Other provisions of the law to the contrary notwithstanding, any offender who has been found guilty of a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve a minimum prison term of eighty-five percent of the sentence imposed by the court or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.]

3. Other provisions of the law to the contrary notwithstanding, any offender who has more than once been found guilty of a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve a minimum prison term of eighty-five percent of the sentence imposed by the court or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.:

(1) If the offender has one previous prison commitment to the department of corrections for a dangerous felony offense, the minimum prison term which the offender must serve shall be fifty percent of their sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first. If the offender has maintained the best possible institutional score for the year prior to their scheduled parole hearing date, then parole shall be granted. If parole is denied, a hearing shall be scheduled every two years until the offender is paroled. The first-time conviction exception of this subsection shall be applicable to all dangerous felonies occurring on or after August 28, 1994.

4. For the purpose of determining the minimum prison term to be served, the following calculations shall apply:

(1) A sentence of life shall be calculated to be thirty years;

(2) Any sentence either alone or in the aggregate with other consecutive sentences for offenses committed at or near the same time which is over seventy-five years shall be calculated to be seventy-five years.

5. For purposes of this section, the term "minimum prison term" shall mean time required to be served by the offender before he or she is eligible for parole, conditional release or other early release by the department of corrections.

6. (1) A sentencing advisory commission is hereby created to consist of eleven members. One member shall be appointed by the speaker of the house. One member shall be appointed by the president pro tem of the senate. One member shall be the director of the department of corrections. Six members shall be appointed by and serve at the pleasure of the governor from among the following: the public defender commission; private citizens; a private member of the Missouri Bar; the board of probation and parole; and a prosecutor. Two members shall be appointed by the Supreme Court, one from a metropolitan area and one from a rural area. All members shall be appointed to a four-year term. All members of the sentencing commission appointed prior to August 28, 1994, shall continue to serve on the sentencing advisory commission at the pleasure of the governor.

(2) The commission shall study sentencing practices in the circuit courts throughout the state for the purpose of determining whether and to what extent disparities exist among the various circuit courts with respect to the length of sentences imposed and the use of probation for offenders convicted of the same or similar offenses and with similar criminal histories. The commission shall also study and examine whether and to what extent sentencing disparity among economic and social classes exists in relation to the sentence of death and if so, the reasons therefor, if sentences are comparable to other states, if the length of the sentence is appropriate, and the rate of rehabilitation based on sentence. It shall compile statistics, examine cases, draw conclusions, and perform other duties relevant to the research and investigation of disparities in death penalty sentencing among economic and social classes.

(3) The commission shall study alternative sentences, prison work programs, work release, home-based incarceration, probation and parole options, and any other programs and report the feasibility of these options in Missouri.

(4) The governor shall select a chairperson who shall call meetings of the commission as required or permitted pursuant to the purpose of the sentencing commission.

(5) The members of the commission shall not receive compensation for their duties on the commission, but shall be reimbursed for actual and necessary expenses incurred in the performance of these duties and for which they are not reimbursed by reason of their other paid positions.

(6) The circuit and associate circuit courts of this state, the office of the state courts administrator, the department of public safety, and the department of corrections shall cooperate with the commission by providing information or access to information needed by the commission. The office of the state courts administrator will provide needed staffing resources.

7. Courts shall retain discretion to lower or exceed the sentence recommended by the commission as otherwise allowable by law, and to order restorative justice methods, when applicable.

8. If the imposition or execution of a sentence is suspended, the court may order any or all of the following restorative justice methods, or any other method that the court finds just or appropriate:

(1) Restitution to any victim or a statutorily created fund for costs incurred as a result of the offender's actions;

(2) Offender treatment programs;

(3) Mandatory community service;

(4) Work release programs in local facilities; and

(5) Community-based residential and nonresidential programs.

9. The provisions of this section shall apply only to offenses occurring on or after August 28, 2003.

10. Pursuant to subdivision (1) of subsection 8 of this section, the court may order the assessment and payment of a designated amount of restitution to a county law enforcement restitution fund established by the county commission pursuant to section 50.565. Such contribution shall not exceed three hundred dollars for any charged offense. Any restitution moneys deposited into the county law enforcement restitution fund pursuant to this section shall only be expended pursuant to the provisions of section 50.565.

11. A judge may order payment to a restitution fund only if such fund had been created by ordinance or resolution of a county of the state of Missouri prior to sentencing. A judge shall not have any direct supervisory authority or administrative control over any fund to which the judge is ordering a person to make payment.

12. A person who fails to make a payment to a county law enforcement restitution fund may not have his or her probation revoked solely for failing to make such payment unless the judge, after evidentiary hearing, makes a finding supported by a preponderance of the evidence that the person either willfully refused to make the payment or that the person willfully, intentionally, and purposefully failed to make sufficient bona fide efforts to acquire the resources to pay.

13. Nothing in this section shall be construed to allow the sentencing advisory commission to issue recommended sentences in specific cases pending in the courts of this state.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-056)

Subject

Initiative petition from Shetova Hayes regarding a proposed amendment to Chapter 558 of the Revised Statutes of Missouri. (Received April 4, 2019)

Date

April 24, 2019

Description

This proposal would amend Chapter 558 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated this initiative petition proposes changes in section 558.019, RSMo subsection 3 as follows:

Section 558.019 subsection 3, requiring a minimum prison term of eighty-five percent for a dangerous felony, is repealed to add the term, "*Any offender who has more than once been found guilty of a dangerous felony*" instead of "*Any offender who has been found guilty of a dangerous felony*." Thus, the requirement of completion of eighty five percent of prison term before attaining seventy years is amended to be applicable to offenders who are found more than once guilty of a dangerous felony under section 556.061.

Although section 558.019, subsection 3(1) sets the minimum prison term to fifty percent for offenders who have one previous prison commitment to the department of corrections for a dangerous felony, it is assumed that the intent of the legislation is to be that offenders

with no prior incarceration for a dangerous felony will serve a minimum prison term of 50%. The subsection also sets parole hearing guidelines for such offenders. The legislation will apply to offenders serving new sentences and to offenders incarcerated and serving a minimum prison term of 85%.

Calculating how long offenders will serve if the minimum prison term (MPT) is reduced to 50% is difficult because dangerous felonies are serious offenses and the parole board has historically required offenders to serve a significant portion of the sentence before parole. If the MPT is reduced to 50%, then the time served can be from 50% to the conditional release date. For most offenses the parole board's guideline time served is the best estimate, but for serious violent offenses the parole board has normally set release dates over guideline.

It is unknown how the Parole Board will determine the release dates for offenders serving dangerous felonies. Therefore, the fiscal impact to their department with the passage of this bill is an unknown savings.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would not have a fiscal impact on their office/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Section 558.019 by modifying minimum prison terms for offenders found guilty of a dangerous felony. Current law provides that offenders who have been found guilty of a dangerous

felony shall be required to serve a minimum prison term of 85% of the sentence or until the offender attains 70 years of age and has served at least 40% of the sentence imposed.

This proposal modifies current law to require that offenders who have been more than once found guilty of a dangerous felony shall be required to serve a minimum prison term of 85% of the sentence or until the offender attains 70 years of age and has served at least 40% of the sentence imposed. Offenders who have one previous prison commitment for a dangerous felony shall be required to serve a minimum prison term of 50% of the sentence or until the offender attains 70 years of age and has served at least 40% of the sentence imposed. A parole hearing for such offenders shall be scheduled every two years and parole shall be granted if the offender has maintained the best possible institutional score for the year prior to their parole hearing. The first-time conviction exception shall be applicable to dangerous felonies occurring on or after August 28, 1994.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there may be some impact on the courts but there is no way to quantify that currently.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated there is no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities estimate no additional costs, and possible savings of an unknown amount. Local governmental entities expect no costs or savings.

STATE AUDITORS OFFICE

RE: Petition approval request from Steven Reed regarding a proposed constitutional amendment to Article I (2020-055)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Steven Reed on April 3, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt
Sheri Hoffman
Trish Vincent

It is a class A misdemeanor punishable, notwithstanding the provisions of Section 560.021, RSMo, to the contrary, for a term of imprisonment not to exceed one year in the county jail or a fine not to exceed ten thousand dollars or both, for anyone to sign any initiative petition with any name other than his or her own, or knowingly to sign his or her name more than once for the same measure for the same election, or to sign a petition when such person knows he or she is not a registered voter.

INITIATIVE PETITION

To the Honorable John (Jay) Ashcroft, Secretary of State for the State of Missouri:

We, the undersigned, registered voters of the State of Missouri and _____County (or City of St. Louis), respectfully order that the following proposed amendment to the constitution shall be submitted to the voters of the State of Missouri, for their approval or rejection, at the general election to be held on the 3rd day of November, 2020 and each for himself or herself says: I have personally signed this petition; I am a registered voter of the State of Missouri and _____ County (or City of St. Louis); my registered voting address and the name of the city, town or village in which I live are correctly written after my name.

Be it resolved by the People of the State of Missouri that the Constitution be amended:

Section A. Article I, Constitution of Missouri, is amended by adding one new section, to be known as section 38, to read as follows:

Section 38. All areas of this state shall be exempted from the daylight saving time provisions of 15 U.S.C. Section 260a. Beginning on the first Sunday in March of 2021, the state and its political subdivisions and agencies shall switch clocks to daylight saving for the last time and the use of daylight saving time for public purposes will be eliminated. After this time, daylight saving time will no longer be recognized as the official time of this state.

FISCAL NOTE (20-055)

Subject

Initiative petition from Steven Reed regarding a proposed constitutional amendment to Article I. (Received April 4, 2019)

Date

April 24, 2019

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed petition.

Officials from the **Department of Elementary and Secondary Education** indicated this petition has no cost to their department.

Officials from the **Department of Higher Education** indicated no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated there is fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would not have a fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article I of the Constitution of Missouri by exempting Missouri from daylight saving time after the first Sunday in March of 2021. After this time, daylight saving time will no longer be recognized as the official time of the state.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment would have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see a particular fiscal impact of this petition on their school.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State and local governmental entities estimate no costs or savings from this proposal.

RE: Petition approval request from Christopher Pieper regarding a proposed constitutional amendment to Article VI (2020-054)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Christopher Pieper on March 25, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article VI of the Constitution is revised by repealing Sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 and adopting one new section to be known as Article VI, Section 30 to read as follows:

1. Definitions.

(1) When used in this section, the following terms shall have the following meanings:

(a) "Effective date of this section" shall mean January 1, 2021, which shall be the effective date of the enactment of section 30 of this article and the repeal of sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 of this article.

(b) "Financing obligation" means any bond, note, capital lease, or similar obligation of the metropolitan city, a municipality, a municipal district, or the St. Louis Municipal Corporation, as applicable, including any such obligations issued on behalf of any such entity and any such obligations issued to refinance or refund any such obligation.

(c) "General district service" shall mean any duty, service, or function of the metropolitan city, a county, or a city, now or in the future assigned by law, charter, or ordinance of the metropolitan city, including, without limitation: public health, safety, and general welfare; police, law enforcement, and municipal court; the licensing, taxing, and regulation of businesses, occupations, professions, activities, and things; transportation, infrastructure, and public works; and economic development.

(d) "Mayor" shall mean the mayor of the metropolitan city.

(e) "Metropolitan city" shall mean The Metropolitan City of St. Louis.

(f) "Municipal district" shall mean a municipal district of the metropolitan city, comprising the territory within the municipality immediately prior to the effective date of this section.

(g) "Municipal district service" shall mean any duty, service, or function of the municipality immediately prior to the effective date of this section or in the future assigned to the municipal district by law, charter, or ordinance of the metropolitan city, and which is not otherwise a general district service provided or secured by the metropolitan city within the territory of the municipal district, including, without limitation: fire protection, emergency medical, and related services; parks and recreation; proprietary and enterprise functions; facilities; and administration of the municipal district.

(h) "Municipality" shall mean any incorporated city, town, or village located wholly within the territory of the city of St. Louis or the county of St. Louis as of January 1, 2019, including the city of St. Louis.

(i) "Special district" shall mean, excluding school districts and fire protection districts, any political subdivision, municipal corporation, body corporate and politic, authority, metropolitan district, taxing district, taxing subdistrict, public corporation, or quasi-public corporation created pursuant to this constitution, law, charter, ordinance, or resolution, other than the county of St. Louis or a municipality, located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section.

(j) "This section" shall mean this article VI, section 30.

(k) "Transition mayor" shall mean the transition mayor of the metropolitan city.

(l) "Transition period" shall mean the period between the effective date of this section and January 1, 2023.

2. Metropolitan City.

(1)(a) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the territory of the county of St. Louis is extended to embrace the territory heretofore in the city of St. Louis and the county of St. Louis, and the county of St. Louis so expanded shall continue its corporate existence as a new political subdivision, body corporate and politic, and municipal corporation, which is hereby created, with its name "The Metropolitan City of St. Louis" and its seat of government within the territory heretofore in the city of St. Louis.

(b) All rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the county of St. Louis, including, without limitation, the payment of principal and interest on financing obligations, and any obligations related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, shall continue without impairment with the metropolitan city by operation of this section.

(2) The metropolitan city shall be a metropolitan city form of government, which is hereby created, and which shall possess all the powers and privileges of both a constitutional charter county and a constitutional charter city, including any city not within a county. The powers and privileges of the metropolitan city shall include, without limitation, all powers and privileges of the county of St. Louis and of any municipality immediately prior to the effective date of this section, and all powers and privileges now or in the future granted to the metropolitan city, to a county, or to a city under this constitution and the laws of this state. Such powers and privileges shall be cumulative and shall be construed broadly in favor of the metropolitan city.

(3) The metropolitan city shall be governed by a charter. Notwithstanding any provision of law or this constitution, the initial charter of the metropolitan city shall be the charter of the county of St. Louis as of January 1, 2019, except as otherwise provided in this section. The specific mention of or the failure to mention a particular power or privilege in the initial charter shall not limit in any way the powers and privileges granted herein to the metropolitan city. The initial charter shall be liberally construed to effectuate this section and in harmony therewith. The initial charter may be amended in the manner provided in this section and, following the transition period, in the manner provided by charter, provided that any amendment submitted to voters by ordinance of the metropolitan council shall require the affirmative vote of two-thirds of the qualified electors voting thereon.

(4)(a) Unless otherwise provided by charter following the transition period, there shall be no elective officers of the metropolitan city other than the mayor, the members of the metropolitan council, the assessor, and the prosecuting attorney. Elective officers shall be qualified voters of the metropolitan city and shall possess such additional qualifications provided by charter. Except as otherwise provided in this section, elective officers of the metropolitan city shall be nominated and elected in the manner provided in the election laws for state and county officers. No person duly serving in any office of the county of St. Louis or of any municipality immediately prior to the effective date of this section shall be disqualified from candidacy for elective office of the metropolitan city or of a municipal district, but shall forfeit such office upon assuming elective office of the metropolitan city or of a municipal district. A vacancy shall exist in an office of the metropolitan city in the event of death, resignation, or inability to serve of the person designated by this section to assume such office.

(b) The salary for members of the metropolitan council shall be as provided for members of the board of aldermen of the city of St. Louis immediately prior to the effective date of this section and as may be fixed by ordinance. The salary for all other elective officers of the metropolitan city shall be as provided for corresponding officers of the county of St. Louis immediately prior to the effective date of this section and as may be fixed by ordinance.

(5)(a) Except as otherwise provided in this section with respect to the transition period and as may be otherwise provided by charter following the transition period, the legislative power of the metropolitan city shall be vested in the metropolitan council and shall include the exercise of legislative power throughout the territory of the metropolitan city, including within the territory of any municipal district, pertaining to any and all duties, services, and functions now or in the future assigned to the metropolitan city, to a county, or to a city.

(b) The metropolitan council shall consist of thirty-three members, elected for terms of four years by the qualified voters of the districts in which they reside, except that members initially representing even-numbered districts shall be elected for terms of two years to provide for staggered terms. Members shall be elected at the general election in 2022, and so on at succeeding elections, and shall take office on January first following election. Notwithstanding the foregoing, the members of the county council of the county of St. Louis duly serving as of the effective date of this section shall be entitled to continue service as members of the county council of the county of St. Louis for the term of office for which they were elected or appointed and receive compensation therefor in the exercise of the duties specified in this section.

(c) Members of the metropolitan council shall be elected from districts established in the manner provided in this section.

(i) Before April 1, 2021, the mayor and transition mayor shall jointly appoint a member or members of the faculty, with relevant expertise and without partisan affiliation, of one or more universities located within the metropolitan city to prepare a plan to divide the metropolitan city into districts from which members of the metropolitan council shall be elected. The plan shall include a statement of the boundaries of the initial districts, together with a map of such districts. Districts shall contain as nearly equal population as practicable, shall be compact and contiguous, and shall comply with all requirements of the United States Constitution and federal laws, including, but not limited to, the Voting Rights Act of 1965, as amended. Such districts shall respect boundaries of municipal districts and communities of interest whenever practicable.

(ii) Before September 1, 2021, the plan shall be submitted for adoption, with or without amendment, by the county council of the county of St. Louis and the governing body of the municipal district within the territory heretofore in the city of St. Louis. If both shall fail to adopt identical plans with the characteristics required by this section, on or before December 31, 2021, the plan as submitted shall be deemed approved as of that date. Upon approval, the plan shall be filed with the official performing the duties of a county clerk and the office or officers charged with conducting elections in the metropolitan city and shall be deemed incorporated into the charter.

(iii) On or before December thirty-first of the year following a federal decennial census, beginning with the first federal decennial census following the transition period, the districts shall be reapportioned, if necessary, in the manner provided in the charter and with the characteristics provided in this section.

(d) At its first regular meeting following the transition period, and every two years thereafter, the members of the metropolitan council shall designate a president and vice-president, whose terms of office shall be for two years.

(e) Any vacancy in the metropolitan council shall be filled by appointment of the president of the metropolitan council. Any person appointed to fill such vacancy shall have the same qualifications otherwise established for the office and shall serve until a successor is duly serving following a special election for the unexpired or full term.

(6)(a) Except as otherwise provided in this section with respect to the transition period and as may be otherwise provided by charter following the transition period, all executive and administrative power of the metropolitan city shall be vested in the mayor, who shall be the chief executive officer of the metropolitan city and shall possess and exercise all the powers and duties of the chief executive officer of a county and of a city now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial mayor shall be the person duly serving as county executive of the county of St. Louis on the effective date of this section, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The mayor shall be elected at the general election in 2022, and every four years thereafter, and shall take office on January first following election. Except as otherwise provided in this section with respect to the transition period, a vacancy in the office of mayor shall be filled by the president of the metropolitan council, who shall possess and exercise the powers and duties of the office until a successor is serving following a special election for the unexpired or full term. While so holding the office of mayor, a temporary vacancy shall exist in the office of the president of the metropolitan council. The vice-president of the metropolitan council shall hold the office of president of the metropolitan council during any such vacancy, with the right of succession to the office of mayor. Notwithstanding the foregoing, the transition mayor shall possess and exercise the powers and duties of the office of mayor in the event of a vacancy in such office during the transition period. The vacancy in the office of transition mayor thereby created shall be filled by appointment of the transition mayor, now serving as mayor, from a list of no less than three qualified voters nominated by resolution of the county council of the county of St. Louis. If the county council of the county of St. Louis shall fail to submit such list within seven days of the vacancy, the office shall be filled by appointment of the transition mayor, now serving as the mayor.

(b) The mayor shall appoint no fewer than four deputy mayors, to serve at the pleasure of the mayor and with such duties as directed by ordinance or executive order, with respect to public health and safety; economic development and innovation; community development and housing; community engagement and equity; and as otherwise designated by charter.

(c) There shall be an assessor of the metropolitan city who shall possess and exercise all the powers and duties of a county assessor now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial assessor shall be the person duly serving as assessor of the county of St. Louis on the effective date of this section, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The assessor shall be elected at the general election in 2022, and every four years thereafter, and shall take office on January first following election. A vacancy in the office shall be filled by appointment of the mayor, and the person so appointed shall hold office until January first following the next general election at which a successor shall be elected for the unexpired or full term.

(d) There shall be a prosecuting attorney of the metropolitan city who shall possess and exercise all the powers and duties of a prosecuting attorney and the circuit attorney for the city of St. Louis now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial prosecuting attorney shall be the person duly serving as prosecuting attorney of the county of St. Louis on the effective date of this section, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The prosecuting attorney shall be elected at the general election in 2022, and every four years thereafter, and shall take office on January first following election. A vacancy in the office shall be filled by appointment of the mayor, and the person so appointed shall hold office until January first following the next general election at which a successor shall be elected for the unexpired or full term.

(e) There shall be a metropolitan city counselor appointed by the mayor, with such qualifications provided by charter, who shall serve as the metropolitan city's attorney and counselor at law and shall possess and exercise all the powers and duties of a county counselor and a city attorney now or in the future granted.

(f) Except as provided in this section, the metropolitan city shall have such departments and offices as established by the county of St. Louis as of the effective date of this section and as may be subsequently established by the metropolitan city. Except for the heads of a department appointed by the majority of the circuit judges as provided by charter, the heads of each department shall be appointed by the mayor and shall assume office upon appointment. Upon the effective date of this section, a board or commission of the county of St. Louis, and which is not the governing body of a special district, shall continue as a board or commission of the metropolitan city, until otherwise provided by charter or by ordinance of the metropolitan city, with the members duly serving holding office until a successor is duly appointed. The members of boards and commissions of the metropolitan city shall be appointed by the mayor, or otherwise as designated by charter, and shall exercise such duties and functions as assigned by law, charter, ordinance, or order.

(7)(a) During the transition period, all executive and administrative power of the metropolitan city shall be vested jointly in the mayor and transition mayor, who shall together constitute the chief executive officer of the metropolitan city and who shall jointly undertake or order the exercise or performance of any power, duty, or function necessary and proper to faithfully execute the orderly administration and implementation of this section. Notwithstanding any provision of law or this constitution, the transition mayor shall be the person serving as mayor of the city of St. Louis on the effective date of this section, who shall assume the office of transition mayor upon the effective date of this section and hold office until January 1, 2023. During the transition period, the transition mayor shall concurrently exercise the powers, privileges, duties, and functions of the chief executive officer of the governing body of the municipal district within the territory heretofore in the city of St. Louis. A vacancy in the office of transition mayor shall be filled by appointment of the mayor from a list of no less than three qualified voters nominated by resolution of the governing body of the municipal district within the territory heretofore in the city of St. Louis. If the governing body of the municipal district shall fail to submit such list within seven days of the vacancy, the office shall be filled by appointment of the mayor.

(b) Notwithstanding any provision of law or this constitution, to the extent an executive or administrative power, duty, or function is required to be exercised or performed by the metropolitan city during the transition period, such power, duty, or function may be exercised or

performed jointly by the mayor and transition mayor or, at their joint direction, by an official or employee of the metropolitan city or of a municipal district, but shall be deemed exercised or performed by the metropolitan city. Such powers, duties, and functions shall include, without limitation: (i) on or before February 1, 2021, establishing procedures related to the joint exercise and performance of the power, duties, and functions authorized by this section, including, without limitation, a procedure for the resolution of any nonconcurrence among the mayor and transition mayor; (ii) on or before April 1, 2021, making appointments to offices, departments, boards, and commissions, except for officers appointed by a majority of the circuit judges as provided in the charter, with such persons assuming office upon their appointment; (iii) ordering the metropolitan city provide or secure the provision of a general district service within the territory of a municipal district; (iv) administering the budget for each year of the transition period in the manner provided in this section; (v) transferring and assigning the functions and duties of personnel; (vi) entering into contracts and agreements; (vii) transferring and accepting the transfer of property; and (viii) executing any necessary documents or instruments related thereto on behalf of the metropolitan city. The mayor and transition mayor shall jointly undertake or order the exercise or performance of such powers, duties, or functions pursuant to executive order contemporaneously transmitted to the county council of the county of St. Louis and the governing body of each municipal district.

(c) During the transition period, the mayor and transition mayor shall jointly solicit public comment and, before November 15, 2022, shall jointly present to the public, at meetings called for such purpose, a plan to create, organize, and abolish executive and administrative departments, divisions, bureaus, commissions, boards, offices, and employments, and transfer the functions and duties thereof, as necessary and proper to effectuate this section and to ensure the proper and efficient administration of the affairs of the metropolitan city. The plan shall provide for the exercise of executive and administrative powers and duties of counties and county officers prescribed by this constitution and laws of the state and shall provide for the exercise of executive and administrative powers, privileges, duties, and functions of the metropolitan city prescribed in this section, including, without limitation, providing or securing the provision of general district services throughout the territory of the metropolitan city. On or after January 1, 2023, the plan shall be submitted to the metropolitan council and shall take effect within thirty days of submission, unless disapproved by resolution adopted by two-thirds of all members voting in the affirmative, provided that if the plan would affect the department of judicial administration, such plan shall not become effective unless upon the concurrence of a majority of the circuit judges within the metropolitan city. Upon taking effect, the plan shall take the place of and supersede charter provisions, ordinances, resolutions, rules, regulations, and orders inconsistent therewith.

(d) Notwithstanding any provision of law or this constitution, during the transition period, the county council of the county of St. Louis and the governing body of the municipal district located within the territory heretofore of the city of St. Louis, upon the joint recommendation of the mayor and transition mayor, shall adopt resolutions, ordinances, and orders consistent with this section and its orderly implementation and administration, with such resolutions, ordinances, and orders deemed as on behalf of the metropolitan city upon their adoption by both such bodies and the joint approval thereof by the mayor and transition mayor, and may continue to separately adopt resolutions, ordinances, and orders consistent with this section and its orderly implementation and administration applying to their respective territories.

(e) During the transition period, the governing body of a municipal district shall administer the affairs of the municipal district, provided that, unless upon the joint approval of the mayor and transition mayor, no municipal district shall incur any new obligation extending beyond the transition period with respect to the provision of general district services, other than with respect to the refunding of financing obligations, nor dispose of its property, except as required by contract.

(f) During the transition period, it shall be the affirmative duty of any official or employee of the metropolitan city, the county of St. Louis, or a municipal district to cooperate in the orderly administration and implementation of this section under the joint direction of the mayor and transition mayor and to refrain from any official action that would impair or frustrate its orderly administration and implementation.

(8) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the powers and duties of any county office of the city of St. Louis or the county of St. Louis shall be deemed exercised or performed on behalf of the metropolitan city. Except as otherwise provided in this section, on or before January 1, 2022, all property, contracts, records, and personnel related to any such county office shall be transferred to the corresponding office of the metropolitan city. Incumbents serving in such offices shall serve the remainder of the term for which they were elected or appointed, subject to any right of resignation, and shall receive compensation therefor in the performance of such duties directed by the metropolitan city.

(9) The entire territory of the metropolitan city shall be a general services district throughout which the metropolitan city shall provide or secure the provision of general district services, including within the territory of any municipal district. Notwithstanding the foregoing, a municipal district shall continue to provide or secure the provision of a general district service on behalf of the metropolitan city until provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city. Except as otherwise provided in this section and excluding any fund balance of a municipal district, any property, contracts, records, and personnel of a municipal district related to providing or securing a general district service shall be transferred to the metropolitan city upon the metropolitan city providing or securing the provision of a general district service within the territory of the municipal district.

(10)(a) The metropolitan city shall enforce its ordinances, resolutions, rules, regulations, and orders throughout its territory. Ordinances, resolutions, rules, regulations, and orders of the county of St. Louis in effect immediately prior to the effective date of this section shall remain effective as ordinances, resolutions, rules, regulations, and orders of the metropolitan city and shall be enforced by the metropolitan city until repealed, modified, or amended by the metropolitan city, except to the extent of any conflict with this section. Charter provisions, ordinances, resolutions, rules, regulations, and orders of any municipality in effect immediately prior to the effective date of this section shall become effective as ordinances, resolutions, rules, regulations, and orders of the metropolitan city as if enacted or promulgated by the metropolitan city and shall be enforced by the metropolitan city with respect to the territory to which they applied immediately prior to the effective date of this section until repealed, modified, or amended by the metropolitan city, except to the extent of any conflict with this section. Notwithstanding the foregoing, during the transition period, a municipal district may, under the direction of the metropolitan city, continue to enforce such ordinances, resolutions, rules, regulations, and orders within its territory, and such enforcement shall be deemed on behalf of

the metropolitan city. All ordinances, resolutions, rules, regulations, or orders of the metropolitan city shall be construed to effectuate this section.

(b) The metropolitan city counselor shall review all charter provisions, ordinances, resolutions, rules, regulations, and orders and shall solicit public comments related thereto. By no later than November 15, 2022, the metropolitan city counselor shall issue a report on such modifications and revisions necessary or advisable, including, without limitation, to resolve any conflicts whereby any rights, remedies, entitlements, or the enforcement thereof, cannot reasonably be reconciled. The metropolitan council may adopt the report by ordinance, and, upon adoption, the charter, ordinances, resolutions, rules, regulations, and orders in effect shall be deemed modified to reflect the report so adopted.

(11)(a) Upon the effective date of this section, the jurisdiction of the municipal court for the county of St. Louis shall be extended to the entire territory of the metropolitan city and shall constitute the municipal court for the metropolitan city. The municipal court shall have jurisdiction to hear and determine cases involving violations of ordinances in the manner provided by this constitution or by law, rule, charter, or ordinance. Notwithstanding the foregoing, during the transition period, a municipal court within the metropolitan city immediately prior to the effective date of this section may continue to operate as a division of the municipal court of the metropolitan city, with any act of such division deemed performed on behalf of the municipal court of the metropolitan city. On or before January 1, 2023, property, contracts, records, and personnel of any municipal court within the metropolitan city immediately prior to the effective date of this section shall be transferred to the municipal court of the metropolitan city.

(b) The metropolitan city may authorize the municipal court to operate within divisions and in such locations as are convenient to residents of the metropolitan city and which may correspond with the geographic boundaries of one or more municipal courts immediately prior to the effective date of this section. Except as otherwise provided in this section, the municipal court shall have such municipal judges, and the necessary non-judicial personnel assisting them, as provided by law and ordinance. Unless otherwise provided by ordinance of the metropolitan city respecting a municipal court, the mayor shall appoint, with advice and consent of the metropolitan council, the judges of the municipal court. The metropolitan city shall prescribe by ordinance the tenure and compensation of the judges of the municipal court. Municipal judges and necessary non-judicial personnel shall serve full-time, unless otherwise provided by charter of the metropolitan city, provided that the compensation for any full-time judge of the municipal court shall not exceed the compensation for an associate circuit judge.

(c) The clear proceeds of all penalties, forfeitures, and fines collected by the municipal court shall be distributed annually to the schools of the metropolitan city according to law.

3. Municipal Districts.

(1)(a) Upon the effective date of this section, a municipality shall continue its corporate existence as a municipal district, with its name the term "Municipal District" preceded by the name of the municipality, less any previous designation as to city, town, or village, unless otherwise designated by the municipal district or by law. A municipal district of the metropolitan city, which is hereby created, shall be a political subdivision, body corporate and politic, and municipal corporation, exercising and performing such powers, privileges, duties, and functions of the municipality necessary and proper: (i) to provide or secure the provision of a municipal district service not otherwise provided or secured within its territory; (ii) to provide or secure the provision of a general district service until provided or secured by the metropolitan

city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city; and (iii) for the satisfaction of outstanding obligations of any kind incurred by the municipality prior to the effective date of this section.

(b) All rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the municipality, including, without limitation, the payment of principal and interest on financing obligations and any obligation related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, and any sums required to be paid by the municipality pursuant to Chapter 86 of the revised statutes of Missouri, shall continue without impairment with the municipal district by operation of this section. Except as otherwise provided in this section, the municipal district and the territory therein shall continue to be held responsible for any such outstanding obligation to the same extent as the municipality immediately prior to the effective date of this section, and any tax, license, fee, or special assessment levied or imposed for the satisfaction of any outstanding obligation shall continue to be levied or imposed within its territory until such obligation is satisfied or the obligation terminates pursuant to the terms thereof. The municipal district may refinance or refund any outstanding financing obligation in the manner provided by law for the municipality. Any property or interest therein securing an outstanding financing obligation shall remain the property of the municipal district until such financing obligation is satisfied, unless otherwise provided pursuant to the terms thereof. Notwithstanding the foregoing, the metropolitan city may assume any outstanding obligation of the municipal district, provided that no such assumption shall impair any obligation of contract.

(2)(a) The governing body of a municipal district shall be the governing body of the municipality, exercising and performing such powers, privileges, duties, and functions of the governing body of the municipality necessary and proper to effectuate this section and for the proper and efficient administration of the municipal district, including, without limitation, serving the function of a planning commission and board of adjustment to the metropolitan city, in the manner authorized by the metropolitan city, with respect to zoning ordinances applicable to territory of the municipal district.

(b) Notwithstanding any provision of law or this constitution, the initial governing body shall consist of the members of the governing body of the municipality duly serving immediately prior to the effective date of this section, who shall assume office with the municipal district upon the effective date of this section and hold office until a successor is duly serving following election, beginning with the first general municipal election following the transition period.

(c) Upon the effective date of this section, a board or commission of the municipality, and which is not the governing body of a special district, shall continue as a board or commission of the municipal district, until otherwise provided by the municipal district, by the metropolitan city, or by law, with the members duly serving holding office until a successor is duly appointed in a manner consistent with that of the municipality or as provided by law.

(3) The boundaries of a municipal district shall not be altered except as approved by ordinance of the metropolitan city. Following the transition period, a municipal district may merge or consolidate with one or more municipal districts or may be dissolved as authorized by ordinance of the metropolitan city providing for the transfer of any rights, duties, personnel, property, contracts, assets, liabilities, and obligations and the procedure and effective date for such merger, consolidation, or dissolution. Such ordinance may provide for creation of a new

municipal district to assume the powers, privileges, duties, and functions of any municipal districts so subsumed.

4. The St. Louis Municipal Corporation.

(1)(a) On January 1, 2023, the municipal district within the territory heretofore in the city of St. Louis shall continue its corporate existence as a political subdivision and municipal corporation, with its name "The St. Louis Municipal Corporation." The St. Louis Municipal Corporation shall exercise and perform such powers, privileges, duties, and functions of the municipal district necessary and proper: (i) for the satisfaction of outstanding obligations of any kind of the municipal district; and (ii) to provide or secure the provision of a municipal district service not otherwise provided or secured within its territory, except as otherwise provided by ordinance of the metropolitan city.

(b) Except as otherwise provided in this section, all rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the municipal district within the territory heretofore in the city of St. Louis, including, without limitation, the payment of principal and interest on financing obligations, and any obligation related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, and any sums required to be paid by the municipality pursuant to Chapter 86 of the revised statutes of Missouri, shall continue without impairment with the St. Louis Municipal Corporation by operation of this section. Except as otherwise provided in this section, the St. Louis Municipal Corporation and the territory therein shall continue to be held responsible for any such outstanding obligation to the same extent as the municipal district within the territory heretofore in the city of St. Louis, and any tax, license, fee, or special assessment levied or imposed for the satisfaction of any outstanding obligation shall continue to be levied or imposed within its territory until such obligation is satisfied or the obligation terminates pursuant to the terms thereof. The St. Louis Municipal Corporation may refinance or refund any outstanding financing obligation in the manner provided by law for the municipality. Any property or interest therein securing any outstanding financing obligation shall remain the property of the St. Louis Municipal Corporation until such financing obligation is satisfied, unless otherwise provided pursuant to the terms thereof. Notwithstanding the foregoing, the metropolitan city may assume any outstanding obligation of the St. Louis Municipal Corporation, provided that no such assumption shall impair any obligation of contract.

(2) The governing body of the St. Louis Municipal Corporation shall be comprised of a board of directors of five qualified voters appointed by the transition mayor, with three directors appointed for terms of three years and two appointed for terms of two years. Such initial members shall assume office on January 1, 2023, and shall hold office until a successor is duly appointed by the mayor of the metropolitan city. Notwithstanding the foregoing, the members of the governing body of the municipal district shall serve the remainder of the term of office for which they were elected or appointed, subject to any right of resignation, and receive compensation therefor in the performance of such duties as directed by the governing body of the St. Louis Municipal Corporation.

(3)(a) As provided in this section for a municipal district, the territory of the St. Louis Municipal Corporation shall continue as a taxing subdistrict of the metropolitan city, and the St. Louis Municipal Corporation shall continue as a separate taxing district, provided that it may exercise only such taxing powers of the municipal district authorized for its exercise by

ordinance of the metropolitan city, except as otherwise provided in this section for the satisfaction of any outstanding obligation.

(b) The metropolitan city shall distribute funds to the St. Louis Municipal Corporation in the manner and for the purposes provided in this section with respect to a municipal district, including, without limitation, funds required to be paid to a retirement system pursuant to Chapter 86 of the revised statutes of Missouri, and may levy or impose a tax, license, fee, or special assessment solely within the territory of the St. Louis Municipal Corporation in the manner and for the purposes provided in this section with respect to a tax, license, fee, or special assessment of the metropolitan city levied or imposed solely within the territory of a municipal district.

(c) Unless otherwise provided by ordinance of the metropolitan city, the St. Louis Municipal Corporation shall be deemed a municipal district for purposes of determining the right to receive, and for the calculation and receipt of, distributions, allocations, remittances, and reimbursements of any kind from the state or United States government, or from any other agency, public or private.

5. Finances.

(1)(a) General district services and the satisfaction of outstanding obligations of any kind of the metropolitan city shall be financed with funds generated throughout the territory of the metropolitan city, including within the territory of any municipal district thereof, or otherwise secured by the metropolitan city. Municipal district services provided or secured by a municipal district within its territory and the satisfaction of outstanding obligations of any kind of a municipal district shall be financed with funds generated within the territory of the municipal district, or otherwise secured by the municipal district.

(b) Notwithstanding any provision of law or this constitution, the metropolitan city shall be empowered to take any and all actions necessary and proper to ensure the satisfaction of outstanding obligations incurred prior to the effective date of this section and to prevent any impairment thereof.

(2)(a) Except as otherwise provided in this section, the tax structure, tax rates, and level of services in effect immediately prior to the effective date of this section shall remain in effect until modified by the metropolitan city. Notwithstanding any provision of law or this constitution, in order to maintain the tax structure, tax rates, and level of services, all taxes, licenses, fees, and special assessments levied or imposed by the county of St. Louis or by a municipality shall continue as a tax, license, fee, or special assessment of the metropolitan city with respect to the territory to which the same applied immediately prior to the effective date of this section, until modified by the metropolitan city, but shall remain subject to any duty or requirement regarding the use of funds generated thereby and shall remain subject to any requirement imposed by law for voter approval of the continued levy or imposition of any such tax initially levied or imposed prior to the effective date of this section. Notwithstanding any provision of law or this constitution, the continuation of any such taxes, licenses, fees, and special assessments shall not be deemed an action by a political subdivision in levying, increasing, or broadening the base of an existing tax, license, or fee.

(b)(i) The metropolitan city shall distribute to the municipal district funds generated by any tax, license, fee, or special assessment of the metropolitan city initially levied by the municipality as required for the satisfaction of any outstanding obligation. If any outstanding obligation is subject to the appropriation of funds therefor, the governing body of the municipal district shall determine whether and to what extent funds shall be appropriated therefor.

(ii) Except as otherwise provided in this section, the metropolitan city shall distribute any remaining funds generated by any property tax or special assessment of the metropolitan city initially levied by the municipality to the municipal district for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(iii) Except as otherwise provided in this section, the metropolitan city shall, from any remaining funds generated by any sales or use tax of the metropolitan city initially levied or imposed by the municipality, distribute to the municipal district funds necessary for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(3) Each municipal district shall constitute a taxing subdistrict of the metropolitan city. Notwithstanding any provision of law or this constitution: (i) taxes, licenses, fees, or special assessments of the metropolitan city levied or imposed solely within the territory of a municipal district may be different than taxes, licenses, fees, or special assessments of the metropolitan city levied or imposed generally throughout its territory; (ii) the metropolitan city may levy or impose a tax, license, fee, or special assessment solely within the territory of a municipal district in order to ensure the satisfaction of any outstanding obligation, including, without limitation, financing obligations, incurred by the municipality prior to the effective date of this section; and (iii) the metropolitan city may levy or impose a tax, license, fee, or special assessment solely within the territory of a municipal district to provide or secure the provision of, or to increase the level of, any services provided or secured within the territory of the municipal district. Any such tax, license, fee, or special assessment levied or imposed shall be subject to voter approval to the extent required by this constitution for the municipality, and the metropolitan city may issue financing obligations for the purposes provided herein, subject to the requirements of this constitution for voter approval thereof.

(4)(a) In addition to constituting a taxing subdistrict of the metropolitan city, each municipal district shall be a separate taxing district with the taxing powers specified in this section and as may be provided by law. A municipal district may, in the manner and to the extent heretofore authorized for the municipality, exercise the following taxing powers for providing or securing the provision of municipal district services and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district: (i) continue to levy a property tax or special assessment previously levied by the municipality, or levy a property tax or special assessment, which new levy may be in addition to any such property tax or special assessment of the metropolitan city; and (ii) continue to levy a tax upon utilities previously levied by the municipality, or levy a tax upon utilities within the municipal district, which shall be in the place of any such tax upon utilities the metropolitan city is authorized to levy within the territory of the municipal district. The governing body of the municipal district shall set the rate of any property tax or special assessment levied by the municipal district in the manner provided by law and this constitution for the municipality.

(b) A municipal district may, in the manner and to the extent authorized for the municipality and as may be provided by law, charter, or ordinance of the metropolitan city,

continue to impose and collect licenses and fees previously imposed and collected by the municipality, or impose and collect licenses and fees for providing or securing the provision of municipal district services, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district.

(c) A municipal district may issue financing obligations for the foregoing purposes in the manner provided by law and this constitution for the municipality.

(d) The fiscal year of each municipal district shall be the same as the fiscal year for the metropolitan city. The governing body of a municipal district shall administer the revenues generated from taxes, licenses, fees, and special assessments, along with any funds otherwise secured by the municipal district in a manner consistent with that provided for the municipality and as may be provided by law, charter, or ordinance of the metropolitan city, pursuant to an annual budget adopted by the governing body, beginning with an annual budget for the fiscal year beginning January 1, 2023.

(e) Except as otherwise provided by law, charter, or ordinance of the metropolitan city, not later than ninety days prior to the first day of each fiscal year, beginning with the fiscal year beginning January 1, 2023, the governing body of a municipal district shall submit to the metropolitan city a true and accurate estimate of: (i) all outstanding obligations of any kind, including, without limitation, the principal, interest, and other amounts required to be paid on any financing obligations for the ensuing fiscal year; (ii) the expenditures necessary to provide or secure the provision of services for the ensuing fiscal year; and (iii) the funds, revenues, taxes, licenses, fees, and special assessments for such purposes for the ensuing fiscal year. Except as otherwise provided in this section with respect to the transition period and as may be otherwise provided by law, charter, or ordinance of the metropolitan city following the effective date of this section, the metropolitan city shall make distributions pursuant to this section in accordance with the estimate so certified by the municipal district.

(5)(a) The metropolitan city shall be entitled to receive all funds from the state or United States government, or from any other agency, public or private, to the extent and in the manner in which any county or city of the state is, or may in the future be, entitled to receive such funds. The metropolitan city shall be deemed both a city and a county for determining the right to receive funds from the state or United States government, or from any other agency, public or private.

(b) A municipal district shall be entitled to receive all funds from the state or United States government, or from any other agency, public or private, that are in furtherance of any power conferred upon a municipal district. A municipal district shall be deemed a political subdivision of the state and a municipal corporation for the purpose of determining the right to receive funds from the state or United States government, or from any other agency, public or private.

(c) Notwithstanding any provision of law or this constitution, all apportionments, distributions, allocations, remittances, and reimbursements of any kind from the state or United States government, or from any other agency, public or private, to counties, cities, towns, or villages that the county of St. Louis or any municipality was eligible to receive immediately prior to the effective date of this section, including, without limitation, the proceeds of taxes, licenses, and fees apportioned and distributed pursuant to this constitution or law, shall be calculated in the same manner as if the reorganization pursuant to this section had not occurred, but any such apportionments, distributions, allocations, remittances, and reimbursements shall be made to the

metropolitan city, which shall distribute to the municipal district such portion thereof required for the satisfaction of any outstanding obligation, or necessary for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district.

(6)(a) Notwithstanding any provision of law or this constitution, except as otherwise provided in this section, the budget of the metropolitan city and the municipal districts thereof for each year of the transition period shall be the combined adopted budgets for the county of St. Louis and for each municipality covering the twelve-month period beginning January 1, 2019, along with any supplemental or emergency appropriations, and any additional appropriations necessary for the satisfaction of any obligations of the county of St. Louis or any municipality adopted during the twelve-month period beginning January 1, 2020. Such budget shall be the complete financial plan for the metropolitan city and the municipal districts thereof for each year of the transition period. The amounts appropriated therein shall be deemed effective for each year of the transition period, and the taxes, licenses, fees, and special assessments levied and imposed in support thereof are hereby levied and imposed at the rates provided therein for each year of the transition period in order to create and provide new revenues in support of such appropriations. Notwithstanding any provision of law or this constitution, no adjustment to the rate of any levy therein shall be required during the transition period.

(b) The mayor and transition mayor shall jointly administer the budget for each year of the transition period. The mayor and transition mayor may jointly control the rate at which any appropriation is expended by allotment, may jointly reduce expenditures below appropriations, and may jointly transfer appropriations to ensure the proper and efficient administration of the metropolitan city and the municipal districts thereof during the transition period, provided that the mayor and transition mayor shall not reduce any appropriation for the payment of principal and interest on financing obligations. Notwithstanding any provision of law or this constitution, if jointly recommended by the mayor and transition mayor, the county council of the county of St. Louis and the governing body of the municipal district located within the territory heretofore in the city of St. Louis shall by ordinance make supplemental or emergency appropriations from available funds, and such ordinances shall be deemed on behalf of the metropolitan city upon their adoption by both such bodies and the joint approval thereof by the mayor and transition mayor.

(c) During the transition period, the metropolitan city shall distribute, to the municipal district, funds generated from any tax, license, fee, or special assessment of the metropolitan city initially levied by the municipality: (i) as required for the satisfaction of any outstanding obligation of the municipal district, including, without limitation, financing obligations of the municipality; (ii) as necessary for providing or securing the provision of municipal district services within its territory; and (iii) as necessary for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(7)(a) Not later than November 15, 2022, the mayor and transition mayor shall jointly recommend and publish a balanced budget for the metropolitan city, which shall provide a complete financial plan for the metropolitan city for the ensuing fiscal year and shall include proposed tax rates, all estimated income and revenue, all proposed expenditures, and such other matters as may be necessary or advisable.

(b) The metropolitan city shall set the rate of any property tax or special assessment of the metropolitan city, including any property tax or special assessment of the metropolitan city levied solely within the territory of a municipal district, in the manner provided in this constitution and by law, except that the rate of the property tax levy for general county purposes levied solely within the territory heretofore in the county of St. Louis shall be reduced, for each subclass of real property and for personal property, to yield revenues no greater than half of the amount of revenues generated by such levy during the prior fiscal year.

(c) On or after January 1, 2023, the budget may be adopted in the manner provided by charter and ordinance, except as otherwise provided in this section. The amounts appropriated and the taxes, licenses, fees, and special assessments levied or imposed in support thereof for the current fiscal year shall be deemed appropriated and levied or imposed for the ensuing fiscal year on a month-to-month basis, with all items prorated accordingly, until such time as the metropolitan council does adopt the budget. The mayor may object to one or more items or portions of items of appropriation, other than an appropriation for the payment of principal and interest on financing obligations, in any ordinance presented, and such items or portions of items shall not take effect unless separately reconsidered and adopted by the metropolitan council with two-thirds of all members voting in the affirmative, the objections of the mayor notwithstanding.

(d) Following adoption of the annual budget, the mayor may control the rate at which any appropriation is expended by allotment, may reduce expenditures below appropriations whenever the actual revenues are less than the revenues upon which the appropriations were based, and may transfer appropriations to ensure the proper and efficient administration of the metropolitan city, provided that the mayor shall not reduce any appropriation for the payment of principal and interest on financing obligations. If recommended by the mayor, the metropolitan council may by ordinance make supplemental or emergency appropriations from available funds during the fiscal year.

(8)(a) Not later than sixty days prior to each fiscal year, beginning with the fiscal year beginning January 1, 2024, the mayor shall recommend to the metropolitan council a balanced budget, which shall provide a complete financial plan for the metropolitan city for the ensuing fiscal year and shall include proposed tax rates, all estimated income and revenue, all proposed expenditures, and such other matters as may be necessary or advisable.

(b) The metropolitan city shall annually set the rate of any property tax or special assessment of the metropolitan city, including any property tax or special assessment of the metropolitan city levied solely within the territory of a municipal district, in the manner provided in this constitution and by law, except that the property tax levy of the metropolitan city for general county purposes levied solely within the territory heretofore in the county of St. Louis shall be levied throughout the territory of the metropolitan city, for each subclass of real property and for personal property, and shall be in place of the corresponding property tax levy of the metropolitan city for general county purposes levied solely within the territory heretofore in the city of St. Louis.

(c) The budget may be adopted in the manner provided by charter and ordinance, except as otherwise provided in this section. The amounts appropriated and the taxes, licenses, fees, and special assessments levied or imposed in support thereof for the current fiscal year shall be deemed appropriated and levied or imposed for the ensuing fiscal year on a month-to-month basis, with all items prorated accordingly, until such time as the metropolitan council does adopt the budget. The mayor may object to one or more items or portions of items of appropriation, other than an appropriation for the payment of principal and interest on financing obligations, in

any ordinance presented, and such items or portions of items shall not take effect unless separately reconsidered and adopted by the metropolitan council with two-thirds of all members voting in the affirmative, the objections of the mayor notwithstanding.

(d) Following adoption of the annual budget, the mayor may control the rate at which any appropriation is expended by allotment, may reduce expenditures below appropriations whenever the actual revenues are less than the revenues upon which the appropriations were based, and may transfer appropriations within any department of the budget to ensure the proper and efficient administration of the metropolitan city, provided that the mayor shall not reduce any appropriation for the payment of principal and interest on financing obligations. If recommended by the mayor, the metropolitan council may by ordinance make supplemental or emergency appropriations from available funds during the fiscal year.

6. The St. Louis Fire Protection District.

(1)(a) Notwithstanding any provision of law or this constitution, on January 1, 2023, there is hereby established a fire protection district, coextensive with the boundaries of the territory heretofore in the city of St. Louis, to exercise the powers, privileges, duties, and functions now vested or in the future granted to a fire protection district pursuant to chapter 321 of the revised statutes of Missouri, with its name "The St. Louis Fire Protection District." Such fire protection district shall be a political subdivision, municipal corporation, and a body corporate and politic, providing fire protection, emergency medical, and related services authorized by law for a fire protection district.

(b) The fire protection district shall be governed by a board of directors with the powers, privileges, duties, and functions now or in the future granted by law to such boards. The initial board shall be comprised of five qualified voters appointed by the transition mayor, with three directors appointed for terms of three years and two appointed for terms of two years. Thereafter, members shall be elected to terms as provided by law for a fire protection district and serve until successors are duly elected and qualified in the manner provided by law for a fire protection district.

(c) Except as otherwise provided in this section, any property, contracts, records, and personnel related to the provision of fire protection, emergency medical, and related services within the territory heretofore in the city of St. Louis shall be transferred to the fire protection district. Any employee so transferred who has completed the training and instruction requirements applicable within the territory of the city of St. Louis shall be deemed as having completed the training and instruction requirements applicable to the territory of the metropolitan city.

(2)(a) For the fiscal year beginning January 1, 2023, the board shall certify to the metropolitan city the amount necessary to be raised by taxation and, with other revenues, to support the fire protection district, and shall certify the rate of levy which, when levied upon taxable property within the district as shown by the last completed assessment, shall raise the amount of revenues necessary to be raised by taxation. During the fiscal year beginning January 1, 2023, the metropolitan city shall distribute to the fire protection district, from funds generated solely within the territory heretofore in the city of St. Louis, the amount of revenues necessary to be raised by taxation so certified by the board. In addition to such distribution, during such fiscal year, the metropolitan city may, by ordinance, make appropriations to the fire protection district from funds generated solely within the territory heretofore in the city of St. Louis.

(b) Notwithstanding any provision of law or this constitution, effective for the fiscal year beginning January 1, 2024, the board is hereby authorized to levy, on all taxable property within

the territory of the district, a tax sufficient to produce from all taxable property, exclusive of new construction and improvements, substantially the same amount of revenue certified by the board as necessary to be raised by taxation for the prior fiscal year, subject to voter approval as required by this constitution. Upon such levy, the metropolitan city shall adjust the rates of taxes, licenses, and fees levied or imposed by the metropolitan city within the fire protection district, other than a tax, license, or fee levied for the satisfaction of any outstanding financing obligation, so to reduce the revenues generated overall thereby by substantially the same amount of revenues generated by the levy of the fire protection district.

(c) For each year beginning on or after January 1, 2025, the board shall determine the amount necessary to be raised by taxation and, with other revenues, to support the fire protection district, and shall set the rate of tax on all taxable property within the territory of the district to raise the amount required, in the manner provided by law and this constitution for a fire protection district. The board may fix an additional rate and may levy an additional tax for the purposes and in the manner authorized by law for a fire protection district.

(d) Until such time as the board has levied a tax authorized herein, the metropolitan city shall distribute funds annually to the fire protection district in the manner provided herein for the fiscal year beginning January 1, 2023.

(3) The fire protection district may assume any outstanding obligations related to the services to be provided by the district within the territory heretofore in the city of St. Louis, including, without limitation, the payment of principal and interest on financing obligations, and any obligations related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, provided that no such assumption shall impair any obligation of contract. The board shall make provision for the payment of principal, interest, and other amounts required to be paid on any outstanding financing obligation so assumed by levy of a sufficient tax within the district in the manner authorized by law for a fire protection district.

7. Elections.

(1)(a) Following the effective date of this section, the general assembly shall provide by law for a board of election commissioners or other election authority to perform such duties and possess such powers as provided by law with respect to the conduct of elections within the metropolitan city. Until such time as the general assembly has provided for a board of election commissioners or other election authority, the respective boards of election commissioners shall cooperate in the performance of the duties provided by law for a board of election commissioners in the conduct of elections within the metropolitan city.

(b) Following the effective date of this section, the general assembly shall provide for party committees of the metropolitan city organized in the manner and to perform such duties provided by law for county party committees. Until such time as the general assembly has provided for such party committees, the respective party committees shall cooperate in the performance of duties provided by law for county party committees.

(2)(a) Notwithstanding any provision of law or this constitution, during the transition period, neither the metropolitan city nor any municipal district thereof shall have the power to submit any question to voters with respect to the continued levy or imposition of any tax initially levied or imposed by a municipality prior to the effective date of this section. Upon the failure to submit any question to voters with respect to the continued imposition or levy of any tax on earnings, such tax shall be reduced in the manner provided by law, and any tax on payroll expense initially levied or imposed by a municipality prior to the effective date of this section

shall be reduced by one-twentieth of one percent annually until such tax is eliminated. Notwithstanding any provision of law or this constitution and notwithstanding any reduction of such levies, the St. Louis Municipal Corporation shall satisfy any outstanding financing obligations from available revenues, and the metropolitan city shall distribute to the St. Louis Municipal Corporation, from revenues generated within the territory of the St. Louis Municipal Corporation, such revenues as may be required for the satisfaction of any such outstanding financing obligation.

(b) Notwithstanding any provision of law or this constitution, in the event of the death, resignation, or inability to serve of both persons designated by this section to serve in the offices of mayor and transition mayor prior to the effective date of this section, the prosecuting attorney of the metropolitan city and the assessor of the metropolitan city shall jointly possess and exercise the powers and duties of the office of mayor and transition mayor, and shall jointly act as the chief executive officer of the metropolitan city until such time as a mayor is elected by the qualified voters of the metropolitan city at the general municipal election in 2021 and has assumed office ten days thereafter. Notwithstanding any provision of this section, the mayor so elected shall constitute the chief executive officer of the metropolitan city and shall exercise and perform any power, duty, or function otherwise to be jointly exercised by the mayor and the transition mayor during the transition period and shall exercise and perform any power, duty, or function of mayor until January 1, 2023, when a successor elected at the general election in 2022 is duly serving. Except for the election of the mayor as provided in this paragraph, during the transition period, neither the metropolitan city nor any municipal district thereof shall have the power to call an election or to submit any question to voters with respect to any other office of the metropolitan city or of any municipal district.

(c) Nothing herein shall be construed to prevent a school district, fire protection district, or special district from submitting any question to voters, and the costs of submitting such shall be borne according to law.

8. Judicial Circuit Boundaries.

(1) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the judicial conference of the state of Missouri, as established by law, is hereby authorized to submit a circuit realignment plan, in the manner provided by section 478.073 of the revised statutes of Missouri, for the alteration of the geographical boundaries of the judicial circuits to create a single judicial circuit for the metropolitan city, provided that no judge shall be removed from office during his or her term by reason of any alteration of the geographical boundaries of any judicial circuit. Such plan shall become effective January first of the year following the session of the general assembly to which it is submitted, unless a bill providing such is presented to the governor and is duly enacted. Nothing herein shall be construed to prohibit the general assembly from providing by law for the alteration of the geographical boundaries of the judicial circuits as authorized by this constitution.

(2) Notwithstanding any provision of law or this constitution, the judges of the circuit courts for the city of St. Louis and for the county of St. Louis shall continue as judges of any judicial circuit for the metropolitan city, and the number of judges for any such circuit shall be the number authorized by law for both circuits as of the effective date of this section, unless subsequently modified in the manner provided by law.

(3) Whenever a vacancy shall occur in the office of circuit judge or associate circuit judge of a circuit court within the metropolitan city, the vacancy shall be filled in the manner provided by article V, sections 25(a)-(g) of this constitution.

9. Special Districts.

(1)(a) Notwithstanding any provision of law or this constitution, upon the effective date of this section, all special districts and any provisions of this constitution or the laws of this state pertaining thereto, shall continue unaffected, and all special districts shall continue to exercise all powers, privileges, duties, and functions authorized as of the effective date of this section, except that any power to appoint, nominate, or recommend an appointment to the governing body of a special district possessed by any official of the county of St. Louis or of a municipality immediately prior to the effective date of this section shall be exercised by the mayor, and any other power related to a special district possessed by the county of St. Louis or by a municipality immediately prior to the effective date of this section shall be exercised by the metropolitan city, unless otherwise provided by law or pursuant thereto following the effective date of this section.

(b) Nothing herein shall be construed to prohibit the general assembly from providing by law for the consolidation of special districts made duplicative by the adoption of this section, provided that no such consolidation shall impair any obligation of contract.

10. School Districts and Fire Protection Districts.

(1) Notwithstanding any provision of law or this constitution, nothing herein shall be construed as affecting any school district or school, or any provisions of this constitution or the laws of this state pertaining thereto, and such laws and constitutional provisions shall continue in operation with respect to such school district or school, as if the reorganization adopted pursuant to this section had not occurred, including, without limitation, any law that constitutes the territorial boundaries of any school district based on the territorial boundaries of any municipality.

(2) Notwithstanding any provision of law or this constitution, nothing herein shall be construed as affecting any fire protection district located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section, or any provisions of this constitution or the laws of this state pertaining thereto, and such laws and constitutional provisions shall continue in operation with respect to such fire protection district, as if the reorganization adopted pursuant to this section had not occurred.

11. General Provisions.

(1)(a) Nothing in this section shall be construed to impair any obligation of contract, and the provisions of this section shall be administered so as to preserve and protect any vested rights therein. Any conflict in the provisions of contracts, bonds, franchises, deeds, obligations, and instruments shall be resolved in a manner that shall protect and preserve any vested rights and shall not impair the rights of any parties thereto.

(b) No action shall be taken to impair any contract with or any claim in favor of or against the county of St. Louis or any municipality in existence immediately prior to the effective date of this section or to impair or affect the validity of any outstanding obligation of any kind incurred prior to the effective date of this section.

(c) All actions, causes of action, rights, duties, titles, claims, debts, judgments, recognizances, fines, penalties, forfeitures, and obligations of any kind in favor of or against the county of St. Louis or any municipality as of the effective date of this section shall continue in full force and effect in favor of or against the metropolitan city or a municipal district, as the case may be.

(d) Except as otherwise provided in this section, all matters pending before or under consideration by the county of St. Louis or any municipality immediately prior to the effective

date of this section may be acted upon and disposed of as if originated, initiated, or introduced with the metropolitan city or a municipal district, as the case may be.

(e) Notwithstanding any provision of law or this constitution, if the requisite vote of the electors of the county of St. Louis or of any municipality shall have occurred with respect to the issuance of financing obligations prior to the effective date of this section, the metropolitan city or a municipal district, as the case may be, shall have the right to take any and all steps necessary to issue the same, with the same effect as if such actions had been taken by the metropolitan city or a municipal district and as if the vote had been of the requisite vote of the electors of the metropolitan city or the municipal district, as the case may be.

(2)(a) Any employee transferred to the metropolitan city pursuant to this section shall be entitled to continue in service with the metropolitan city, with seniority, rank, compensation, and accrued benefits intact, until otherwise provided by ordinance or order of the metropolitan city. Any rights, protections, and privileges attributed to any such employee by a civil service or similar system shall continue unimpaired with respect to any such employee in a corresponding civil service or similar system of the metropolitan city. Notwithstanding any other provision of this subsection or law, any employee transferred to the metropolitan city pursuant to this section who was serving as chief, director, commissioner, or similar rank or position as the head of a department or office of a municipality, or any employee who was serving as assistant chief, deputy director, or similar rank or position immediately subordinate to the head of such department or office, shall be entitled to continue in service with the metropolitan city as provided in this subsection, but shall not be entitled to the rank or position as the head of a department or office of the metropolitan city or the immediate subordinate to the head of a department or office of the metropolitan city.

(b) Any employee transferred to the St. Louis Fire Protection District pursuant to this section shall be entitled to continue in service with the St. Louis Fire Protection District, with seniority, rank, compensation, and accrued benefits intact, until otherwise provided by the St. Louis Fire Protection District. Any rights, protections, and privileges attributed to any such employee by a civil service or similar system shall continue unimpaired with respect to any such employee in a corresponding civil service or similar system of the St. Louis Fire Protection District.

(c) Unless otherwise provided by ordinance of the metropolitan city following the transition period, any employee of the metropolitan city previously employed by the county of St. Louis or any municipality, other than the city of St. Louis, who is not a resident of the territory heretofore within the city of St. Louis and who became an employee of the metropolitan city as a result of the adoption of this section, shall be entitled to receive annually from the metropolitan city a refundable tax credit in an amount equal to the amount of taxation collected by the metropolitan city upon the earnings of such employee.

(3)(a) All collective bargaining agreements under negotiation or in existence with the county of St. Louis or any municipality immediately prior to the effective date of this section shall, if being negotiated, continue to be negotiated and, if in existence, continue in effect until the expiration of the terms of such agreements, at which time new agreements shall be negotiated with the metropolitan city, municipal district, or the St. Louis Fire Protection District, as the case may be; provided that, upon the metropolitan city assuming the provision of a general district service, the metropolitan city shall be the sole successor to any existing collective bargaining agreement in effect immediately prior to the effective date of this section between a recognized or certified majority collective bargaining representative and the county of St. Louis or the city

of St. Louis related to such general district service. The metropolitan city shall continue to recognize and bargain in good faith with such collective bargaining representatives and shall abide by the terms of any collective bargaining agreement then in effect.

(b) Should the adoption of this section result in the merger of one or more collective bargaining units with another such unit represented by recognized or certified collective bargaining representatives, any disputes concerning such merger with respect to collective bargaining agreements with the city of St. Louis or the county of St. Louis relating to the provision of a general district service assumed by the metropolitan city, including the status of a representative or conflicts between agreements, that cannot be resolved through negotiations shall be submitted to interest arbitration, which shall bind all required parties and which shall be conducted by an experienced labor interest arbitrator mutually selected by the metropolitan city and the affected collective bargaining representatives.

(c) Nothing herein shall be construed to affect, limit, or impair the rights of employees to organize and bargain collectively as provided in article I, section 29 of this constitution, and the provisions of this section shall be construed in harmony therewith.

(4)(a) Nothing herein shall deprive any person of any vested, non-forfeitable, and contractual right or privilege to retire or to retirement or pension benefits, including, without limitation, disability and death benefits, if any, earned prior to the effective date of this section in any retirement fund or pension system related to employment with the county of St. Louis or a municipality, including, without limitation, any retirement system created pursuant to Chapter 86 of the revised statutes of Missouri. All vested, non-forfeitable, and contractual rights, protections, and privileges of employees, eligible dependents, and beneficiaries in any retirement fund or pension system related to employment with the county of St. Louis or a municipality as of the effective date of this section, including, without limitation, any retirement system created pursuant to Chapter 86 of the revised statutes of Missouri, shall continue unimpaired until all benefits due such employees, eligible dependents, and beneficiaries have been paid.

(b) Employee members of a retirement fund or pension system, including, without limitation, any retirement system created pursuant to Chapter 86 of the revised statutes of Missouri, who are transferred to the metropolitan city or to the St. Louis Fire Protection District pursuant to this section shall remain members of and continue to earn service credit toward the benefits of such retirement fund or pension system, including, without limitation, disability and death benefits, during their employment with the metropolitan city. The metropolitan city or the St. Louis Fire Protection District, as the case may be, shall contribute proportionately to any such retirement fund or pension system for each such employee member with respect to their employment with the metropolitan city or the St. Louis Fire Protection District as required by law or ordinance, but any contribution or portion thereof attributed to benefits accrued prior to the transfer of such employee to the metropolitan city or to the St. Louis Fire Protection District shall remain an outstanding obligation satisfied solely from funds generated within the territory in which such obligation was incurred as provided in this section, provided that the St. Louis Fire Protection District may assume any such obligation for employees transferred to the district as provided in this section. The metropolitan city, municipal districts, and the St. Louis Municipal Corporation may purchase from an insurance company in accordance with federal fiduciary standards under the Employment Retirement Income Security Act of 1974 or its successor laws, annuities to provide for such retirement or pension benefits as necessary.

(c) Notwithstanding any provision of law or this constitution, the members of the board of trustees or similar governing body for any retirement fund or pension system created prior to

the effective date of this section shall continue to hold office until a successor is appointed and serving. The successor for such members who are office holders of a municipality shall be the assessor of the metropolitan city, and the successor for such members who were required to be appointed by any official of a municipality prior to the effective date of this section shall be appointed by the mayor.

(d) Nothing herein shall be construed to prohibit the general assembly from providing by law for the modification of any pension or retirement system created pursuant to state law, including, without limitation, any retirement system created pursuant to Chapter 86 of the revised statutes of Missouri, or to prohibit the metropolitan city from providing by charter or ordinance for the modification of any pension or retirement system created by charter or ordinance of a municipality or the county of St. Louis prior to the effective date of this section.

(5) Notwithstanding any provision of law or this constitution, a geographic or other designation in law or this constitution based upon the territorial boundaries of the county of St. Louis or of any municipality may continue to be construed as the territorial boundaries of the county of St. Louis or the municipality, as the case may be, as such boundaries existed immediately prior to the effective date of this section.

(6) Notwithstanding any provision of law or this constitution, any city, town, or village located partially but not wholly within the territory of the metropolitan city shall remain unaffected by this section, except that its territory located within the metropolitan city shall be detached and annexed to the metropolitan city upon the effective date of this section. The metropolitan city shall distribute annually to such city, town, or village, funds in an amount equal to the revenues generated within the former territory of such city, town, or village and that would have otherwise been received if the reorganization adopted pursuant to this section had not occurred, until otherwise provided by law. Notwithstanding any provision of law or this constitution, any municipal district with territory outside of the metropolitan city may continue providing or securing the provision of municipal district services within such territory, and the metropolitan city may provide or secure the provision of general district services within such territory, until otherwise provided by law.

(7) Notwithstanding any provision of this section, any charter provision in effect immediately prior to the effective date of this section requiring a public vote related to the sale, lease, or disposition of any real estate designated as a public park shall continue to apply to the territory to which it applied immediately prior to the effective date of this section, until amended in the manner provided in this section for amending the charter of the metropolitan city.

(8) The general assembly may enact such laws as may be necessary and proper to aid in effectuating this section and may regulate the metropolitan city to the same extent and in the same manner as a constitutional charter county or a constitutional charter city.

12. Severability.

(1) The provisions of this section are severable, and if any portion, subsection, sentence, clause, or phrase of this section, or an application thereof to any person or circumstance, is held to be invalid, the remaining portions, subsections, sentences, clauses and phrases, and the application of the section and its provisions to other persons and circumstances, shall not be affected, but shall remain in full force and effect.

[Section 30(a). The people of the city of St. Louis and the people of the county of St. Louis shall have power (1) to consolidate the territories and governments of the city and county into one political subdivision under the municipal government of the city of St. Louis; or, (2) to extend

the territorial boundaries of the county so as to embrace the territory within the city and to reorganize and consolidate the county governments of the city and county, and adjust their relations as thus united, and thereafter the city may extend its limits in the manner provided by law for other cities; or, (3) to enlarge the present or future limits of the city by annexing thereto part of the territory of the county, and to confer upon the city exclusive jurisdiction of the territory so annexed to the city; or, (4) to establish a metropolitan district or districts for the functional administration of services common to the area included therein; or, (5) to formulate and adopt any other plan for the partial or complete government of all or any part of the city and the county. The power so given shall be exercised by the vote of the people of the city and county upon a plan prepared by a board of freeholders consisting of nineteen members, nine of whom shall be electors of the city and nine electors of the county and one an elector of some other county. Upon the filing with the officials in general charge of elections in the city of a petition proposing the exercise of the powers hereby granted, signed by registered voters of the city in such number as shall equal three percent of the total vote cast in the city at the last general election for governor, and the certification thereof by the election officials to the mayor, and to the governor, then, within ten days after the certification the mayor shall, with the approval of a majority of the board of aldermen, appoint the city's nine members of the board, not more than five of whom shall be members of or affiliated with the same political party. Each member so appointed shall be given a certificate certifying his appointment signed by the mayor and attested by the seal of the city. Upon the filing with the officials in general charge of elections in the county of a similar petition signed by registered voters of the county, in such number as shall equal three percent of the total vote cast in the county at the last general election for governor, and the certification thereof by the county election officials to the county supervisor of the county and to the governor, within ten days after the certification, the county supervisor shall, with the approval of a majority of the county council, appoint the county's nine members of the board, not more than five of whom shall be members of or affiliated with the same political party. Each member so appointed shall be given a certificate of his appointment signed by the county supervisor and attested by the seal of the county.]

[Section 30(b). Upon certification of the filing of such similar petitions by the officials in general charge of elections of the city and the county, the governor shall appoint one member of the board who shall be a resident of the state, but shall not reside in either the city or the county, who shall be given a certificate of his appointment signed by the governor and attested by the seal of the state. The freeholders of the city and county shall fix reasonable compensation and expenses for the freeholder appointed by the governor and the cost shall be paid equally by the city and county. The appointment of the board shall be completed within thirty days after the certification of the filing of the petition, and at ten o'clock on the second Monday after their appointment the members of the board shall meet in the chamber of the board of aldermen in the city hall of the city and shall proceed with the discharge of their duties, and shall meet at such other times and places as shall be agreed upon. On the death, resignation or inability of any member of the board to serve, the appointing authority shall select the successor. The board shall prepare and propose a plan for the execution of the powers herein granted and for the adjustment of all matters and issues arising thereunder. The members of the board shall receive no compensation for their services as members, but the necessary expenses of the board shall be paid one-half by the county and one-half by the city on vouchers signed by the chairman of the board. The plan shall be signed in duplicate by the board or a majority thereof, and one copy shall be returned to the

officials having general charge of elections in the city, and the other to such officials in the county, within one year after the appointment of the board. Said election officials shall cause separate elections to be held in the city and county, on the day fixed by the freeholders, at which the plan shall be submitted to the qualified voters of the city and county separately. The elections shall not be less than ninety days after the filing of the plan with said officials, and not on or within seventy days of any state or county primary or general election day in the city or county. The plan shall provide for the assessment and taxation of real estate in accordance with the use to which it is being put at the time of the assessment, whether agricultural, industrial or other use, giving due regard to the other provisions of this constitution. If a majority of the qualified electors of the city voting thereon, and a majority of the qualified electors of the county voting thereon at the separate elections shall vote for the plan, then, at such time as shall be prescribed therein, the same shall become the organic law of the territory therein defined, and shall take the place of and supersede all laws, charter provisions and ordinances inconsistent therewith relating to said territory. If the plan be adopted, copies thereof, certified to by said election officials of the city and county, shall be deposited in the office of the secretary of state and recorded in the office of the recorder of deeds for the city, and in the office of the recorder of deeds of the present county, and the courts of this state shall take judicial notice thereof.]

[Section 31. The city of St. Louis, as now existing, is recognized both as a city and as a county unless otherwise changed in accordance with the provisions of this constitution. As a city it shall continue for city purposes with its present charter, subject to changes and amendments provided by the constitution or by law, and with the powers, organization, rights and privileges permitted by this constitution or by law. As a county, it shall not be required to adopt a county charter but may, except for the office of circuit attorney, amend or revise its present charter to provide for the number, kinds, manner of selection, terms of office and salaries of its county officers, and for the exercise of all powers and duties of counties and county officers prescribed by the constitution and laws of the state.]

[Section 32(a). The charter of the city of St. Louis now existing, or as hereafter amended or revised, may be amended or revised for city or county purposes from time to time by proposals therefor submitted by the lawmaking body of the city to the qualified voters thereof, at a general or special election held at least sixty days after the publication of such proposals, and accepted by three-fifths of the qualified electors voting for or against each of said amendments or revisions so submitted.]

[Section 32(b). In the event of any amendment or revision of the charter of the city of St. Louis which shall reorganize any county office and/or transfer any or all of the duties, powers and functions of any county officer who is then in office, the officer shall serve out the remainder of his or her term, and the amendment or revision of the charter of the city of St. Louis shall take effect, as to such office, upon the expiration of the term of such office holder. In the event of any amendment or revision of the charter of the city of St. Louis which shall reorganize any county office and/or transfer any or all of the duties, powers and functions of any county officer, all of the staff of such office shall be afforded the opportunity to become employees of the city of St. Louis with their individual seniority and compensation unaffected and on such other comparable terms and conditions as may be fair and equitable.]

[Section 32(c). An amendment or revision adopted pursuant to section 32(a) of this article shall not deprive any person of any right or privilege to retire and to retirement benefits, if any, to which he or she was entitled immediately prior to the effective date of that amendment or revision.]

[Section 33. Copies of any new or revised charter of the city of St. Louis or of any amendments to the present, or to any new or revised charter, with a certificate thereto appended, signed by the chief executive and authenticated by the seal of the city, setting forth the submission to and ratification thereof, by the qualified voters of the city shall be made in duplicate, one of which shall be deposited in the office of the secretary of state, and the other, after being recorded in the office of the recorder of deeds of the city, shall be deposited among the archives of the city, and thereafter all courts of this state shall take judicial notice thereof.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-054)

Subject

Initiative petition from Christopher Pieper regarding a proposed constitutional amendment to Article VI. (Received March 26, 2019)

Date

April 15, 2019

Description

This proposal would amend Article VI of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue**, the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, State Tax Commission, The Metropolitan Police Department - City of St. Louis, St. Louis County Board of Elections, Board of Election Commissioners City of St. Louis, Metropolitan Zoological Park and Museum District, Missouri Municipal League, Municipal League of Metro St. Louis,** the **City of Affton,** the **City of Ballwin,** the **City of**

Bellefontaine Neighbors, the **City of Berkeley,** the **City of Brentwood,** the **City of Bridgeton,** the **City of Chesterfield,** the **City of Clayton,** the **City of Crestwood,** the **City of Creve Coeur,** the **City of Des Peres,** the **City of Eureka,** the **City of Ferguson,** the **City of Florissant,** the **City of Hazelwood,** the **City of Jennings,** the **City of Kirkwood,** the **City of Manchester,** the **City of Maryland Heights,** the **City of Overland,** the **City of Pacific,** the **City of Richmond Heights,** the **City of St. Ann,** the **City of Town and Country,** the **City of University City,** the **City of Webster Groves,** and the **City of Wildwood.**

Matthew A. Jacober, Partner with Lathrop Gage LLP provided information to the State Auditor's office.

Christopher R. Pieper on behalf of Unite STL provided information as a proponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact to their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated there is no impact to their department in regards to this initiative petition.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition is not anticipated to have a fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article VI of the Missouri Constitution by repealing Sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 and adopting a new Section 30 which would merge St. Louis City and St. Louis County into one Metropolitan City.

Article VI, Section 30.4(3)(b)
This section would allow the metropolitan city to levy a tax, license, fee, or special assessment solely within the St. Louis Municipal Corporation. Budget and Planning (B&P) notes that if a sales tax is levied, General Revenue could be increased through the 1% Department of Revenue collection fee.

Article VI, Section 30.5(2)(a)
This section clarifies that any taxing structure and tax rate in effect immediately prior to the effective date of this section (January 1, 2021) shall remain in effect until modified by the metropolitan city. In addition, all taxes, fees, and special assessments levied or imposed by St. Louis County or a municipality shall continue as a tax, fee, or special assessment. Therefore, B&P estimates that this provision will not impact state or local revenues.

Article VI, Section 30.5(3)
This section would allow the metropolitan city to levy a tax, license, fee, or special assessment solely within the territory of a municipal district upon voter approval. B&P notes that if a sales tax is levied, General Revenue could be increased through the 1% Department of Revenue collection fee.

Article VI, Section 30.5(7)(b)
This section states that the rate of property tax levied for general county purposes within St. Louis County shall be reduced to yield revenues no greater than half of the amount generated during the prior fiscal year. B&P notes that it is unclear whether this reduction would occur once or every year until the property tax in St. Louis County was abolished. B&P further notes that it is unclear in what tax year the reduction would begin. Section 30 would be enacted January 1, 2021; however, Section 30.5(7)(a) references November 15, 2022 and Section 30.5(7)(c) references January 1, 2023. Therefore, B&P cannot determine whether the property tax reduction would begin January 1, 2021, January 1, 2022, or January 1, 2023. B&P notes that abolishing the property tax for St. Louis County could have a significant negative impact on the revenues available for the newly created metropolitan city.

Section 30.5(7)(b) would only impact the property tax rate and not the assessed valuations of property; therefore, B&P estimates that the Blind Pension Trust Fund (which receives $0.03 per $100 of assessed valuation) will not be impacted.

Article VI, Section 30.5(8)(b)
This section would apply the lowered property tax rate (Section 30.5(7)(b)) of St. Louis County to all property located within St. Louis City. B&P notes that the property tax reduction language in Section 30.5(7)(b) is unclear as to how many reductions should occur. If the property tax rate under Section 30.5(7)(b) is to be decreased until no such property tax exists, then the property tax rate under this section will also decrease until no such tax is levied. B&P notes that this could have a significant negative impact on the revenues available for the newly created metropolitan city. B&P further notes that it is unclear in what tax year the new property tax would begin. Section 30 would be enacted January 1, 2021; however, Section 30.5(8)(a) references January 1, 2024. Therefore, B&P cannot determine whether the property tax reduction would begin January 1, 2021, January 1, 2024, or at the same time as the rate reduction in Section 30.5(7)(b).

Section 30.5(8)(b) would only impact the property tax rate and not the assessed valuations of property; therefore, B&P estimates that the Blind Pension Trust Fund (which receives $0.03 per $100 of assessed valuation) will not be impacted.

Article VI, Section 30.6(2)
Beginning January 1, 2023 Section 30.6(2)(a) allows the metropolitan city to levy a property tax to support the newly created fire protection district.

Beginning January 1, 2024 Section 30.6(2)(b) requires the metropolitan city to lower the rates of other taxes, licenses, and fees levied within the fire protection district to offset the

amount of revenue generated from the property tax created in Section 30.6(2)(a). B&P notes that if sales taxes are reduced as part of this adjustment, General Revenue could be reduced through the 1% Department of Revenue collection fee.

This section would allow the metropolitan city to levy an additional tax for the fire protection district. B&P notes that it is unclear as to what additional tax may be levied and whether additional refers only to an extra property tax levy or the use of other types of taxes. B&P notes that depending on the definition of "additional" the metropolitan city could levy a sales tax for the fire protection district. If the metropolitan district chooses to levy a sales tax, B&P notes that General Revenue could be increased through the 1% Department of Revenue collection fee.

Article VI, Section 30.7(2)(a)

This section states that during the transition period, the metropolitan city shall not submit any questions to voters regarding reauthorizations of any tax initially levied prior to January 1, 2021. B&P notes that this section could impact any sales taxes that require reauthorization during the transition period. If such taxes were to expire, this would reduce local revenues. This could reduce General Revenue by $0 to an unknown minimal amount if this provision results in the loss of funds through the Department of Revenue collection fee.

This section also states that upon the failure to submit the reauthorization of any tax on earnings and payroll, the earnings tax shall be reduced in the manner set out in in law and the payroll tax shall be reduced by 1/20th of one percent (or 0.05%) annually until such tax is eliminated. Section 92.125, RSMo, states that the earnings tax shall be reduced by 0.1% annually until the tax is eliminated. B&P notes that the St. Louis City earnings and payroll tax is up for reauthorization in April 2021. Therefore, B&P estimates that the St. Louis City earnings and payroll tax would begin phasing out January 1, 2022 and would be completely eliminated beginning January 1, 2031. B&P notes that nothing prohibits the metropolitan city from authorizing a new earnings and payroll tax after the transition period.

Using data published by St. Louis City[1], B&P determined that the average earnings tax collections from 2013-2017 was $169,061,000 and the average payroll tax collections was $37,977,800. Therefore, B&P estimates that this proposal will reduce metropolitan city revenues by $207.0 million ($169,061,000 + $37,977,800) once fully implemented in tax year 2031. The following two tables show the impact to metropolitan city revenues as the earnings and payroll taxes are phased out.

[1] https://www.stlouis-mo.gov/government/departments/comptroller/documents/current-comprehensive-annual-financial-report.cfm, FY17 CAFR – Table 9

Table 1: Impact from Earnings
Tax Phase-Out by Tax Year

Tax Year	Tax Rate	Metropolitan City Impact
2021	1.0%	$0
2022	0.9%	($16,906,100)
2023	0.8%	($33,812,200)
2024	0.7%	($50,718,300)
2025	0.6%	($67,624,400)
2026	0.5%	($84,530,500)
2027	0.4%	($101,436,600)
2028	0.3%	($118,342,700)
2029	0.2%	($135,248,800)
2030	0.1%	($152,154,900)
2031	0.0%	($169,061,000)

Table 2: Impact from Payroll Tax
Phase-Out by Tax Year

Tax Year	Tax Rate	Metropolitan City Impact
2021	0.50%	$0
2022	0.45%	($3,797,780)
2023	0.40%	($7,595,560)
2024	0.35%	($11,393,340)
2025	0.30%	($15,191,120)
2026	0.25%	($18,988,900)
2027	0.20%	($22,786,680)
2028	0.15%	($26,584,460)
2029	0.10%	($30,382,240)
2030	0.05%	($34,180,020)
2031	0.00%	($37,977,800)

Further, B&P notes that some taxpayers claim the amount of earnings tax paid to St. Louis City in their itemized deductions. Based on information provided by the Department of Revenue, B&P determined that 29% of Missouri taxpayers itemize their deductions. However, B&P notes that with the federal tax changes fewer taxpayers are likely to file itemized deductions, which may lower the actual amount of General Revenue received. B&P notes that currently the top rate of Missouri income tax is scheduled to decrease from 5.4% to 5.1% over a number of years depending on General Revenue growth. Therefore, B&P will show the range of impact from this section on General Revenue with a top tax rate of 5.4% and a top tax rate of 5.1%. Table 3 shows the revenue impact to the metropolitan city and General Revenue from the phase-out of the earnings tax.

Table 3: General Revenue Impact from Earnings/Payroll Tax Phase-Out

Tax Year	Metropolitan City Impact (Earnings Tax)	State Fiscal Year	GR Impact (top tax rate 5.4%)	GR Impact (top tax rate 5.1%)
2022	($16,906,100)	2022	$0	$0
2023	($33,812,200)	2023	$265,000	$250,000
2024	($50,718,300)	2024	$529,000	$500,000
2025	($67,624,400)	2025	$794,000	$750,000
2026	($84,530,500)	2026	$1,059,000	$1,000,000
2027	($101,436,600)	2027	$1,324,000	$1,250,000
2028	($118,342,700)	2028	$1,588,000	$1,500,000
2029	($135,248,800)	2029	$1,853,000	$1,750,000
2030	($152,154,900)	2030	$2,118,000	$2,000,000
2031	($169,061,000)	2031	$2,383,000	$2,250,000
2032	($169,061,000)	2032	$2,647,000	$2,500,000

B&P estimates that this provision may increase General Revenue by $250,000 to $265,000 in state FY 2023. Once fully implemented in state FY 2032, this provision may increase General Revenue by $2.5 million to $2.6 million. B&P notes that the delay in the estimated state impact reflects the lag between a tax year and the annual tax return filing period.

Article VI, Section 30.9

This section states that all special districts shall continue unaffected after January 1, 2021; however, the General Assembly has the ability to consolidate any special districts that have been made duplicative by the merger of St. Louis City and St. Louis County. B&P notes that this could include special taxing districts. The consolidation of special taxing districts could impact local revenues if each district to be consolidated levies a different tax rate. In addition, General Revenue could be impacted by $0 to unknown minimal amount if the amount collected through the Department of Revenue collection fee were to change after consolidation.

Article VI, Section 30.11(2)(c)

This section requires the metropolitan city to provide a refundable tax credit in the amount equal to the amount of earnings taxes paid by a metropolitan city employee who became subject to the city's earning tax as a result of this proposal. Such employee shall not be a resident of St. Louis City. B&P is unable to determine the amount of refundable credits that may have to be paid by the metropolitan city as a result of this section. B&P notes that this section will not directly impact General Revenue, as qualifying employees would not have been subject to the earnings tax without this proposal becoming effective.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article VI to modify the current provisions of the Missouri Constitution relating to the consolidation of St. Louis City and St. Louis County.

Upon consolidation of the city and county, the petition also authorizes the judicial conference to submit a circuit realignment plan in the manner provide by section 478.073, RSMo, to create a single circuit for the city and county. A circuit realignment planning process would result in a cost of at least $286,479 for planning, analysis and review, draft recommendations, and analysis.

The combining of two circuit courts into one court has never been estimated since the creation of JIS (Justice Information System) and Show-Me Courts. There are many unknown and potential unforeseen circumstances. There are issues related to data conversion, system configuration, application limitations, application interfaces and procedure modification that would need to be considered. If circuits were combined, it would result in a cost range of at least a minimum of $100,000 to unknown.

These costs will be incurred for the conversion of program based reporting, complete set up of the database, consolidation planning, analysis and combination of court forms, reconciliation of accounts, analysis of court specific developed interfaces, conversion of JIS (Justice Information System), Show-Me Courts and many other unforeseen items.

There may be other costs. However, these will not be known until the conversion.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of

their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **City of St. Louis** indicated:

NICOLE GALLOWAY
MISSOURI STATE AUDITOR
State Capitol Room 121
Jefferson City, MO 65101

Initiative Petition: **20-054**

Date: **4/3/2019**
Local Government: **City of St. Louis**

Short Description: **Proposes the merger of the City of St. Louis with St. Louis County and its municipalities.**

Fiscal Impact:

Whereas the City of St. Louis currently operates as a city not within a county, the proposed initiative petition seeks an amendment to the state constitution that would make the City of St. Louis part of a much larger municipal government encompassing St. Louis county and all its municipalities.

The proposal provides the opportunity for operational savings through significant economies of scale but also eliminates over a ten year period existing major revenue sources in the earnings and payroll tax. A discussion of potential expenditure and revenue considerations of the proposal are discussed below.

<u>Expenditures</u>
Under its current city not within a county status, the City of St. Louis maintains a variety of offices and functions that are typically reserved for county governments. These include court functions, sheriff's office, correctional facilities, assessor, recorder of deeds, board of elections, medical examiner, collector of revenue, license collector and treasurer's offices. The total operating costs of these typical "county" functions totaled nearly $121M in the past fiscal year (FY18). Meanwhile, revenues either generated by these offices or allocated to offset their operating costs for the same period totaled nearly $35M. This left a net annual operating cost of county functions at over $86M . (see attached)
While a large portion of these costs are certain to continue regardless of the City's "county" status, the merger into a larger municipal unit of St. Louis County would provide an opportunity to identify potential redundancies and realize economies of scale between the City of St. Louis and St. Louis County operations with the potential for a significant amount of cost savings. Additional economies of scale will also be found within combinations of the more traditional municipal department operations (e.g. Police, Parks, Streets, etc.)
The City's existing expenditures related to the Fire Department are to be relegated to a Fire Protection district encompassing the existing boundaries of the City. The funding of this district is to be provided by a property tax levy subject to voter approval. If said levy is approved then other "taxes licenses and fees levied" are to be reduced so as to make this substantially revenue neutral.

<u>Revenues - Earnings & Payroll Tax Elimination</u>
The proposed amendment would preclude the City of St. Louis from seeking continued authorization of the 1% Earnings tax. Typically the next authorization vote would be scheduled in 2021, thus the elimination of the Earnings tax at the rate of 10% per year would begin under this proposal beginning in 2022. It also provides for elimination of the 0.5% City Payroll tax along the same schedule. Combined these two sources of revenue less commissions totaled $211.7M in general revenue in FY18. The loss of revenue would increase in increments over

the next ten years by over $21M per year until the entire amount of revenue is eliminated by 2031. Aside from any benefits from any operational savings described above, revenues from other sources would be necessary to make up this difference. (This does not take into account any additional expenditures related to accelerated payments on previous City debt which while not specified in the amendment has been reported as part of the merger plan.)

Revenues - TIF Considerations

In addition to the revenue amounts discussed above, in FY18 a total of $6.5M in Earnings and Payroll taxes were allocated specifically to TIF and other development agreements. Typically these obligations are to be paid solely from a portion of the economic activity taxes generated by the respective project. The proposed amendment leaves open the issue of how these obligations are to be addressed in light of the proposed changes in tax structure.

Comptroller's Annual Reports - cash basis and 2018 Cost Allocation report

Officials from **Wellsville-Middletown R-1 School District** indicated as a small out-state rural school district, they are unsure how this change will affect their fiscal condition.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact on their college.

Officials from **Harris-Stowe State University** indicated Harris-Stowe State University traces its origin back to 1857 when it was founded by the St. Louis Public Schools as a normal school and thus became the first public teacher education institution west of the Mississippi River and the 12th such institution in the United States. The earliest predecessor of Harris-Stowe State University was a normal school established for white students only by the Public School System of the city of St. Louis. This school was later named Harris Teachers College in honor of William Torrey Harris who had been a Superintendent of Instruction in the St. Louis Public Schools and also a United States Commissioner of Education.

The College began offering in-service education for St. Louis white teachers as early as 1906. In 1920, Harris Teachers College became a four-year undergraduate institution authorized to grant a Bachelor of Arts in Education Degree.

A second predecessor institution was Stowe Teachers College, which began in 1890 as a normal school for future black teachers of elementary schools in the city of St. Louis. This normal school was also founded by the St. Louis Public School System and was an extension of Sumner High School. In 1924, the Sumner Normal School became a four-year institution with authority to grant the baccalaureate degree. In 1929, its name was changed to Stowe Teachers College, in honor of the abolitionist and novelist Harriet Beecher Stowe. These two teacher education institutions were merged by the Board of Education of the St. Louis Public Schools in 1954 as the first of several steps to integrate the public schools of St. Louis. The merged institution retained the name Harris Teachers College.

Later, in response to the many requests from alumni of Stowe Teachers College and members of the greater St. Louis community, the Board of Education agreed to restore to the College's name the word "Stowe" and to drop the word "Teachers." In 1979, the General Assembly of the State of Missouri enacted Senate Bill 703 under which Harris-Stowe College became the newest member of the State system of public higher education. The institution's name was again changed by the addition of the word "State" and became officially known as Harris-Stowe State College. In addition to the name change, the College's baccalaureate degree was changed to Bachelor of Science in Education. In compliance with the new state standards and teacher certification requirements, the College's Teacher Education curriculum was modified and three separate Teacher Education majors were approved: Early Childhood Education, Elementary School Education and Middle School/High School Education.

In 1981, the College received state approval for a new degree program — the Bachelor of Science in Urban Education. This program is the only one of its kind at the undergraduate level in the United States and is designed to prepare non-teaching urban education

specialists who will be effective in solving the many urban-related problems facing today's urban schools. In 1993, the State Governor signed into law Senate Bill 153, which authorized the College to expand its mission in order to address unmet needs of metropolitan St. Louis in various applied professional disciplines. In response to that authority, Harris-Stowe developed two new baccalaureate degree programs:

1. Business Administration, with professional options in Accounting, Management Information Systems, General Business and Marketing;

2. Secondary Teacher Education, with subject-matter options in Biology, English, Mathematics and Social Studies.

Finally, on August 25, 2005, by mandate of the State of Missouri, Harris-Stowe State College obtained university status. Today the University hosts collaborative graduate degree programs with Maryville University, the University of Missouri-St. Louis and Webster University. The University continues to expand, adding new campuses and buildings as part of its 21st-century initiative to offer opportunities for both undergraduate and graduate students seeking a variety of degrees.

Thus, from its beginnings as two normal schools in the mid and late 19th century to its present status as a state institution of public higher education, Harris-Stowe State University and its predecessor institutions have always been in the forefront of teacher education. Now, with its mission expanded to include other professional disciplines, the University will provide greatly needed additional opportunities to metropolitan St. Louisians in other important fields of endeavor. The University will continue its quest for excellence in all of its offerings and strive even more to meet the complex and demanding challenge of preparing students for effective roles in this region's various professions.

Because of this history and the historic nature of the proposed merger of the City and County of St. Louis, Harris-Stowe State University fiscal impact will be enhanced. Since the various school districts will not be a part of this merger, our recruiting in the City of St. Louis and St. Louis County school districts will continue uninterrupted. It may even increase since the City and the County will see itself as one region rather than separate entities which is similar to their history.

Officials from the **State Tax Commission** indicated they have reviewed the initiative petition and determined no fiscal impact. The petition provides the current property tax structure, including levies and distribution, will remain in effect after passage, and until such time as the governing authority modifies the provisions.

Officials from **St. Louis County Board of Elections** indicated they believe under this petition that they would need to purchase new voting equipment and software to cover the city's portion of registered voters. This is an estimated cost of $1-3 million. They estimate that if new equipment for the County's voters would cost roughly $10 million, and the City would add about 30% more voters to the population, the total cost for this new equipment would be anywhere from $1-3 million depending on vendors and bids. This estimate is

based on the fact that the St. Louis County Board of Elections would be the new jurisdiction for City voters.

Officials from **Metropolitan Zoological Park and Museum District** indicated they do not believe it will have a financial impact on the Zoo Museum District.

Officials from the **Municipal League of Metro St. Louis** indicated:

The Honorable Nicole Galloway
Missouri State Auditor
State Capitol Building
Jefferson City, Missouri 65101

Re: Fiscal Note – Petition Initiative 2020-054

Dear Ms. Galloway:

The Municipal League of Metro St. Louis represents 80 municipalities including St. Louis City ("the City") and municipalities within St. Louis County ("the Municipalities"). As submitted, Petition Initiative 2020-054 would negatively impact every municipality. The Municipalities, which would become municipal districts, would no longer be political subdivisions of the state but instead would become political subdivisions of the new metropolitan city. The petition gives the new metropolitan city complete authority over the municipal districts, taxes, services, and zoning. It limits the municipal districts' sources of revenue to property and utility taxes and requires the municipal districts to seek voter approval to increase these taxes to cover the loss in sales tax revenue.

Petition Initiative 2020-054 will negatively impact all the Municipalities by reallocating local sales taxes and all revenues associated with municipal operations—such as the courts, police, business licensing, and regulations—to the new metropolitan city. There will also be an uncalculatable loss in real property assessed valuation due to the reduction in level of services. The areas in St. Louis County ("the County") with the highest assessed valuations are serviced by municipalities at the local level, and if this petition is approved, the new metropolitan city will receive the services at the current level of the City and unincorporated areas in the County, which have some of the lowest property values.

While Petition Initiative 2020-054 does redistribute several of the Municipalities' current responsibilities and associated costs to the new metropolitan city, the net result will be a substantial deficit for the remaining municipal operations, which will require either dissolution of the municipal district or substantial increases in real estate or utility taxes. While some reduction in service levels and expenses would occur, the Municipalities would be required to increase property taxes, gross receipts utility taxes, park and recreation fees, and trash services fees to cover the costs of operation that were previously covered by general revenue funds generated by sales tax.

Respectfully, given that Petition Initiative 2020-054 is effectively an amended version of Petition Initiative 2020-042, it bears noting that the fiscal note and fiscal note summary

1034 S. Brentwood Blvd., Suite 410 • Richmond Heights, MO 63117
Phone: (314) 726-4747 • Fax: (314) 726-1520 • www.stlmuni.org • staff@stlmuni.org

prepared by this Office for Petition Initiative 2020-042 contained several legal deficiencies, which may be avoided in drafting a fiscal note and fiscal note summary for this petition. The fiscal note summary proposed by this Office for Initiative 2020-042 was as follows:

> Individual St. Louis County municipalities expect decreased revenues to exceed savings with a total unknown impact. The overall savings for the new metropolitan city is unknown but estimated to be as much as $1 billion annually by 2032. State revenue is estimated to increase between $2.5 million to $7 million annually by 2032.

We believe the first sentence is an accurate statement of the impact of the proposed consolidation on the Municipalities, and the third sentence may be correct and is probably a reasonable estimate. However, the second sentence is unfair and prejudicial for the following reasons:

- The fiscal note summary's reference to the estimated savings to the new metropolitan city is beyond the intended scope of the fiscal note summary. This Office is only authorized to include the anticipated costs and savings to existing state and local governmental entities. *See* § 116.175.3. Under the proposed initiative, the "new metropolitan city" would not be provided with any new taxing or governmental revenue that does not already exist within the City, County, or Municipalities.

- In including the proposed new metropolitan city, the fiscal note summary omits any reference to the other two local governments directly affected by this proposal. This is a direct violation of section 116.175.3, which requires the fiscal note summary to "state the measure's estimated costs and savings, if any, to state or local government entities." The stated purpose of the ballot initiative is to redistribute cost allocations and taxing and governmental revenue between the City, County, and Municipalities. Because an adequate summary of the fiscal impact must include the estimated costs and savings to ***all local government entities***, the fiscal note summary for this initiative petition must include the estimated costs and savings to the City and County.

- Limiting the projected costs and savings of the new metropolitan city to those outside the anticipated period of transition is prejudicial and unfairly favorable to the proponents. *See* § 116.175.3; *see also Hill v. Ashcroft*, 526 S.W.3d 299, 308 (Mo. Ct. App. 2017) (internal quotations and citations omitted). The proposal states with specificity the taxes to be eliminated, that no new taxes are imposed, and how tax collection and the provision of services will be redistributed between the local governments and absorbed by the new metropolitan city. Other actions in the proposal will have a known and reasonably measurable impact, such as the consolidation of functions of the City and County. Based on this existing fact-based information, this Office should be able to provide an objective statement as to the fiscal note as it relates to the period of transition.

- In the same vein, it is prejudicial and unfairly favorable to the proponents to include the proponents' claim that "[t]he overall savings is unknown for the new metropolitan city but estimated to be as much as $1 billion annually by 2032." Read literally, this means the savings could be as little as $1 annually or as much as $1 billion annually. Further, there was no independent validation done, and thus there is no reason that the second part of the sentence could stand alone. Indeed, while the first part of the sentence is accurate, there are multiple reasons for serious doubts about the validity of the claim of $1 billion-dollar annual savings by 2032, including:

    1. Academic studies of city-county consolidations in other parts of the country have rarely found that projected savings occurred, and never at the magnitude of this claim. Projected economy-of-scale savings do not materialize because local government services are labor intensive, and there is no appetite for the consolidated government to either reduce personnel or services.
    2. The projections of systematic reductions in expenditures every year while revenues are increasing defies logic and common sense. Among the questionable assumptions is an expenditure starting point in year one of the consolidated government equal to expenditures in 2017, which is the status quo assumption. The consolidated government revenue assumptions appear to be based on a rate of growth greater than the experience of the last decade.
    3. There also appears to be an assumption that all debt will be quickly eliminated, and there is no provision for future debt associated with essential capital expenditures.

Based on the above analysis, we propose the fiscal note summary be revised to read as follows:

> Total fiscal impact is unknown. St. Louis County municipalities expect decreased revenues to exceed savings. St. Louis City expects provided revenues to equal net costs. St. Louis County expects to have revenue increased to exceed increased cost of services. State revenue expected to increase over $2.5 million annually by 2032.

We urge you to adopt this revised summary to more accurately reflect for voters, especially those across the state who may be unfamiliar with St. Louis issues, an accurate representation of the unknown and problematic savings associated with the proposed consolidation.

Sincerely,

Pat Kelly
Executive Director

Report of the Fiscal Analysis Team on the Better Together Consolidation Plan
Financial Projection: A First Step

Mark Tranel
Terry Jones
Jim Brasfield

April 9, 2019

Executive Summary

Proponents of Better Together's proposed constitutional amendment claim the new Metro City will reduce expenditures by up to $3.2 billion from 2023 to 2032, and create a revenue surplus of $1.7 billion during the period. By adding the two estimated numbers, they claim a ten-year savings of $4.9 billion dollars. By 2032, according to the Better Together projections, there will be yearly budget surpluses in the hundreds of millions of dollars. This is a fantasy. The analysis below projects annual budget deficits in the tens of millions that would require significant cuts in key services, like public safety and public works. That is reality.

This report examines separately the revenue and expenditure claims of the amendment's proponents. The two streams are then compared on a yearly basis. We make no attempt to add annual savings or deficits to produce a ten-year number, because this defies local government budget practice.

Why? If surpluses begin to accumulate, they will not be put in a bank account or buried in the back yard. Service and capital needs will lead to citizen demand for additional expenditures, or taxes will be reduced to return the surplus to voters. If expenditures increase faster than revenues, either new taxes will be proposed or expenditures will be reduced. Neither short-term surpluses nor deficits continue indefinitely. Adding projected yearly surpluses or deficits for a ten-year total is an uninformed fabrication.

Multiple studies of past city-county consolidations have consistently found little or no cost savings after consolidation. Better Together boosters have offered Indianapolis and Louisville as examples of consolidations which produce public services at a lower per capita rate than St. Louis. These differentiations are fraught with problems, because each local environment is different rendering comparison across jurisdictions prone to erroneous conclusions. The best yardstick is the before-and-after comparisons within jurisdictions.

This revenue analysis below examines property and sales tax, since these were the focus of the Better Together fiscal projections. They projected annual property tax increases of 2% per year. Historic assessment trends and the biennial reassessment casts doubt on this revenue assumption. In this report property tax increase is projected based on a 1% increment in reassessment years and .5% in alternative years. This produces $20 to $30 million dollars a year less revenue over the decade.

The Better Together sales tax projection is critical to the revenue base of the proposed Metro City. This report does not dispute the possibility of an annual 1% increase in sales tax predicted by Better Together. However, because the Metro City will rely on sales tax for over 50% of its revenue, there is a danger of serious shortfalls over the decade if that standard is not met. On-line sales, shopping center decline, and economic downturns may cause serious sales tax revenue shortfalls over the decade. This report's more prudent scenario of an annual .5% increase leads to about $20 to $25 million less dollars a year in revenues for Metro City.

Under the plan existing municipal sales taxes would be captured by the Metro City. It is unclear legally whether some of those taxes could be spent for general fund purposes rather than the special function for which they were authorized, further endangering the budget projections.

Finally, the Better Together proposal eliminates the City of St. Louis earnings and payroll taxes and reduces the "county purposes" property tax in both the City and County. By 2032, this translates into a revenue loss of over $250 million annually.

There is a much sharper difference between this analysis and the claims of Better Together proponents with respect to expenditures. They project a decline of 1% per year over the decade with the status quo as the 2023 baseline. However, it appears that this baseline is in fact the level of expenditures for the 2017/18 period, not 2022, meaning the five years of no increases would precede the ten years of annual 1% reductions.

This report projection begins with 2018 and increases spending for all entities (City, County, municipalities) on services through 2022, which produces an almost $200 million-dollar baseline difference. To achieve this realistic projected 2023 baseline starting point would require draconian cuts in the first year of operation of the Metro City.

Better Together claims the annual 1% expenditure reduction claims will be accomplished through employee attrition, service consolidation, and new technology. However, no details are provided. Employee attrition may not occur in expendable positions. Most urban government costs are to provide labor intensive services. Reduction in personnel leads directly to service decline. Unless judges, police officers, or street workers are replaced by robots, it is hard to understand how technology will lead to the level of cost savings projected.

The Better Together expenditure projection also assumes once existing debt is retired, no new debt will be incurred and thus it does not budget any funds for debt service payments. We cannot find any major city in the country with no debt to finance long-term capital projects. It is financial folly to assume that the current buildings and other infrastructure will last forever.

Assumptions matter. If the citizens of the City of St. Louis and St. Louis County want the lower levels of government spending projected by Better Together, they will need to accept massive reductions in services, such as public safety and public works.

Introduction

The Better Together Consolidation Plan Fiscal Note was submitted to the Auditor and Secretary of State of the State of Missouri as part of the process for certifying the constitutional amendment ballot language. In the Fiscal Note and other documents, a number of claims were made relative to the revenue flows, expenditure patterns, and projected savings resulting from the consolidation. A Fiscal Analysis Team (Team) consisting of

Professor Emeritus E. Terrence Jones, University of Missouri- St. Louis
Director Emeritus Mark Tranel, University of Missouri- St. Louis
Professor Emeritus James Brasfield, Webster University

analyzed the fiscal claims, and our conclusions are contained in this report.

The Team consulted several current city managers/finance directors in the process of this academic assessment of the likely financial impact of consolidation on public services and taxes. This report is an initial summary of this analysis. The Team expects to examine in greater detail other elements of the consolidation proposal in the near future.

Since any attempt to examine the path of public spending more than a decade into the future is fraught with uncertainty, we fully expect readers will find issues with our work and conclusions. This is why the subtitle reads, "A First Step". We wish to hear from those who read this first report, and take issue with our methodology or conclusions. We presume there will be a need for future adjustments. Our aspiration is to contribute to the community dialog on this proposal in the coming months and expect that discussion will lead to some modification of our initial conclusions.

This report begins with a review of the substantial academic literature on city-county consolidation. This is followed by an assessment of the pitfalls of attempting to compare revenues and expenditures of cities/counties in different parts of the country. The next section examines the claims of savings asserted by consolidation advocates by analyzing the revenue and expenditure assumptions inherent in the fiscal projections. In the conclusion the Team evaluates the projected consolidation savings and presents the results of its own projections based on a somewhat different set of assumptions.

Academic Studies of City-County Consolidations

Studies of city-county consolidations consistently show that there have been little or no cost savings realized.

After examining nine city-county consolidations in

(Nashville/Davidson County, Tennessee; Virginia Beach/Princess Anne County, Virginia; Jacksonville/Duval County, Florida; Carson City/Ormsby County, Nevada;

Lexington/Fayette County, Kentucky; Butte/Silver Bow County, Idaho; Lynchburg/Moore County, Virginia; Athens/Clarke County, Georgia; Kansas City/Wyandotte County, Kansas),

the study directors conclude "*there is no support for the hypothesis that consolidations predictably lead to increased efficiency in local government*"

Suzanne M. Leland and Kurt Thurmaier, *City-County Consolidations: Promises Made, Promises Kept?*, Georgetown University Press, 2010, pages 282-283.

H.V. Savitch and Ronald Vogel, the leading scholars on the Louisville/Jefferson County (Kentucky) merger, examined the pre-merger (1999/2000 – 2002/2003) and post-merger (2003-2004 to 2008-2009) experience. They found that

> "*in general any reductions in budgets, personnel, and costs have been small (about 1%)*" and that "*the basic pattern has been for expenditures to modestly recede for a short period only to climb back to previous levels*"

(H.V. Savitch, Ronald Vogel, and Lin Ye, "Louisville Transformed but Hardly Changed: A Survey of a City Before and After Merger," in Don Phares, editor, *Governing Metropolitan Regions in the 21st Century*, M.E. Sharpe, 2009, page 174).

Philadelphia completed a full city-county merger in 1952 According to an Allegheny Institute for Public Policy report that also examined Indianapolis and Louisville, the study notes:

> "*Whenever talks centers on city-county mergers, the city that is least likely to come up is Philadelphia. However, it is one of the few complete models in the country. It is more complete than Metro Louisville and Indianapolis in that there are no remaining cities or towns and one consolidated government is providing all functions and services. The reason it is not mentioned is that it has been under a state appointed fiscal oversight board and is beset by high taxes and low economic performance. It does suggest caution against the belief that a large, merged government is necessarily more cost effective.*

(Frank Gamraz and Jake Haulk, *Merging Governments: Lessons from Louisville, Indianapolis, and Philadelphia,* Allegheny Institute for Public Policy, 2005, page 15).

Although the City of Indianapolis merged with Marion County in 1970, the Indianapolis Police Department and the Marion County Sheriff's Department were not consolidated into the single Indianapolis Metropolitan Police Department until 2007. Proponents estimated the annual savings would be $8.8 million. A 2013-2014 study of the police consolidation commissioned by the Indianapolis City-County Council (Unigov) concluded that:

A considerable and diverse set of factors mitigated the ability to achieve the estimated cost savings Administrative staffing changes and turnover, unavoidable contract obligations, legacy personnel costs, legislative and judicial decisions, and changing public safety responsibilities of the Indianapolis Metropolitan Police Department and the Marion County Sheriff's Department prevented the realization of anticipated immediate cost savings.

(*Consolidated City of Indianapolis and Marion County: Law Enforcement Consolidation Review*, KSM Consulting, 2014.)

A 2011 summary of consolidation studies in the United States finds that:

Previous studies have examined the impact of city-county consolidation using a variety of research methods from cases studies to econometric techniques, and they have found that consolidation has little impact on local government spending or economic development outcomes. The results of the models presented in this book concur with the previous research. We found that there are no pre- or post-consolidation differences in the employment, payroll, or expenditures of consolidated local governments.

(Dagney Faulk and Michael Hicks, Local *Government Consolidation in the United States*, Cambria Press, 2011).

Challenges of Local Government Fiscal Comparisions

There are a number of challenges in examining the fiscal operation of consolidated city-county governments and projecting the outcome for a consolidation in St. Louis. While there are 40 consolidated city-county governments in the U.S., the National League of Cities has separated them into three categories:[1]

- governments legally designated as city-counties and operating primarily as cities
- areas designated as metropolitan governments and operating primarily as cities
- areas having certain types of county offices, but as part of another government (city, township, special district, state)

One of the impacts of these varying government forms is the specific services that are the responsibility of any one of these 40 governments is not exactly the same as any of the others. While there are some services that are consistently provided, such as police and public works, there are other services that are not provided in some cases or are delivered by a special district or some other arrangement. One approach to determining these differences is to examine the organization charts in Comprehensive Annual Financial Reports (CAFR).

CAFR's is a set of U.S. government financial statements comprising the financial reports of a county or municipal governmental entity that complies with the accounting requirements

[1] https://www.nlc.org/list-of-consolidated-city-county-governments

promulgated by the Governmental Accounting Standards Board (GASB). The organization charts for the 40 consolidated city-county governments shows a wide range of services and service structures that make comparison across governments very difficult.

For example, comparing the governments in the City of St. Louis and St. Louis County to Louisville-Jefferson County should account for the St. Louis Port Authority functioning as one of the 12 Development Boards of the municipal government of the City of St. Louis whereas The Louisville and Jefferson County Riverport Authority is a legally separate entity that was established in order to develop and maintain an industrial riverport complex on a self-supporting basis utilizing a rate structure designed to produce revenues sufficient to fund debt service requirements, operating expenses and adequate working capital.[2]

Similarly, the Parking Commission of the City of St. Louis is a part of the City government whereas in Louisville-Jefferson County the Parking Authority of River City, Inc. is a separate non-profit corporation.

Comparing St. Louis to Indianapolis is similarly complex. Despite the moniker Unigov, the structure of local government in Marion County Indiana is perplexingly complex. While Unigov consolidated the City of Indianapolis and Marion County as the primary governmental unit, there are a number of component units that perform discrete functions and are outside the direct governance of the consolidated City of Indianapolis and Marion County. Examples of components of Unigov include: Capital Improvement Board of Managers, Health and Hospital Corporation of Marion County, Indiana, Indianapolis-Marion County Building Authority. These component units each have their own source of tax and other revenues separate from the Consolidated City of Indianapolis/Marion County.

While there are potential lessons to be learned by a metropolitan area through contrasting the cost, quality, and impact of its governmental structure, there are many factors which must be accounted for to have confidence in the veracity of the analysis.

Revenue Estimation

The claims of fiscal savings as a result of the monumental consolidation of local government proposed by Better Together are derived from a set of revenue and expenditure projections in the post consolidation world. This section examines the revenue assumptions and projections contained in the fiscal note submitted to the Missouri Auditor by Better Together.

The major revenue assumptions can be summarized as:[3]

> Property tax collections will increase 2% per year in all jurisdictions combined beginning in 2018

---

[2] https://www.nasco.org/Data/Sites/1/documents/committees/financing/resources/gccb/statements/Louisvillle.pdf

[3] This revenue section does not include Fire District revenue since that will be the subject of a subsequent report.

Sales tax collections will increase 1% per year in all jurisdictions combined beginning in 2018 after accounting for the increase in aggregate sales tax as result of Prop P approval in both City and County.

The earnings tax/payroll tax in the City of St. Louis will be phased out beginning in 2021.

There will be a reduction in property tax rate in St Louis County and elimination of the "county services" property tax in the City.

The Fiscal Analysis Team (Team) built a spreadsheet model to analyze the impact of these revenue assumptions on the resources available to provide services in 2021 and subsequent years until 2032. The analysis details both the Better Together projections as well as the working assumptions of the Team. The Team employed slightly different assumptions to some of the key elements.

Property Tax

A flat 2% per year increment in property tax seems inappropriate on two grounds. First, the history of assessed valuation over both a ten year and five-year period of time in both the City and County does not support the premise that values will rise 2% a year over the next fifteen years. The combined City/County assessment in 2009 was $29.5 billion dollars, which decreased to $29.0 billion in 2017[4]. Between the 2015 reassessment and 2017 reassessments, the increase was 7.9% over the two-year period. Of course, actual revenue from the property tax is a function of assessed valuation and the tax rate.

Second, property reassessment occurs every other year. A pattern of yearly increase by the same metric is particularly questionable. Thus, the compounding effect of yearly increases absent voter approved rate increases overstates the cumulative impact. The Team employed a metric of 1% increase for assessment years, and .5% increase for non-assessment years.[5]

Sales Tax

Estimates of future revenues from sales tax is especially important for this analysis. Currently, sales tax accounts for 38% of all revenue for the City/County/Municipalities combined. However, in the projected metro city budget sales tax would account for more than 50% of the revenue of the Metro City. Thus, a small inaccuracy in revenue projection over a decade can either sharply reduce or increase the estimation, and this could be cumulative.

For purposes of projection one can utilize either sales tax collected or total taxable sales as a metric. The Better Together projection employs a 1% increase per year on sales tax collected, as the basis for the fifteen-year projection.

---

[4] CAFR St Louis City and County

[5] As this report was being prepared newspaper accounts indicated that reassessments in 2019 were indicating a significant increase in both City and County. To reflect these preliminary estimates the Team employed a 2% increment for 2019 only.

The aggregate sales tax collection metric can be skewed by changes in the rate or number of entities collecting sales tax. There are a variety of local option sales taxes available and used by the individual entities. In the future, increments to the rates and number of sales taxes utilized would require a positive vote of the entire metro city rather than an existing municipality, which may be more challenging.

Several factors might negatively impact the fifteen-year projection of growth at a compounded 1% per year. Online sales have clearly reduced the growth of "brick and mortar" retail location sales. There is little reason to conclude this pattern will change in the next decade, and ample evidence to infer that the trend will continue. One of the inevitable consequences of this trend is the decline in the number of malls and "big box" retail stores, which generate a major share of the total sales tax.

The Brookings Institution documented the historical trends in the sales tax base and the sales tax rate in the 2018 report *The History and Future of the Retail Sales Tax*.[6] Sales tax collections historically have been maintained only by increasing the tax rate because the tax base has been shrinking. There is every reason to expect a similar future for Metro City, since its largest source of revenue will be sales tax, starting at 42 percent in 2023 and increasing to over 50% percent in 2032.

The sales tax base has been shrinking...

BROOKINGS

A decade ago a significant recession caused sales tax revenues to drop precipitously. Almost a decade later total taxable sales are just returning to the pre-recession level. Hopefully, there will not be another recession of this magnitude in the next fifteen years, but is it realistic to presume no economic downturn?

Because of the importance of sales tax to the overall revenue projections for the Metro City, the team has undertaken three projections of sales tax. The base assumption is the optimistic one (1% per year) used by Better Together. The alternative assumption is a more conservative (.5% per year) projection that seeks to reflect changes because of either online sales or a recession or both over the fifteen-year period. Because the sales tax revenue will be the most critical segment of revenue for the Metro City, the Team has a base projection of 1% increase per year (following the Better Together metric), but have also explored the impact of a .5% increase and a .75% increase.

Table 1
Taxable Sales- St. Louis City and County 2014-2017

	2017	2016	2015	2014
County	$16,910,882,473	$17,075,262,610	$16,844,027,084	$16,300,797,027
City	$4,714,503,278	$4,663,675,173	$4,683,668,511	$4,577,453,173
Combined	$21,625,385,751	$21,738,937,783	$21,527,695,595	$20,878,250,200
% Increase	-0.5%	1.0%	3.0%	
% Incr 2014-17	3.6%			

Source: Missouri Department of Revenue

Historic statistics on actual sales tax revenues is an alternative approach to projecting future income.

Table 2
Sales Tax Revenue Increases- St Louis City/County

	2017	2016	2015
County	2.5%	0.9%	2.8%
City	9.3%	0.4%	0.6%

There is a volatility for annual sales tax generation that reflects variations in spending patterns. This is why the Team used alternative scenarios to assess the impact of declining taxable sales.

Finally, it should be noted that total county and municipal sales taxes currently collected are authorized by a variety of statutes some of which specify a dedicated use for the tax. The plan appears to assume in the future the Metro City will receive all sales taxes and use them as general revenue. This is a potential point of legal challenge. Since the Metro City budget will rely heavily on sales tax revenue, the earmarked nature of some of the sales taxes may render yearly budgeting more difficult and less flexible.

Other Revenue

The Better Together fiscal note offers no increment on the other revenue sources, except to gradually eliminate the earnings/payroll tax in the City, and project an initial reduction in the court fines/fees. These items are kept at the same level for the entire fifteen-year period. This is probably unrealistic. License fees and utility tax together represent 16% of the total revenue in the base year. However, since the Better Together projection did not add an inflation factor to these items, the Team also decided to not adjust them. This allows for a focus on Sales and Property tax in the comparative analysis.

Revenue conclusions

The Team's Revenue projections employed the same approach as Better Together for all revenue items except Property Tax and Sales Tax. This is a presumption of no increase beyond the 2017 status quo. We also assumed the phase out of the City earnings/payroll tax over ten years, and the one-time reduction in court fines.

We adjusted property tax revenue to account for greater increases in assessment years. The Hancock Amendment constrains excessive increases caused by reassessment. Our approach was to increment revenue by 1% in assessment years and .5% in other years. We also reduced revenues in 2024 to account for the reduction of the City tax for county services and the reduction in the County rate stipulated in the Better Together fiscal note. With these adjustments the Team's projection finds $123 million dollars less than the Better Together projection for property tax in 2032 with a shortfall of about $100 million dollars a year throughout the period.

The sales tax pattern is slightly different. It appears that the Team's estimate of Prop P addition to the sales tax yield after 2017[7] is slightly higher than the Better Together estimate. This produces a slightly higher sales tax yield for the Team across the projection period when both use the 1% yearly increment.

The Team is comfortable with the 1% metric based on recent historic trends, but recognizes there is a volatility to sales tax that renders long-term projection troublesome. Therefore, we did alternative projections of .5% and .75% per year. In these scenarios $20 to $25 million dollars less is collected per year over the projection period.

When all revenues are included, the Team projects $40 million dollars less revenue per year than the Better Together projection for 2032 with similar differentials each year. If the Team alternative scenario #1 (annual .5% sales tax increase) becomes more accurate, the revenue differential may approach $150,000,000.

The Team has not undertaken a "status quo" projection, but notes that both projections assume elimination of the earnings/payroll tax over ten years and reductions in property tax in both City and County. In 2017 the earnings/payroll tax was nearly $200 million dollars. The Team estimated the property tax reductions to be in the neighborhood of $70 million dollars.

Assuming other revenue sources remain the same in a status quo projection, this will remove almost $300 million dollars a year now utilized to provide public services.

Expenditure Estimation

This section examines the pre and post consolidation expenditure projections of Better Together as published in the fiscal note submitted.

---

[7] Better Together used 2017 as the base year. At this point most of the Prop P money was yet to be collected. The Team adjusted 2019 sales tax revenues to fully reflect Prop P collections, and this enhanced number became part of the base in 2022.

The Better Together major expenditure assumptions can be summarized as:

> Pro forma 2023 Metro City Budget nearly identical to 2017 Status Quo Expenditures projected forward to 2032 with 1% annual decrease. (expressed as 3% reduction offset by 2% inflation)
>
> Specific cost reduction areas are unspecified.
>
> Municipal district expenditures will decrease over time to reflect limited responsibility

The Fiscal Analysis Team (Team) built a spreadsheet model to analyze the impact of these expenditure assumptions on the provision of services in 2023 and subsequent years until 2032. This analysis examines both the Better Together expenditure projections as well as the working assumptions of the Team. The Team employed somewhat different assumptions related to key elements.

Treatment of Baseline Expenditures in Pro Forma Budget

The baseline initial expenditures for the 2023 and beyond pro forma budget appears to use the 2017 status quo expenditures as a starting point.[8] The Table 3 below illustrates expenditures by category remain fundamentally the same despite the five-year gap between 2017 and 2023.[9] The Team sought to present a more realistic view of an appropriate baseline expenditures for year one of the Metro City. In the Team model, the Status Quo 2017 expenditures were grouped according to function and entity.[10]

> **County Functions** were those listed as exclusive of STL County and/or City with no municipal expenditures. Board of Elections and Assessor are examples of this function currently provided by both City and County, but not by municipalities.
>
> **Judicial Functions** were those involving Courts, Prosecutors, and Jails in the City and County.
>
> **Municipal Functions**, such as police and parks, were those performed by City, County, and municipalities with listed expenditures for each.

---

[8] Reference 3 of the Fiscal Note (p 3 of Better Together Fiscal Note Spreadsheet) in referring to Revenue cites the FY 18 for City, FY17 County, 16-17 CAFRs for municipalities. Status quo expenditures (p4 of Better Together Fiscal Note Spreadsheet) do not list a source, but it appears to be the same 2016-18 data sets used for revenue baseline.

[9] The fire district expenditures have been included in the total because the fiscal note spreadsheet (p9) includes fire protection (districts and municipal) as first year expenditures, although the Metro City will not directly provide fire service. We anticipate a closer analysis of fire service finances in a subsequent report.

[10] The fire district expenditures have been included in the total because the fiscal note spreadsheet (p9) includes fire protection (districts and municipal) as first year expenditures, although the Metro City will not directly provide fire service. We anticipate a closer analysis of fire service finances in a subsequent report.

This division does not consistently divide all expenditures into appropriate categories[11], but does provide a sense of expenditures related to functional activities. The share of expenditures in each functional category are:

County Functions 22%
Judicial Functions 6%
Municipal Functions 72%

The expenditures by function were subject to different annual increments for each entity (City, County, Municipalities) for the years 2018 through 2022.[12] [13] The Status Quo expenditures did not appear to account for the new spending attributed to the public safety sales tax for each entity. Most of the expenditures associated with the tax were salary increases that become part of the base budget and not easily reduced compared to capital expenditures.[14]

In the Team budget projection, annual public safety sales tax revenue was added to the previous police expenditures in addition to the annual increment to reflect this addition to the base budget.[15]

Table 3
Status Quo vs First Year Expenditures
In Better Together Fiscal Note

	StatusQuo 2017	Team2018	Team2019	Team2020	Team2021	Team2022	BT 1st Yr 2023 Tot	Diff 2023/2022	Diff 2023/2017
COUNTY FUNCTIONS	$539,371,973	$546,381,512	$553,663,414	$561,069,624	$568,602,416	$576,264,106	$541,976,203	($34,287,903)	$2,604,230
JUDICIAL FUNCTIONS	$144,369,963	$146,415,422	$148,493,371	$150,604,376	$152,749,012	$154,927,866	$144,369,963	($10,557,903)	$0
MUNICIPAL FUNCTIONS	$1,733,912,710	$1,756,322,545	$1,856,350,819	$1,880,729,309	$1,905,487,004	$1,930,630,053	$1,787,762,486	($142,867,567)	$53,849,776
ALL FUNCTIONS	$2,417,654,646	$2,449,119,479	$2,558,507,604	$2,592,403,309	$2,626,838,432	$2,661,822,025	$2,474,108,652	($187,713,373)	$56,454,006

The table illustrates the difference between the Team projection of status quo expenditures in 2022 and the Better Together first year projection of expenditures. The Better Together 2023 expenditures are almost identical to the Status Quo 2017 baseline. The differences are a reduction in costs for municipal courts, addition of the emergency fund, additional fire protection money for the new St. Louis Fire District, and reduction in the "Other" category for the City of St. Louis. Most the additional expenditures are accounted for by additional debt service and new fire protection dollars.

---

[11] For example the catchall category of "Administration" includes areas of spending that may be attributed to other functions.
[12] City 1% per year, County 2% per year, Municipalities, 1.5% per year.
[13] Not all categories were subject to an increment. Those categories where the service provided was unclear were kept at the 2017 level. The county item for "Convention and Recreation" is an example
[14] A body camera purchase, for example, is a one-time expense. A base salary increase is a continuing expense.
[15] Since not all public safety sales tax revenue was dedicated to salary, the tax was multiplied by .75 in the 2019 base year, and this new amount became part of the baseline expenses going forward.

The more significant difference is in the comparison between the Team projection of spending for all functions in 2022 and the 2023 Better Together projection spending for all functions in 2023. This analysis found a significant shortfall in every function category with a total difference of $187.7 million-dollar difference between projected 2022 spending and the first year Metro City expenditures. This represents an approximately 7% reduction from 2022 to 2023.

For example, police expenditures are the largest single item representing 20% of all expenditures. The police shortfall represents about $116 million dollars. If police expenditures in 2023 were maintained at the level of 2022 spending to avoid a reduction in officers for this critical service, all other functions might need to be reduced by 20% to meet the target total expenditure.

In a scenario in which the Better Together 2023 proforma expenditures are used with a decrease of 1% a year across the board produces a much smaller yearly expenditure total than a scenario in which the Team projection of the status quo in 2022 is used for future estimations.

The Team finds the proposition that a yearly reduction in expenditures equal to 1% per year to be unrealistic. Police, public works, parks, and fire protection represent well over 50% of all expenditures, and these are labor intensive services. Annual budget reductions over a decade in these popular services seems unlikely.

Recent press reports indicate Louisville faces a significant budget shortage with police cuts among areas subject to reduction. Consolidation does not guarantee a world free of budget problems.[16]

The Team did not attempt to project an increase in debt service beyond the plan to reduce debt, especially with use of the earnings tax during the phase out period. The Better Together plan does not appear to provide for any future debt service over the first decade. Comparable cities across the country routinely use new debt for essential capital improvements. Road and bridge improvements, building retrofitting, and other capital projects will not be undertaken without the additional debt.

Projected Savings

A hallmark of the Better Together fiscal plan is projected savings of $55,000,000 annually with a cumulative savings of up to $1 billion annually. Our analysis leads to an opposite conclusion. We estimate that expenditures will quickly exceed revenues leading to either deficits or substantial reductions in service. Table 4 below is our comparative summary of revenue and expenditure projections from 2023 to 2032.

[16] https://www.courier-journal.com/story/news/politics/metro-government/2019/04/05/louisville-budget-belle-louisville-city-pools-other-summer-impacts/3369447002/

Table 4 Summary Comparison of Team and Better Together Financial Projections

Summary	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032
BT Revenue Projection	$2,321,663,940	$2,316,018,827	$2,295,754,852	$2,290,336,792	$2,308,320,990	$2,285,468,419	$2,276,206,068	$2,271,883,046	$2,267,791,480	$2,285,110,465
Team Revenue Projection	$2,337,799,484	$2,328,112,319	$2,297,543,509	$2,287,804,717	$2,302,760,104	$2,263,050,360	$2,255,195,797	$2,246,018,239	$2,230,746,916	$2,242,921,447

Difference BT - Team	$171,777,828	$319,112,146	$210,652,133	$226,237,759	$240,651,809	$268,815,838	$278,838,313	$418,593,342	$441,271,558	$457,820,395

In the early years the Team revenue estimates are higher than the Better Together projections. The subsequent reversal comes from less optimistic property tax estimates. If, however, the Team sales tax scenario #1 (using a .5% rather than a 1% yearly increment) is more accurate, the gap would be considerably higher.

However, the most significant difference is on the expenditure side. As noted above, the Team concluded the Better Together 2023 expenditure starting point is artificially low. If the 2017 starting point is projected forward with a modest inflationary increment and full accounting for expenditures relating to the voter approved public safety sales tax, then the 2023 baseline expenditures will be considerably higher.

The differences in expenditure projection in the early years are in the range of $200 to $250 million dollars a year. These, of course, would be unsustainable. Balanced budgets would quickly require large expenditure reductions in essential services. The Better Together analysis assumes an annual and cumulative expenditure reduction of 1% a year across the board for a decade. The Team basic analysis also assumes a 1% per year reduction after inflation adjustment, but finds higher levels of expenditure because of the larger baseline.

Conclusion

This report represents a first attempt to systematically analyze the financial projections of the Better Together merger plan. The Team did not find evidence to support the claim of tens of millions of dollars of annual savings with no loss of essential public services.

The Team revenue projections are somewhat higher than those of Better Together in the near term, but less in the later years. The baseline expenditure budget in the Better Together plan appears to start at an unrealistically low point, even before anticipated budget reductions attributed to economies of scale and employee attrition.

The Team's analysis concludes with the projection of an operating deficit of between $50 and $80 million dollars a year during the first decade, even with the projected 1% per year reduction. We do not believe such a shortfall would be sustainable over that period of time. Either new tax increases would be necessary, or major service cuts beyond 1% per year will be required.

Police, Public Works, and Parks represent 45% of all expenditures. The Judicial functions, including jails, account for another 6%, and the dedicated tax support for mass transit an additional 8%. It is difficult to reduce expenditures in these service areas, but the Metro City will not be able to balance its budget without cutbacks in these services.

The Team welcomes comments and critiques of its methodology and conclusions.

Please contact: Jim Brasfield jimbrasfield@mac.com

Your comments will be reviewed by the entire team.

Officials from the **City of Ballwin** indicated:

Under this initiative petition, they anticipate a reduction in revenues of $13,528,000:

Sales taxes $9,626,000
Other intergovernmental taxes $1,917,000
Licenses and permits $1,070,200
Court fines $600,000
Police and communications $219,000
False alarm fines $6,800
Grants $36,000
Miscellaneous $53,000

They anticipate a reduction in costs of $11,842,000:

Police $6,514,000
Public Works personnel $1,561,000
operating expenses $1,954,000
Administration court $170,000
other personnel $924,000
operating expenses $719,000

Without additional revenue sources, remaining public works operations would be cut ($1,180,000) and additional administrative staff.

Officials from the **City of Bellefontaine Neighbors** indicated their city will be stripped of all sales tax revenue, all revenue associated with their police department, courts, business licensing, any permits associated with zoning, will leave no monies for Capital Improvements, will unjustly leave their city with unfunded mandates which will eventually lead to dissolving their city as a whole. They submit the following information per our request. Their annual budget is $4,895,911.00. It is estimated if the proposed merger were to occur their city would lose 73.9% of the amount, or $3,618,078.23.

Officials from the **City of Chesterfield** indicated their city estimates implementing this petition would result in a deficit of $19,039,279 when compared with their city's 2019 budget as passed with a $904,374 surplus. This net decrease of an estimated $19,943,653 results primarily from sales taxes no longer being remitted to their city, offset in part, by the reductions of service cost in the courts, police, and street maintenance. In order to provide the services after the constitutional amendment, the deficit would necessarily be made up by a substantial dedicated real estate and personal property tax and/or a substantial increase in gross receipts taxes on utilities.

Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, Missouri 65101

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-054)
City of Crestwood, Missouri

Auditor Galloway:

The State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under Section 116.332 RSMO on all initiative petitions. Please accept the following suggestions for inclusion in the fiscal note as to how this proposal will impact local government in the St. Louis Region. The below example is for the City of Crestwood.

Background

The proposal as presented strips from all municipalities control over sales tax revenues and budgeting. The proposal gives the Metro City Mayor authority to release any funds "as necessary" to Municipal Districts, while also giving the Metro City Mayor line item authority over the budget, which is defined as the combined budget of St. Louis City, County, and all Municipal Districts. Any revenues associated with courts, police, business licensing and regulations, and roads are subject to the review and approval of a separate government entity. While the proposal also removes from "Municipal Districts" responsibility and costs for courts, police, business regulation including zoning and permits, the savings from these changes are not enough to make up for the expected loss of revenue due to losing control over sales taxes.

In Crestwood's case, the net result of changes proposed in the Constitutional Amendment is a deficit for the surviving Crestwood Municipal District of nearly $3.5 million per year. The Crestwood Municipal District would have no funds for capital improvements, such as maintaining our Government Center or Community Center. Crestwood also operates a Municipal Fire Department, and there would be no funds available for replacing our fire truck and other costly fire department equipment. Without secure funding for these necessary maintenance needs, the future cost of replacing or repairing them increases. A

roof leak not immediately repaired can reasonably be expected to cost significantly more if left unaddressed. The financial situation for the potential Crestwood Municipal District is bleak.

Another concern about the proposal is its treatment of infrastructure maintenance. The proposal strips public works responsibilities from Municipal Districts and instead assigns them to the Metro City. The City of Crestwood strives to maintain local infrastructure through annual maintenance activities. Under the proposal, the Municipal District would have to rely upon the Metro City to maintain infrastructure within its boundaries. Given the reduction in the County's property tax, coupled with the phase-out (and dedicated use) of St. Louis City's earning tax, there are significant doubts about the ability of the proposed Metro City to adequately fund infrastructure maintenance. As stated above, deferring critical maintenance only leads to greater costs in the long run.

With financial obligations significantly exceeding available revenues, the Crestwood Municipal District would have to give serious consideration to dissolving. The dissolution of the Crestwood Municipal District would mean, among other things, that fire services would cease to be provided to residents of the former Crestwood Municipal District by the Municipal District, and therefore would need to be resumed by some other entity - presumably, a neighboring Fire District. It should be noted that the property taxes for those neighboring districts are higher than that of the City of Crestwood/Crestwood Municipal District. Therefore, the dissolution of the City of Crestwood would almost certainly result in a property tax increase to our residents.

As opposed to dissolution, the Crestwood Municipal District would have to resort to substantial increases to property owners in the surviving Crestwood Municipal District. There are three options: 1) increasing the real estate and personal property tax; 2) increasing the gross receipts taxes on utilities (the costs of which are borne by that utility's customers), or 3) an increase in fees charged by the city for parks and recreation and fire inspections.

Adjusted 2019 Crestwood Budget showing the impact of the Better Together proposal:

Chart 1. Crestwood 2019 Budget and Showing Impact of Better Together Proposal.

CRESTWOOD

One Detjen Drive
Crestwood, MO 63126
(314) 729-4780

OFFICE OF THE CITY ADMINISTRATOR

2019 Budget	General Fund	Park Fund	Capital Fund	Sewer Lateral Fund
Revenues	9,535,667	1,828,695	1,445,690	139,600
Expenses	9,444,238	1,812,475	1,423,682	135,000
Transfers In (Out)	-	-	-	-
Surplus (Deficit)	91,429	16,220	22,008	4,600

Better Together Proposal	General Fund	Park Fund	Capital Fund	Sewer Lateral Fund
Revenues	3,980,531	654,350	19,000	139,600
Expenses	5,613,664	1,812,475	681,500	135,000
Transfers In (Out)	-	-	-	-
Surplus (Deficit)	(1,633,133)	(1,158,125)	(662,500)	4,600

Footnotes:

1. The "General Fund" comprises the bulk of Crestwood operations, traditionally including police, fire, planning and zoning, public works administration, facilities maintenance staffing, municipal court and administrative services.
2. The above chart is a restatement of what the Crestwood 2019 Annual Budget would look like assuming the Better Together proposal was in effect on January 1, 2019.
3. The only revenue in the Capital Fund would be interest income on the current balance of that fund. The Better Together proposal would require deficit spending in the Capital Fund until that fund's balance were exhausted, thereby eliminating any interest income and effectively terminating this fund.

Even if the Crestwood Municipal District were to increase its authorized property and utility taxes to their statutory maximums, the district could NOT cover the operational deficit created by the Better Together proposal. Below is a chart identifying available additional revenue sources:

Chart 2. Additional Revenues Available by Increasing Taxes.

Revenue Source Available	Statutory Maximum	Added Revenue Potential
Real Estate Taxes	1.00	1,156,563
Personal Property Tax	1.00	44,655
Utility Tax Increases	10%	1,018,117

All additional revenue sources generate an estimated $2.2 million per year. As shown in Chart 1 above, Crestwood is facing a deficit of $3.4 million per year. Thus, the Crestwood Municipal District would be left with a $1.2 million deficit. With no other revenue sources available, Crestwood would have to reduce services, by either:

1) Reducing its Parks and Recreation operations (total annual expenditures $1.8 million).
2) Cease all Fire Department operations (total annual expenditures $3.2 million).

CRESTWOOD

One Detjen Drive
Crestwood, MO 63126
(314) 729-4780

OFFICE OF THE CITY ADMINISTRATOR

Finally, a note concerning the proposed Metro City finances. As a Municipal District, Crestwood would comprise a portion of the new Metro City and our residents have a keen interest in the fiscal health of the new Metro City. There are significant unanswered questions and new obligations raised by this proposal that appear to be unaddressed, and appear to not be taken into account in the fiscal analysis previously prepared by the Better Together group. For example, the Metro City would, upon voter approval of the ballot initiative, take possession of a significant amount of property and personnel previously employed by municipalities. There is insufficient discussion of how insurance (health, general liability, auto liability, police liability, etc...), pension liabilities, worker's compensation, and more would be handled in the fiscal analysis prepared by Better Together. These liabilities are significant and create doubt which undermines the principal conclusion of grandiose savings under their proposal.

Sincerely,

Kris Simpson
City Administrator

State Capitol Building
Jefferson City, Missouri 65101

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-054)
City of Des Peres, Missouri

Dear Mrs. Galloway:

Please accept and consider the contents of this letter in drafting your fiscal note for initiative petition #2020-054 required under Section 116.332, RSMO on all initiative petitions. Specific example is given for the impact on the City of Des Peres.

SUMMARY:

The proposal as presented strips all existing municipalities in St Louis County of substantial revenues including sales tax and any revenues associated with courts, police, business licensing and regulations and roads which by current statutes are remitted to cities in St Louis County. While the proposal also strips from cities (now called Municipal Districts) all responsibility and associated costs for courts, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal district that will require either dissolution or substantial increases in real estate or utility taxes.

In the case of Des Peres, the net result of changes proposed in the Constitutional Amendment is a deficit for the surviving Des Peres Municipal District of nearly $6,000,000 per year with no funds allocated for capital equipment or projects which we expect would need to average $1,000,000 per year for parks, recreation and fire purposes and maintenance of public facilities. (Des Peres currently allocates $2.5 million per year from the capital improvement sales tax for capital equipment and projects with over 50% allocated to streets)

While some reduction in service levels and expenses would likely be appropriate post-merger, the end result would be a requirement to substantially increase local taxes on the property owners in the surviving Des Peres Municipal District focused on only three options: (1) a

12325 Manchester Rd. • Des Peres, Missouri 63131 • Phone (314) 835-6100 • Fax 835-6101
Relay Missouri 1-800-735-2966 TDD
www.desperesmo.org

substantial real estate and personal property tax); (2) a substantial increase in gross receipts taxes on utilities (passed thru to the underlying customers); or (3) an increase in fees charged by the city the area of trash services and parks & recreation fees.

For purposes of this analysis, we have adjusted the current 2019 Des Peres Budget to show the fiscal impact of Better Together Proposal if it were in place for this year.

2019 Budget	**General Fund**	**Park Fund**	**Operating Budget**	**Capital Budgets**
Revenues	11,833,825	6,269,400	18,103,2225	3,227,055
Expenses	(11,680,947)	(5,133,616)	(16,814,096)	(4,448,055)
Transfers In (Out)	29,000	(1,214,500)	(1,185,500)	1,213,000
Surplus (Deficit)	182,467	(78,816)	101,751	(8,000)
Post Better Together	**General Fund**	**Park Fund**	**Operating Budget**	**Capital Budgets**
Revenues	3,160,447	3,232,400	6,392,847	473,305
Expenses	(6,014,343)	(5,133,616)	(11,147,918)	(2,400,900)
Transfers In (Out)	0	(1,207,000)	(1,207,000)	1,234,500
Surplus (Deficit)	(2,853,896)	(3,108,175)	(5,962,000)	(729,095)

Footnotes:

1. The "General Fund" is a compilation of budgets for the General Fund, Fire Fund and Public Safety Fund
2. This analysis is a restatement of our current budget assuming the Better Together proposal was in effect on January 1, 2019. For purposed of the analysis, the 'General Fund" also includes revenues and expenses from the Fire Fund and Public Safety Fund since revenues from both of those funds are largely transferred into the General Fund.
3. For purposes of this analysis, transfers out of the Park Fund to the Debt Service Fund ($1,050,000) are not included in the analysis since all outstanding debt for The Lodge will be fully retired in early 2020.
4. The major transfer in 2019 in the Park fund is to our Capital Improvement Fund to finance a large scale capital project to refurbish one of our major parks.
5. Capital Budgets: the city has funded an average of $2.5 million in capital projects per year utilizing a 0.5% capital improvement sales tax. No funds will be available as a dedicated income to the capital fund post Better Together.

The Des Peres Municipal District could cover the operational deficit created by the Better Together petition IF the city were to take all of its authorized taxes for real estate, personal property and gross receipts to their statutory maximums:

Revenue Source Available	Statutory Maximum	Added Revenue Potential
Real Estate Tax	$ 1.00	4,148,734
Personal Property Tax	$ 1.00	451,157
Gross Receipts Tax on Utilities	10.0%	1,563,488
Sanitation Fee	Actual Cost of Service	887,625

Major assumptions used in this analysis are attached hereto as Exhibit "A" along with associated excel spreadsheets using our 2019 budget as our baseline.

The overall general impact of the proposal on local government finance is to shift all sales taxes from existing cities (surviving as "municipal districts") projected at over $300 million per year to the Metropolitan City requiring the most "municipal districts" face the options of either substantially decreasing fire-ems and parks & recreation services or seek substantial increases in property taxes to finance municipal services.

FISCAL IMPACT - THE METROPOLITAN CITY

The Fiscal Impact note previously filed by Unite STL (Christopher Pieper) with the State Auditor suggests that the measure will "result in savings for local governments of up to $55 million annually in 2023 and up to $1 billion annually by 2032." (Petition 2020-042). The revised petition filed March 25, 2019 makes no substantive changes in the structure or finances of the proposed Metropolitan City and one would assume that the fiscal impact statement initially filed will be reiterated as a filing for the new petition (2020-054).

That original fiscal note is flawed in a number of its basic financial assumptions and failed to consider the impact on all governments in the region. The financial plans as presented will require that the "municipal districts" will in total be required either to substantially reduce their level of services being provided OR seek substantial tax increases in property taxes to support Fire & EMS and Parks & Recreation functions absent the current funding mechanism provided by various sales taxes which are being shifted to the Metropolitan City.

The fiscal analysis submitted by UniteSTL is flawed and unrealistic in the following respects:

1. The analysis used in projections for all governmental entities in the 2023 analyses uses as a baseline of current budgets in 2016 and 2017 both of which pre-date the adoption of Prop P (0.5% sales tax in St Louis County in 2017). While their analysis updates revenues to reflect the $84 million generated from the tax annually, the analysis does not adjust the expense projections for 2023 to reflect how those funds were allocated in 2018 (the first full year of receipt). In many cases, those funds were allocated substantially to recurring costs associated with police staffing, salaries and benefits.

2. The analysis uses "status quo" revenues and expenses for comparative purposes are based on 2016-17 revenues & expenses. However, the plan as submitted defines the 2021 budget as being the same as the 2019 budgets. The numbers used as "status quo" for calculation of "savings" in year one and on which their preposterous claims of dramatic savings of $55.0 million. That analysis ignores the impact of inflationary growth in expenses for the 5 years from 2016 to 2021.

   Given that the lion share of operating budgets are personnel related – that assumption must be that no adjustments in compensation have been or will be made from 2016-2019. Their analysis also ignores the overall impact of adoption of Prop P (0.5% sales tax for public safety) in St Louis County representing $84 million. Their analysis incorporates the additional revenue into 2021 projections but fails to recognize the additional public safety expenditures (much of which are recurring costs for personnel) for 2018 and forward to 2021.

3. The analysis of revenue growth shows an assumed 2.0% growth in real estate tax revenue which they states is attributed to "new construction". That assumption runs counter to the last decade in which total assessments (including increases due to new construction and reassessment) have grown only 0.17% annually since 2009. That assumption overstates property tax revenue by over $5.5 million per year

4. Sales Tax projections assume a 1.0% growth line going forward. While consistent with historic growth in the last decade, the projections fail to assume any impact of the continuing erosion of local sales tax revenues due to internet sales which are growing

exponentially and that growth is not anticipated to diminish going forward. National trends are a declining reliance on "brick and mortar" sales taxes.

The sales tax assumptions are also flawed by lumping all sales tax revenues into a single line-item and co-mingling those approved for a dedicated purpose (Fire, Parks, Capital, Public Safety, ECC Fund, Children's' Fund) into a single pot of money for the Metro City without regard for their restricted uses.

The proposal as presented redirects 100% of sales taxes from existing cities to the new Metropolitan City estimated at $300 million per year in the St Louis County area of the new city. Sales tax rates vary substantially among existing cities in St Louis County:

Sales Tax	Rate	Applied	# Cities with Tax
State Sales Tax	4.2250%	County Wide	
General- County	3.0125%	County Wide	
Public Safety - County	0.50%	County Wide	
General Purpose	0.25%	Municipal Districts	44
Fire Protection	0.25%	Municipal Districts	17
Parks & Storm Water	0.50%	Municipal Districts	55
Capital Improvements	0.50%	Municipal Districts	79
Econ Development	0.50%	Municipal Districts	13
Public Safety (Police)	0.50%	Municipal Districts	1 - Eureka

Footnote: Rates in the City of St Louis also differ dramatically from those of the County Municipalities

The sales tax projections in the UniteSLT analysis states that current sales tax rates in both the Metro City (St Louis City and St Louis County) and all "municipal districts" remain at current levels. Their projections appear to assume no equalization of rates by metro city over time. That would not be tenable that different sales tax rates for fire, parks, capital and economic development would be applied in some but not all municipal districts or in the metro city as a whole. At some point in time, rates will need to be normalized across the Metropolitan City.

5. Other revenues from sources such as business licenses, permits etc... are based on 2016 budgets and not 2021 estimates. Those revenues remain constant in their projections and at the same levels as the base year. Existing license fees imposed by a municipal district remain at pre-merger levels and are never equalized by the Metropolitan City? Current business license rates in the City of St Louis, St Louis County and many of the "municipal districts" are substantially different and logic would require that they be equalized by the new government over some short period of time.

6. The fiscal note for the Metropolitan City assumes an annual reduction in operations of -1.0% (3% savings due to merger efficiencies offset by 2.0% inflation) but nowhere does it suggest where those savings are derived. The general assumption is "trust us" that they will materialize. Their fiscal note makes no mention of how those cuts will be achieved or what the impact is on service levels in the Metropolitan City or resulting municipal districts. However, typically police budgets across the region represent roughly 50% of municipal expenditures suggesting that a substantial portion of those reductions will need to come in police operations.

7. The fiscal note provides all current debt obligations of the Metropolitan City are paid off using earnings tax revenues and assumes that no new debt will be incurred by the new Metropolitan City going forward. This runs counter to experiences in other metro cities in the country (including Indianapolis and Nashville) which continue to incur debt and runs counter to experience logic that a larger government can finance everything with cash and no new debt.

8. The financial proforma provided by UniteSTL does not provide for any transitional costs associated with the merger itself. Any consideration of a large scale merger, whether involving governments or private entities, will require substantial costs during the transition period for planning and execution. In large scale mergers, corporations typically take huge write-offs against earnings during transition to reflect those high transitional costs.

SUGGESTED LANGUAGE FOR FISCAL NOTE

These are but a few of the flaws in the Fiscal Note by UniteSTL and should be considered by the State Auditor in drafting any fiscal note that will accompany a ballot proposition. Perhaps an appropriate fiscal note might read:

> *The constitutional amendment is so broad and vague that the fiscal impact cannot be reasonably calculated. However, individual St Louis County Municipalities can expect decreased revenues that exceed savings with transfer of $300 million in sales tax revenues from municipalities to the Metropolitan City likely necessitating substantial tax increases in the municipal districts. The overall savings to the taxpayers of the Metropolitan City is unknown in-as-much as decisions on taxation, finances and service levels going forward are not defined in the amendment and are entirely dependent on decision of the future Metropolitan Council. State income tax revenue is estimated to increase by $2.5 million to $7.0 million as a result of repeal of the city earnings tax.*

At best any fiscal note on this constitutional amendment should be that the proposal is so vague and broad that a fiscal impact cannot be reasonably projected. It certainly should not simply regurgitate the claims of UniteSTL that "savings are unknown but estimated to be as much as $1 billion annually by 2032" which suggests that this is a conclusion of the State Auditor's Office.

If you have any questions regarding our analysis please feel free to contact me by e-mail at dharms@desperesmo.org and I will respond as quickly as possible.

Sincerely,

Douglas J. Harms
City Administrator
City of Des Peres, Missouri

EXHIBIT A
DES PERES, MISSOURI

MAJOR ASSUMPTIONS IN THE ANALYSIS:

REVENUES:

Sales Taxes – currently the city receives the proceeds from a 1.25% general sales tax (shared in St Louis County) that will flow to the new Metropolitan City under the proposal. In addition, the city has imposed a 0.25% Fire Sales Tax, a 0.5% Parks Sales Tax and a 0.5% Capital Sales Tax (shared in St Louis County)

Under the proposal as detailed in the proposed constitutional amendment, all sales and use taxes will go to the new Metropolitan City and no longer to current municipalities. The proposal provides that those taxes remain in place in the areas of the municipal districts and the Metro City shall remit to the municipal district those sales tax revenues necessary to meet outstanding obligations of any kind (which we assume to mean pensions and bonds tied to the revenue source) and **may** remit any remaining balance to the municipal district **as necessary** for providing municipal services within the district. Since the pass-thru of sales and use tax is discretionary and associated with a finding of "necessity" by the new Metropolitan City, these projections assume that no pass thru for dedicated sales taxes for municipal services except the Fire Sales Tax since the Metro City is not responsible for any fire services.

Intergovernmental Revenues – are assumed under the proposal to be redirected by the state to the Metro City since the Des Peres Municipal District is not a city under state law. Further, most of the shared revenues from the state are related to transportation – a function defined as a service reserved to the Metro City and not the municipal districts.

Licenses – all business license fees including merchants and liquor licenses are under the proposal the sole jurisdiction and are to be levied by the Metro City and not the municipal districts.

Permits – the proposal provides that all "public works" is reserved to the Metro City and not a function of the municipal district. While that term is not defined in the proposal, the prevailing document for interpretation is the current St Louis County Charter which provides for a Department of Public Works with responsibility for all "permits" which are assumed to include all building and related permits. That revenue, along with the responsibility for those services, would appear to be assigned to the Metro City and not the municipal district

Municipal Court - all municipal court functions are assigned by the proposal to the Metro City and one would then assume that all fines, costs and forfeitures would also flow to the Metro City.

Contracts - Des Peres has a contract with a Community Improvement District to provide additional police protection to West County Center. That contract and related revenue would no longer be collected since municipal districts are not allowed to provide police services.

EXPENSES

The proposal assigns as the sole responsibility of the Metropolitan City certain functions currently provided by the City of Des Peres including police, courts, business licensing and regulation, transportation, public works and economic development. Therefore, it is assumed that 100% of those costs for the city contained in its current budget for both operating and capital purposes will no longer be necessary and the Des Peres Municipal District budget reduced accordingly.

Expenses relating to Fire and EMS services, Parks & Recreation and Solid Waste Collection are retained as municipal district services and the costs associated with each such service are carried forward to the adjusted municipal district budget. In this analysis, the budget for Public Safety is assumed to be split evenly between the Police function and the Fire-EMS function. We believe that assumption not to be true since Des Peres enjoys some economies by having a combined Department of Public Safety with all employees cross trained and utilized in both functions, rather than separate police and fire agencies and expect that the cost of a stand alone Fire-Ems department to be greater than half cost of our current combined department. expect that the cost to operate a stand- alone Fire Department in lieu of our combined Public Safety Department.

I would assume that an additional $750,000 could be reduced from our operations budget due to a 50% in the reduction of administrative costs including general administrative and finance functions supporting operating departments resulting from the service levels to be provided by the successor Des Peres Municipal District.

Pensions – Des Peres Municipal Pension Plan is a 401 Defined Contribution Plan and there are no unfunded pension liability associated therewith to be carried over to the new municipal district. Current obligations are embedded in departmental operations budgets.

Debt Service – for purposes of this analysis, Des Peres current obligations for Debt Service ($1,455,000) in 2019 has been deleted from the analysis since all outstanding debt will be retired in 2020 before the effective date of the proposed reorganization.

Capital Improvements – the City of Des Peres currently receives $2.5 million from the capital improvement sales tax none of which is dedicated to repayment of outstanding general Obligation Bonds or Certificates of Participation. It is assumed that the proceeds from the capital improvement sales tax would not be remitted to the municipal district by Metro City. The adjusted 2019 budget deletes all projects or equipment relating to functions which are transferred to the metropolitan city (the largest of which is transportation and streets) and includes only equipment relating to fire-ems, parks & recreation and maintenance of public buildings being retained by the municipal district.

Officials from the **City of Eureka** indicated they have reviewed the initiative petition and determined the estimated costs this measure would have on their city. Based on the change from the original petition that addressed how the executive person would be elected, there is no change to the financial impact this would have on their city. They provided the following suggestions for inclusion in the fiscal note as to how this proposal will impact their city that have been submitted with prior fiscal notes.

The proposal as presented will strip all sales tax revenue not associated with debt from their city. During the fiscal year end (FYE) 2019, their city would lose approximately $2,525,000 of general sales tax, not associated with debt, under the initiative plan. Sales tax revenues fund Administration, Code Enforcement, Economic Development, Police, Court and Public Works. Under the proposed initiative, the Metropolitan City will assume all departments except for Administration. It is budgeted that the Administration Department will expend approximately $1,100,000 on payroll and operating expenses during FYE 2019, which would be funded by real property, personal property and gross tax receipts under the initiative plan. Their city estimated real property, personal property and gross receipt tax receipts are $2,317,000 for FYE 2019. Under the plan, it is unclear if this surplus will be retained by their city for future operating and capital expenses. In the event that there is a deficit, the District could be required to increase local taxes on personal property, real property and gross receipt taxes.

Their city currently receives approximately $1,200,000 from Capital Improvement Sales Tax, of which $685,700 is committed to paying off debt for Water System Enhancements and the Timbers Recreation Center. The remainder is used to fund capital expenditures such as vehicles, equipment, storm water management, Parks Department projects and Water and Sewer Department projects. The loss of this revenue will impact the water and sewer systems and the Park Department as noted below.

Their city operates a water and sewer system. The revenues and expenditures are recorded in two Enterprise Funds. It is projected that the water and sewer system Enterprise Funds will have to be subsidized by the General Fund in FYE 2021. Under the initiative petition, it is unclear how their city could subsidize the shortfall, if at all. The Capital Improvement Sales Tax funds capital improvements and major repairs to infrastructure of the water and sewer systems. The loss of the Capital Improvement Sales Tax not associated with debt would prohibit capital improvement projects and major repairs to the water and sewer systems. It is possible that the water and sewer systems would have to be sold, creating a loss of service or significant rate increases to the residents of their city.

The Parks Department will require a transfer beginning in FYE 2020 from the Capital Sales Tax fund to fund capital projects in the amount of $500,000. This transfer is considered in perpetuity. With the loss of this sales tax, the Parks Department would not be able to maintain or upgrade capital items. This would likely result in a loss of service or increased fees to the residents of their city or the Park Department being absorbed by the Metropolitan City.

There are other costs that are not easily measured. Under the plan, the Metropolitan City would assume all of the assets of their city. This will eliminate most to their city's balance sheet creating an unstable financial position. This could result in an elimination or withdraw of bond rating and higher borrowing costs. Since it is unclear how outstanding obligations are to be handled, the sources of revenues described in the Official Statement will change, and management of their city's finances and economic development described in the Official Statement will change, making their city vulnerable to investor litigation.

This initiative would eliminate any control their city would have over economic development. Costs associated with the loss of economic development cannot be identified at this time.

Officials from the **City of Florissant** indicated:

CITY OF FLORISSANT

Re: Fiscal Note addressing Initiative Petition 20-054 Proposing to Amend Article VI
City of Florissant, MO

Dear Ms. Galloway:

It is our understanding that the State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under section 116.332 RSMO on all initiative petitions. Please accept the following information for inclusion in the fiscal note as to how this proposal will impact local government and specifically City of Florissant.

This proposal strips all existing municipalities in St. Louis County of substantial revenues including sales tax and any revenues associated with Courts, Police, Business Licenses and Regulations, Roads & Bridges which by current statutes are remitted to cities in St. Louis County.

While the proposal also strips from cities (Municipal Districts), all responsibility and associated costs for; Court, Police, Business Regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining Municipal District.

While some reduction in service levels and expenses would be appropriate, the end result would be requirement to substantially increase local taxes on the property owners in the surviving Florissant Municipal District focused on only three options: 1) a substantial real estate and personal property tax; 2) a substantial increase in gross receipts taxes on utilities (passed through to the underlying customer); and/or 3) an increase in fees charged by the Florissant Municipal District for parks and recreation fees.

In the case of Florissant, the net result of the changes proposed in the Constitutional Amendment is a deficit to the surviving Florissant Municipal District of nearly $3.8 Million annually with no funds allocated for capital equipment or projects.

Florissant currently allocates over $3.6 Million from the Capital Improvement Sales Tax for Capital Improvement Projects. Post Better Together the City will not have the funds for necessary on-going capital improvements.

Additionally, Florissant currently allocates over $3.5 Million from the Park Improvement Sales Tax to support its extensive parks and recreation system and will result in the loss of this valuable public amenity.

Attached you will find the City of Florissant Resolution #1007 passed by the Florissant City Council and Mayor opposing unifying the City of St. Louis and St. Louis County into a new form of government currently referred to as a "Metropolitan City" through Constitutional Amendment.

If you have any questions regarding our analysis please feel free to contact me at 314-839-7610 or email kjohnson@florissantmo.com.

Sincerely,

Kimberlee L. Johnson

Kimberlee L. Johnson
Director of Finance
City of Florissant, Missouri

INTRODUCED BY COUNCIL AS A WHOLE
FEBRUARY 25, 2019

RESOLUTION NO. 1007

A RESOLUTION OPPOSING UNIFYING THE CITY OF ST. LOUIS AND ST. LOUIS COUNTY INTO A NEW FORM OF GOVERNMENT, CURRENTLY REFERRED TO AS A "METROPOLITAN CITY," THROUGH CONSTITUTIONAL AMENDMENT, AS IT WOULD DISENFRANCHISE LOCAL VOTERS BY SUBMITTING A PURELY LOCAL MATTER TO A STATE-WIDE REFERENDUM AND SUBJUGATE THE WILL OF THE VOTERS IN THOSE POLITICAL SUBDIVISIONS TO THE WILL OF THE MANY.

WHEREAS, the Florissant City Council and Mayor promote the goals of economic development, public safety, and efficient use of tax dollars in local government and believes that such decisions in furtherance of those goals must be made directly by the voters of those localities or through their elected officials; and

WHEREAS, the Florissant City Council and Mayor believe, as did President Thomas Jefferson, that "The government closest to the people serves the people best," and believes that local government is the foundation of American democracy, designed specifically to be accountable, available, and answerable to the taxpayer; and

WHEREAS, the Florissant City Council and Mayor believe that the right to vote is fundamental to the citizens of our nation, and the right to vote on purely local interests is fundamental to the citizens of those specific localities; and

WHEREAS, the Florissant City Council and Mayor maintain that, when matters pertain solely to the interests of the citizens of a specific local governmental entity, the will of those citizens should not be subjugated to the will of the many who do not necessarily share those specific, common interests; and

WHEREAS, the Florissant City Council and Mayor have concerns regarding the proposal to unify the City of St. Louis and St. Louis County into a new form of government, currently referred to as a "Metropolitan City," through an amendment to the Missouri Constitution; and

WHEREAS, the Florissant City Council and Mayor have concerns that the process currently proposed for such action would entail a state-wide referendum to decide matters concerning only the citizens of the City of St. Louis and St. Louis County; and

WHEREAS, the Florissant City Council and Mayor note that a process currently exists under the Missouri Constitution which allows the voters of the City of St. Louis and St. Louis County, independently, to approve and effectuate a substantial portion of the changes necessary to complete the merger proposed; and

WHEREAS, the Florissant City Council and Mayor contend that this process outlined in Article VI, Sections 30(a)-30(b) of the Missouri Constitution (more commonly known as the "Board of Freeholders" process which the Municipal League of Metro St. Louis is currently collecting signature petitions for.) grants the citizens of these political subdivisions the opportunity to petition the local governments for the changes desired and to approve these changes by a referendum of local voters.

NOW, THEREFORE, BE IT RESOLVED BY THE FLORISSANT CITY COUNCIL AND MAYOR AS FOLLOWS:

Section 1. The Florissant City Council and Mayor hereby oppose unification of the City of St. Louis and St. Louis County into a new form of government by means that would not allow the citizens of those political subdivisions to vote on their fate independently first, as it would disenfranchise local voters by submitting a purely local matter to a state-wide referendum; subjugate the will of the voters in those political subdivisions to the will of the many; and raise potential issues under the Equal Protection Clause of the Fourteenth Amendment of the United States Constitution.

Section 2. The Florissant City Council and Mayor recommend that, to the extent possible, any process to unify the City of St. Louis and St. Louis County first be achieved by local petition, proposal, and popular vote through a "Board of Freeholders" process pursuant to Article VI, Sections 30(a)-30(b) of the Missouri Constitution, so that the local voters directly affected by such unification may have their say before being subject to the vote of the entire state.

Section 3. Florissant City Staff shall forward a certified copy of this Resolution to Missouri state legislators and/or representatives and as many affected stakeholders who can be identified.

PASSED THIS 25TH DAY OF FEBRUARY 2019.

Jeff Caputa
Council President

Thomas P. Schneider
Mayor

ATTEST:

Karen Goodwin, MPPA/MMC/MRCC
City Clerk

Officials from the **City of Hazelwood** indicated the analysis that they performed to determine their response is in the following financial information. All of the figures presented were taken from the City of Hazelwood Budget for the FYE ended June 30, 2019.

City of Hazelwood

Revenues lost to Municipal City		Costs turned over to Metropolitan City		
General Fund				
1% Sales Tax A	1,948,430	Police	8,483,044

WHERE COMMUNITY AND SPIRIT MEET

April 5, 2019

Honorable Nicole Galloway
State Auditor
State Capital Building
Jefferson City, Mo 65101

RE: Fiscal Note regarding Constitutional amendment (20-042) City of Kirkwood, Missouri

Dear Ms. Galloway:

I understand that the State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under section 116.332 RSMO on all initiative petitions. Please accept the following suggestions for inclusion in the fiscal note as to how this proposal will impact local government in the St. Louis region. Specific example is for the City of Kirkwood.

SUMMARY:

The proposal as presented strips all existing municipalities in St. Louis Count of substantial revenues including sales taxes and any revenues associated with courts, police, business licenses, and regulations and roads which by current statutes are remitted to cities in St. Louis County . While the proposal also strips from cities (now called Municipal Districts) all responsibility and associated costs for court, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal district that may require service reductions and/or substantial increases in real state or utility taxes.

In the case of Kirkwood, the net result of the changes proposed in the Constitutional Amendment is a deficit for the surviving Kirkwood Municipal District of nearly $2,144,551 per year with no funds allocated for capital equipment or projects. (Kirkwood currently allocates $4.7 million per year from the capital improvement sales taxes for capital equipment and projects) Post Better Together we will not have the

funding for crucial capital equipment. For example in our fire department we have scheduled replacements of ambulances and fire rescue pumpers. Post Better Together leaves us with the responsibility of fire rescue and emergency response with no funding for any of the equipment needed for this operation.

While some reduction in service levels and expenses would be appropriate, the end result would be requirement to substantially increase local taxes on the property owner's in the surviving Kirkwood Municipal District focused on three options: 1) a substantial real estate and personal property tax; 2) a substantial increase in gross receipts taxes on utilities (passed thru to the underlying customer); an increase in the fees charged by the Kirkwood Municipal District for parks & recreation fees.

2019/2020 Budget	General Fund	Capital Improvement	Parks/Stormwater Capital	Park Fund
Revenues	23,182,471	6,299,750	2,644,822	2,024,532
Expenses	24,994,874	5,687,796	2,010,687	1,673,874
Transfers IN (Out)	2,055,489	1,966,845	(1,030,000)	621,120
Surplus/(Deficit)	243,086	2,578,799	(395,865)	971,778
Post Better Together	**General Fund**	**Capital Improvement**	**Parks/Stormwater Capital**	**Park Fund**
Revenues	13,094,960	-	1,318,307	1,474,532
Expenses	15,040,169	-	1,318,307	1,673,874
Transfers IN (Out)	-	-	-	71,120
Surplus/(Deficit)	(1,945,209)	-	-	(199,342)

1. Expenses in pre Better Together 2019/2020 General Fund are estimated at 95% of budgeted amount.

2. Parks/Stormwater monies(post Better Together) are for debt service

3. Kirkwood's capital improvement and parks/stormwater capital improvement sales taxes will no longer be available post Better Together.

4. Park Fund would lose a transfer from the Parks/Stormwater Fund (post Better Together) in the amount of $550,000

The Kirkwood Municipal District to cover our proposed post Better Together deficit would need a substantial increase in real estate taxes and/or utility gross receipts taxes.

If you have any questions regarding the City of Kirkwood's analysis please call me at 314-822-5833 or e-mail me at adamsjr@kirkwoodmo.org.

Sincerely,

John Adams

April 4, 2019

Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, Missouri 65101

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-054)
City of Overland, Missouri

Dear Mrs. Galloway:

Please accept and consider the contents of this letter in drafting your fiscal note for initiative petition #2020-054 required under Section 116.332, RSMO on all initiative petitions. Specific example is given for the impact on the City of Overland.

SUMMARY:

The proposal as presented strips all existing municipalities in St Louis County of substantial revenues including sales tax and any revenues associated with courts, police, business licensing and regulations and roads which by current statutes are remitted to cities in St Louis County. While the proposal also strips from cities (now called Municipal Districts) all responsibility and associated costs for courts, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal district that will require either dissolution or substantial increases in real estate or utility taxes.

In the case of the City of Overland, the net result of changes proposed in the Constitutional Amendment is a ***deficit*** for the surviving Overland Municipal District of approximately $362,767.00, across all funds, per year with no funds allocated for capital equipment or projects. We would anticipate the need to average $330,000.00 per year for parks, recreation and maintenance of public facilities. Overland currently allocates approximately $950,000.00 per year from the capital improvement sales tax for capital equipment and projects with over 50% allocated to streets.

While some reduction in service levels and expenses would likely be appropriate, the result would require a significant increase in local taxes on the property owners or an increase in fees for the user of our parks and recreation facilities. Potential areas of increase would be limited to only three options: (1) a substantial real estate and personal property tax); (2) a substantial increase in gross receipts taxes on utilities (passed thru to the underlying customers); or (3) an increase in fees charged by the city related to parks & recreation fees.

For purposes of this analysis, we have adjusted the current FY 18/19 Overland Budget to show the fiscal impact of Better Together Proposal if it were in place for this year.

FY 18/19 Budget

Current	General Fund	Park Fund	Cap. Imp. Fund	Total
Revenues	$8,566,045.00	$1,000,100.00	$950,100.00	$10,516,245.00
Expenses	$8,517,933.00	$990,390.00	$794,700.00	$10,303,023.00
Surplus (Deficit)	**$48,112.00**	**$9,710.00**	**$155,400.00**	**$213,222.00**

After BT	General Fund	Park Fund	Cap. Imp. Fund	Total
Revenues	$2,580,475.00	$0.00	$0.00	$2,580,475.00
Expenses	$1,627,617.00	$979,625.00	$336,000.00	$2,943,242.00
Surplus (Deficit)	**$952,858.00**	**($979,625.00)**	**($336,000.00)**	**($362,767.00)**

Footnotes:

1. This analysis is a restatement of our current FY 18/19 Budgets assuming the Better Together proposal was in effect on July 1, 2018.
2. The General Fund is used to account for all general operating expenses for all departments except for the Parks and Recreation Department, Community Center, Summer Youth Program and building maintenance at 2500 Ashby Road.
3. The Park Fund is used to account for all expenses related to the Parks and Recreation Department, Community Center, Summer Youth Program and building maintenance at 2500 Ashby Road.
4. Post Better Together, all expenses related to Parks and Recreation Department, Community Center, Summer Youth Program and building maintenance at 2500 Ashby Road would have to be paid for out of the General Fund as revenue from the Parks Sales Tax would go to the Metro City not the Overland Municipal District.
5. Capital Budgets: the city has funded an average of $950,000.00 in capital projects per year utilizing a 0.5% capital improvement sales tax. No funds will be available as a dedicated income to the capital fund post Better Together.

Major assumptions used in this analysis are attached hereto as Exhibit "A" along with associated excel spreadsheets using our FY 18/19 budget as our baseline.

If you have any questions regarding this analysis, please feel free to contact me at (314) 227-2911 or by e-mail at jmcconachie@overlandmo.org.

Sincerely,

Jason McConachie
City Administrator
City of Overland, Missouri

CITY OF OVERLAND
9119 Lackland Road, Overland Mo 63114

EXHIBIT A

MAJOR ASSUMPTIONS IN THE ANALYSIS:

REVENUES:

Sales Taxes – Currently the city receives revenue from a 1.25% general sales tax (shared in St Louis County), a 0.5% Parks Sales Tax and a 0.5% Capital Sales Tax (shared in St Louis County).

Under the proposed constitutional amendment, all sales and use taxes will go to the new Metropolitan City and no longer to current municipalities. The proposal provides that those taxes remain in place in the areas of the municipal districts and the Metro City shall remit to the municipal district those sales tax revenues necessary to meet outstanding obligations of any kind (which we assume to mean pensions and bonds tied to the revenue source) and may remit any remaining balance to the municipal district as necessary for providing municipal services within the district. Since the pass-thru of sales and use tax is discretionary and associated with a finding of "necessity" by the new Metropolitan City, these projections assume that no pass thru for dedicated sales taxes for municipal services.

Utility Taxes – Assumes no decrease or rate cap in Utility Tax Rates in future years. The concept of a reduction or a rate cap routinely seems to be a topic of discussion by the Missouri General Assembly. Any reduction or rate cap below our current rates would result in a reduction in revenue for the Municipal District.

Intergovernmental Revenues – are assumed under the proposal to be redirected by the state to the Metro City since the Overland Municipal District is not a city under state law. Further, most of the shared revenues from the state are related to transportation – a function defined as a service reserved to the Metro City and not the municipal districts.

Licenses – all business license fees including merchants and liquor licenses are under the proposal the sole jurisdiction and are to be levied by the Metro City and not the municipal districts.

Permits – the proposal provides that all "public works" is reserved to the Metro City and not a function of the municipal district. While that term is not defined in the proposal, the prevailing document for interpretation is the current St Louis County Charter which provides for a Department of Public Works with responsibility for all "permits" which are assumed to include all building and related permits. That revenue, along with the responsibility for those services, would appear to be assigned to the Metro City and not the municipal district

Municipal Court - all municipal court functions are assigned by the proposal to the Metro City and one would then assume that all fines, costs and forfeitures would also flow to the Metro City.

EXPENSES:

The proposal assigns as the sole responsibility of the Metropolitan City certain functions currently provided by the City of Overland including police, courts, business licensing and regulation, transportation, public works and economic development. Therefore, it is assumed that 100% of those costs for the city contained in its current budget for both operating and capital purposes will no longer be necessary and the Overland Municipal District budget reduced accordingly.

Expenses relating to Administration, Finance, MIS and Parks & Recreation and pension obligations are retained as municipal district services and the costs associated with each such service are carried forward to the adjusted municipal district budget. One can assume that additional reductions related to Administration, Finance, MIS and Parks & Recreation may occur in the future, however given that the proposal does not address a multitude of operational issues of the new metro city, those assumptions have not been incorporated into this analysis.

Pensions – The City of Overland maintains both a non-uniform and uniform (Police) pension plans. The Non-Uniform Pension Plan is funded through General Fund revenues of the City at a cost of approximately $500,000.00 per year. The Uniform Pension Plan is funded through a dedicated property tax at a cost of approximately $650,000.00 per year.

The proposal notes that the financial obligation related to the pensions are the responsibility of the Municipal District and that *any tax, license, fee or special assessment levied or imposed for the satisfaction of the financial obligation shall continue to be levied or imposed within the territory until such obligation is satisfied.* What is unclear is what specific "tax" is being referred to here. For the purposes of this analysis the assumption is that the tax being referred to is a property tax as that is the only tax that a municipal district will be authorized to levy.

Capital Improvements – the City Overland currently receives approximately $950,000.00 from the capital improvement sales tax. It is assumed that the proceeds from the capital improvement sales tax would not be remitted to the municipal district by Metro City. The adjusted FY 18/19 Budget deletes all projects or equipment relating to functions which are transferred to the metropolitan city (the largest of which is transportation and streets) and includes only equipment relating to street lights, parks & recreation and maintenance of public buildings being retained by the municipal district.

Parks Sales Tax – The City currently receives approximately $1,000,000.00 from the Parks Sales Tax. It is assumed that the proceeds from the Parks Sales Tax would not be remitted to the municipal district by Metro City. The adjusted FY 18/19 Budget transfers all expenses currently accounted for the in the Park Fund to the General Fund. Those expenses include costs associated with the operation of the Parks Department, Community Center, and maintenance of 2500 Ashby Road. Expenses related to the Summer Youth Program that are previously accounted for in the Park Fund would be eliminated.

CITY OF OVERLAND - REVENUES

RE: Fiscal Note for Initiative Petition 20-054 proposing to amend Article VI

Dear Ms. Galloway,

It is my understanding the State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under Section 116.322, RSMO on any and all initiative petitions.

Please accept the following for inclusion in the fiscal note for the local government impact of the proposed Constitutional Amendment to Article VI proposed by Better Together, Initiative Petition 20-054.

SUMMARY

The proposal seems to sweep all local sales tax revenues, use taxes, local Road & Bridge sales taxes, business and merchant license fees, and any revenues associated with municipal policing and court fines from all municipalities within St. Louis County, except perhaps the Fire & EMS quarter-cent sales tax and Parks & Stormwater half-cent sales tax. The proposal also removes the power for municipalities in St. Louis County to provide policing, zoning, property maintenance inspections/regulations, permitting, and courts services. It allows for Fire, EMS, parks and recreation, and solid waste removal services to be provided by Municipal Districts, but very little funding to provide such without significant increase in property and real estate taxes.

For the City of Richmond Heights, the net result proposed in the Constitutional Amendment is a deficit of over $5.5 million per year with no revenues for solid waste removal, or capital projects such as road and bridge repairs. Currently, Richmond Heights allocates over $1 million annually for road and bridge maintenance and $1 million annually for solid waste/trash removal.

While the Amendment would allow the discontinuation of some services, the end result would be the dissolution of many municipal services or the need for a substantial increase to property owners in the Municipal District of Richmond Heights through real estate and personal property

taxes; and significant fees for solid waste/trash removal and parks and recreation services and maintenance. Currently, residents pay no fees for solid waste/trash removal service.

FISCAL IMPACT

Please see Estimated 2019 Budget without and with Article VI Better Together Proposal impact:

2019 BUDGET	General Fund	Parks and Rec Fund	Operating Budgets	Capital Budget
Revenues	$13,304,627	$4,626,140	$17,930,767	$2,775,139
Expenses	$13,432,406	$3,757,470	$17,189,876	$1,162,886
Transfers In (Out)	$329,839	($866,071)	($536,232)	($1,354,278)
Surplus (Deficit)	$202,060	$2,599	$204,659	$257,975
Post Better Together				
Revenues	$5,194,404	$3,863,520	$9,057,924	$0
Expenses	$7,032,781	$3,942,958	$10,975,739	$1,403,663
Transfers In (Out)	$63,792	($872,214)	($808,422)	($1,386,213)
Surplus (Deficit)	($1,774,585)	($951,652)	($2,726,237)	($2,789,876)

("General Fund" General Fund and Fire & EMS Services Fund combined.)

Other Assumptions used in this analysis are:

REVENUES
No local sales tax or use tax revenues other than the Fire & EMS quarter-cent sales tax and the Parks and Stormwater half-cent sales tax, no road and bridge tax revenues, no cigarette tax revenues. This does assume all local property tax revenues and utility tax revenues remain with the "municipal district".

EXPENSES
No police, public works, or inspections operations and no police capital purchases

Please contact me at (314) 645-4595 or by email at ahamilton@richmondheights.org should you have any questions regarding the above information.

Sincerely,

Amy Hamilton

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-054)
City of University City, Missouri

Dear Ms. Galloway:

It's my understanding; the State Auditor's Office is required to submit a Fiscal note and Fiscal Note Summary under Section 116.332, RSMO on all initiative petitions. Please accept the following suggestions for inclusion in the fiscal note as to how this proposal will impact local government in the St. Louis Region. The below example is for the City of University City.

Summary

The proposal as presented strips all municipalities in St. Louis County of sales tax revenues, and any revenues associated with courts, police, business licensing and regulations, and roads. While the proposal also removes from "Municipal Districts" responsibility and costs for courts, police, business regulations including zoning and permits, the end result will be a substantial deficit for the remaining municipal district that will require either dissolution or substantial increases in real estate or utility taxes.

In the case of University City, the net result of changes proposed in the Constitutional Amendment is a deficit for the surviving University City Municipal District of nearly $4.3 million per year. The University City Municipal District would have no funds for capital improvements, such as maintaining our City Hall, Community Center, and capital equipment or projects. University City also operates a Municipal Fire Department, and there would be no funds available for replacing our fire trucks and other costly fire department equipment.

While some reduction in service levels and expense would likely be appropriate, the end result would be requirement to substantially increase local taxes on the property owners in the surviving University City Municipal District. There are three options: (1) increase the real estate and property tax; (2) increase the gross receipts tax on utilities, which are passed thru to the underlying customers; or (3) an increase in fees charged by the City for trash services, parks and recreation fees, and fire inspections.

Adjusted 2019 University City Budget showing the impact of the Better Together proposal:

University City

	General Fund	Capital Improvement	Park & Stormwater	Public Safety	Sewer Lateral	Economic Development Sales tax	Loop Business District
2019 Budget							
Revenues	22,802,800	2,402,000	1,301,000	1,700,000	576,000	703,400	75,000
Expenses	(23,744,300)	(3,197,800)	(1,413,400)	(1,799,300)	(576,000)	(494,400)	(142,300)
Transfers In(Out)	1,058,000	(400,000)	-	(300,000)	-	(133,000)	75,000
Surplus (Deficit)	116,500	(1,195,800)	(112,400)	(399,300)	-	76,000	7,700
Post Better Together							
Revenues	11,753,300	2,000	1,000	-	500	1,000	75,000
Expenses	(10,773,600)	(1,549,800)	(1,413,400)	(1,666,300)	-	(494,400)	(142,300)
Transfers In(Out)	225,000	-	-	-	-	-	75,000
Surplus (Deficit)	1,204,700	(1,547,800)	(1,412,400)	(1,666,300)	500	(493,400)	7,700

	Parkview Garden Special District	Grant	Internal Service Fund	Solid Waste	Public Parking Garage	Golf Course
2019 Budget						
Revenues	95,300	1,077,700	1,559,900	3,122,500	161,200	725,000
Expenses	(94,800)	(1,077,700)	(1,534,000)	(3,263,600)	(158,500)	(715,800)
Transfers In(Out)	-	-	-	(75,000)	-	(150,000)
Surplus (Deficit)	500	-	25,900	(216,100)	2,700	(140,800)
Post Better Together						
Revenues	95,300	-	1,557,900	3,122,500	161,200	725,000
Expenses	(94,800)	-	(1,534,000)	(3,263,600)	(158,500)	(715,800)
Transfers In(Out)	-	-	-	(75,000)	-	(150,000)
Surplus (Deficit)	500	-	23,900	(216,100)	2,700	(140,800)

Footnotes:

1. The "General Fund" comprises the bulk of University City's operations, traditionally including police, fire, planning and development, public works, parks and recreation, facilities maintenance, municipal court, and administration services.
2. The above chart is an assumption restatement of what the University City 2019 Annual Budget would look like assuming the Better Together proposal was in effect on July 1, 2019.
3. The only revenue in the Capital Improvement, Park & Stormwater, and Economic Development Sales Tax Fund would be interest income on the current balance of that fund. The Better Together proposal would require deficit spending in the Capital Improvement Fund, Park & Stormwater Fund, and Economic Development Fund until their fund balance is exhausted, thereby eliminating any interest income and effectively terminating the fund.

The University City Municipal District could help offset the operational deficit created by the Better Together petition IF the City were to take all of its authorized taxes for real estate, personal property and gross receipts to their statutory maximums:

Revenue Source Available	Statutory Maximum	Added Revenue Potential
Real Estate Tax	$ 1.00	1,431,954
Personal Property Tax	$ 1.00	137,440
Gross Receipts Tax on Utilities	10.00%	718,811

Major assumptions used in this analysis were used from the City's 2019 budget as a baseline.

If you have further questions, please feel free to contact me at 314-505-8542 or by email at kcole@ucitymo.org.

RE: Fiscal concerns regarding Amended Initiative Petition 2020-054 ("Petition")

Dear Auditor Galloway:

As you know, this firm represents the interests of the Police Retirement System of St. Louis ("Retirement System") with respect to the proposed merger of the City and County of St. Louis set forth in Petitioner's Amended Initiative Petition filed on March 25, 2019. The Retirement System reasserts its original position in regard to the Initiative Petition and all amendments thereto.

The Retirement System asks the Auditor to provide a fiscal note that more completely discusses the adverse impact on local governments, retirement plans and citizens and the risks associated with the proponents untested projections as to sales tax revenue and alleged local government expenditure savings.

Thank you for the opportunity to comment.

Very truly yours,

Lathrop Gage LLP

RE: Fiscal concerns regarding Initiative Petition 2020-042 ("petition")

Dear Auditor Galloway:

This firm has been retained to represent the interests of the Police Retirement System of St. Louis ("retirement system") regarding the above referenced ballot initiative and the proposed merger of the City and County of St. Louis. In this letter, we will begin to outline our significant concerns with the petition, however, we believe an in-person meeting to review these issues will be best for all involved. The most recent petition was filed on February 11, 2019. Pursuant to the authority set out in section 116.175, RSMo, the retirement system is timely expressing its statement of fiscal impact in accordance with section 23.140, RSMo. If the proposed consolidation initiative is approved by voters, the retirement system is concerned with the cost of the proposed legislation, and the significant direct fiscal impact it has on the City of St. Louis (or the St. Louis Municipal Corporation) to provide the required future employer contributions to the retirement system. We urge your office to consider the fiscal impact on local government entities who will become not only a taxing sub-district of the Metro City but also a separate taxing district – and exactly how this revision will affect their ability to meet current statutory obligations. The proposed constitutional amendment is voluminous and has far reaching impact. It deserves a comprehensive fiscal review.

Sections 86.200-86.366, RSMo controls the retirement system. Since October 1, 1957 this system has helped to ensure the financial security of Police Officers and their dependents. The board of trustees of the retirement system certifies every year the cost of one-half of the expenses for the next year and the cost of benefits as determined by section 86.337, RSMo. This information is submitted to the city and shall be appropriated and delivered to the retirement system every year. Section 86.350 provides:

> The payment of the cost of providing all benefits granted under the provisions of sections 86.200 to 86.366, as determined pursuant to section 86.337, and the payment of fifty percent of all expenses described in subsection 2 of section 86.343 incurred in connection with the administration and operation of the retirement system are hereby made obligations of the cities.

This obligation is in the tens of millions of dollars annually and has been paid faithfully by the city, allowing our client to meet its obligations and provide a dignified retirement to its vested members. The initiative petition directs the new Metropolitan City will provide general services, including public safety. At some point after the transition period, the Metropolitan City will form a

new police force. The petition is silent as to how exactly a new police force will be formed. The current initiative petition provides a framework of future services, indicates existing obligations will remain obligations of the original municipality, describes numerous taxing responsibilities of these municipal districts but provides no substance as to how or if these "existing obligations" will be paid. The petition's silence on the "how" or "if" is deafening – in particular to a pension system whose charge is to provide for Police Officers and their families in retirement. As you are no doubt aware, while serving, Police Officers are vastly more susceptible to loss of life and suffering debilitating injuries than the general population.

The initiative petition repeals six sections of the Missouri Constitution including Article VI, section 32(c). We highlight section 32(c) because it mandates any amendment or revision under the current constitutional structure not impair retirement benefits to which one is entitled prior to the amendment. The recent revisions of the current initiative petition add language suggesting (but not directly stating) any person with "any vested, non-forfeitable, and contractual right or privilege to retire or retirement or pension benefits..." will retain those rights unimpaired until all benefits have been paid. *See* Initiative Petition 11. (4)(a).

The initiative petition has a significant direct fiscal impact upon the St. Louis City municipality, after it becomes the St. Louis Municipal Corporation following transition. This impact factors into how the entity will honor its pension obligations for the Police Officers and their families who depend on them (and accept the risks attendant with their careers, at least in part based on this security). The initiative petition is, again, silent as to how the St. Louis Municipal Corporation will meet these obligations. Failure to address this issue casts doubt on the fiscal soundness of the proposed consolidation. Further, failure to address funding for pension obligations amounts to a "just trust us" position. Active duty officers, retirees and their dependents should not be placed in such jeopardy. The initiative's proponents have not engaged in dialogue with interested parties about how issues like this will be worked out. To fulfill their fiduciary obligations to their members our clients must move these important questions - not addressed at all in the petition - to the forefront of this debate.

Two examples illustrate the significant fiscal impact the proposed St. Louis Municipal Corporation will face.

First, the initiative petition mandates municipal districts and the St. Louis Municipal Corporation continue as a taxing sub-district of the metropolitan city and as a separate taxing district. *See* Initiative Petition 4. (3)(a) and (5)(3) and (4)(a). This might mean businesses and citizens might be taxed by the metro city and the St. Louis Municipal Corporation simultaneously. Until it is better understood what items will be taxed and by who, it is impossible to determine whether the St. Louis Municipal Corporation can meet its now existing obligations, such as the ongoing annual obligation to our client. Second, how taxes will be imposed and what taxes will be levied is unknown. However, it is known the initiative petition, over time eliminates the earnings tax and appears to preclude an opportunity for a vote on the issue. This will significantly and directly impact the ability of the St. Louis Municipal Corporation's ability to make payments like the annual obligation to the retirement system. *See* Initiative Petition 7. (2)(a). This may explain the additional language in the second petition:

> Notwithstanding any provision of law or this constitution and notwithstanding any reduction of such levies, the St. Louis Municipal Corporation shall satisfy any outstanding financing obligations from available revenues, and the metropolitan city shall distribute to the St. Louis Municipal Corporation, from revenues generated within the territory of the St. Louis Municipal Corporation, such revenues

as may be required for the satisfaction of any such outstanding financing obligation. *See* Second Initiative Petition 7. (2)(a).

Better Together explained this addition was to provide greater specificity regarding the responsibility of the St. Louis Municipal Corporation to meet its existing obligation from the revenue generated in its territory. Arguably this was already required under the general provisions related to satisfaction of outstanding obligations. However, the Petition's language concerning funding appears to propose funding and take it away simultaneously. In a separate section the largest revenue generator in the territory is removed, without an explanation of how this revenue source would be replaced. Stating obligations must be satisfied appears to be window dressing when a deeper look reveals–there is no method outlined to actually satisfy the obligations.

In conclusion, the retirement system asks the auditor to see the petition for what it demonstrates – a lot of the "right words", but no "right actions" to explain any payment method to satisfy the significant outstanding obligations owed on an annual basis to our client as fiduciary to its members and their dependents. We have demonstrated "significant direct fiscal impact upon a political subdivision of the state" and the petitioners should have to demonstrate how those concerns will be addressed before being given the right to present this ballot initiative to the people of Missouri. Thank you for the opportunity to comment.

Very truly yours,

LATHROP GAGE LLP

***Contribution Settlement in City's Fiscal Year 2008**

The Police Retirement System filed lawsuits against the City and the Board of Estimate and Apportionment to require the City to contribute the actuarially determined annual contribution for the Police Retirement System for the City's 2004, 2005, 2006 and 2007 fiscal years. The City received an unfavorable ruling in the initial court proceedings relative to the fiscal year 2004 suit, and appealed the decision. In August 2006, the Missouri Court of Appeals affirmed the lower court's decision but transferred the case to the Missouri Supreme Court (Supreme Court). On March 13, 2007, the Supreme Court affirmed the judgments of the Circuit Court.

In response to the judgments, the Board of Aldermen had authorized and approved the issuance and sale of bonds for the purpose of paying certain judgments and other amounts in connection with the Retirement System. During fiscal year 2008, Pension Funding Leasehold Revenue Bonds Series 2007 and Pension Funding Series 2008A were issued funding the Police's System in the amounts of $29,587 and $6,000, respectively (in thousands).

301 W. High Street
Jefferson City, MO 65101

Re: Follow up Information Concerning the Police Retirement System of St. Louis (PRS) and Fiscal concerns regarding Initiative Petition 2020-042 ("petition")

Dear Auditor Galloway:

We appreciated the opportunity to meet with Susan Beeler of your staff and to discuss our client's concerns regarding the fiscal impact of the petition. In the meeting, we indicated that demographic and actuarial information concerning PRS might better illustrate the negative fiscal impact of the initiative.

PRS Demographics.

Before discussing present and future financial impacts of a successful initiative, we provide the following statistics concerning PRS. As of October 1, 2018, PRS served the following:

Participant	Number	Description
Active	1,138	Currently employed police officers
DROP	123	Former officers who have a deferred vested pension eligible to collect when they turn age 55
Retired and Disabled	1,433	PRS pays benefits to retired officers and officers who became disabled while employed.
Surviving Spouses and Children	475	PRS pays benefits to both surviving spouses and their children
Total Participants	3,169	
Total Receiving Benefits	1,908	Number of Retired, disabled and surviving spouses and children receiving benefits.
Number of Actives supporting those receiving benefits	.66	According to the actuaries in 2000 .83 actives supported in-activities – retirees and all other beneficiaries – Retired, disabled, surviving spouses and children

As you can see, over the last 9 years, the number of active duty police officers contributing 7.5% of their pay has decreased as the number of beneficiaries has increased. This means the investment returns, which suffered during the 2007-2013 period. and the City of St. Louis' obligations pursuant to MO. REV. STAT. §§ 86.200-86.364 bear over 94.4% of PRS actuarial funding obligations.

PRS Future Funding Obligations.

PRS' independent actuaries determine annually the unfunded Entry Age Normal (EAN) actuarial liability and the Present Value of Future Benefits. Both are measures of current value of benefits PRS will owe to members and their beneficiaries. The EAN is used for financial statements but the Present Value of Future Benefits presents a more complete picture for purposes of your evaluation of the fiscal impact of the initiative. The Present Value of future Benefits is the amount of money needed today to fully fund all PRS benefits both earned as of the valuation date and those expected to be earned in the future by the current plan participants, under the current plan provisions if all of the actuarial assumptions (morbidity, mortality, investment returns, economy etc.) are met. PRS' actuaries determine this number for Active, DROP and Currently retired, disabled and surviving spouse and children beneficiaries. If the initiative passes, it is possible that obligations to active participants may be assumed by another plan (the initiative is silent on that point). As the chart below illustrates, even if active participants are not included, the Present Value of Future Benefits to those currently receiving benefits and with deferred vested pension benefits exceeds **$800,000,000.** Porting active participants to another plan does not significantly change PRS obligations to beneficiaries.

Present Value of Future Benefits - 10/1/18

Benefit Category	**10/1/18 PV of FB**	
Active	$306,011,501.00	
DROP and Re Entered	$193,779,042.00	
Retired, Disabled, Surviving Spouse and Children	$622,510,814.00	
Total not including active	**$816,289,856.00**	
Total including Active		$1,122,301,357.00

Fiscal Impact of the Initiative on Present and Future PRS Obligations.

We believe that the petition creates an unfunded liability as to PRS obligations to current and future beneficiaries. As we read the initiative, there is no post passage revenue stream adequate to satisfy PRS funding obligations and voters need to be aware of this. We expect other plans similarly situated will have the same problems. At present, police officer participants in the plan pay 7.5% of payroll into the plan. This amounts to about $5.3 MM annually and the city pays the actuarially-determined amount necessary to fund the plan's obligations to present and future beneficiaries. We provided the payment amounts for the last 10 years which average approximately $33 MM per year. According to the most recent PRS independent actuarial report, over the next 20 years, assuming investment returns of 7.5% and no significant downturn in the

economy the range of payments from the City of St. Louis or its successor will likely range from $32.4 MM to $36.2MM per year.

Results for the year ended September 30, 2017 provide a tool for illustrating this point. The chart below shows PRS funding, expenses and benefits paid and how those results would differ if there were no employee contributions (actives are in another plan) and if the City of St. Louis or its successor did not pay the amount required by Chapter 86. There are not sufficient funds to pay benefits, without eroding fund balances. Without city funding there will not be sufficient funds, over time, to pay the benefits owed.

Additions to PRS	**Value as of 9/30/17**	**Assuming passage and no funding of employer obligations**	**Comments**
Payments from members	$5,129,154.00	$-	Assumes no future payments from EEs
Employer Contributions	$33,104,561.00	$-	Assumes no ER contribution
Interest and Dividends	$8,631,971.00	$8,631,971.00	Not adjusted for changes in rates
Investment Returns	$45,322,802.00	$45,322,802.00	Not adjusted for investment performance
Total Additions	$92,188,488.00	$53,954,773.00	
Deductions from PRS			
Investment Expenses	$2,865,515.00	$2,865,515.00	Assumes same expenses
Benefit Payments	$63,603,561.00	$63,603,561.00	Assumes no increase in payments
Refunds of Employee Contributions	$4,972,550.00	$4,972,550.00	Refunds arise if employees are vested in their contributions and resign prior to retirement
Administrative Expense	$1,165,930.00	$1,165,930.00	Expense is less than 2% of earnings
Total Deductions	$72,607,556.00	$72,607,556.00	
Gain or Shortfall	$19,580,932.00	$(18,652,783.00)	Without additions from the employer and employees the funding gap increases.

As illustrated above, investment returns and interest and dividends are not sufficient to pay pension obligations. As written, the initiative creates what amounts to an unfunded mandate.

The Initiative Does not Provide Funding for Obligations.

The initiative petition makes clear that the St. Louis Municipal Corporation is responsible for funding Obligations such as those benefits PRS owes to members. However, the initiative provides no funding for any of these obligations after the effective date. During the period after the effective date of 1/1/21 and the date that general services such as law enforcement are to be undertaken by the Metropolitan City, the municipal districts and St. Louis Corporation continue to provide these services. They continue as taxing districts, but can only tax utilities and property and can only tax these for the provision of services – not the payment of obligations such as those owed by PRS. Further, in Section 7, the earnings tax will end effective 1/1/21 and cannot be reinstated. According to the City Collector of Revenue the earnings tax provides 33% of the City of St. Louis general revenue. https://www.stlouis-mo.gov/collector/earnings-tax-home.cfm.

Conclusion.

As information from the 2018 Actuarial Report makes clear, the initiative's proposal for creating a new form of government while saddling all prior governments with financial obligations and providing no meaningful revenue stream creates an untenable fiscal problem and jeopardizes benefits owed under Police Retirement System of St. Louis.

Very truly yours,

Lathrop Gage LLP

Re: Follow up Information Concerning the Police Retirement System of St. Louis (PRS) and Fiscal concerns regarding Initiative Petition 2020-042 ("petition") – Correction, p. 2, final par., line 5.

Dear Auditor Galloway, Susan and Kim:

After we finalized our letter of 2-21-19 we noted a typo on page 2 in the final paragraph. At line 5 of that paragraph we stated that police officer participants pay 7.5% of payroll into the plan. That percentage was incorrect. Police officer participants pay 7% of payroll into the plan. However, the dollar value quoted, $5.3MM is correct.

Very truly yours,

Lathrop Gage LLP

RE: IP 2020-054: Proponent's Proposed Statement of Fiscal Impact

Dear Auditor Galloway:

Please accept the enclosed Proponent's Proposed Statement of Fiscal Impact for Initiative Petition 2020-054 (hereinafter "the measure") submitted on behalf of proponent Unite STL pursuant to Section 116.175.1, RSMo.

You recently issued a fiscal note and fiscal summary for a substantially similar and fiscally-identical initiative petition proposed by Unite STL—Initiative Petition 2020-042 (hereinafter "IP 2020-042"). The primary differences between IP 2020-042 and this measure relate to the timing of election of executive officials and additional specificity regarding certain pension and retirement systems. None of these changes affect the fiscal impact of the measure.

As indicated in the materials submitted herewith, the fiscal note and fiscal summary should reflect that the measure will result in savings for local governments of up to $37 million annually in 2023 and up to $1 billion annually by 2032. The fiscal note and fiscal summary should reflect that the measure will result in $4.9 billion in savings to local governments from 2023 to 2032. The fiscal note and fiscal summary should reflect that the measure will result in increased state revenues of up to $636,695 in 2023, increasing to up to $6.95 million annually in 2032 and each year thereafter. The fiscal note and fiscal summary should reflect that the measure would generate up to $40 million in new state revenue from 2022 to 2032.

Alternatively, the fiscal summary for this measure should be identical to the fair and sufficient fiscal summary you issued for IP 2020-042, which provided as follows:

Individual St. Louis County municipalities expect decreased revenues to exceed savings with a total unknown impact. The overall savings for the new metropolitan city is unknown but estimated to be as much as $1 billion annually by 2032. State revenue is estimated to increase between $2.5 million to $7 million annually by 2032.

Thank you for your attention to this matter. Please do not hesitate to contact me if you have any questions or if there is any additional information I can provide.

Very truly yours,

Christopher R. Pieper

on behalf of Unite STL, Proponent of the Proposed Measure

Initiative Petition 2020-054
Proponent's Proposed Statement of Fiscal Impact

The following information is submitted on behalf of the proponent of the proposed measure as a proposed statement of fiscal impact for the Initiative Petition 2020-054 (hereinafter "the measure"), pursuant to Section 116.175.1, RSMo.

The State Auditor recently issued a fiscal note and fiscal summary for a substantially similar and fiscally identical initiative petition. *See* Initiative Petition 2020-042. The primary differences between this measure and Initiative Petition 2020-042 relate to the timing of election of executive officials and additional specificity regarding certain pension and retirement systems. Neither of these changes affect the fiscal impact of the measure.

As demonstrated more fully below and in the accompanying supporting materials, the fiscal note and fiscal summary should reflect that the measure will result in savings for local governments of up to $37 million annually in 2023 and up to $1 billion annually by 2032. The fiscal note and fiscal summary should reflect that the measure will result up to $4.9 billion in savings to local governments from 2023 to 2032. The fiscal note and fiscal summary should reflect that the measure will result in increased state revenues of up to $636,695 in 2023, increasing to up to $6.95 million annually in 2032 and each year thereafter. The fiscal note and fiscal summary should reflect that the measure would generate up to $40 million in new state revenue from 2022 to 2032.

Alternatively, the fiscal summary for this measure should be identical to the fair and sufficient fiscal summary issued for Initiative Petition 2020-042 by stating:

> Individual St. Louis County municipalities expect decreased revenues to exceed savings with a total unknown impact. The overall savings for the new metropolitan city is unknown but estimated to be as much as $1 billion annually by 2032. State revenue is estimated to increase between $2.5 million to $7 million annually by 2032.

I. The Measure

If enacted, the measure would reorganize local governments in St. Louis County (hereinafter "the County") and the City of St. Louis (hereinafter "the City") to reduce fragmentation and achieve greater efficiency and cost-effectiveness. To accomplish this purpose, the measure combines the County and the City in a newly-created, Metropolitan City of St. Louis (hereinafter the "Metro City"), with the powers of both a charter city and a charter county. Art. VI, Section 30.2. The entire territory of the Metro City is designated a "general services district" in which the Metro City is empowered to provide "general

district services." Art. VI, Section 30.2(9).[1] Current Municipalities (including the City, until after the transition period) continue as "Municipal Districts," which are political subdivisions empowered to provide "municipal district services" and required to satisfy outstanding obligations of the municipality. Art. VI, Section 30.3.[2]

A. Finances

General district services and outstanding obligations of the Metro City would be financed by revenues generated throughout the Metro City, while municipal district services and outstanding obligations of a Municipal District would be financed by revenues generated within the Municipal District or otherwise secured by the Municipal District. Art. VI, Section 30.5(1)(a).[3]

The measure initially continues existing levels of services, and taxes, licenses, fees, or special assessments levied by the County, the City, or Municipalities with respect to the territory to which such applied prior to the effective date. Art. VI, Section 30.5(2)(a). The Metro City is required to distribute revenues generated from such taxes, licenses, fees, and special assessments levied solely within a Municipal District to that Municipal District for use in satisfying outstanding obligations and for the services the Municipal District provides. Art. VI, Section 30.5(2)(a). In particular, the measure requires the Metro City to distribute to Municipal Districts:

(1) All revenues generated from taxes, licenses, fees, or special assessments levied solely within the Municipal District required for the satisfaction of any outstanding obligation. Art. VI, Section 30.5(2)(b)(i).

(2) Revenues generated from property taxes levied solely within the Municipal District. Art. VI, Section 30.5(2)(b)(ii).

(3) Revenues generated from any sales or use tax levied solely within the Municipal District necessary to provide municipal district services or to provide a general district service until such service is provided by the Metro City. Art. VI, Section 30.5(2)(b)(iii).

(4) Revenues that would have otherwise been received by the Municipality from the state or federal government, including gaming revenues and county pool sales taxes,

---

[1] Examples of "general district services" include the licensing and regulation of businesses, occupations, professions, activities, or things; public health, public safety, and general welfare; police, law enforcement, and municipal court; transportation, infrastructure, and public works; and economic development. *See* Art. VI, Section 30.1(1)(c).

[2] Examples of "municipal district services" include fire protection, parks and recreation, proprietary and enterprise functions, facilities, and administration of the Municipal District. *See* Art. VI, Section 30.1(1)(g).

[3] Outstanding obligations include, but are not limited to, contracts; financing obligations, such as bonds, notes, capital leases and similar obligations; and other long-term obligations such as pensions. *See* Art. VI, Section 30.1(1)(b).

required to satisfy outstanding obligations or necessary to provide municipal district services, or provide a general district service until such service is provided by the Metro City. Art. VI, Section 30.5(5)(c).

Revenues collected within a Municipal District over and above the foregoing would be retained by the Metro City and used for providing general district services such as police. *See* Art. VI, Sections 30.2(9), 30.5(1)(a). Until such time as the Metro City provides a general district service, the Municipal District would continue to receive distributions of revenue necessary to continue providing such service. *See* Art. VI, Sections 30.5(2)(b); 30.5(5)(c).

90 days prior to each fiscal year, a Municipal District would submit to the Metro City an estimate of outstanding obligations, the expenditures necessary for services provided by the Municipal District, and the revenues required for such purposes. Art. VI, Section 30.5(4)(e). The Metro City is required to distribute funds to the Municipal District for such purposes and in such amounts for the ensuing fiscal year. *Id.*

If a Municipal District wanted to increase the level of services, it could levy an additional property tax, levy a utility tax, charge fees for service, and issue financing obligations for such purposes. Art. VI, Section 30.5(4). The Municipal District would administer the revenues generated thereby pursuant to an annual budget adopted in the manner provided for the current Municipality. Art. VI, Section 30.5(4)(d).

The measure provides a two-year transition period from the effective date on January 1, 2021, through the end of the transition period on January 1, 2023. Art. VI, Section 30.1(1)(l). The budget for the Metro City and Municipal Districts for each year of the transition period would be the combined annual budgets for the County, the City, and Municipalities for the twelve month-period beginning January 1, 2019, along with any supplemental appropriations and any appropriations for the satisfaction of outstanding financing obligations. Art. VI, Section 30.5(6)(a). The first budget for the Metro City post-transition period would be adopted on or after January 1, 2023. Art. VI, Section 30.5(7)(c).

B. <u>Tax Relief</u>

Beginning in 2022, the one-percent earnings tax imposed by the City would be reduced annually by one-tenth of one percent until eliminated in the manner provided in current law, Section 92.015, RSMo, due to the failure to reauthorize the tax in 2021. Art. VI, Section 30.7(2)(a). Each reduction would result in approximately $18.3 million in tax relief each year. Also beginning in 2022, the one-half of one percent payroll expense tax

imposed by the City would be reduced annually by one-twentieth of one percent until eliminated. *Id.* Both taxes would be fully phased-out over a period of ten years.[4]

In 2023, the general revenue property tax levied in the former County would be reduced to yield no greater than half the revenue generated by the levy during the prior year. Art. VI, Section 30.5(7)(b). Based on the Auditor's 2017 report of tax rates, the County's general revenue property tax levy for each class of property would generate approximately $47.1 million.[5] An adjustment to generate half the amount of revenue is estimated to result in tax relief of approximately $23.6 million annually.

In 2024, the general revenue county purposes property tax levy in the former City would be replaced with the lowered general revenue property tax levied in the former County. Art. VI, Section 30.5(8)(b). Based on the Auditor's 2017 report of tax rates, the City's county purposes levy would generate approximately $14.1 million.[6] Replacing this levy with the newly-lowered County levy is estimated to result in tax relief of approximately $8.1 million annually.[7]

C. St. Louis Municipal Corporation and St. Louis Fire Protection District

On January 1, 2023, the Municipal District within the former City would continue as the St. Louis Municipal Corporation, primarily to satisfy outstanding obligations of the City. Art. VI, Section 30.4.

Also, on January 1, 2023, the St. Louis Fire Protection District would be created within the boundaries of the former City. Art. VI, Section 30.6. During 2023, the fire protection district is funded out of revenues generated from within the former territory of the City. Art. VI, Section 30.6(2)(a). In 2024, the fire protection district would be authorized to levy a property tax and, upon such levy, the Metro City would be required to correspondingly reduce the rates of taxes, licenses, and fees within the former City to ensure that the fire protection district levy is revenue neutral. Art. VI, Section 30.4(2)(b).

II. Local Government Positive Fiscal Impact

A. Local Government Savings

---

[4] *See Better Together Policy Recommendations: Analysis of New State Tax Revenue*, submitted herewith and hereby incorporated by reference herein. Available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5c6d500324a694e2f1da31ca/1550667780395/Better+Together+Policy+State+Revenue+Compiled+with+Analysis.pdf.

[5] *See id.*

[6] *See id.*

[7] *See id.*

The measure would result in a significant savings to local governments. Specific areas targeted for savings, such as general administration, are analyzed in a series of studies published by Better Together over the past five years and in the recently-released City-County Task Force Report and Recommendations.[8] Better Together has also analyzed revenue, expenditures, and savings from its policy recommendations as reflected in the proposed measure.[9]

As discussed more fully in Better Together's analysis, savings to local governments result from both reduced expenditures and the availability of surplus revenue over expenditures. The measure creates a structure for reducing expenditures on a system-wide, rather than jurisdiction-by-jurisdiction basis, which would enable modest expenditure reductions of 3% annually, offset by 2% inflation in expenditures, for net annual expenditure reductions of 1%. In addition, the structure results in annual surpluses of revenue, which enables accelerated debt repayment that would in turn achieve additional savings from reduced interest and financing costs. Initial savings for local governments from the measure are estimated at $37 million annually in 2023.[10] By 2032, annual savings for local governments are estimated at $1 billion annually. From 2023 to 2032, the measure is estimated to result in up to $3.2 billion in expenditure reductions and surplus revenues of $1.7 billion, for total savings to local governments of up to $4.9 billion over the ten-year period.

The estimated $37 million in savings in 2023 has been refined from the previous estimate of $55 million in savings in 2023 submitted by Unite STL in connection with IP 2020-042. The $37 million provides a more conservative estimate to reflect that a number of municipal CAFR's include both fire protection and police within a single expenditure

Available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5c6d5041eb393157f0303840/1550667841801/STL+Metro+City+-+Pro+Forma+Budget.pdf. The supplemental data cited therein reflecting revenues and expenditures of the City, County, and Municipalities has been previously submitted to the State Auditor's Office and is hereby incorporated by reference herein.

[10] Several aspects of the measure support the reasonableness of the $37 million estimated savings to local governments by 2023 by requiring specific consolidations to occur during the transition period. For example, effective January 1, 2022, all county offices of the City are required to be fully consolidated into the corresponding offices of the Metro City. *See* Art. VI, Section 30.2(8). In addition, all municipal courts within the Metro City are to be fully consolidated by January 1, 2023. *See* Art. VI, Section 30.2(11)(a). The reasonableness of the $55 million estimated savings to local governments by 2023 is supported by fiscal note responses to a previously proposed constitutional amendment consolidating the City of St. Louis with St. Louis County, which estimated net savings of approximately $60.6 million annually from the consolidation of county functions. *See* Fiscal Note, SJR 3 (2015), L.R. No. 0525-01, *available at* http://www.moga.mo.gov/OverSight/Over20151//fispdf/0525-01N.ORG.pdf

category of "public safety." In order to provide a more conservative estimate of savings, Better Together classified these $9 million in expenditures as Municipal District expenditures and deducted $9 million from surplus revenues, resulting in an $18 million reduction in savings for 2023. This adjustment does not impact the overall estimated savings of more than $1 billion by 2032.

B. Local Government Costs

Local governments will not incur any new costs as a result of the proposed measure. Local governments would continue to provide the same functions and services currently provided separately by 90 different local governments. However, the proposed measure would reallocate these functions and services *among* local governments. Therefore, any cost incurred by the Metro City in assuming a function or service would result in savings to the local government from which the function or service was assumed.[11]

Current local governments may claim a "cost" to their particular local government because, following enactment of the measure, their particular local government may not continue to receive all of the revenues it receives today. However, the measure requires that a Municipal District receive all revenues required to satisfy outstanding obligations and necessary to provide municipal district services and a general district service until such service is assumed by the Metro City. *See* Art. VI, Section 30.5(2)(b). As discussed more fully in Better Together's analysis of Municipal District Revenues and Expenditures,[12] by 2023 the Metro City would distribute revenues of up to $526 million to Municipal Districts, while Municipal Districts would have estimated expenditures of up to $360 million, resulting in up to $165 million in revenues in excess of estimated expenditures distributed to Municipal Districts.

Under the measure, all existing taxes, licenses, and fees are initially continued in order to ensure the same overall amount of revenue to local governments. *See* Art. VI, Section 30.5(2)(a). Thus, no local government would lose any revenues necessary to perform the functions they remain authorized to perform, although a portion of the revenue

---

[11] The Missouri Supreme Court has recognized that a new activity or service is not established when a governmental entity is simply required to continue an existing activity or service, *see Breitenfeld v. School Dist. of Clayton*, 399 S.W.3d 816, 826 (Mo. banc 2013); *see also State ex rel. City of Desloge v. St. Francois Cty.,* 245 S.W.3d 855, 861 (Mo. App. E.D. 2007) (requiring showing that County was "forced to hire additional employees or pay higher salaries to existing employees in order to carry out its duties" in order to establish a "new service or activity required of the County" as opposed to being "part of the County's existing duties."), nor when a measure merely reallocates obligations or revenues among various political subdivisions. *Berry v. State*, 908 S.W.2d 682, 685 (Mo. banc 1995); *see also Cty. of Jefferson v. Quiktrip Corp.*, 912 S.W.2d 487, 491 (Mo. banc 1995) (holding that reallocation of local revenue does not shift tax burden to local government and the act of distributing tax revenue is "part of the normal operations of any county" and therefore only a *de minimis* administrative activity not in violation of Hancock).

[12] *See Better Together Policy Recommendations: Analysis of Municipal District Revenues and Expenditures* submitted herewith and hereby incorporated by reference herein. Available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5ca4f9b6f4e1fc20aa55706d/1554315709901/Fiscal+Analysis.pdf.

a particular local government previously received would be reallocated to another local government—the Metro City—for services now provided by that local government—the Metro City. Indeed, the difference between the amount of revenue currently received by a particular local government and the amount of revenue actually required to satisfy outstanding obligations and necessary to provide services represents potential overall savings to local governments from the more efficient allocation of service provision and supporting revenues.

With respect to elections, no cost to local governments should be reflected in the fiscal note and fiscal summary. The proposed measure requires the Missouri General Assembly to enact legislation to provide for an election authority for the Metro City. Art. VI, Section 30.7(1)(a). Until such time, the current Board of Election Commissioners in the City and County are required to cooperate in the conduct of elections within the Metro City. *Id.* Therefore, any costs related to the conduct of elections should be reflected in connection with legislation to create such election authority, as opposed to in the fiscal note and fiscal summary for the measure.

III. State Government Positive Fiscal Impact

A. Increased State Revenues

The measure will have a significant positive impact on state revenues resulting from the required reduction, and ultimate elimination, of the earnings tax and payroll expense tax and the required reduction of property taxes. As such taxes are reduced, the amount of deductions that can be claimed by individual taxpayers against Missouri income and the expenses claimed by businesses for the payment of such taxes will also be reduced. Both will generate new state revenues.

Better Together has performed a detailed analysis of the additional state revenue generated by reductions in Missouri income tax from 2023 through 2032 as a result of the local tax reductions required under the measure.[13] Based on this analysis, the fiscal note and fiscal summary should reflect that the measure will result in increased state revenues of up to $636,695 in 2023, increasing up to $6.95 million annually in 2032 and each year thereafter. The fiscal note and fiscal summary should reflect that the measure would generate up to $40 million in new state revenue from 2022 to 2032.

B. State Costs

The proposed measure would neither establish a new program or state agency, nor duplicate an existing program or state agency. Any one-time implementation costs can be

[13] *See Better Together Policy Recommendations: Analysis of New State Tax Revenue*.

assumed within existing resources. Moreover, new state revenues generated by the proposed measure would more than offset any one-time implementation costs.

IV. Other Political Subdivisions

The proposed measure will be cost neutral to other political subdivisions. School districts, fire protection districts, and other special districts are not reorganized pursuant to the amendment. *See* Art. VI, Sections 30.1(1)(i); 30.9(1)(a); 30.10(1)(1).[14] Accordingly, the fiscal note and fiscal summary should not reflect any costs or savings to any other political subdivisions.

V. Small Business

The proposed measure would provide a significant positive fiscal impact for small business by eliminating bureaucracy and unnecessary regulatory complexity, by streamlining government operations affecting small businesses, and by reducing earnings, payroll expense, and property taxes.

VI. Proposed Fiscal Note Summary

This proposal is estimated to generate savings to local governments of up to $37 million annually by 2023 and up to $1 billion annually by 2032. Reduced earnings, payroll, and property taxes are estimated to increase state revenues by up to $40 million through 2032.

[14] "Special districts" are defined to include "any political subdivision, municipal corporation, body corporate and politic, authority, metropolitan district, taxing district, taxing subdistrict, public corporation, or quasi-public corporation created pursuant to this constitution, law, charter, ordinance, or resolution, other than the county of St. Louis or a municipality, located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section." Art. VI, Section 30.1(1)(i).

Better Together Policy Recommendation
Analysis of New State Tax Revenue

Better Together's policy recommendation is estimated to result in increased state revenues of up to $636,695 in 2023, increasing to up to $6.95 million in new state revenue annually in 2032 and each year thereafter. Over the ten-year period from 2022 to 2032, the Better Together policy recommendation would generate up to $40 million in new state revenue.

Beginning in 2022, the one-percent earnings tax will be reduced annually by one-tenth of one percent until eliminated in the manner provided in current law, Section 92.015, RSMo., due to the failure to reauthorize the tax in 2021. Beginning in 2022, the one-half of one percent payroll expense tax imposed by the City will be reduced annually by one-twentieth of one percent until eliminated. In 2023, the general revenue property tax levied in the former County is to be reduced to yield no greater than half the revenue generated by the levy during the prior year. In 2024, the general revenue county purposes property tax levy in the former City is replaced with the lowered general revenue property tax levied in the former County.

As the earnings tax, payroll tax, and property taxes decrease, the taxable income of individuals and corporations increase. The state tax revenue base thereby increases resulting in new state tax revenue.

The following is a description of the methodology used in analyzing the additional state tax revenue resulting from Better Together's policy recommendation. The following also includes a description of other estimates of additional state revenue from the reduction of the earnings tax and payroll expense tax to support the reasonableness of this analysis and its conclusions.

I. Earnings Tax Analysis

Pursuant to the City of St. Louis FY 2018 CAFR, the earnings tax revenue base was $3,787,500,000 for business and $14,558,200,000 for individuals.[1] This equates to a split of the earnings tax revenue base of approximately 20.65% business and 79.35% individual. The split between business and individual is relevant to state tax impact due to the method by which the payment of the tax may be utilized by taxpayers. In particular, an individual must itemize deductions and take such tax payment as a deduction to have an impact. However, a business uses the payment of tax as an expense, which reduces income and is either reported by the entity (corporation) or is passed to its owners (partnership/LLC). Thus, the analysis segregates the business and individual allocation between the earnings tax revenue base.

A. Individuals subject to Earnings Tax

Based on the City of St. Louis 2018 CAFR, the total earnings tax revenue base is $18,345,700,000. The individual portion of the earnings tax revenue base is approximately

[1] City of St. Louis, 2018 Comprehensive Annual Financial Report, Pg. 210, *available at* https://www.stlouis-mo.gov/government/departments/comptroller/documents/upload/CityofStLouisMO_CAFR-FY18.PDF.

79.35% of such base or approximately $14,558,200,000. Based on this information, 2018 aggregate individual earnings tax is $145,582,000.

The earnings tax paid by individuals impacts state tax revenue when such individuals itemize deductions and claim a deduction for such tax payment. An individual that itemizes deductions thereby reduces his/her taxable income. Based on the 2008 Fiscal Note prepared by the State Auditor's Office related to a ballot measure to phase-out the earnings tax if not reauthorized by voters, approximately 28.06% of Missouri individual tax filers itemized deductions.[2] Thus, the analysis assumes that only 28.06% of the earnings tax paid by individuals has an impact on the state tax revenue. Data is not available to show a different deduction rate, such as any change in deduction rates due to recent changes to federal tax laws.

The analysis uses the statutory individual income tax rate and reflects a decrease in the rate based on current Missouri statutes. The calculations in Section I.A. of the analysis reflect the foregoing, along with the assumption that the earnings tax revenue base is constant.

B. Businesses subject to Earnings Tax

Based on the St. Louis City FY2018 CAFR, the total earnings tax revenue base is $18,345,700,000. The business portion of the earnings tax revenue base is approximately 20.65% of such base or approximately $3,787,500,000. Based on such information, 2018 aggregate business earnings tax is $37,875,000.

Payment of the earnings tax is a business expense which will reduce the income of the business. Such reduced income is then taxed on either a corporate income tax return for a corporation or an individual income tax return if the business does not pay income tax but instead passes the income to its owners, such as a partnership. To analyze the tax impact, the tax effect must be segregated between corporation income tax and individual income tax. The corporate income tax rate is different than the individual income tax rate. Thus, the impact on state revenue depends in part on whether a corporation or an individual is reporting the income.

Per the Missouri Department of Revenue Financial and Statistical Report FYE June 30, 2017, 3,002,736 individual returns were filed and 146,282 corporate returns were filed.[3] Thus, 95.35% of income tax returns were individual returns and 4.65% were corporate returns. Such percentages can be applied to the business portion of the earnings tax to determine an approximate amount reported by individuals and corporations respectively.

The analysis in Section I.B. applies these percentages to the earnings tax applicable to the business portion of the earnings tax revenue base. Section I.B.1. analyzes the impact using the foregoing percentages and the applicable individual income tax rate. The individual taxpayer will

---

[2] *See* Fiscal Note (09-62), Office of the Missouri State Auditor, *available at* https://app.auditor.mo.gov/Repository/Notes/09-62.pdf. This is consistent with the 29% deduction rate assumed by the Office of Administration Division of Budget and Planning (OA-B&P) in its response to a prior initiative petition seeking to enact the Better Together policy recommendation (IP 2020-039).

[3] Missouri Department of Revenue Financial and Statistical Report FYE June 30, 2017, Pg. 18, Income Tax Summary of Activities, *available at* https://dor.mo.gov/cafr/documents/financialstatreport17.pdf.

be reporting the net business income, which has already been reduced by the earnings tax paid by the business. Therefore, unlike the analysis in Section I.A. above, the analysis does not include factoring in the deduction rate. Instead, the analysis looks at what happens to state tax revenue as the income of a business increases due to the reduced earnings tax expense. The difference in the expense amount from the original 2018 data is taxed at the individual income tax rate.

The analysis in Section I.B.2 addresses the business portion of the earnings tax, which can be attributable to corporations based on the corporate return rate above. The analysis looks at what happens to state tax revenue as the income of a corporation increases due to the reduced earnings tax expense. The difference in the expense amount from the original 2018 data is taxed at the corporate income tax rate.

II. Payroll Expense Tax Analysis

The payroll expense tax is applicable to businesses with payroll expenses. Such taxes are paid by the business and reduce business income. Similar to the analysis in I.B. above, the business income is either reported by a corporation or an individual owner of the business. The analysis is similar to I.B. above and is apportioned between individual reporting and corporation reporting. The individual reporting again does not factor in the deduction since the tax reduces the business income and is not an itemized deduction. The reduction in the payroll expense tax results in increased income of individuals and corporations, which in return results in new state tax revenue.

III. Property Tax Analysis

The Better Together policy recommendations include a reduction in the County general revenue property tax in 2023 followed by application of the lower County general revenue property tax in place of the higher City county purposes property tax in 2024.

A. County Property Tax Analysis

The assessed values for each class of property in the County are individually reported in the St. Louis County 2017 CAFR.[4] The Missouri Auditor's Office 2017 Property Tax Rates ("2017 Rates Report") sets forth the permitted rates for the County general revenue property tax for each class of property.[5] The assessed values and rates were utilized to determine such portion of the property tax currently. Per the policy recommendation, the general revenue levy of the County will be reduced to generate approximately 50% of the revenue for the prior year. For purposes of the analysis, 50% of the rates reported in the 2017 Rates Report has been utilized.

---

[4] St. Louis County Comprehensive Annual Financial Report for the Year Ended December 31, 2017, Pg. 180, *available at* https://www.stlouisco.com/Portals/8/2017%20CAFR.pdf

[5] Office of Missouri State Auditor Nicole Galloway, CPA, 2017 Property Tax Rates, Appendix VIII, Pg. 116, *available at* https://app.auditor.mo.gov/Repository/Press/2017143113567.pdf?_ga=2.196564524.1676225323.1550249944-1961047601.1502219957

To determine the impact on state revenue of this property tax reduction, the reductions must be apportioned between individual taxpayers and businesses. Available information does not fully apportion property tax payments in the County, although the County 2017 CAFR does report the principal property taxpayers, which are businesses and which account for 5.8% of the assessed value.[6] This percentage is utilized to allocate property taxes 94.2% for individuals and at least 5.8% for businesses.

The allocation between business and individual is relevant to state tax impact due to the method by which the payment of tax may be utilized by taxpayers. As discussed above in section I.A., an individual must itemize deductions and take such tax payment as a deduction to have an impact. However, a business uses the payment of tax as an expense, which reduces income and is either reported by the entity (corporation) or is passed to its owners (partnership/LLC). Thus, the analysis segregates the business and individual allocation of the property tax.

Based on the St. Louis County 2017 CAFR and Auditor's 2017 Rates Report, the applicable general revenue property tax generated approximately $47,124,464. For purposes of this analysis and based on the information set forth below, this property tax is allocated 94.2% to individuals, such that individual taxpayers paid $44,391,245 of the total general revenue property tax. Such individual amount will be subject to itemized deductions for reporting and the methodology applies the deduction percentage as stated in Section I.A. above. The 5.8% of the general revenue property tax apportioned to businesses is allocated between corporations and individuals similar to the analysis in Section I.B. above based on the percentage of returns filed.

The analysis uses the statutory individual income tax rate and corporate tax rates similar to the analysis in Sections I and II above. The assessed value of property was constant in the analysis.

B. City Property Tax Analysis

St. Louis City levies property tax on all classes of property at a single tax rate. The assessed value of City property subject to the property tax for county purposes and the rate of such tax is reported in the Auditor's 2017 Rates Report.[7] In 2024, the county purposes property tax in the former City would be replaced with the County general revenue property tax as reduced per the recommendation, resulting in a reduced rate applicable to all classes of property.

Similar to the analysis for the reduction of the County general revenue property tax in Section III.A., the county purpose property tax in the City must be apportioned between individuals and businesses. The principal taxpayers of the property tax reported in the St. Louis City 2018 CAFR are all businesses and account for 11.99% of the assessed value.[8] This percentage is used to allocate the county purposes property tax between individuals 88.01% and businesses 11.99%. The analysis utilizes a similar approach as in Section III.A. above to allocate and calculate the current apportionment to determine future state tax revenue impact.

---

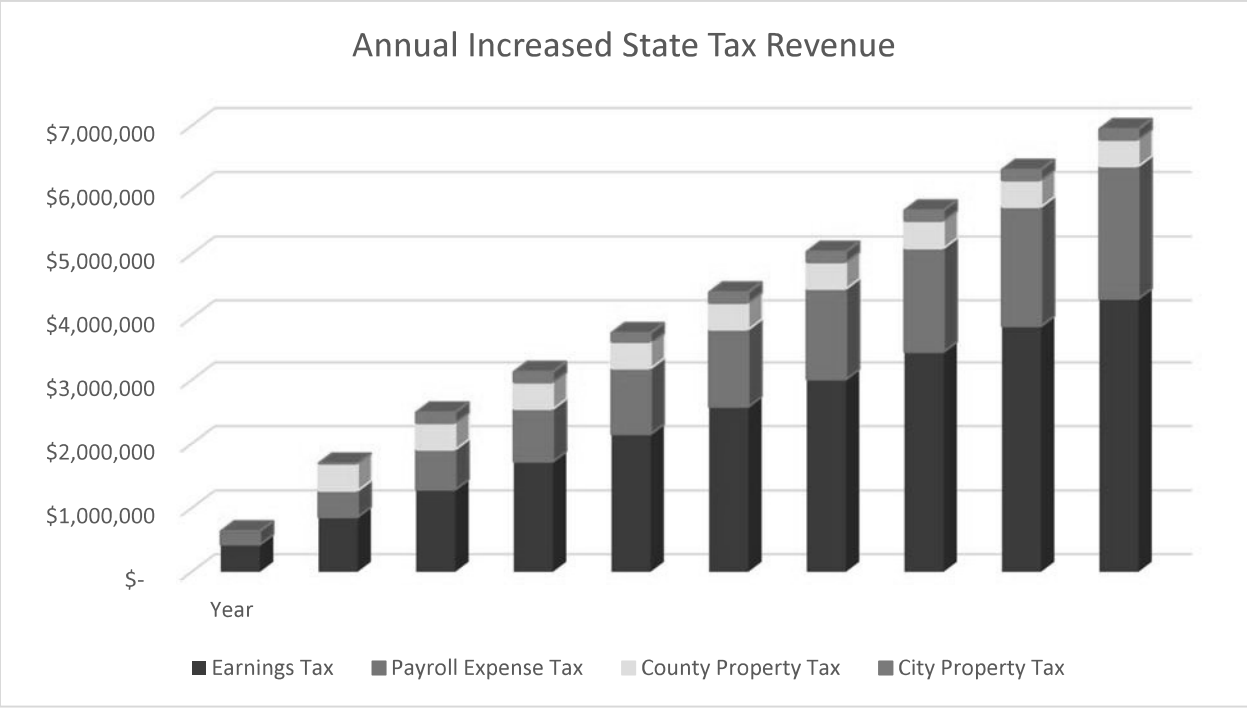
[6] St. Louis County 2017 CAFR, Pg. 182.
[7] Auditor's 2017 Rate Report, Appendix VII, Pg. 108.
[8] St. Louis City 2018 CAFR, Table 7, Pg. 208.

Under the policy recommendation, in 2024, when the County property tax would replace the City's county purposes property tax, the classes of property will become relevant. The City 2018 CAFR reports classifications of property and the assessed values thereof.[9] These values are used to apply the reduced County property tax rates provided in the analysis in Section III.A. above to the relevant class of property (with manufacturer's machinery tools and equipment added to personal property classification). The analysis does not factor in tax-exempt property, since sufficient information is not provided in the CAFR to allocate such amount to the classes of property.

IV. New State Revenues

Based on the foregoing analysis and as reflected in the enclosed materials, the phase-out of the earnings tax and payroll expense tax and the reduction in property tax would result in new state revenues beginning in 2023 and increasing each year until 2032. The tables below summarize the new state revenue each year resulting from the policy recommendation.

	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032
Additional State Tax Revenue	$636,695	$1,690,146	$2,491,446	$3,128,142	$3,764,837	$4,401,533	$5,038,228	$5,674,923	$6,311,619	$6,948,314



[9] St. Louis City 2018 CAFR, Table 5, Pg. 206.

V. Additional Information

A. Prior Fiscal Notes on Earnings Tax Measures

The above estimate of new state revenue is consistent with prior estimates of new state revenue from the phase-out of the earnings tax over a period of ten years. This additional information is provided merely for comparison, with differences between the present analysis noted below.

For example, Senate Substitute for Senate Bill 575 (2016) would have phased-out the City of St. Louis earnings tax by one-tenth of one percent each year for ten years.[10] Relying on an estimated $160 million annually in earnings tax revenue and a six percent income tax rate, the Oversight Division assumed an increase in state revenue of up to $1.92 million in the first full tax year and up to $9.6 million annually once the tax is fully eliminated.

Unlike the present analysis, this estimate does not apportion the taxes paid between individuals and businesses and does not apply a deduction factor. Therefore, this estimate likely overstates the additional state revenues that would be generated by the earnings tax phase-out. The payroll expense tax was not phased-out as part of the proposal analyzed by the fiscal note, and therefore the fiscal note does not reflect additional state revenue from the phase-out of the payroll expense tax as provided in the Better Together policy recommendation.

The State Auditor's Office similarly reflected a positive impact to state revenues as a result of the ten year phase-out of the earnings tax.[11] The State Auditor's fiscal note for an initiative petition related to the earnings tax in St. Louis and Kansas City adopted in November 2010 noted that in 2008, the City of St. Louis collected $174.9 million annually in earnings tax and the City of Kansas City collected $202.5 million annually, for a total of $377.4 million in annual earnings taxes paid. The Missouri Department of Revenue reported that $105.9 million in deductions were claimed for earnings taxes in St. Louis and Kansas City in tax year 2008. Assuming a 4.5-percent effective individual income tax rate, the Office of Administration estimated a $4.8 million annual increase in state revenues when fully implemented, and a $500,000 increase in state revenues in the first year of the phase-out. Accordingly, the fiscal summary issued by the Auditor and presented to the voters indicated that if the earnings tax was fully-phased out, "[r]educed earnings tax deductions could increase state revenues by $4.8 million."

Unlike the present analysis, this estimate does not apportion the taxes paid between individuals and businesses and therefore likely understates the additional state revenues that would be generated by the earnings tax phase-out. The payroll expense tax was not phased-out as part of the proposal analyzed by the fiscal note, and therefore the fiscal note does not reflect the additional state revenue from the phase-out of the payroll expense tax provided in the Better Together policy recommendation.

B. OA-B&P Response to 2020-039

In its fiscal note response to a prior initiative petition seeking to enact the Better Together policy recommendations (IP 2020-039), the Office of Administration Division of Budget and Planning (OA-B&P) estimated that the Better Together policy recommendations could increase state revenues by $3.2 million once fully implemented. However, OA-B&P assumed that the phase-out of the earnings tax and payroll expense tax would occur over a period of twenty years, rather than over a period of ten years as provided in the language of the policy recommendations. Specifically, the language of the policy recommendation requires the one percent earnings tax to phase out by one-tenth-of-one percent annually for ten years pursuant to existing law, *see* Section 92.015, RSMo., and the one half-percent payroll expense to phase out by one-twentieth of one percent annually over ten years.[12] Based on its assumption that the phase-out was over a 20-year period rather than a 10-year period, OA-B&P reflected an annual increase in state revenues over a period of 20 years from 2022 through 2042, rather than over a 10-year period from 2022 through 2032.

In addition to the longer phase-out period assumed, the OA-B&P fiscal note response also understated the positive impact to state revenue by failing to account for the distinction between individual and business taxpayers, both of whom pay the earnings tax. As discussed above, during FY 2018, the earnings tax revenue base was $3,787,500,000 for businesses and $14,558,200,000 for individuals, which equates to an apportionment of approximately 20.65% business and 79.35% individual. This apportionment affects state tax revenues as individuals who pay the tax report the payment as an itemized deduction on their tax returns. However, a business that pays the tax treats the tax as an expense, which affects the net income of the business. Accordingly, applying a deduction rate to the entire earnings tax, as the OA-B&P fiscal note response does, fails to recognize that a portion of the tax is not required to be itemized in order to impact the income of taxpayers and thereby impact state revenues. The methodology discussed above and reflected in the supporting materials recognizes the apportionment between individuals and businesses in determining state revenue impact by applying a deduction rate to the tax paid by individuals, while not applying a deduction rate to the tax apportioned to businesses.

There are a number of additional distinctions between the present analysis and the OA-B&P response. First, unlike the OA-B&P analysis, the present analysis uses statutory rates of tax recognizing that a portion of the businesses paying the tax are corporations based on the Department of Revenue's apportionment between individual and corporate tax returns. Second, the OA-B&P response does not distinguish between the positive state revenue impact from the earnings tax and payroll expense tax, which further understates the estimated new state revenues. Unlike the earnings tax, which is largely assessed against individual earnings, the payroll expense tax is assessed based on the payroll expenses of businesses. As such, the payroll expense tax is a business cost that would reduce the income of the business and is not a separate itemizable deduction of an individual. Accordingly, no deduction rate should be applied to the payroll

[12] *See* Article VI, Section 30.7(2)(a) ("Upon the failure to submit any question to voters with respect to the continued levy or imposition of any tax on earnings, such tax shall be reduced in *the manner provided by law*, and any tax on payroll expense levied or imposed by a municipality prior to the effective date of this section shall be reduced by one-twentieth of one percent annually until such tax is eliminated.") (emphasis added).

expense tax reduction, and, by doing so, the OA-B&P fiscal note response understates the positive state revenue impact of the Better Together policy proposal.

Finally, the OA-B&P response understates the additional state revenue generated by the Better Together policy recommendation because it does not address the required property tax reductions and the additional state revenues such reductions would generate.

Better Together Policy Recommendations
Analysis of Local Government Savings

Executive Summary

Better Together's policy recommendation will result in significant savings in local government spending in the St. Louis region, beginning with savings of up to $37 million annually in 2023 and increasing to savings of up to $1 billion annually by 2032.

The enclosed analysis demonstrates savings to local governments over the ten-year period post-reorganization (2023 through 2032). The components of this savings include reductions in expenditures and surplus revenues over expenditures. During that period, the Metro City would reduce expenditures by up to $3.2 billion versus the current trend of expenditures over the same time period. In addition, over the same period, the Metro City would generate surplus revenues of $1.6 billion. This would result in a total savings to local governments over the ten-year period of up to $4.8 billion.

The following is a summary of the methodology used in analyzing savings to local governments pursuant to Better Together's policy recommendation.

Key Takeaways

- The Metro City, St. Louis Municipal Corporation, and Municipal Districts will have excess revenues over expenditures following reorganization, even with the phase-out of the earnings tax, payroll expense tax, and reduction in property taxes.

- During the first-year post-reorganization (2023) savings are estimated at up to $37 million based on the conservative assumptions set forth in the accompanying fiscal analysis.

- Because services within the former City of St. Louis will be provided by the Metro City, the St. Louis Municipal Corporation will have the revenue capacity to accelerate the satisfaction of outstanding obligations and debt, including through a refinancing or accelerated debt payments, which would result in additional savings in interest and carrying costs.

- The approximately $360 million in expenditures estimated for Municipal Districts is projected to decrease over time as outstanding obligations are satisfied. As with the St. Louis Municipal Corporation, this is expected to result in additional savings to local governments through the reduction in interest and carrying costs. It will also make additional sales and use tax revenue available to the Metro City to support the provision of general district services.

- The Metro City is estimated to have sales tax revenues in excess of $1 billion by 2025.

- As outstanding obligations are satisfied and continued efficiencies and economies of scale are realized, including through attrition of employees, the consolidation of services, and the implementation of state-of-the-art technology, revenues to the Metro City are expected to exceed expenditures by up to $334 million by 2032.

Savings

Based on modest 1% annual expenditure reduction above inflation, the Metro City will realize an initial reduction in expenditures and surplus of $37 million in 2023. The Metro City will achieve these savings despite additional expenditures necessary to ensure compliance with state law regarding appropriation to a 3% emergency fund and to fund the initial year operating costs of the St. Louis Fire Protection District. The St. Louis Fire Protection District is projected to increase expenditures by $21 million over the status quo. Revenues are available to cover these additional expenditures, while still leaving the Metro City with revenues in excess of expenditures and savings of up to $37 million.

Savings for local governments will reach as much as $250 million annually in 2026, and up to $1 billion annually by 2032. Even with Municipal Districts continuing to spend approximately $360 million annually and fire protection districts continuing to spend $300 million annually, Better Together's policy recommendation would capture much of the estimated overspend in government services compared to peer regions identified in Better Together's prior research—between $750 million and $1 billion annually.[1]

The enclosed analysis demonstrates savings to local governments over the ten-year period post-reorganization (2023 through 2032). The components of this savings to local governments include both reductions in expenditures and surplus revenues over expenditures. During that period, the Metro City would reduce expenditure by up to $3.2 billion, versus the current trend of expenditures over the same time period. In addition, over the same period, the Metro City would generate surplus revenues of $1.6 billion. This would result in a total savings to local governments over the ten-year period of up to $4.8 billion.

Better Together's regional spending comparison report showed that residents of the St. Louis region spend $1,912.84 per capita to deliver services.[2] To provide context, Better Together compared this cost to the budgets of metropolitan peers Louisville (KY) and Indianapolis (IN). Both Louisville and Indianapolis were at one time fragmented but have since consolidated their city and county governments. This research revealed that the per capita cost to fund municipal services in Indianapolis-Marion County was $1,208.11 and $1,094.76 in Louisville-Jefferson County.

By 2032, the Metro City will expend $2,170,858,488 annually on the provision of services in the region, a per capita cost of $1,657.16. This represents a per capita annual savings of $255.68. In 2032, a family of four would save $1,022.72 compared to status quo spending.

Solvency: Revenues Over Expenditures

In the status quo, expenditures are increasing by at least 2% annually due to inflation. The St. Louis Metro City will achieve modest cost savings of 3% annually through the consolidation of services, attrition, and implementation of technology - outpacing inflation to generate a net reduction in local government expenditures of at least 1% annually. This modest annual savings

[1] *See* Report and Recommendations of the City-County Governance Task Force.
[2] *See id.*

leads to increased revenues in excess of expenditures, which can be used to accelerate the servicing and retirement of debt and similar financing obligations.

Status Quo Revenues

As detailed in the enclosed materials, local governments in the City and County collected approximately $2.4 billion in revenues in 2017. Due to the current fragmented government structure, this revenue is divided among the following local governments:

- City of St. Louis: $790 million
- St. Louis County: $700 million
- Municipalities: $730 million
- Fire Protection Districts: $200 million

Better Together's 2017 regional spending comparison showed $2.5 billion in combined spending among the 90 local governments providing municipal services to the St. Louis region, as well as the 23 fire protection districts.[3]

Transition Revenues

Under Better Together's policy recommendation, during each year of the Transition Period (January 1, 2021 through December 31, 2022), revenues from current taxes, licenses, and fees of the City of St. Louis, St. Louis County, and the 88 municipalities would be distributed by the Metro City to the Municipal Districts as required for satisfaction of outstanding obligations and for providing services. Estimated distributions are based on the 2017 Comprehensive Annual Financial Reports (CAFRs) for the Municipalities and the 2017 actual expenditures of the City and County and rely on the following assumptions:

- 2% increase in property tax per standard adjustment/new construction;
- $100 million in additional sales tax revenue to reflect a full year of revenues generated by Prop P in the City and County and an annual 1% growth in sales tax;
- A 20% reduction in Court Fines & Fees due to consolidation of municipal courts;
- The initial one-tenth of one-percent phase-out of the earnings tax and the initial one-twentieth of one-percent phase-out of the payroll expense tax beginning in 2022.

Post-Reorganization Revenues

Post-reorganization (January 1, 2023 and thereafter), revenues from taxes, licenses, and fees of the former City of St. Louis, St. Louis County, and 88 municipalities would be distributed to the Municipal Districts and the St. Louis Municipal Corporation as required for the satisfaction of outstanding obligations and as necessary for services provided by Municipal Districts. In addition, all revenues from property taxes levied solely within the territory of a Municipal District will be distributed to the Municipal District. Municipal districts will also be authorized to levy property taxes or special assessments, levy and collect utility gross receipts taxes, make charges for services, and receive investment income.

[3] *See* Report and Recommendation of the City-County Governance Task Force.

St. Louis Metro City Revenues - Assumptions

- 2% annual increase in property tax per standard adjustment/new construction;
- 1% annual growth in sales tax revenues;
- One-tenth of one percent annual phase-out of earnings tax and one-twentieth of one-percent annual phase out of payroll expense tax;
- One-time 50% reduction of revenue generated by county property tax levied in the former County (approximately $24 million reduction in property taxes);
- Beginning in 2024, replacing the county purposes property tax levy in former City with the lowered general revenue levy within former County (approximately $10 million reduction in property taxes);
- Continued reduction in Court Fines & Fees, with amounts generated in excess of costs distributed to school districts.

Distributions to Municipal Districts - Assumptions

- 2% annual increase in property tax per standard adjustment/new construction;
- Declining sales tax distributions over time as outstanding obligations are satisfied and only sales tax revenues necessary for providing municipal district services are distributed as general district services are assumed by the Metro City.
    - Sales tax revenues necessary for Municipal Districts to provide municipal district services are estimated at approximately $63 million annually.

Distributions to St. Louis Municipal Corporation – Assumptions

- 2% annual increase in property tax per standard adjustment/new construction;
- Declining sales tax revenues distributed to the Municipal Corporation as obligations are satisfied over time;
- One-tenth of one percent annual phase-out of earnings tax and one-twentieth of one-percent annual phase-out of payroll expense tax.

Metro City Expenditures

To demonstrate expenditures and savings, Better Together developed a pro forma budget for the Metro City. Assumptions represent a conservative allocation of greater than or equal to the anticipated cost. Subsequent year budgets assume annual savings of 3%, offset by inflation at a rate of 2%. The specific areas of the Metro City budget targeted for savings would be determined by elected officials of the Metro City during the annual budget process.

Municipal District Expenditures

Municipal Districts will continue to provide municipal services such as parks and recreation, fire protection (for Municipal Districts operating a fire department), trash removal, maintenance of facilities related to municipal district services, and general administration. Municipal Districts may also continue to provide a general district services until such service is provided by the Metro City within the Municipal District. Expenditures reflect the newly-limited authority of Municipal Districts.

- Over time, it is anticipated that Municipal Districts operating a municipal fire department may discontinue doing so and instead contract with neighboring departments or become part of neighboring fire protection districts.

- Expenditures for general administration are likely to decrease over time given the newly-limited authority of Municipal Districts. For example, as reported in Better Together's General Administration Study, Municipal Governance and Management (January 2016), approximately $6 million was expended in 2015 on salaries for city managers, administrators, and clerks throughout the 88 municipalities.[4]

Expenditure Comparison

Based on a comparison of status quo expenditures and expenditures during the first-year post-reorganization, an estimated savings as much as $37 million would be realized during 2023.

- The expenditure comparison also reflects an $21 million increase in fire protection district expenditures to reflect the creation of the St. Louis Fire Protection District. This estimate is 33% more than the City of St. Louis Fire Department's expenditure, which is necessary to account for the district's operation as an independent political subdivision, requiring administrative services such as human resources, legal, accounting, facilities management, etc. The district's operations will be funded out of a dedicated property tax levy and fee revenues, but until such time as voters approve a property tax levy for the district, the Metro City will distribute revenues collected from within the former City to support the district.

- The expenditure comparison also reflects a distribution of $47.3 million to the Metro City's emergency fund as required by state law.

Municipal Corporation Debt Service

- There will be a greater capacity to accelerate the satisfaction of outstanding obligations, particularly within the former City, due to the provision of general district services on a regional basis. This greater capacity is expected to reduce debt-related expenditures over time.
- The $952 million in total outstanding debt is based on the City's FY19 Annual Operating Plan.

44% Revenue Bonds

56% of $1.7B = $952M

[32] Distributions to Municipal Corporation for Municipal Corporation Obligations less the required debt payment.

Better Together Policy Recommendations
Analysis of Municipal District Revenues and Expenditures

Executive Summary

Better Together's policy recommendation will result in significant savings in local government spending in the St. Louis region, beginning with savings of up to $37 million annually in 2023 and increasing to savings of up to $1 billion annually by 2032.

The enclosed analysis demonstrates the impact of Better Together's policy recommendations on individual municipalities in St. Louis County, which would continue as Municipal Districts providing municipal services such as parks and recreation, fire protection (for municipal districts operating a fire department), trash removal, maintenance of facilities related to municipal district services, and general administration. Municipal Districts may also continue to provide a general district services until such service is provided by the Metro City within the Municipal District.

Beginning in 2023, the Metro City would distribute revenues up to $526 million to Municipal Districts and expenditures of Municipal Districts are estimated at up to $360 million, with total revenues in excess of expenditures for all Municipal Districts of up to $165 million.

The enclosed analysis shows 23 individual Municipal Districts are estimated to receive revenues below expenditures, ranging from $5,000 in Hillsdale to $1.9 million in Richmond Heights; and a combined total of expenditures in excess of revenues for these 23 municipal districts to be up to $9 million. For these 23 municipal districts, the Better Together policy recommendation provides that the Metro City would distribute revenues generated within the boundaries of that Municipal District from any revenue source (including sales tax revenue) as necessary for the provision of municipal services. There is an estimated $50 million in TIF revenue reflected in Municipality data that could be eligible for distribution by the Metro City to Municipal Districts, resulting in a projected total of $526 million in distributions in 2023. Due to TIF revenue, some Municipal Districts shown as making expenditures in excess of revenues, may nonetheless be receiving net positive revenues.

Municipal District Revenues

Better Together used 2016 and 2017 Comprehensive Annual Financial Reports for each Municipality in order to estimate revenue distributions to Municipal Districts.

Estimated revenue distribution is based on all revenues currently collected by Municipalities and less revenues that would be utilized by the Metro City for the provision of general services. Revenues to be distributed to Municipal Districts include:

- Property tax
- Sales tax as necessary for the provision of municipal services, the provision of general district services until provided by the Metro City, and required to satisfy outstanding obligations

- Utility gross receipts tax
- Charges for service for municipal district services
- Investment income

In total, the Metro City is estimated to distribute revenues of up to $526 million to Municipal Districts for the provision of services and to satisfy outstanding obligations in 2023.

Municipal District Expenditures

Municipal Districts will continue to provide municipal services such as parks and recreation, fire protection (for Municipal Districts operating a fire department), trash removal, maintenance of facilities related to municipal district services, and general administration. Municipal Districts may also continue to provide a general district services until such service is provided by the Metro City within the Municipal District.

Expenditures reflect the newly-limited authority of Municipal Districts and are estimated at up to $360 million in 2023. As outstanding obligations are retired, expenditures for Municipal Districts are projected to decrease. Additionally, expenditures related to general administration will decrease as such services are provided by the Metro City.

Better Together used 2016 and 2017 Comprehensive Annual Financial Reports for each Municipality in order to estimate revenue expenditures of Municipal Districts. Expenditures of Municipal Districts include expenditures related to:

- General Government
- Municipal Fire Departments
- Public Works & Capital Outlay pertaining to municipal services
- Parks and Recreation
- Debt Service Obligations
- Non-Department (primarily trash and refuse, and other services not provided by the Metro City)

The combined total of all municipal district expenditures is estimated at up to $360 million beginning in 2023.

			Total Net Revenue Over Expenditures for All Municipal Districts	Combined Net Revenue (Under) Expenditures for 23 Municipal Districts

* There is an estimated $50 million in TIF revenue reflected in Municipality data that could be eligible for distribution by the Metro City to Municipal Districts, resulting in a projected total of $526 million in distributions in 2023. Due to TIF revenue, some Municipal Districts shown as making expenditures in excess of revenues, may nonetheless be receiving net positive revenues.

* * For the 23 municipal districts that incur Net Revenue (Under) Expenditures, the Metro City would distribute revenues generated within the boundaries of that municipal district from any source (including Sales Tax) as necessary to fund the provision of municipal services.

Municipality	Property Tax [1]	Sales Tax Distribution to Municipal Districts	Utility Gross Receipts	Charges for Service	Investment Income	Other	Total Distribution to Municipal Districts

Auditor Nicole Galloway
Missouri State Auditor
State Capitol, Rm. 121
Jefferson City, MO 65101

RE: IP 2020-054: Proponent's Supplemental Proposed Statement of Fiscal Impact

Dear Auditor Galloway:

Please accept Proponent's Supplemental Proposed Statement of Fiscal Impact for Initiative Petition 2020-054 (hereinafter "the measure") on behalf of proponent Unite STL pursuant to Section 116.175.1, RSMo. This submission supplements Proponent's Proposed Statement of Fiscal Impact submitted on April 3, 2019 and is in response to the April 1, 2019 submission by the Municipal League of Metro STL (hereinafter the "Municipal League").

The Municipal League's submission for the measure restates fiscal impact information previously submitted in connection with Initiative Petition 2020-042 (hereinafter "IP 2020-042")—a substantially similar and fiscally-identical measure also submitted by Unite STL.

The fiscal summary for IP 2020-042 fairly and sufficiently summarized savings to the Metro City estimated at $1 billion annually by 2032. This savings to the Metro City also reflects the measure's impact on the City and County, since the measure combines the existing County and City into the Metro City, and the Metro City is a continuation of the corporate existence of the County. *See* IP 2020-054, Art. VI, Section 30.2.

The Municipal League takes issue with the fiscal summary providing a range of estimated savings from unknown to $1 billion annually by 2032. As detailed in Proponent's Proposed Statement of Fiscal Impact, the City and County region currently spends between $750 million

and $1 billion annually more to provide the same services as consolidated governments elsewhere.[1] Proponent's Proposed Statement of Fiscal Impact demonstrates how the structure adopted through the measure can capture those savings over time. The submission is reasonable; it addressed and did not diverge from the particular issue—the fiscal impact on local governments from the measure. Evaluations of city-county consolidations involving just two governments—as compared to the 90 involved with this measure—or in regions without the level of fragmentation found in the City and County through Better Together's research are inapposite.

The revenue and expenditure assumptions included in Proponent's Proposed Statement of Fiscal Impact are reasonable and are based on the research, analysis and data submitted therewith compiled by Better Together over the past five years. Additional sources demonstrating the reasonableness of revenue and expenditure assumptions are referenced herein, including the City of St. Louis, Office of the Comptroller's Long-Range Financial Plan Update, released March 15, 2019, reflecting base revenue growth assumptions consistent with the assumptions included in Proponent's Proposed Statement of Fiscal Impact.[2]

Finally, contrary to the Municipal League's contention, achieving the estimated $1 billion in savings depicted in Proponent's Proposed Statement of Fiscal Impact does not rely on accelerated debt repayment. Instead, accelerated debt repayment is depicted to show how the estimated savings could be achieved more rapidly.[3]

Thank you for your attention to this matter. Please do not hesitate to contact me if you have any questions or if there is any additional information I can provide.

Very truly yours,

Christopher R. Pieper

Fiscal Note Summary

Individual St. Louis County municipalities expect decreased revenues to exceed savings with a total unknown impact. The overall annual local fiscal impact is unknown but estimated to be between a cost of $80 million to a savings of $1 billion by 2032. State revenue could increase up to $7 million annually by 2032.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Heidi Miller regarding a proposed statutory amendment to Chapter 208 (2020-053)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Heidi Miller on March 22, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

Chapter 208, RSMo, is amended by adding thereto one new section, to be known as section 208.207, to read as follows:

208.207. 1. Notwithstanding any provision of law to the contrary, beginning July 1, 2021, individuals nineteen years of age or older and under sixty-five years of age who qualify for MO HealthNet services under 42 U.S.C. Section 1396a(a)(10)(A)(i)(VIII) and as set forth in 42 C.F.R. 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. Section 1396a(e)(14) and as set forth in 42 C.F.R. 435.603, shall be eligible for medical assistance under MO HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. Section 1396a(k)(1) and any implementing regulations.

3. No later than March 1, 2021, the Department of Social Services and the MO HealthNet Division shall submit all state plan amendments necessary to implement this section to the United States Department of Health and Human Services, Centers for Medicare and Medicaid Services.

4. The Department of Social Services and the MO HealthNet Division shall take all actions necessary to maximize federal financial participation in funding medical assistance pursuant to this section.

5. No greater or additional burdens or restrictions on eligibility or enrollment standards, methodologies, or practices shall be imposed on persons eligible for MO HealthNet services pursuant to this section than on any other population eligible for medical assistance.

6. All references to federal or state statutes, regulations or rules in this section shall be to the version of those statutes, regulations or rules that existed on January 1, 2019.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-053)

Subject

Initiative petition from Heidi Miller regarding a proposed amendment to Chapter 208 of the Revised Statutes of Missouri. (Received March 22, 2019)

Date

April 11, 2019

Description

This proposal would amend Chapter 208 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Heidi Miller, MD, **Timothy McBride, PHD**, and **Abigail Barker, PHD** provided information to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated they defer to the Department of Social Services to calculate the fiscal impact of the proposed legislation.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated they defer to the Department of Social Services for an estimate of fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Department of Social Services.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated there is no impact to their department in regards to this initiative petition.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated this initiative petition will impact the budgets of the Department of Social Services, Department of Mental Health, the Department of Corrections, and the Department of Health & Senior Services by proposing the expansion of Medicaid eligibility.

Section 208.207.1 – 208.207.2

- Today, Missouri covers custodial parents below 19% of the federal poverty level (FPL), which for a family of four is currently $4,769 per year. In addition, non-custodial adults and childless adults without other qualifying criteria are not currently eligible for Medicaid in Missouri regardless of income.

- The Affordable Care Act allows states to expand health care coverage under the Medicaid program to non-elderly, non-Medicare, low-income adults up to 133% of the FPL. The same law includes a 5% disregard of income when determining eligibility for health care benefits; thus, adults with incomes up to 138% FPL will qualify. For a family of four in Missouri, this is currently income up to $34,638 per year.

- The Family Support Division estimates a need of an additional 56 Eligibility Specialists, 6 Eligibility Supervisors, and 1 Social Services Manager to assist in enrolling new participates. The estimated cost for the new full time employees (FTEs) is $4.6 million.

- The Family Support Division estimates increased costs for the call center for eligibility questions is $9.1 million.

- MO HealthNet would need to contract with an actuary to provide actuarially sound managed care rates. MO HealthNet estimates this cost to be approximately $500,000 based on the previous scope for expansion.

- MO HealthNet estimates a need of an additional 15 Correspondence and Info Specialists, 18 Medicaid Specialists, 15 MASII, and 2 Social Services Managers to provide call center and customer service support, tracking, and reporting claims data. The estimated cost for the new FTEs is $4.1 million.

- MO HealthNet estimates changes to the Medicaid Management Information System (MMIS) would be in excess of $5 million.

- OA-ITSD estimates costs for system changes related to Medicaid Expansion to be approximately $657,000 for the first year and $289,000 for the second year.

- The expansion of eligibility for Medicaid benefits under the proposed federal program could potentially include coverage for an estimated 250,000 additional Missourians.

The costs for this expansion would be in excess of $2 billion per year. The expansion population state match would be at least 10%; however, that match is subject to change as federal law is amended. Depending on implementation requirements from CMS, there could be some costs shifted from state funds to federal funds; however, the cost of implementing this proposal will result in a significant cost in state general revenue. The overall estimated general revenue cost for implementation of this proposal is estimated to exceed $200 million.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would not have a fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated they are deferring to the Department of Social Services on this initiative petition.

Officials from the **Office of State Courts Administrator** indicated there may be some impact on the courts but there is no way to quantify that currently.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have a positive fiscal impact on their city in an indeterminate amount, because it will increase the benefits people receive thus freeing up their city's health levy dollars for other uses.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from **Missouri State University** indicated no fiscal impact for their university.

Heidi Miller, MD, **Timothy McBride, PHD**, and **Abigail Barker, PHD** provided the following information.

March 15, 2019

Nicole Galloway, CPA
Missouri State Auditor
301 West High Street, Rm 880
Jefferson City, Missouri 65102
Sent to *moaudit@auditor.mo.gov*

Ms. Galloway,

Today I submitted two initiative petitions to expand access to health care for more than 300,000 Missourians. I understand that in the process of certifying these petitions for signature collection, your office will provide a fiscal note and fiscal note summary. To aid in this process, I'd like to share the attached document "Analysis of the Fiscal Impact of Medicaid Expansion in Missouri," which was funded by the Missouri Foundation for Health and produced by the Center for Health Economics and Policy at Washington University in St. Louis.

To complete this analysis, Center researchers conducted reviews of other states' experiences, including reports at the national level by the Urban Institute, Robert Wood Johnson Foundation, the Commonwealth Fund, and the Centers for Medicare and Medicaid Services. They relied upon published Missouri Medicaid enrollment and cost data as well as a prior fiscal analysis of Medicaid expansion conducted by the Department of Social Services, and the Office of Administration in the Governor's Office, in 2014. They also carried out independent analyses of American Community Survey data and Medical Expenditure Panel Survey data.

Drawing upon these data sources and making conservative assumptions at every step, the report concludes that Medicaid expansion in Missouri is cost neutral and could create cost savings. **The best-estimate is that Medicaid expansion in Missouri will reduce the state's 2020 financial obligation by $39 million.**

If you or a member of your staff would like to meet and discuss this analysis further, I am happy to connect you with Timothy McBride PhD and Abigail Barker PhD who authored the report. Thank you for your service to Missourians and the opportunity to share this analysis to inform the fiscal note process.

Sincerely,

Heidi Miller, MD

Analysis of the Fiscal Impact of Medicaid Expansion in Missouri

Center for Health Economics and Policy
INSTITUTE FOR PUBLIC HEALTH AT WASHINGTON UNIVERSITY

February 2019

To complete this analysis, Center researchers conducted reviews of all existing documentation of other states' experiences, including reports at the national level by the Urban Institute, Robert Wood Johnson Foundation, the Commonwealth Fund, and the Centers for Medicare and Medicaid Services. We relied upon published Missouri Medicaid enrollment and cost data as well as a prior fiscal analysis of Medicaid expansion conducted by the Department of Social Services in 2014. We also carried out independent analyses of American Community Survey data and Medical Expenditure Panel Survey data. Parts of the analysis were informed by a discussion with analysts at The Urban Institute. The key assumptions were vetted by health policy staff at the Missouri Foundation for Health, the Missouri Hospital Association, the Missouri Primary Care Association, and others.

Introduction

Although the Affordable Care Act (ACA) of 2010 directed all states and the District of Columbia to expand their Medicaid programs to cover all adults with incomes up to 138% of the Federal Poverty Level (FPL), a subsequent Supreme Court ruling in 2012 made this expansion optional. Initially, in 2014, 25 states expanded their programs. Subsequently, eight additional states expanded their programs through legislative action, and in 2017-18, four states passed ballot initiatives to expand.[1] Early evidence from multiple states indicates that expansion has a positive impact on state budgets; due to the increased federal match available for expansion populations, some states have even realized net cost savings.

The goal of this analysis is to estimate the impact of an expansion of Medicaid in Missouri (to 138% of the FPL) in 2020 for the first five years of expansion on the state budget. This report outlines the important background, sources of data, methods, and assumptions used to generate these estimates. The "best estimate" of the impact on the state budget is presented, along with some sensitivity analysis to show the impact of crucial assumptions on the estimate. A companion spreadsheet to this report allows the user to vary all assumptions as desired.

Background

In the first three years after the implementation of the ACA (2014-16), expansion states received 100% federal match on spending for newly eligible populations, which ensured that states' budgets would not be negatively impacted due to upfront costs or high pent-up demand. From 2017 to 2020, the federal matching rate is being gradually reduced to 90%. This was expected to have a minimal impact on state budgets, given the likelihood that cost savings would ultimately occur as better access to care would both decrease uncompensated care and

increase prevention and early intervention in the course of disease treatment, resulting in very little net cost to the states.[2] However, for states such as Missouri that did not expand Medicaid during that window, the challenge when considering a later expansion is that the federal match is initially set at 90%, meaning that the state budget must cover 10% of the costs of expansion, and any upfront costs or high pent-up demand are not fully covered.

Furthermore, prior to the ACA, Missouri's eligibility levels for parents were among the lowest in the United States. Although most states, like Missouri, previously offered no coverage to childless adults, this still creates some difficulty in applying other states' outcomes to Missouri, as the newly eligible population would contain a disproportionate share of extremely low-income parents. Conversely, because Missouri did not expand Medicaid in 2014, a large share of otherwise eligible people with slightly higher incomes (100% to 138% FPL) obtained highly subsidized coverage through health insurance marketplaces of the ACA, and these people may now be better managing their health conditions or have less pent-up demand for health care services. These caveats suggest that a range of values be considered as representative of the costs of the expansion population.

Finally, Missouri's reliance on provider taxes and other forms of revenue to finance its Medicaid program is much greater than in other states.[3] Because of the magnitude of the provider tax programs, it is important to consider the role these have played in drawing down federal dollars and how this might change in an environment of Medicaid expansion. Current federal law also specifies cuts to the Disproportionate Share Hospital (DSH) program beginning in 2020, and since Missouri's state share of DSH-eligible expenditures is financed through provider taxes, it is important to consider the potential impact of a cut to the cap on federal matching funds.

Data and Methods

Cost and financial data for this analysis come primarily from aggregation of MO HealthNet Monthly Management Reports for fiscal year 2017, as this was the last full fiscal year of data available at the start of the project.[4] These data have been supplemented by information on the Federal Reimbursement Allowance (FRA) from the Missouri Hospital Association (MHA), which administers that program.[5] Supplemental cost data have also been calculated using the Medical Expenditure Panel Survey (MEPS), 2015-16.

Information on the size and composition of the population that would potentially enroll in a MO HealthNet expansion comes from census data: the 2017 American Community Survey (ACS) has been analyzed for Missouri and checked against administrative (enrollment) counts. In certain cases, we relied on information from a 2014 Missouri Department of Social Services (DSS) analysis of the impact of Medicaid expansion, in particular for estimating proportions of existing Medicaid eligibility groups whose incomes would qualify them for coverage under an expansion.

Methods for processing the ACS data include restricting the sample to individuals in households earning at or below 138% FPL, then combining responses to a series of questions on insured status, removing those with Medicare and Medicaid while sorting others into categories. As detailed in the next section, we separate those with employer coverage, those with other private coverage, and those without insurance, because we assume different take-up rates will apply to these three groups.

Assumptions

There are about 18-20 assumptions made in creating this analysis for 2020, but several of them are quite minor, and most of them have very little impact on the state's overall financial obligation. We highlight and discuss the most influential assumptions below, including ways in which other states' experience may inform that of Missouri, and conclude with a list of other assumptions made.

- **How many adults will enroll?**

  The Kaiser Family Foundation (KFF) estimated for Missouri in 2016 that 199,000 uninsured adults would be eligible for Medicaid under an expansion, which excludes those currently buying Marketplace coverage (about 72,500 with incomes below 138% FPL in 2018[6]) as well as those already eligible but not enrolled.[7] This suggests a total of at least 271,500 adults *eligible*. The Urban Institute estimates a total of 352,000 new enrollees (non-elderly adults and children) in Missouri *will actually enroll* in the event of an expansion.[8]

  Our own analysis of ACS data indicates that roughly 458,000 nonelderly adult citizens of Missouri with incomes below 138% of the FPL are potentially eligible for expansion, including about 190,000 uninsured adults, 72,400 with private coverage from another source, and 195,750 adults with employer-sponsored insurance (ESI) coverage. Looking first at the currently uninsured population, there is some literature available on take-up rates: Urban Institute has found an average 73% take-up across existing expansion states, although they note that actual take-up rates have varied by state due to factors such as executive branch commitment, the role of private organizations, the political climate, etc. **We apply a 73% take-up rate to the ACS-based estimates of about 190,000 uninsured.**

  We assume that a small number of those with ESI may be willing to take up Medicaid and drop their ESI coverage, which is known as "crowd out." According to KFF, studies exploring the potential for Medicaid expansion to crowd out private insurance have found mixed results, with most showing no evidence of crowd out and some showing slight declines in private coverage in expansion states following expansion. **We use a 10% crowd-out rate.**

  As noted, the ACS indicates that about 72,400 adults age 18-64 below 138% of the FPL hold private non-ESI coverage, meaning they likely purchase it directly from an insurance company (potentially subsidized through the Health Insurance Marketplaces). Since all Medicaid coverage has a zero premium, making this the dominant choice for such individuals, **we assume that all (100%) of those with other private coverage would take up Medicaid coverage.**

  Combining these assumptions, we estimate that about 231,000 adults would take up Medicaid in 2020 and be part of the expansion population. (Note that this is equivalent to an average take-up rate of 73% applied to a combined potential adult population of about 315,000.)

- **How many kids will enroll?**

  Our estimate includes the possibility that some children who are currently eligible for Medicaid but are enrolled in private coverage or uninsured may enroll during an expansion, which is reflected in an

increased budget for kids at the standard match. Analysis of the data for children under age 18 and with family income below 138% of the FPL suggests that about 30,000 children are currently uninsured, that roughly 15,000 children have private, non-ESI coverage, and that 77,000 have ESI coverage derived from a parent. That there remain any uninsured children under 138% of the FPL may seem perplexing since all are currently eligible for Medicaid and have been for years. On the other hand, there are several reasons that some parents may have chosen not to sign their eligible children up for Medicaid. These include: stigma, lack of awareness that they are eligible, barriers to obtaining coverage (complexity of the system and many bureaucratic requirements), parents' immigration status, and the possibility that if the children are very healthy the parents may not see the need to obtain coverage.

Experience from ACA implementation has shown that a large number of children have obtained coverage due to ACA coverage expansions even though they were eligible prior to 2014, in what is often characterized as the "woodwork effect." For this and other reasons, we assume that some children will obtain coverage after a Medicaid expansion, but also that there remain some underlying reasons why some children will never be signed up for coverage. **We assume take-up rates of 66%, 9%, and 90% respectively (reducing the adult values of 73%, 10%, and 100% by 10%) for a total of about 40,000 kids being added to Medicaid at the standard match.** Note that a few higher-income kids would likely enroll in SCHIP, pay premiums, and be eligible for the enhanced FMAP associated with that program, which is not reflected in the model.

The assumptions made here imply that about 40,500 children who are citizens and in families with income below 138% of the FPL would be added to the Medicaid population in 2020. This brings the total estimate of the population that could be enrolled in an expansion to 271,500.

- **How much will the adult expansion population cost?**

As noted above, a range of information is available to address this question. One option is to use the average cost of a current adult, non-pregnant recipient who is not aged, blind, or disabled (ABD). In FY17, this was $459/month, including pharmacy, which represented about 25% of that cost. Evidence from other states suggests that the new enrollees will be less expensive, possibly not initially, but after the first couple of years. Since Missouri's eligibility level is so low, it suggests that the average cost may not be representative of the general Medicaid expansion population, who may be healthier.

Another approach is to analyze Medical Expenditure Panel Survey (MEPS) data, which is not Missouri specific, but which can generate average total health expenditures across demographic groups (age, gender) and self-reported health status. These average costs can then be combined with CPS data in which counts of the eligible population by age, gender, and self-reported health status in Missouri are specified. When analyzing costs for low-income Midwestern MEPS respondents with public insurance or no insurance, this method gives an estimated cost of about $340/month in 2018 dollars. This is likely a low estimate due to some uninsured people not seeking needed care.

Other states have reported data on this issue, but it is difficult to separate out the costs of the truly newly eligible, who are more likely to be relatively healthy, and the spend-down population, who are by

definition incurring unusually high costs. The latter group – or the subset who are eligible for expansion by reason of their income – typically becomes incorporated into the expansion cost data. We assess this group separately in the next section. To inform our estimate, we reviewed analyses from several Medicaid expansion states as well as considering a CMS report that summarizes data on expenditures for expansion states.[9] We expect that the newly eligible population will be slightly healthier and less expensive than the current adult non-ABD population, i.e., custodial parents with incomes less than 20% FPL.

We use a cost estimate of $425/PMPM for the newly eligible, but we consider a range from $350 to $525, noting that a bell-shaped distribution applies to this (and all) estimates and that the extreme ends of the range are considered unlikely.

- **How much can be saved on the spend-down population?**

FY2017 enrollment data show that about 8.5% of the ABD population is considered "spenddown." This category of individuals earns too much to qualify for Medicaid, but are able to gain Medicaid coverage by documenting their high out-of-pocket costs that effectively reduce their income to the qualifying level. Fiscal data show that total spending across the entire ABD population is about $5.7 billion. If we assume proportionality, then about $480 million is spent by this population. (In fact, it is likely much greater than this. A Kaiser report found in 2012 that on average, the medically needy population in 2009 was 5% of enrollment but incurred 11% of costs, and this is a similar group.)[10] Thus, when estimating spending on this population, we make the conservative assumption that they are 25% more expensive than proportionality would suggest.

Data from Arkansas show that their spend-down disabled population was actually reduced by 87.2% pre/post expansion (although the overall size of the population was much smaller to start), allowing significant savings to occur through the increased match.[11] Washington state expected savings of $35 million in FY2015 (year two of implementation)[12] on a pre-ACA spend-down population of about 12,000.[13] Missouri's population averages about 19,000, so a savings of $55 million by year two would be predicted on this basis.

Finally, an earlier DSS analysis found that about 14.5% of the spend-down population would qualify for expansion – because this subgroup of individuals are not on Medicare and have incomes between 85% and 138% FPL, so they would be immediately eligible under the Medicaid expansion without having to spend down first – so we use 14.5% of 8.5% of the original permanently and totally disabled (PT&D) spending, scaling up by 25% as mentioned above, to determine that **about $70.7 million in P&TD spending would be subject to the new 90% match, saving about $17.4 million.**

- **How much can be saved on the disabled population that never becomes dual eligible?**

Previous DSS analysis of enrollment patterns found that about 47% of persons who applied for Supplemental Security Income (SSI) benefits did not ever become disabled according to that standard and thus were not ultimately dually Medicare- and Medicaid-eligible. That analysis also made the assumption that about 25% of this group, on a rolling basis, would not elect to apply for Medicaid through obtaining P&TD eligibility if they were instead eligible through an expansion. This translates into about a 4.9%

annual rate of attrition from the standard match rate and to the 90% match rate: each year, 4.9% of the total P&TD enrollment will be replaced by expansion-population enrollment.[14] This is one key assumption in the model that has a cumulative impact over time, which will be reflected in the five-year horizon analysis. We do assume that the impact tapers off over the course of the five years.

Data from Arkansas show that their disabled SSI population was actually reduced by 6.6% pre/post expansion, allowing significant savings to occur through the increased match.[15] They expected to save $45 million in FY2016. Kentucky expected to save $8 million in FY2015. In Oregon, new enrollees seeking disability determinations dropped by 80% in one year.[16]

Of the 47% who never become dually eligible, **we assume 30% of them will forgo the P&TD pathway in the presence of an expansion**. This represents a slight increase from the assumption made in the previous DSS analysis, informed by the experiences of several states and resulting in an overall annual attrition rate of 4.9% and corresponding to about a $55 million savings in FY2020 (similar to Arkansas when adjusted for inflation and the size of its P&TD population). We also note that this is a key driver of cost savings, and every effort should be made to strategize the best way to create fiscal savings while ensuring that those with some level of disability are making the best choice for their situation.

- **What is the growth rate of spending (inflation) and of the population likely to be?**

Growth rates in Medicaid spending, not including growth due to enrollment changes, has averaged 4-5% over the past several years. This includes inflation, measured by the CPI, which is typically about 2%. The remainder of growth is due to what may be broadly termed "utilization" and refers to the amount and intensity of services needed by the enrolled population. **An annual spending growth rate of 4.5% is used**, and when projecting forward to 2024, we also add in a population growth rate of 0.66% annually to ensure that we adequately account for the fact that the much more inclusive "expansion population" eligibility category may increase proportional to Missouri's average population growth rate. We note that by 2024 and beyond, it is likely that utilization growth may be arrested and may even reverse slightly due to increased access to preventive care and primary care services, but this is not reflected in our estimates.

- **What other assumptions are needed?**

All programs for adults not required by law are subsumed into Medicaid expansion, and all spending on these programs receives the 90% match instead of the standard match. This includes Blind Pensions, Presumptive Eligibility, Ticket to Work Health Assurance, Breast/Cervical Cancer Treatment, and Women's Health Services. This generates significant savings, in particular, on Medicaid for Pregnant Women in Poverty, as 94% of participants (about 13,000) would be eligible under expansion according to prior DSS analysis. A total of about 19,000 beneficiaries would be converted to expansion and receive the 90% match (not counting the enrollment of about 68,000 in Women's Health Services).

We also assume that the FRA rate would decline somewhat due to an expansion, both because some of the funding is tied to uncompensated care and because of internal MHA formulas that ensure fairness across hospitals with varying Medicaid patient volume. A related assumption is that DSH allotments would be reduced further (based upon published information about DSH reduction methodology[17]) if

Missouri expands Medicaid and thus has less uncompensated care. Also related is our assumption regarding "direct Medicaid FRA" spending – spending that is administered by MHA outside the state budget and helps "top up" the low reimbursement rates to hospitals – which is that because about 4% of total hospital spending is made in relation to claims for P&TD patients who would become expansion population, this spending will also receive a higher match.

Results for 2020

Assuming a 4.5% annual growth rate in projecting FY2017 values to FY2020, and assuming that DSH cuts occur as currently specified in Federal law, **we find that a Medicaid expansion in Missouri is approximately revenue neutral and could create cost savings**. With the assumptions outlined in the previous section, we find that the total state obligation (general revenue plus other sources, excluding provider tax revenues) in 2020 is about $3.245 billion in the absence of expansion and $3.206 billion in the presence of an expansion, for **a savings of about $39 million**.

	Lower Bound	**Best Estimate**	**Upper Bound**
Total New Adult Eligible Population	270,000	315,000	360,000
Average Take-up Rate	68%	73%	78%
New Enrollee Cost, PMPM	$350	$425	$525
% Never-Dual Who Forgo P&TD Pathway	40%	30%	20%
State Obligation with Expansion	$3,150.4M	**$3,206.1M**	$3,287.3M
State Obligation without Expansion	$3,245.0M	$3,245.0M	$3,245.0M
Net Change	**-$94.6M**	**-$38.9M**	**+$42.3M**

In addition to our estimate, the table shows two additional estimates based on changes in the key assumptions discussed above. These estimates should be viewed as lower and upper bounds for the actual value, as many assumptions must be set at the extreme end of their likely ranges in order to obtain these values. **The most likely result, if assumptions vary moderately in either direction from our choices, is a value that is within +/- $30m of our best estimate.** Nonetheless, for transparency in communicating the importance of key assumptions, we show:

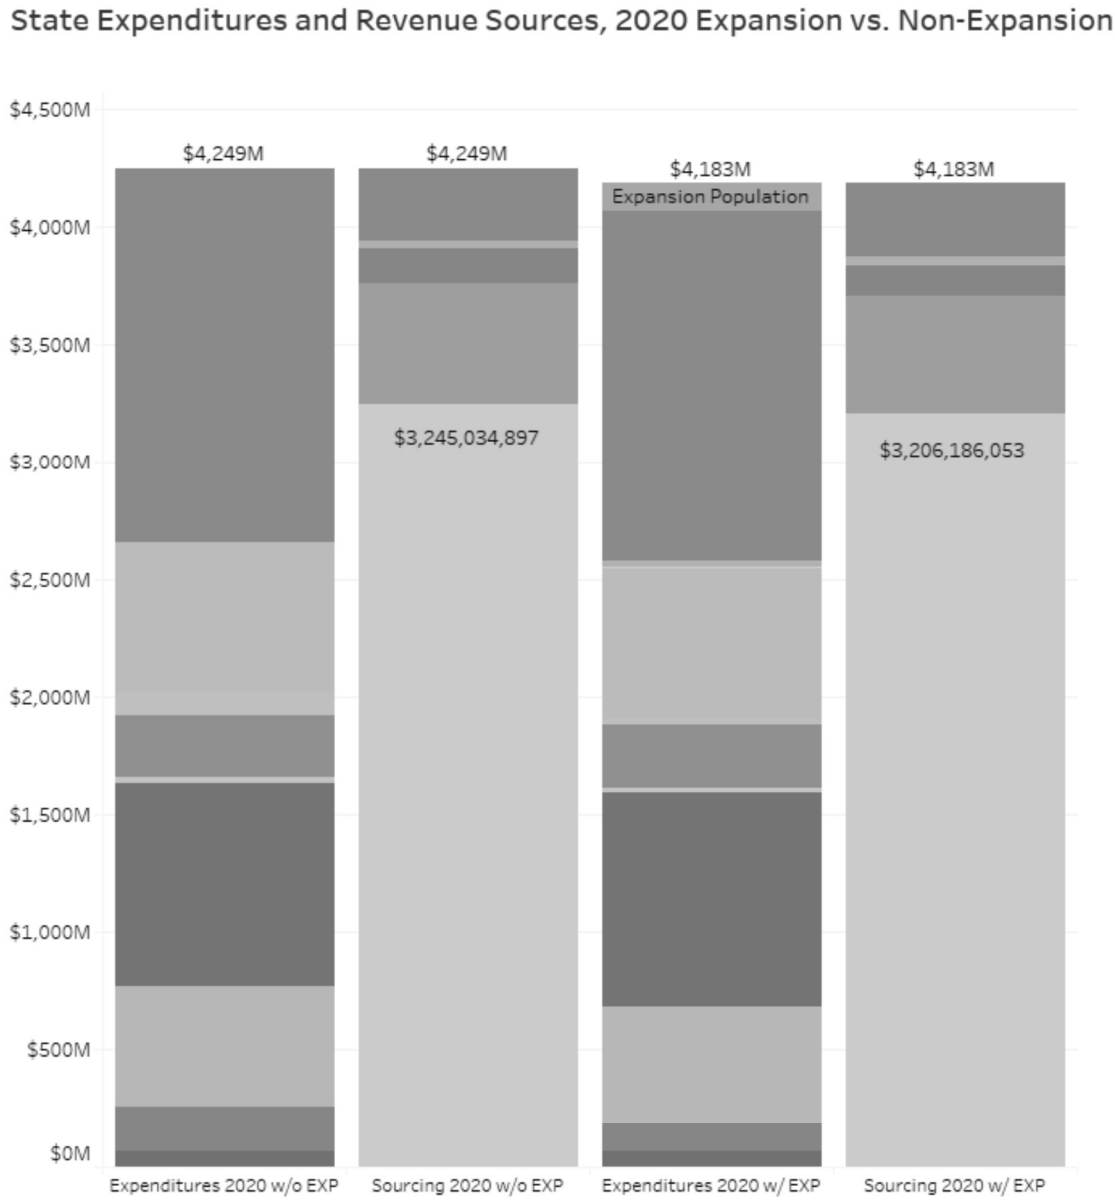
- A worst-case scenario, in terms of immediate fiscal impact, would occur due to higher than expected take-up rates and PMPM costs, along with lower numbers of P&TD applicants switching to the expansion eligibility pathway and smaller costs currently associated with the P&TD spenddown population. With all worst-case assumptions in place, the state obligation under expansion is estimated to be $3.287 billion, or $42 million higher than the $3.245 billion in the non-expansion case.
- A best-case scenario, in terms of immediate fiscal impact, would occur due to lower than expected take-up rates and PMPM costs, along with higher numbers of P&TD applicants switching to the expansion eligibility pathway and larger costs currently associated with the P&TD spenddown population. With all best-case assumptions in place, the state obligation under expansion is estimated to be $3.150 billion, or $95 million lower than the $3.245 billion in the non-expansion case.

Note that this is a very narrowly defined impact insofar as higher take-up rates are associated with more individuals obtaining coverage and needed medical services, which is likely to have social and economic benefits beyond the MO HealthNet program.

Finally, we consider the possibility that DSH cuts are postponed or eliminated, and we find that the state budget improves in both cases. The gap between expansion and non-expansion widens slightly – assuming that DSH cuts would be more dramatic in the case of expansion – but in general the outcomes are similar: costs are higher ($3.213 billion) without expansion than they are with expansion ($3.159 billion).

For the assumptions corresponding to our "best estimate," the resulting costs are compared in Figure 1. The first two columns are expenditures and sourcing in 2020 without expansion, and the last two columns are expenditures and sourcing with expansion. Of note are the labeled gold rectangles which represent the state's obligation from general revenue and other funds (not including provider taxes).

Figure 1.

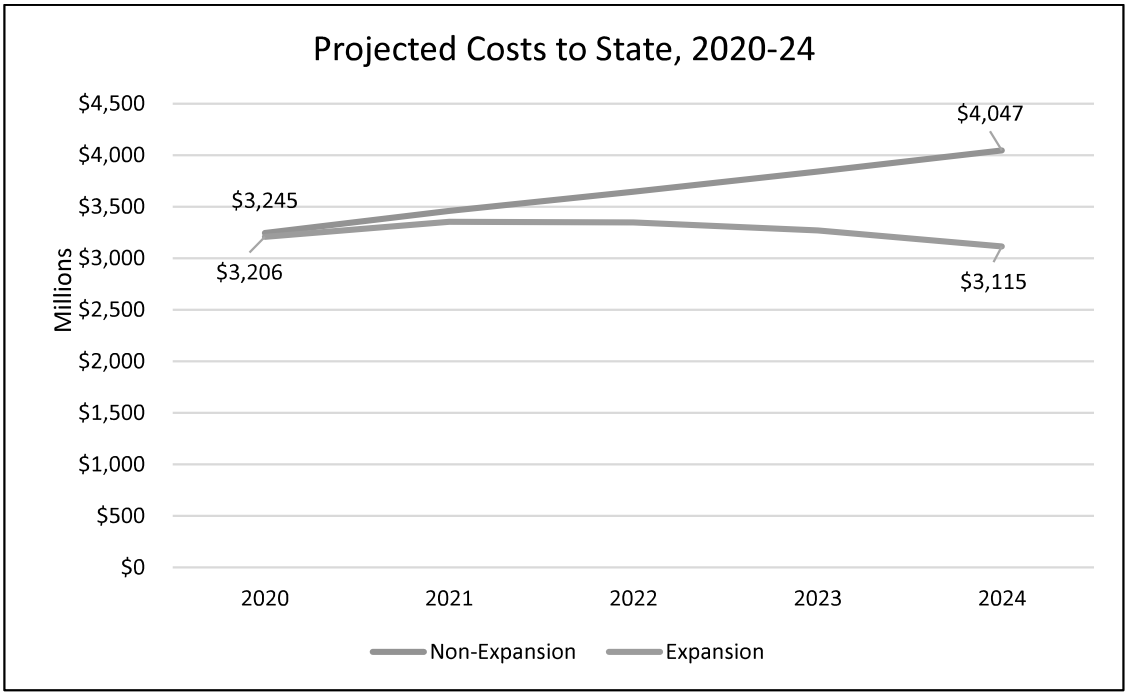


Projections, 2020-24

The last piece of the analysis is to extend these projections to 2024. As mentioned previously, we expect a cumulative effect to occur due to attrition from P&TD enrollment, which is included. Due to the significant savings expected from this population, by 2023 our projection shows the state's obligation actually declining compared to 2020. Another factor that also contributes is the DSH cuts, which in an expansion scenario are less challenging for the state budget due to more FRA provider tax revenues being able to be spent on expansion-eligible individuals, thereby receiving a 90% match that is not limited by the DSH cap, which applies to uncompensated care.

Thus, Figure 2 shows that, beginning with the "best estimate" values for 2020, and continuing to assume a 4.5% growth rate in prices and utilization, by 2024 the annual savings due to expansion is estimated to be about $932 million. The projection also includes an annual population growth rate of 0.66% for both scenarios.

Figure 2.



Not reflected in this projection is the likelihood that better access to care, especially access to prevention and management of chronic conditions, is likely to have a dampening effect on growth of costs for both the expansion population as well as the P&TD population over time. These effects may occur at significant rates after the first few years of expansion.

Also not reflected is the possibility that the Federal Matching Assistance Percentage (FMAP) may not be constant over the five years. Since the FMAP formula is determined based on a state's per capita income relative to the U.S. average, it is difficult to predict. However, it has fallen over the past few years, suggesting Missouri has been more stagnant than some other states, so it seems reasonable to make the neutral assumption that the FMAP does not change.

Additional Considerations

Although not explicitly modeled here, our review of other states' experience suggests a positive fiscal impact to the state budget due to savings within the Department of Corrections, savings within the Department of Mental Health, and increased tax revenues due to the increase in paid health care services.[18]

States that have expanded have seen health care-related savings in their correction budgets for newly Medicaid-eligible prisoners who are treated in an inpatient medical facility outside of the state correctional system. Kentucky has estimated savings of $5.4 million in SFY 2014 and $11.0 million in SFY2015 from replacing state general funds with Medicaid funds for hospital inpatient costs of prisoners. Though we are unable to find updated estimates, the Missouri Department of Corrections previously estimated (for the prior DSS expansion analysis) that inmates in Missouri incur an average of 150 inpatient bed days outside of a corrections facility per month, for a savings of about $3.1 million in 2020. That analysis also estimated savings of $6.9 million in 2020 due to reduced recidivism.

There is some concern about cost containment, with respect to the relatively healthy expansion population who would doubtless be enrolled in managed care, because of Missouri's limited ability to accurately assess – and compensate – managed care companies' exposure to and management of risks, and even to accurately convey enrollees' information to managed care companies. With current technology and staffing limitations, there is a chance that costs will not be well contained in a managed care setting. However, information technology upgrades are in the beginning stages of a six-to eight-year timeline, with significant funding in the governor's FY2020 budget recommendation to achieve the IT capabilities for modernizing existing payment methodologies, even in the context of an unexpanded program.

On this point, a recent Commonwealth Fund analysis of 10 Medicaid expansion states finds:

> "States have made health system reform a core element of their Medicaid expansions, with the aim of improving access, quality, efficiency, and population health. States have sought to incorporate evidence-based practice and payment strategies, with an emphasis on populations likely to benefit from improved care management and on better integration of treatment for physical and behavioral health problems. Seven of 10 are directly engaged in provider payment and delivery system reform. Agencies noted the importance of experienced provider networks in addressing complex health and social needs, along with managed care's role in quality improvement and payment reform. States embrace their roles as payers and health care innovators, identifying stability of both coverage and the underlying federal policy environment as key factors."[19]

It is our recommendation that these issues be brought to the forefront in any discussion of Medicaid expansion, with barriers to implementation of such innovations identified and addressed as far in advance as possible of the addition of new enrollees to the program. An ongoing commitment of resources, especially staffing, will be critical in realizing the potential savings from cost containment.

Conclusion

This analysis has shown that expansion of Medicaid in Missouri is close to budget neutrality and actually has an estimated savings of $39 million. While this value is our best estimate, we also provide a range of -$95 million to +$42 million, which should be considered the lower and upper bounds of what the net impact to the state, within the MO Healthnet program, would be in FY2020. Other forms of savings across other departments, as well as increases to general revenue, are likely. There are numerous benefits in terms of health outcomes that have been documented in other states, many of which will likely generate economic dividends over time, as investment in a healthy workforce has been shown in other settings to create.

Furthermore, there is a current net outflow of dollars from Missouri due to its lack of expansion. In 2015, Missouri residents sent a total of $64.1 billion to the Federal government in the form of income taxes, which was 1.95% of the U.S. total. In FY2015, Missouri received $6.28 billion back from the federal government for Medicaid, which was only 1.80% of the U.S. total. Roughly, this difference of 0.15% of total U.S. income taxes collected represents about $500 million leaving the state each year and is therefore an economic loss to the state. Conversely, spending within the state spurs job creation, increasing incomes and tax revenues in the state.

Although we find expansion to be roughly revenue neutral, we caution that some assumptions (in particular, the size of the new population) are fairly uncertain prior to implementation. Other estimates could be honed with recent data available internally to DSS analysts. The cost estimates for the newly eligible, however, really depend upon how well Missouri can commit to modernizing and improving its relationship with managed-care companies. Costs have the potential to be well contained, based upon evidence in other states, but modern infrastructure may be required to accomplish this in Missouri while maintaining and improving delivery of services for lower-income Missourians throughout the state.

About Missouri Foundation for Health

This report is supported by Missouri Foundation for Health, a resource for the region, working with communities and nonprofits to generate and accelerate positive changes in health. As a catalyst for change, the Foundation improves the health of Missourians through partnership, experience, knowledge, and funding.

MEMORANDUM

To: Susan Beeler, Office of the Missouri State Auditor

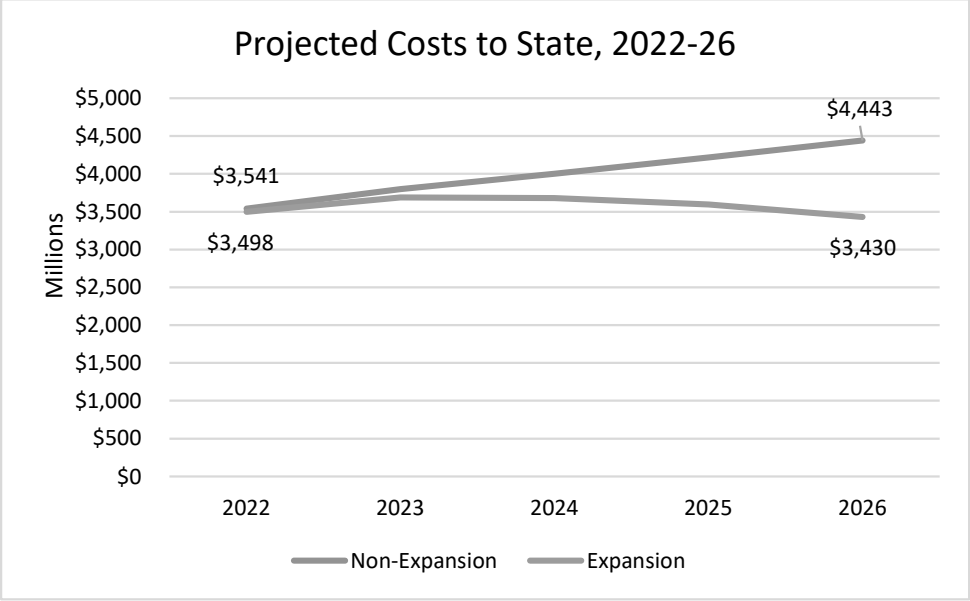
From: Abigail Barker, PhD and Timothy McBride, PhD
Center for Health Economics and Policy, Washington University

Subject: Analysis of the Fiscal Impact of Medicaid Expansion in Missouri
Revised Projections for FY2022-26

Date: April 10, 2019

In our recent report analyzing the fiscal impact of a Medicaid expansion to the state's Medicaid budget, we produced estimates for FY2020 and extended these projections to 2024. Per your request, we have changed the timeframe of the projections to FY2022-26. The revised numbers reflect (1) trending forward the FY2017 fiscal data for 5 years rather than 3; (2) trending forward the assumed PMPM cost of newly eligible adults and newly enrolling children by 2 years; and (3) eliminating the phase-in of DSH cuts, which is slated to occur in FY2020, and assuming the full DSH cuts for all 5 years.

The figure below shows that, beginning with the "best estimate" values for 2022, and continuing to assume a 4.5% growth rate in prices and utilization, by 2026 the annual savings due to expansion is estimated to be about $1.013 billion. The projection also includes an annual population growth rate of 0.66% for both scenarios.



As mentioned previously, we expect a cumulative effect to occur due to attrition from P&TD enrollment. Due to the significant savings expected from this population, by 2023 our projection shows the state's obligation actually declining compared to 2022. By 2026, we assume a total decline of about 27% of the current P&TD population as individuals elect to obtain Medicaid coverage through expansion rather than application through the disability determination process. As P&TD enrollees incur very high costs on average, and the state can save about 25% of all costs associated with these individuals, this is a key driver of the savings over time.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State government entities are estimated to have one-time costs of approximately $6.4 million and an unknown annual net fiscal impact by 2026 ranging from increased costs of at least $200 million to savings of $1 billion. Local governments expect costs to decrease by an unknown amount.

STATE AUDITORS OFFICE

RE: Petition approval request from Heidi Miller regarding a proposed constitutional amendment to Article IV (2020-052)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Heidi Miller on March 22, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the State of Missouri that the Constitution be amended:

Article IV of the Constitution is revised by adding one new section to be known as Article IV, Section 36(c) to read as follows:

Section 36(c). 1. Notwithstanding any provision of law to the contrary, beginning July 1, 2021, individuals nineteen years of age or older and under sixty-five years of age who qualify for MO HealthNet services under 42 U.S.C. Section 1396a(a)(10)(A)(i)(VIII) and as set forth in 42 C.F.R. 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. Section 1396a(e)(14) and as set forth in 42 C.F.R. 435.603, shall be eligible for medical assistance under MO HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. Section 1396a(k)(1) and any implementing regulations.

3. No later than March 1, 2021, the Department of Social Services and the MO HealthNet Division shall submit all state plan amendments necessary to implement this section to the United States Department of Health and Human Services, Centers for Medicare and Medicaid Services.

4. The Department of Social Services and the MO HealthNet Division shall take all actions necessary to maximize federal financial participation in funding medical assistance pursuant to this section.

5. No greater or additional burdens or restrictions on eligibility or enrollment standards, methodologies, or practices shall be imposed on persons eligible for MO HealthNet services pursuant to this section than on any other population eligible for medical assistance.

6. All references to federal or state statutes, regulations or rules in this section shall be to the version of those statutes, regulations or rules that existed on January 1, 2019.

This measure amends the Missouri Constitution by replacing Article XVI (16), henceforth to be called **Missouri Cannabis Restoration and Protection**. The current content of Article XVI (16) that will be replaced is **in brackets** and reads as follows:

[Section 1. Right to Access Medical Marijuana

1. Purposes

This section is intended to permit state-licensed physicians to recommend marijuana for medical purposes to patients with serious illnesses and medical conditions. The section allows patients with qualifying medical conditions the right to discuss freely with their physicians the possible benefits of medical marijuana use, the right of their physicians to provide professional advice concerning the same, and the right to use medical marijuana for treatment under the supervision of a physician.

This section is intended to make only those changes to Missouri laws that are necessary to protect patients, their primary caregivers, and their physicians from civil and criminal penalties, and to allow for the limited legal production, distribution, sale and purchase of marijuana for medical use. This section is not intended to change current civil and criminal laws governing the use of marijuana for non medical purposes. The section does not allow for the pub) ic use of marijuana and driving under the influence of marijuana.

2. Definitions

(1) "Administer" means the direct application of marijuana to a Qualifying Patient by way of any of the following methods:

(a) Ingestion of capsules, teas, oils, and other marijuana-infused products:

(b) Vaporization or smoking of dried flowers, buds, plant material, extracts, or oils;

(c) Application of ointments or balms;

(d) Transdermal patches and suppositories;

(e) Consuming marijuana-infused food products; or

(f) Any other method recommended by a Qualifying Patient's physician.

(2) "Department" means the Department of Health and Senior Services, or its successor agency.

(3) "Entity" means a natural person, corporation, professional corporation, nonprofit corporation, cooperative corporation, unincorporated association, business trust, limited liability company, general or limited partnership, limited liability partnership, joint venture, or any other legal entity.

(4) "Flowering plant" means a marijuana plant from the time it exhibits the first signs of sexual maturity through harvest.

(5) "Marijuana" or "Marihuana" means ***Cannabis indica, Cannabis sativa,*** and ***Cannabis ruderalis,*** hybrids of such species, and any other strains commonly understood within the scientific community to constitute marijuana, as well as resin extracted from the plant and marijuana-infused products. "Marijuana" or "Marihuana" do not include industrial hemp containing a crop-wide average tetrahydrocannabinol concentration that does not exceed three-tenths of one percent on a dry weight basis, or commodities or products manufactured from industrial hemp.

(6) "Marijuana-Infused Products" means products that are infused with marijuana or an extract thereof and are intended for use or consumption other than by smoking, including, but not limited to, edible products, ointments, tinctures and concentrates.

(7) "Medical Marijuana Cultivation Facility" means a facility licensed by the Department, to acquire, cultivate, process, store, transport, and sell marijuana to a Medical Marijuana Dispensary Facility, Medical Marijuana Testing Facility, or to a Medical Marijuana-Infused Products Manufacturing Facility.

(8) "Medical Marijuana Dispensary Facility" means a facility licensed by the Department, to acquire, store, sell, transport, and deliver marijuana, marijuana-infused products, and drug paraphernalia used to administer marijuana as provided for in this section to a Qualifying Patient, a Primary caregiver, another Medical Marijuana Dispensary Facility, a Medical Marijuana Testing Facility, or a Medical Marijuana-Infused Products Manufacturing Facility.

(9) "Medical Marijuana-Infused Products Manufacturing Facility" means a facility licensed by the Department, to acquire, store, manufacture, transport, and sell marijuana-infused products to a Medical Marijuana Dispensary Facility, a Medical Marijuana Testing Facility, or to another Medical Marijuana-Infused Products Manufacturing Facility.

(10) "Medical Marijuana Testing Facility" means a facility certified by the Department, to acquire, test, certify, and transport marijuana.

(11) "Medical use" means the production, possession, delivery, distribution, transportation, or administration of marijuana or a marijuana-infused product, or drug paraphernalia used to administer marijuana or a marijuana-infused product, for the benefit of a Qualifying Patient to mitigate the symptoms or effects of the patient's qualifying medical condition.

(12) "Physician" means an individual who is licensed and in good standing to practice medicine or osteopathy under Missouri law.

(13) "Physician certification" means a document, whether handwritten, electronic or in another commonly used format, signed by a physician and stating that, in the physician's professional opinion, the patient suffers from a qualifying medical condition.

(14) "Primary caregiver" means an individual twenty-one years of age or older who has significant responsibility for managing the well-being of a Qualifying Patient and who is designated as such on the primary caregiver's application for an identification card under this section or in other written notification to the Department.

(15) "Qualifying medical condition" means the condition of, symptoms related to, or side- effects from the treatment of:

(a) Cancer:

(b) Epilepsy;

(c) Glaucoma:

(d) Intractable migraines unresponsive to other treatment;

(e) A chronic medical condition that causes severe, persistent pain or persistent muscle spasms, including but not limited to those associated with multiple sclerosis, seizures, Parkinson's disease, and Tourette's syndrome:

(f) Debilitating psychiatric disorders, including, but not limited to, post-traumatic stress disorder, if diagnosed by a state licensed psychiatrist;

(g) Human immunodeficiency virus or acquired immune deficiency syndrome:

(h) A chronic medical condition that is normally treated with a prescription medication that could lead to physical or psychological dependence, when a physician determines that medical use of marijuana could be effective in treating that condition and would serve as a safer alternative to the prescription medication: (i) Any terminal illness: or

(i) In the professional judgment of a physician, any other chronic, debilitating or other medical condition, including, but not limited to, hepatitis C, amyotrophic lateral sclerosis, inflammatory bowel disease, Crohn's disease, Huntington's disease, autism, neuropathies, sickle cell anemia, agitation of Alzheimer's disease, cachexia, and wasting syndrome.

(16) "Qualifying Patient" means a Missouri resident diagnosed with at least one qualifying medical condition.

3. Creating Patient Access to Medical Marijuana

(1) In carrying out the implementation of this section, the Department shall have the authority to:

(a) Grant or refuse state licenses and certifications for the cultivation, manufacture, dispensing, sale, testing, tracking, and transportation of marijuana for medical use as provided by law; suspend, fine, restrict, or revoke such licenses and certifications upon a violation of this section or a rule promulgated pursuant to this section: and impose any administrative penalty authorized by this section or any rule promulgated pursuant to this section.

(b) Promulgate rules and emergency rules necessary for the proper regulation and control of the cultivation, manufacture, dispensing, and sale of marijuana for medical use and for the enforcement of this section so long as patient access is not restricted unreasonably and such rules are reasonably necessary for patient safety or to restrict access to only licensees and Qualifying Patients.

(c) Develop such forms, certificates, licenses, identification cards, and applications as are necessary for, or reasonably related to, the administration of this section or any of the rules promulgated under this section:

(d) Require a seed-to-sale tracking system that tracks medical marijuana from either the seed or immature plant stage until the medical marijuana or medical marijuana-infused product is sold to a Qualifying Patient or Primary Caregiver to ensure that no medical marijuana grown by a Medical Marijuana Cultivation Facility or manufactured by a Medical Marijuana-Infused Products Manufacturing Facility is sold or otherwise transferred except by a Medical Marijuana Dispensary Facility. The Department shall certify, if possible, at least two commercially available systems to licensees as compliant with its tracking standards and issue standards for the creation or use of other systems by licensees.

(e) Issue standards for the secure transportation of Marijuana and Marijuana-Infused Products. The Department shall certify entities which demonstrate compliance with its transportation standards to transport Marijuana and Marijuana-Infused Products to a Medical Marijuana Cultivation Facility, a Medical Marijuana-Infused Products Manufacturing Facility, a Medical Marijuana Dispensary Facility, a Medical Marijuana Testing Facility, or another entity with a transportation certification. The Department shall develop or adopt from any other governmental agency such safety and security standards as are reasonably necessary for the transportation of marijuana. Any entity licensed or certified pursuant to this section shall be allowed to transport cannabis.

(f) The Department may charge a fee not to exceed $5,000 for any certification issued pursuant to this section.

(g) Prepare and transmit annually a publicly available report accounting to the Governor for the efficient discharge of all responsibilities assigned to the Department under this section;

(h) Establish a system to numerically score competing medical marijuana licensee and certificate applicants, only in cases where more applicants apply than the minimum number of licenses or certificates as calculated by this section, which scoring shall be limited to an analysis of the following: (i) the character, veracity, background, qualifications, and relevant experience of principal officers or managers: (ii) the business plan proposed by the applicant, which in the case of cultivation facilities and dispensaries shall include the ability to maintain an adequate supply of marijuana, plans to ensure safety and security of Qualifying Patients and the community, procedures to be used to prevent diversion, and any plan for making Marijuana available to low-income Qualifying Patients: (iii) site security: (iv) experience in a legal cannabis market: (v) in the case of Medical Marijuana Testing Facilities, the experience of their personnel with testing marijuana, food or drugs for toxins and/or potency and health care industry experience: (vi) the potential for positive economic impact in the site community: (vii) in the case of Medical Marijuana Cultivation Facilities, capacity or experience with agriculture, horticulture, and health care; (viii) in the case of Medical Marijuana Dispensary Facilities, capacity or experience with health care, the suitability of the proposed location, and its accessibility for patients; (ix) in the case of Medical Marijuana-Infused Products Manufacturing Facilities, capacity or experience with food and beverage manufacturing; and (x) maintaining competitiveness in the marijuana for medical use marketplace. In ranking applicants and awarding licenses and certificates, the Department may consult or contract with other public agencies with relevant expertise regarding these factors. The Department shall lift or ease any limit on the number of licensees or certificate holders in order to meet the demand for marijuana for medical use by Qualifying Patients.

(2) The Department shall issue any rules or emergency rules necessary for the implementation and enforcement of this section and to ensure the right to, availability, and safe use of marijuana for medical use by Qualifying Patients. In developing such rules or emergency rules, the Department may consult with other public agencies. In addition to any other rules or emergency rules necessary to carry out the mandates of this section, the Department may issue rules or emergency rules relating to the following subjects:

(a) Compliance with, enforcement of, or violation of any provision of this section or any rule issued pursuant to this section, including procedures and grounds for denying, suspending, fining, restricting, or revoking a state license or certification issued pursuant to this section:

(b) Specifications of duties of officers and employees of the Department:

(c) Instructions or guidance for local authorities and law enforcement officers:

(d) Requirements for inspections, investigations, searches, seizures, and such additional enforcement activities as may become necessary from time to time;

(e) Creation of a range of administrative penalties for use by the Department;

(f) Prohibition of misrepresentation and unfair practices;

(g) Control of informational and product displays on licensed premises provided that the rules may not prevent or unreasonably restrict appropriate signs on the property of the Medical Marijuana Dispensary Facility, product display and examination by the Qualifying Patient and/or Primary caregiver, listings in business directories including phone books, listings in marijuana-related or medical publications, or the sponsorship of health or not for profit charity or advocacy events;

(h) Development of individual identification cards for owners, officers, managers, contractors, employees, and other support staff of entities licensed or certified pursuant to this section, including a fingerprint based federal and state criminal record check in accordance with U.S. Public Law 92-544, or its successor provisions, as may be required by the Department prior to issuing a card and procedures to ensure that cards for new applicants are issued within fourteen days. Applicants licensed pursuant to this section shall submit fingerprints to the Missouri state highway patrol for the purpose of conducting a state and federal fingerprint-based criminal background check. The Missouri state highway patrol, if necessary, shall forward the fingerprints to the Federal Bureau of Investigation (FBI) for the purpose of conducting a fingerprint-based criminal background check. Fingerprints shall be submitted pursuant to 43.543 and fees shall be paid pursuant to 43.530:

(i) Security requirements for any premises licensed or certified pursuant to this section, including, at a minimum, lighting, physical security, video, alarm requirements, and other minimum procedures for internal control as deemed necessary by the Department to properly administer and enforce the provisions of this section, including reporting requirements for changes, alterations, or modifications to the premises;

(j) Regulation of the storage of, warehouses for, and transportation of marijuana for medical use;

(k) Sanitary requirements for, including, but not limited to, the preparation of medical Marijuana-Infused Products:

(l) The specification of acceptable forms of picture identification that a Medical Marijuana Dispensary Facility may accept when verifying a sale:

(m) Labeling and packaging standards;

(n) Records to be kept by licensees and the required availability of the records;

(o) State licensing procedures, including procedures for renewals, reinstatements, initial licenses, and the payment of licensing fees:

(p) The reporting and transmittal of tax payments:

(q) Authorization for the Department of Revenue to have access to licensing information to ensure tax payment and the effective administration of this section: and

(r) Such other matters as are necessary for the fair, impartial, stringent, and comprehensive administration of this section.

(3) The Department shall issue rules or emergency rules for a medical marijuana and medical marijuana-infused products independent testing and certification program for medical marijuana licensees and requiring licensees to test medical marijuana using one or more impartial, independent laboratories to ensure, at a minimum, that products sold for human consumption do not contain contaminants that are injurious to health, to ensure correct labeling and measure potency. The Department shall not require any medical marijuana or medical marijuana-infused products to be tested more than once prior to sale.

(4) The Department shall issue rules or emergency rules to provide for the certification of and standards for Medical Marijuana Testing Facilities, including the requirements for equipment and qualifications for personnel, but shall not require certificate holders to have any federal agency licensing or have any relationship with a federally licensed testing facility. The Department shall certify, if possible, at least two entities as Medical Marijuana Testing Facilities. No Medical Marijuana Testing Facility shall be owned by an entity under substantially common control, ownership, or management as a Medical Marijuana Cultivation Facility, Medical Marijuana-Infused Product Manufacturing Facility, or Medical Marijuana Dispensary Facility.

(5) The Department shall maintain the confidentiality of reports or other information obtained from an applicant or licensee containing any individualized data, information, or records related to the licensee or its operation, including sales information, financial records, tax returns, credit reports, cultivation information, testing results, and security information and plans, or revealing any patient information, or any other records that are exempt from public inspection pursuant to state or federal law. Such reports or other information may be used only for a purpose authorized by this section. Any information released related to patients may be used only for a purpose authorized by federal law and this section, including verifying that a person who presented a patient identification card to a state or local law enforcement official is lawfully in possession of such card.

(6) Within one hundred eighty days of the effective date of this section, the Department shall make available to the public license application forms and application instructions for Medical Marijuana Cultivation Facilities, Medical Marijuana Testing Facilities, Medical Marijuana Dispensary Facilities, and Medical Marijuana-Infused Products Manufacturing Facilities.

(7) Within one hundred eighty days of the effective date of this section, the Department shall make available to the public application forms and application instructions for Qualifying Patient Qualifying Patient cultivation, and Primary caregiver identification cards. Within two hundred ten days of the effective date of this section, the Department shall begin accepting applications for such identification cards.

(8) An entity may apply to the Department for and obtain one or more licenses to grow marijuana as a Medical Marijuana Cultivation Facility. Each facility in operation shall require a separate license, but multiple licenses may be utilized in a single facility. Each indoor facility utilizing artificial lighting may be limited by the Department to thirty thousand square feet of flowering plant canopy space. Each outdoor facility utilizing natural lighting may be limited by the Department to two thousand eight hundred flowering plants. Each greenhouse facility using a combination of natural and artificial lighting may be limited by the Department, at the election of the licensee, to two thousand eight hundred flowering plants or thirty thousand square feet of flowering plant canopy. The license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The Department shall charge each applicant a non-refundable fee of ten thousand dollars per license application or renewal for all applicants filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of five thousand dollars per license application or renewal thereafter. Once granted, the Department shall charge each licensee an annual fee of twenty-five thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three Medical Marijuana Cultivation Facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(9) An entity may apply to the Department for and obtain one or more licenses to operate a Medical Marijuana Dispensary Facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The Department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the Department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than five Medical Marijuana Dispensary Facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(10) An entity may apply to the Department for and obtain one or more licenses to operate a Medical Marijuana-Infused Products Manufacturing Facility. Each facility in operation shall require a separate license. A license shall be valid for three years from its date of issuance and shall be renewable, except for good cause. The Department shall charge each applicant a non-refundable fee of six thousand dollars per license application or renewal for each applicant filing an application within three years of the effective date of this section and shall charge each applicant a non-refundable fee of three thousand dollars per license application or renewal thereafter. Once granted, the Department shall charge each licensee an annual fee of ten thousand dollars per facility license. Application and license fees shall be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. No more than three Medical Marijuana-Infused Products Manufacturing Facility licenses shall be issued to any entity under substantially common control, ownership, or management.

(11) Any applicant for a license authorized by this section may pre-file their application fee with the Department beginning 30 days after the effective date of this section.

(12) Except for good cause, a Qualifying Patient or his or her Primary caregiver may obtain an identification card from the Department to cultivate up to six flowering marijuana plants for the exclusive use of that Qualifying Patient. The card shall be valid for twelve months from its date of issuance and shall be renewable with the annual submittal of a new or updated physician's certification. The Department shall charge an annual fee for the card of one hundred dollars, with such rate to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency.

(13) The Department may set a limit on the amount of marijuana that may be purchased by or on behalf of a single Qualifying Patient in a thirty day period, provided that limit is not less than four ounces of dried, unprocessed marijuana, or its equivalent. Any such limit shall not apply to a Qualifying Patient with written certification from two independent physicians that there are compelling reasons why the Qualifying Patient needs a greater amount than the limit established by the Department.

(14) The Department may set a limit on the amount of marijuana that may be possessed by or on behalf of each qualifying patient, provided that limit is not less than a sixty day supply of dried, unprocessed marijuana, or its equivalent. A Primary caregiver may possess a separate legal limit for each Qualifying Patient under their care and a separate legal limit for themselves if they are a Qualifying Patient.

Qualifying Patients cultivating marijuana for medical use may possess up to a ninety day supply, s iong as the supply remains on property under their control. Any such limit shall not apply to a Qualifying Patient with written certification from two independent physicians that there are compelling reasons for additional amounts. Possession of between the legal limit and up to twice the legal limit shall subject the possessor to Department sanctions, including an administrative penalty and loss of their patient identification card for up to a year. Purposefully possessing amounts in excess of twice the legal limit shall be punishable by imprisonment of up to one year and a fine of up to two thousand dollars.

(15) The Department may restrict the aggregate number of licenses granted for Medical Marijuana Cultivation Facilities, provided, however, that the number may not be limited to fewer than one license per every one hundred thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(16) The Department may restrict the aggregate number of licenses granted for Marijuana-Infused Products Manufacturing Facilities, provided, however, that the number may not be limited to fewer than one license per every seventy thousand inhabitants, or any portion thereof, of the state of Missouri, according to the most recent census of the United States. A decrease in the number of inhabitants in the state of Missouri shall have no impact.

(17) The Department may restrict the aggregate number of licenses granted for Medical Marijuana Dispensary Facilities, provided, however, that the number may not be limited to fewer than twenty-four licenses in each United States Congressional district in the state of Missouri pursuant to the map of each of the eight congressional districts as drawn and effective on the effective date of this section. Future changes to the boundaries of or the number of congressional districts shall have no impact.

(18) The Department shall begin accepting license and certification applications for Medical Marijuana Dispensary Facilities, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, seed-to-sale tracking systems, and for transportation of marijuana no later than two hundred forty days after the effective date of this section. Applications for licenses and certifications under this section shall be approved or denied by the Department no later than one hundred fifty days after their submission. If the Department fails to carry out its non-discretionary duty to approve or deny an application within one hundred fifty days of submission, an applicant may immediately seek a court order compelling the Department to approve or deny the application.

(19) Qualifying Patients under this section shall obtain and annually renew an identification card or cards from the Department. The Department shall charge a fee of twenty-five dollars per year per card with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor or its successor agency. Upon receiving an application for a Qualifying Patient identification card or Qualifying Patient cultivation identification card, the Department shall, within thirty days, either issue the card or provide a written explanation for its denial. If the Department fails to deny and fails to issue a card to an eligible Qualifying Patient within thirty days, then their physician certification shall serve as their Qualifying Patient identification card or Qualifying Patient cultivation identification card for up to one year from the date of physician certification. All initial applications for or renewals of a Qualifying Patient identification card or Qualifying Patient cultivation identification card shall be accompanied by a physician certification that is less than thirty days old.

(20) Primary caregivers under this section shall obtain and annually renew an identification card from the Department. The Department shall charge a fee of twenty five dollars per year, with such fee to be increased or decreased each year by the percentage of increase or decrease from the end of the previous calendar year of the Consumer Price Index, or successor index as published by the U.S. Department of Labor, or its successor agency. Upon receiving an application for a Primary caregiver identification card the Department shall, within thirty days, either issue the card or provide a written explanation for its denial.

(21) All marijuana for medical use sold in Missouri shall be cultivated in a licensed Medical Marijuana Cultivation Facility located in Missouri.

(22) All marijuana-infused products for medical use sold in the state of Missouri shall be manufactured in a Medical Marijuana-Infused Products Manufacturing Facility.

(23) The denial of a license, license renewal, or identification card by the Department shall be appealable to the Administrative Hearing Commission, or its successor entity. Following the exhaustion of administrative review, denial of a license, license renewal, or identification card by the Department shall be subject to judicial review as provided by law.

(24) No elected official shall interfere directly or indirectly with the Department's obligations and activities under this section.

(25) The Department shall not have the authority to apply or enforce any rule or regulation that would impose an undue burden on any one or more licensees or certificate holders, any Qualifying Patients, or act to undermine the purposes of this section.

4. Taxation and Reporting

(1) A tax is levied upon the retail sale of marijuana for medical use sold at Medical Marijuana Dispensary Facilities within the state. The tax shall be at a rate of four percent of the retail price. The tax shall be collected by each licensed Medical Marijuana Dispensary Facility and paid to the Department of Revenue. After retaining no more than five percent for its actual collection costs, amounts generated by the tax levied in this section shall be deposited by the Department of Revenue into the Missouri Veterans' Health and Care Fund. Licensed entities making retail sales within the state shall be allowed approved credit for returns provided the tax was paid on the returned item and the purchaser was given the refund or credit.

(2) There is hereby created in the state treasury the "Missouri Veterans' Health and Care Fund," which shall consist of taxes and fees collected under this section. The State Treasurer shall be custodian of the fund, and he or she shall invest monies in the fund in the same manner as other funds are invested. Any interest and monies earned on such investments shall be credited to the fund. Notwithstanding any other provision of law, any monies remaining in the fund at the end of a biennium shall not revert to the credit of the general revenue fund. The Commissioner of Administration is authorized to make cash operating transfers to the fund for purposes of meeting the cash requirements of the Department in advance of it receiving annual application, licensing, and tax revenue, with any such transfers to be repaid as provided by law. The fund shall be a dedicated fund and shall stand appropriated without further legislative action as follows:

(a) First, to the Department, an amount necessary for the Department to carry out this section, including repayment of any cash operating transfers, payments made through contract or agreement with other state and public agencies necessary to carry out this section, and a reserve fund to maintain a reasonable working cash balance for the purpose of carrying out this section:

(b) Next, the remainder of such funds shall be transferred to the Missouri Veterans Commission for health and care services for military veterans, including the following purposes: operations, maintenance and capital improvements of the Missouri Veterans Homes, the Missouri Service Officer's Program, and other services for veterans approved by the Commission, including, but not limited to, health care services, mental health services, drug rehabilitation services, housing assistance, job training, tuition assistance, and housing assistance to prevent homelessness. The Missouri Veterans Commission shall contract with other public agencies for the delivery of services beyond its expertise.

(c) All monies from the taxes authorized under this subsection shall provide additional dedicated funding for the purposes enumerated above and shall not replace existing dedicated funding.

(3) For all retail sales of marijuana for medical use, a record shall be kept by the seller which identifies, by secure and encrypted patient number issued by the seller to the qualifying patient involved in the sale, all amounts and types of marijuana involved in the sale and the total amount of money involved in the sale, including itemizations, taxes collected and grand total sale amounts. All such records shall be kept on the

premises in a readily available format and be made available for review by the Department and the Department of Revenue upon request. Such records shall be retained for five years from the date of the sale.

(4) The tax levied pursuant to this subsection is separate from, and in addition to, any general state and local sales and use taxes that apply to retail sales, which shall continue to be collected and distributed as provided by general law.

(5) Except as authorized in this subsection, no additional taxes shall be imposed on the sale of marijuana for medical use.

(6) The fees and taxes provided for in this Article XVI, Section 1 shall be fully enforceable notwithstanding any other provision in this Constitution purportedly prohibiting or restricting the taxes and fees provided for herein.

(7) The unexpended balance existing in the fund shall be exempt from the provisions of section 33.080 relating to the transfer of unexpended balances to the general revenue fund.

5. Additional Patient, Physician, Caregiver and Provider Protections

(1) Except as provided in this section, the possession of marijuana in quantities less than the limits of this section, or established by the Department, and transportation of marijuana from a Medical Marijuana Dispensary Facility to the Qualifying Patient's residence shall not subject the possessor to arrest, criminal or civil liability, or sanctions under Missouri law, provided that the possessor produces on demand to the appropriate authority a valid Qualifying Patient identification card: a valid Qualifying Patient cultivation identification card; a valid physician certification while making application for an identification card: or a valid Primary caregiver identification card. Production of the respective equivalent identification card or authorization issued by another state or political subdivision of another state shall also meet the requirements of this subdivision.

(2) No patient shall be denied access to or priority for an organ transplant because they hold a Qualifying Patient identification card or use marijuana for medical use.

(3) A physician shall not be subject to criminal or civil liability or sanctions under Missouri law or discipline by the Missouri State Board of Registration for the Healing Arts, or its successor agency, for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or issuing a physician certification to a patient diagnosed with a qualifying medical condition in a manner consistent with this section and legal standards of professional conduct.

(4) A health care provider shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for owning, operating, investing in, being employed by, or contracting with any entity licensed or certified pursuant to this section or providing health care services that involve the medical use of marijuana consistent with this section and legal standards of professional conduct.

(5) A Medical Marijuana Testing Facility shall not be subject to civil or criminal prosecution under Missouri law, denial of any right or privilege, civil or administrative penalty or sanction, or disciplinary action by any accreditation or licensing board or commission for providing laboratory testing services that relate to the medical use of marijuana consistent with this section and otherwise meeting legal standards of professional conduct.

(6) A health care provider shall not be subject to mandatory reporting requirements for the medical use of marijuana by non-emancipated Qualifying Patients under eighteen years of age in a manner consistent with this section and with consent of a parent or guardian.

(7) A Primary caregiver shall not be subject to criminal or civil liability or sanctions under Missouri law for purchasing, transporting, or administering marijuana for medical use to a qualifying patient or participating in the patient cultivation of up to six flowering marijuana plants per patient in a manner consistent with this section and generally established legal standards of personal or professional conduct.

(8) An attorney shall not be subject to disciplinary action by the state bar association or other professional licensing body for owning, operating, investing in, being employed by, contracting with, or providing legal assistance to prospective or licensed Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana Dispensary Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, Qualifying Patients, Primary caregivers, physicians, health care providers or others related to activity that is no longer subject to criminal penalties under state law pursuant to this section.

(9) Actions and conduct by Qualifying Patients, Primary Caregivers, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities licensed or registered with the Department, or their employees or agents, as permitted by this section and in compliance with Department regulations and other standards of legal conduct, shall not be subject to criminal or civil liability or sanctions under Missouri law, except as provided for by this section.

(10) Nothing in this section shall provide immunity for negligence, either common law or statutorily created, nor criminal immunities for operating a vehicle, aircraft, dangerous device, or navigating a boat under the influence of marijuana.

(11) It is the public policy of the state of Missouri that contracts related to marijuana for medical use that are entered into by Qualifying Patients, Primary Caregivers, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities and those who allow property to be used by those entities, should be enforceable. It is the public policy of the state of Missouri that no contract entered into by Qualifying Patients, Primary Caregivers, Medical Marijuana Testing Facilities, Medical Marijuana Cultivation Facilities, Medical Marijuana-Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities, or by a person who allows property to be used for activities that are exempt from state criminal penalties by this section, shall be unenforceable on the basis that activities related to medical marijuana may be prohibited by federal law.

6. Legislation

Nothing in this section shall limit the General Assembly from enacting laws consistent with this section, or otherwise effectuating the patient rights of this section. The legislature shall not enact laws that hinder the right of Qualifying Patients to access marijuana for medical use as granted by this section.

7. Additional Provisions

(1) Nothing in this section permits a person to:

(a) Consume marijuana for medical use in a jail or correctional facility;

(b) Undertake any task under the influence of marijuana when doing so would constitute negligence orprofessional malpractice; or

(c) Operate, navigate, or be in actual physical control of any dangerous device or motor vehicle, aircraft or motorboat while under the influence of marijuana: or

(d) Bring a claim against any employer, former employer, or prospective employer for wrongful discharge, discrimination, or any similar cause of action or remedy, based on the employer, former employer, or prospective employer prohibiting the employee, former employee, or prospective employee from being under the influence of marijuana while at work or disciplining the employee or former employee, up to and including termination from employment, for working or attempting to work while under the influence of marijuana.

(2) No Medical Marijuana Cultivation Facility, Medical Marijuana Testing Facility, Medical Marijuana Dispensary Facility, or Medical Marijuana-Infused Products Manufacturing Facility, or entity with a transportation certification shall be owned, in whole or in part, or have as an officer, director, board member, manager, or employee, any individual with a disqualifying felony offense. A "disqualifying felony offense" is a violation of, and conviction or guilty plea to, state or federal law that is, or would have been, a felony under Missouri law, regardless of the sentence imposed, unless the Department determines that:

(a) The person's conviction was for the medical use of marijuana or assisting in the medical use of marijuana; or

(b) The person's conviction was for a non-violent crime for which he or she was not incarcerated and that is more than five years old; or

(c) More than five years have passed since the person was released from parole or probation, and he or she has not been convicted of any subsequent criminal offenses.

The Department may consult with and rely on the records, advice and recommendations of the Attorney General and the Department of Public Safety, or their successor entities, in applying this subdivision.

(3) All Medical Marijuana Cultivation Facility, Medical Marijuana Dispensary Facility, and Medical Marijuana-Infused Products Manufacturing Facility licenses, entities with Medical Marijuana Testing Facility certifications, and entities with transportation certifications shall be held by entities that are majority owned by natural persons who have been citizens of the state of Missouri for at least one year prior to the application for such license or certification. Notwithstanding the foregoing, entities outside the state of Missouri may own a minority stake in such entities.

(4) No Medical Marijuana Cultivation Facility, Medical Marijuana Dispensary Facility, or Medical Marijuana-Infused Products Manufacturing Facility shall manufacture, package or label marijuana or marijuana-infused products in a false or misleading manner. No person shall sell any product in a manner designed to cause confusion between a marijuana or marijuana-infused product and any product not containing marijuana. A violation of this subdivision shall be punishable by an appropriate and proportional Department sanction, up to and including loss of license.

(5) All edible marijuana-infused products shall be sold in individual, child-resistant containers that are labeled with dosage amounts, instructions for use, and estimated length of effectiveness. All marijuana and marijuana-infused products shall be sold in containers clearly and conspicuously labeled, in a font size at least as large as the largest other font size used on the package, as containing "Marijuana," or a " Marijuana-Infused Product." Violation of this prohibition shall subject the violator to Department sanctions, including an administrative penalty.

(6) No individual shall serve as the Primary caregiver for more than three Qualifying Patients.

(7) No Qualifying Patient shall consume marijuana for medical use in a public place, unless provided by law. Violation of this prohibition shall subject the violator to sanctions as provided by general law.

(8) No person shall extract resins from marijuana using dangerous materials or combustible gases without a Medical Marijuana-Infused Products Manufacturing Facility license. Violation of this prohibition shall subject the violator to Department sanctions, including an administrative penalty and, if applicable, loss of their identification card, certificate, or license for up to one year.

(9) All Qualifying Patient cultivation shall take place in an enclosed, locked facility that is equipped with security devices that permit access only by the Qualifying Patient or by such patients Primary caregiver. Two Qualifying Patients, who both hold valid Qualifying Patient cultivation identification cards, may share one enclosed, locked facility. No more than twelve Qualifying Patient or Primary caregiver cultivated flowering marijuana plants may be cultivated in a single, enclosed locked facility, except when a Primary caregiver also holds a Qualifying Patient cultivation identification card, in which case no more than eighteen flowering marijuana plants may be cultivated in a single, enclosed, locked facility.

(10) No Medical Marijuana Cultivation Facility, Medical Marijuana Dispensary Facility, Medical Marijuana-Infused Products Manufacturing Facility, Medical Marijuana Testing Facility, or entity with a transportation certification shall assign, sell, give, lease, sublicense, or otherwise transfer its license or certificate to any other entity without the express consent of the Department, not to be unreasonably withheld.

(11) Unless allowed by the local government, no new Medical Marijuana Cultivation Facility, Medical Marijuana Testing Facility, Medical Marijuana Dispensary Facility, or Medical Marijuana-Infused Products Manufacturing Facility shall be initially sited within one thousand feet of any then-existing elementary or secondary school, child day-care center, or church. No local government shall prohibit Medical Marijuana Cultivation Facilities, Medical Marijuana Testing Facilities, Medical Marijuana Infused Products Manufacturing Facilities, or Medical Marijuana Dispensary Facilities, or entities with a transportation certification either expressly or through the enactment of ordinances or regulations that make their operation unduly burdensome in the jurisdiction. However, local governments may enact ordinances or regulations not in conflict with this section, or with regulations enacted pursuant to this section, governing the time, place, and manner of operation of such facilities in the locality. A local government may establish civil penalties for violation of an ordinance or regulations governing the time, place, and manner of operation of a Medical Marijuana Cultivation Facility, Medical Marijuana Testing Facility, Medical Marijuana-Infused Products Manufacturing Facility, Medical Marijuana Dispensary Facility, or entity holding a transportation certification that may operate in such locality.

(12) Unless superseded by federal law or an amendment to this Constitution, a physician shall not certify a qualifying condition for a patient by any means other than providing a physician certification for the patient, whether handwritten, electronic, or in another commonly used format. A Qualifying Patient must obtain a new physician certification at least annually.

(13) A physician shall not issue a certification for the medical use of marijuana for a non-emancipated Qualifying Patient under the age of eighteen without the written consent of the Qualifying Patient's parent or legal guardian. The Department shall not issue a Qualifying Patient identification card on behalf of a non-emancipated Qualifying Patient under the age of eighteen without the written consent of the Qualifying Patient's parent or legal guardian. Such card shall be issued to one of the parents or guardians and not directly to the patient. Only a parent or guardian may serve as a Primary caregiver for a non-emancipated Qualifying Patient under the age of eighteen. Only the Qualifying Patient's parent or guardian shall purchase or possess medical marijuana for a non-emancipated Qualifying Patient under the age of eighteen. A parent or guardian shall supervise the administration of medical marijuana to a non-emancipated Qualifying Patient under the age of eighteen

(14) Nothing in this section shall be construed as mandating health insurance coverage of medical marijuana for Qualifying Patient use.

(15) Real and personal property used in the cultivation, manufacture, transport, testing, distribution, sale, and administration of marijuana for medical use or for activities otherwise in compliance with this section shall not be subject to asset forfeiture solely because of that use.

8. Severability

The provisions of this section are severable, and if any clause, sentence, paragraph or section of this measure, or an application thereof, is adjudged invalid by any court of competent jurisdiction, the other provisions shall continue to be in effect to the fullest extent possible.

9. Effective Date

The provisions of this section shall become effective on December 6, 2018.]

This amendment also implicitly repeals, in part or in whole, and Amends various statutes and subsections including but not necessarily limited to RSMo 1.160, 43.200, 87.400, 87.505, 105.1105, 105.1108, 105.1112, 192.945, 192.947, 195.010, 195.017, 195.017, 195.140, 195.203, 195.207, 195.244, 195.740, 195.743, 195.746, 195.749, 195.752, 195.755, 195.756, 195.758, 195.764, 195.767, 195.770, 195.773, 196.070, 261.265, 263.250, 537.340, 545.030, 546.080, 546.260, 568.050, 577.024, 577.685, 579.015, 579.020, 579.030, 579.040, 579.055, 579.065, 579.068, 579.074, 579.076, 579.105.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XVI (16) shall henceforth be called **Missouri Cannabis Restoration and Protection**, and it shall read as follows:

Controlled Substance List (CSL), Definition as a substance

1. Cannabis shall immediately be removed from the Missouri Revised Statutes list of controlled substances and shall no longer be listed among Missouri's drug schedules. Cannabis shall no longer be considered a controlled substance or a drug, hence forth by Missouri law, by the passage of this Act.

Definitions

2. Definition of terms, as used in this Act:
(a) "Controlled Substance List", or "CSL" refers to Missouri's list of controlled substances as pertains to Missouri Statutes.
(b) "Cannabis" and "Cannabis hemp" refer to the Cannabis, marihuana, marijuana, Cannabis sativa, Cannabis sativa L., Cannabis Americana, Cannabis Gigantea, Cannabis indica, Cannabis ruderalis, or any variety of Cannabis, including any derivative, concentrate, extract, flower, leaf, particle, preparation, resin, root, salt, seed, stalk, stem, or any product thereof.
(c) "Medical Cannabis" refers to Cannabis used to prevent or to treat a medical condition.
(d) "Personal use" refers to the personal use or consumption of Cannabis.
(e) "Cannabis accessories" means any equipment, products, or materials of any kind that are used, intended for use, or designed for use in planting, propagating, cultivating, growing, harvesting, manufacturing, compounding, converting, producing, processing, preparing, testing, analyzing, packaging, repackaging, storing, or containing Cannabis, or for ingesting, inhaling, vaporizing, smoking or otherwise introducing Cannabis into and/or onto the human body.
(f) "Establishment" refers to a Cannabis cultivation facility, a Cannabis testing facility, a Cannabis product manufacturing facility, or a retail store, Cannabis store or other entity that cultivates, prepares, manufactures, packages, transports or sells Cannabis, Cannabis products and/or Cannabis accessories.

Personal and Commercial

3. The following acts are not unlawful and shall not be an offense under Missouri law:
(a) Possession of Cannabis for personal or medical use.
(b) Cultivating Cannabis for personal or medical use.
(c) Cultivation, harvesting, processing, manufacturing, packaging, distributing, transferring, displaying or possessing Cannabis, Cannabis accessories, and Cannabis products for commercial purposes, provided the person has current applicable licensing to operate a commercial establishment. No special licensing will be required beyond that which is applicable for the cultivating, harvesting, processing, manufacturing, packaging, distribution, transferal, display or possession of any non-toxic food or food product.
(d) Providing Cannabis, Cannabis accessories, and Cannabis products for sale to consumers.
(e) Leasing or otherwise allowing the use of property owned, occupied or controlled by any person, corporation or other entity for any of the activities conducted lawfully in accordance with paragraphs (a) through (d) of this subsection.
(f) No one shall be denied housing solely based on their use of Cannabis.
(g) No one shall be denied employment solely based on their use of Cannabis.
(h) The use and/or possession of Cannabis shall in no way impede one's legal right to possess a firearm.

Medical

4. Medical Cannabis shall be available to patients without taxation who have a physician's recommendation for its use.
(a) All patients engaged in Cannabis therapy shall be afforded the same rights and privileges afforded to any patient treated through conventional therapeutic means, whether or not under the care of a physician.
(b) Licensed physicians shall not be penalized for, nor restricted from recommending and/or providing Cannabis for medical purposes to any person under their care.
(c) Veterinarians shall not be penalized nor restricted from recommending and/or providing Cannabis for medical purposes for any creature under their care.
(d) Any individual who is a Cannabis patient in another state shall be granted the same rights and privileges as a legal Missouri Cannabis patient.
(e) Medical care, including organ transplants, shall not be restricted in any way based on a person's use of Cannabis.

Zoning

5. Cannabis farmers, manufacturers, processors, and distributors shall not be subject to any special zoning requirement, licensing fee that is excessive, discriminatory, prohibitive, or in any way contrary to that which is relative to any other commercial or agricultural farmer, manufacturer, processor or distributor.

Law Enforcement and the Courts

6. Missouri's law enforcement and its courts shall protect Cannabis users and their property without discrimination, and with every bit the effort afforded to every citizen of Missouri and our nation.
(a) The use and/or possession of Cannabis shall not be grounds for issuing a "Driving under the influence" (DUI) stop, charge, arrest or fine(s) when operating or a passenger of a motor vehicle. Stops, charges, fines and arrests shall be the product of visible and/or previously proven non-Cannabis infractions of Missouri law.
(b) No Missouri law enforcement personnel or state funds shall be used to assist or aid in the enforcement of federal Cannabis laws involving acts which are no longer illegal in the State of Missouri under this amendment.
(c) Asset or Civil Forfeiture shall no longer be used in the state of Missouri through association with Cannabis, Cannabis cultivation, it's use and/or possession, in any way.
(d) Upon the passage of this Act, all persons incarcerated or under supervision of the Missouri Board of Probation and Parole for non-violent, Cannabis-only offenses, which are no longer illegal in the State of Missouri under this Act, shall be immediately released.
(e) Within 60 days of the passage of this Act, a legal document shall be developed and made available to the public ordering the immediate destruction of all Cannabis-related non-violent civil and criminal records in Missouri and for any offense covered by this amendment which is no longer illegal in the State of Missouri under this Act. This document shall be distributed to all pertinent parties throughout the state.
(f) Within 60 days, Missouri's Courts shall order the immediate expungement of civil and criminal records pertaining to all non-violent Cannabis only offenses which are no longer illegal in the State of Missouri under this Act.

Regarding Federal Law

7. Pursuant to the Ninth and Tenth Amendments to the Constitution of the United States, the people of Missouri hereby repudiate and challenge federal Cannabis prohibitions that conflict with this Act.

Existing Local, State and Federal Law

8. All provisions of this section shall supersede conflicting city, county, state or federal statutory, local charter, ordinance, or resolution.

Implementation

9. The dictates of this Initiative, unless otherwise indicated by this initiative, shall be implemented no later than **January 31st, 2021.**

RE: Petition approval request from Jackie Johnson regarding a proposed constitutional amendment (2020-050)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitutional filed by Jackie Johnson on March 18, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Ballot Initiative

Honest Government Amendment: Be it enacted by the People of the State of Missouri:

No government employee within the State of Missouri (City, County, State, or Federal), by election, appointment, or application shall receive (Other than standard employment payment), payment, gratuities, donations, gifts for actions or inactions of their office by supporting or voting against legislation, awarding of government contracts, implementing, altering, enforcement, or repealing of regulations, or bringing pressure to bare on behalf of individuals. This is to include, but not limited to, campaign contributions, third party payments, hiring or paying family members, business investments, donations or gifts to foundations the employee has access or use of. This amendment shall only apply to employees that have the authority through their office to vote on pending government legislation, awarding government contracts, to implement, alter, or repeal regulations.

The Missouri Ethics Committee shall be required to investigate all complaints filed under this amendment will have full subpoena authority to investigate and enforce this amendment. The Missouri Ethics Committee's contact information, accompanied by a copy of this amendment shall be displayed in an easily visible location in all government buildings. The state shall station a minimum of one investigator in each state representative district. Failure to disclose all information (to included but not limited to, by withholding or destroying evidence) related to the Missouri Ethics Committee subpoena, and or investigation within 2 (two) weeks of the date of service of the subpoena, shall constitute a violation of this amendment, with all evidences presented to the Missouri States Attorney's office for criminal review. Challenges to the Ethic Committee's ruling shall be handled thru a jury trial only, in a civil court of law. Violation of this amendment, the employee's office shall be vacated and the violator's ability to hold government office, government employment, and a State issued license or certification within the State of Missouri shall be permanently revoked.

Be it resolved by the People of the State of Missouri that the Constitution be amended.

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes are hereby enacted, to be known as sections 286.131 and 143.012, to read as follows:

286.131. 1. A program to be known as "The Renewable Energy Project" is hereby created to be administered by the Missouri Department of Labor and Industrial Relations.
2. Funding for The Renewable Energy Project will be provided through revenues from a tax on long-term capital gains and qualified dividends, as provided for in Section 143.012. Additional funds may be solicited and accepted through grants from the federal government or other sources and from voluntary contributions.
3. The Missouri Department of Labor and Industrial Relations shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including methods for the expenditure of the funds collected pursuant to section 143.012 and other sources in a manner that increases the percentage of electricity generated by wind and solar sources within the state of Missouri as rapidly as possible.
4. Workers hired through this program may form or join a union to negotiate pay and benefits and may be employed directly by the state of Missouri or by privately-owned businesses through contracts with the state of Missouri.
5. The locations of any facilities leased or constructed as part of, or in support of, The Renewable Energy Project will be selected with an emphasis on creating jobs in economically-depressed areas of the state of Missouri.
6. Until such time as at least 90 percent of the electricity generated in Missouri is generated from clean, renewable sources, funds collected pursuant to this section and section 143.012 shall be used only for the purposes of employing workers, purchasing or leasing the resources and capital equipment, and leasing or constructing the facilities necessary, to increase the percentage of electricity generated by wind and solar sources and administer this program.
7. Once the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by the tax on long-term capital gains and qualified dividends and from other sources may be used, as directed by appropriate legislation, for the construction and maintenance of state-owned highways and bridges or other infrastructure projects.
8. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.012. 1. Beginning with the 2021 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference between the dollar amount of taxes paid to the federal government by each taxpayer on long-term capital gains and qualified dividends earned, and the dollar amount of the taxes that would have been paid had the capital gains or qualified dividends been taxed as marginal ordinary income, based on each taxpayer's federal tax bracket.
2. Any taxpayer whose total family income is less than 110 percent of the dollar amount of the poverty threshold, based on the poverty guidelines published by the Department of Health and Human Services, is exempt from this tax.
3. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-049)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapters 286 and 143 of the Revised Statutes of Missouri. (Received March 18, 2019)

Date

April 8, 2019

Description

This proposal would amend Chapters 286 and 143 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Public Service Commission,** and **Missouri Joint Municipal Electric Utility Commission.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated they have reviewed this initiative petition, which is a proposal to amend the Revised Statutes of Missouri to create "The Renewable Energy Project." The project focuses on employing individuals and increasing the use of renewable energy. Funding would come from a capital gains tax. This petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** (DOLIR) indicated unknown, greater than ($3,285,169) for fiscal year 2021; unknown, greater than ($3,040,392) for fiscal year 2022; unknown, greater than ($3,070,015) for fiscal year 2023. Of these costs, $835,733 are initial and one-time costs for equipment and a new computer system.

This proposal could affect Department of Revenue, Office of Administration, Department of Economic Development, or Public Service Commission.

Space is required for at least 50 full-time employees (FTE) X 200 square feet per FTE X $18.00 per square foot = $180,000.

It is possible that the proposal could affect small businesses in several ways, including imposition of the capital gains tax and the loss of projects to the state-funded agencies.

Section Funding:				
	General Revenue			
	Federal			
	Other	**425,129**	**101,422**	**103,958**
	Total	**425,129**	**101,422**	**103,958**

A tax on capital gains of 10% would be imposed beginning with the 2021 calendar year. DOLIR defers to the Office of Administration (OA) regarding the estimate of revenue collected from this surtax.

Revenue Projection

DOLIR defers to the Office of Administration (OA) regarding the revenue estimate. For the purpose of this initiative petition, DOLIR, OA, and Department of Revenue are unable to estimate revenue that would be generated by this proposed legislation, since there isn't enough information provided or access to taxpayers' federal tax information.

Cost Estimates

Administrative Costs and Management of Projects
DOLIR estimates that at least $3,285,169 will be needed for The Renewable Energy Project agency. Salaries for agency staff are similar to wages in other state agencies. In addition, it is assumed the DOLIR will contract for the management of the construction/manufacturing projects. Project management fees are estimated to be 10% of the cost of wages and material.

Participant Wages and Benefits
Section 286.131.4.a. requires that participants in the Renewable Energy Project be paid a living wage, defined as 10% over Federal Poverty Level (FPL). The average household has three dependent children. Using the FPL for 2018, for a family of five to earn wages at 10% over FPL, the hourly pay required would be $15.56. Fringe benefits are calculated at the standard state rate. Since we are unable to estimate the revenue generated for this initiative petition, we are unable to estimate the number of participants, placement specialists, or placement supervisors. For every fifteen participants, we will need one placement specialist. For every ten placement specialists, we would need one placement supervisor.

Material Costs for Projects
In calculating the material costs, the DOLIR assumes a labor to material cost at a ratio of 3 to 1.

Summary

Missouri currently has a 15% renewable energy mandate (see Sections 393.1020 to .1050). Hypothetically, they could gather the costs for this program and scale it up to what it would cost at the proposed 90% mandate. However, the programs are very different. Firstly, the current program allows for a wide variety of renewable resources to be used to hit the 15% mark. The proposed 90% mandate in the proposed legislation only allows for solar and wind power. Secondly, the Public Service Commission (PSC) and the Department of Economic Development (DED), administer the current program. The existing law is essentially a mandate on existing utility companies to expand their energy portfolio to include a percentage of renewable options, so most of the implementation costs originate from the large utility companies. The proposed program is a collection of tax revenues to fund a brand new program to be administered by DOLIR to meet the 90% goal.

Best estimates of wages, expenses, materials, and project management costs have been used where possible. Without a revenue estimate, we are only able to estimate the administrative staff salaries, fringe, and expense and equipment costs. Depending on the types and number of projects, the costs and number of participants will vary significantly. The scope of this statute revision is very broad and does not allow DOLIR to provide a complete cost estimate. Therefore, the fiscal impact and the long-range implications for this initiative petition is unknown.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Revenue** indicated they assume an "unknown positive fiscal impact" due to the lack of data their department receives from the IRS regarding capital gains.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated they are unable to estimate a fiscal impact from this initiative petition.

Officials from the **Office of Administration** indicated this proposal would create the Renewable Energy Project, which shall be administered by the Department of Labor and Industrial Relations. Funding for the program would be provided through a tax on capital

gains and shall be used only for employing workers and purchasing or leasing resources in order to increase the percentage of electricity generated by wind and solar sources. Once 90% of energy produced in Missouri is from clean, renewable sources, funds generated may be used, upon appropriation, for the construction and maintenance of state-owned highways, bridges or other infrastructure projects.

Section 143.012 creates a new tax on capital gains, beginning with tax year 2021, to fund the Renewable Energy Project. The tax shall be the difference between the amount of federal taxes paid on capital gains and the amount of federal taxes that would have been paid if the capital gains had been taxed as ordinary income. The Division of Budget and Planning (B&P) notes that this proposal does not specify a fund in which to deposit revenue generated from the new tax. Therefore, for the purpose of this fiscal note, B&P assumes that revenue generated will be deposited into General Revenue.

B&P further notes that this provision will only impact long-term capital gains as short term capital gains are already taxed at the ordinary income tax rates. The following tables show the difference in federal tax rates between long-term capital gains[1] and ordinary income tax rates[2] for the 2019 tax year, based on filing status.

Taxpayers Filing Single

Long-Term Rate	Long-Term Income Threshold	Corresponding Ordinary Income Tax Rate	Corresponding Ordinary Income Threshold

		35%	$204,101 - $461,700
20%	> $461,701	35%	$461,701 - $510,300
		37%	> $510,301

Section 143.012.2 exempts any taxpayer with a family income less than 110% of the federal poverty level from the tax created in Section 143.012. B&P notes that "family income" is not defined and no such term is currently used when calculating Missouri taxes. The following table shows the 110% income limits based on the 2019 Health and Human Services (HHS) poverty guidelines.[3]

Persons in Family	110% Poverty
1	$13,739
2	$18,601
3	$23,463
4	$28,325
5	$33,187
6	$38,049
7	$42,911
8	$47,773
> 8	# Additions x $4,862

B&P does not have access to taxpayers' federal tax rate information. Therefore, due to these data limitations, B&P is unable to estimate the potential revenue generated from this proposal.

This proposal should not impact their office.

[3] https://aspe.hhs.gov/poverty-guidelines

Officials from the **Office of State Courts Administrator** indicated there may be some impact on the courts but there is no way to quantify that currently.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In fiscal year (FY) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office. Given the lack of fund creation language, the funds will go into General Revenue (GR) unless Office of Administration (OA) administratively creates a fund.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no direct fiscal impact of this petition on their school; however, if enacted, they can see a potential economic benefit to their depressed community.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact on their college.

Officials from **Missouri Public Service Commission** indicated they do not anticipate a fiscal impact for this initiative petition. However, they have compiled comments for the drafter's consideration.

Comments:

Section 286.131.3 states ". . . in a manner that increases the percentage of electricity generated by wind and solar sources. . ."

Section 286.131.6 states "Until such time as at least 90 percent of the electricity generated in Missouri is generated from clean, renewable sources. . . to increase the percentage of electricity generated by wind and solar sources."

Section 286.131.7 states "Once the state of Missouri is producing 90% of its electricity from clean, renewable sources. . . "

The Missouri Public Service Commission (MoPSC) suggests the drafter clarify whether "clean, renewable sources" as used in the initiative petition is limited only to wind and solar sources.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri, St. Louis Community College,** and **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental entities estimate unknown annual revenue increases to fund the proposed program, one-time costs of approximately $800,000, and annual operating costs of at least $3 million. Local governmental entities expect no fiscal impact.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed statutory amendment to Chapters 143 & 286 (2020-048)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Winston Apple on March 7, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

cc: Hon. Eric S. Schmitt

My commission expires: _____

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes are hereby enacted, to be known as sections 286.131 and 143.012, to read as follows:

286.131. 1. A program to be known as "The Renewable Energy Project" is hereby created to be administered by the Missouri Department of Labor and Industrial Relations.
2. Funding for The Renewable Energy Project will be provided through revenues from a tax on long-term capital gains and qualified dividends, as provided for in Section 143.012.
3. The Missouri Department of Labor and Industrial Relations shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected pursuant to section 143.012 in a manner that increases the percentage of electricity generated by wind and solar sources within the state of Missouri as rapidly as possible, while creating as many jobs as possible. Workers hired through this program may form or join a union to negotiate pay and benefits. Facilities leased or constructed through this program will be located with an emphasis on creating jobs in economically-depressed areas of the state of Missouri.
4. Funds collected pursuant to this section and section 143.012 shall be used only for the purposes of employing workers and purchasing or leasing the necessary resources, capital equipment, and facilities necessary to increase the percentage of electricity generated by wind and solar sources until such time as at least 90 percent or more of the electricity generated in Missouri is generated from wind and solar sources.
5. Once the state of Missouri is producing 90% or more of its electricity from wind and solar sources, the funds generated by this tax on long-term capital gains and qualified dividends may be used, as directed by appropriate legislation, for the construction and maintenance of state-owned highways and bridges, or other infrastructure projects.
6. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.012. 1. Beginning with the 2021 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference between the amount of taxes paid to the federal government by each taxpayer on long-term capital gains and qualified dividends earned, and the tax rate that would have been paid had the capital gains or qualified dividends been taxed as marginal ordinary income, based on each taxpayer's tax bracket.
2. Any taxpayer whose total family income is less than 110 percent of the dollar amount of the poverty threshold, based on the poverty guidelines published by the Department of Health and Human Services, is exempt from this tax.
3. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-048)

Subject

Initiative petition from Winston Apple regarding a proposed amendment to Chapters 286 and 143 of the Revised Statutes of Missouri. (Received March 8, 2019)

Date

March 28, 2019

Description

This proposal would amend Chapters 286 and 143 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Missouri Public Service Commission,** and **Missouri Joint Municipal Electric Utility Commission.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated after consulting with their divisions (Public Service Commission (PSC), Office of Public Counsel (OPC), Division of Energy, and Division of Workforce Development (DWD)), it is their opinion that there would be no impact if this initiative petition became law.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated they have reviewed the initiative petition, which is a proposal to amend the Revised Statutes of Missouri to create "The Renewable Energy Project." The project focuses on employing individuals and increasing the use of renewable energy. Funding would come from a capital gains tax. This petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** (DOLIR) indicated unknown, greater than ($3,285,169) for fiscal year 2021; unknown, greater than ($3,040,392) for fiscal year 2022; unknown, greater than ($3,070,015) for fiscal year 2023. Of these costs, $835,733 are initial and one-time costs for equipment and a new computer system.

This proposal could affect Department of Revenue, Office of Administration, Department of Economic Development, or Public Service Commission.

Space is required for at least 50 (full-time employees) FTE X 200 square feet per FTE X $18.00 per square foot = $180,000.

It is possible that the proposal could affect small businesses in several ways, including imposition of the capital gains tax and the loss of projects to the state-funded agencies.

	Total		**425,129**	**101,422**	**103,958**

A tax on capital gains of 10% would be imposed beginning with the 2021 calendar year. DOLIR defers to the Office of Administration (OA) regarding the estimate of revenue collected from this surtax.

Revenue Projection

DOLIR defers to the Office of Administration (OA) regarding the revenue estimate. For the purpose of this initiative petition, DOLIR, OA, and Department of Revenue are unable to estimate revenue that would be generated by this proposed legislation, since there isn't enough information provided or access to taxpayers' federal tax information.

Cost Estimates

Administrative Costs and Management of Projects
DOLIR estimates that at least $3,285,169 will be needed for The Renewable Energy Project agency. Salaries for agency staff are similar to wages in other state agencies. In addition, it is assumed the DOLIR will contract for the management of the construction/manufacturing projects. Project management fees are estimated to be 10% of the cost of wages and material.

Participant Wages and Benefits
Section 286.131.4.a. requires that participants in the Renewable Energy Project be paid a living wage, defined as 10% over Federal Poverty Level (FPL). The average household has three dependent children. Using the FPL for 2018, for a family of five to earn wages at 10% over FPL, the hourly pay required would be $15.56. Fringe benefits are calculated at the standard state rate. Since we are unable to estimate the revenue generated for this initiative petition, we are unable to estimate the number of participants, placement specialists, or placement supervisors. For every fifteen participants, we will need one placement specialist. For every ten placement specialists, we would need one placement supervisor.

Material Costs for Projects
In calculating the material costs, the DOLIR assumes a labor to material cost at a ratio of 3 to 1.

Summary

Missouri currently has a 15% renewable energy mandate (see Sections 393.1020 to .1050). Hypothetically, they could gather the costs for this program and scale it up to what it would cost at the proposed 90% mandate. However, the programs are very different. Firstly, the current program allows for a wide variety of renewable resources to be used to hit the 15% mark. The proposed 90% mandate in the proposed legislation only allows for solar and wind power. Secondly, the Public Service Commission (PSC) and the Department of Economic Development (DED), administer the current program. The existing law is essentially a mandate on existing utility companies to expand their energy portfolio to include a percentage of renewable options, so most of the implementation costs originate from the large utility companies. The proposed program is a collection of tax revenues to fund a brand new program to be administered by DOLIR to meet the 90% goal.

Best estimates of wages, expenses, materials, and project management costs have been used where possible. Without a revenue estimate, we are only able to estimate the administrative staff salaries, fringe, and expense and equipment costs. Depending on the types and number of projects, the costs and number of participants will vary significantly. The scope of this statute revision is very broad and does not allow DOLIR to provide a complete cost estimate. Therefore, the fiscal impact and the long-range implications for this initiative petition is unknown.

Officials from the **Department of Public Safety-Director's Office** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Revenue** indicated there is no impact to their department regarding this initiative petition.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no impact.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would have no fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would create the Renewable Energy Project, which shall be administered by the Department of Labor and Industrial Relations. Funding for the program would be provided through a tax on capital

gains and shall be used only for employing workers and purchasing or leasing resources in order to increase the percentage of electricity generated by wind and solar sources. Once 90% of energy produced in Missouri is from solar or wind sources, funds generated may be used, upon appropriation, for the construction and maintenance of state-owned highways, bridges or other infrastructure projects.

Section 143.012 creates a new tax on capital gains, beginning with tax year 2021, to fund the Renewable Energy Project. The tax shall be the difference between the amount of federal taxes paid on capital gains and the amount of federal taxes that would have been paid if the capital gains had been taxed as ordinary income. The Division of Budget and Planning (B&P) notes that this proposal does not specify a fund in which to deposit revenue generated from the new tax. Therefore, for the purpose of this fiscal note, B&P assumes that revenue generated will be deposited into General Revenue.

B&P further notes that this provision will only impact long-term capital gains as short term capital gains are already taxed at the ordinary income tax rates. The following tables show the difference in federal tax rates between long-term capital gains[1] and ordinary income tax rates[2] for the 2019 tax year, based on filing status.

Taxpayers Filing Single

Long-Term Rate	Long-Term Income Threshold	Corresponding Ordinary Income Tax Rate	Corresponding Ordinary Income Threshold
0%	$0 - $39,375	10%	$0 - $9,700
		12%	$9,701 - $39,375

		32%	$160,701 - $204,100
		35%	$204,101 - $461,700
20%	> $461,701	35%	$461,701 - $510,300
		37%	> $510,301

Section 143.012.2 exempts any taxpayer with a family income less than 110% of the federal poverty level from the tax created in Section 143.012. B&P notes that "family income" is not defined and no such term is currently used when calculating Missouri taxes. The following table shows the 110% income limits based on the 2019 Health and Human Services (HHS) poverty guidelines.[3]

Persons in Family	110% Poverty
1	$13,739
2	$18,601
3	$23,463
4	$28,325
5	$33,187
6	$38,049
7	$42,911
8	$47,773
> 8	# Additions x $4,862

B&P does not have access to taxpayers' federal tax rate information. Therefore, due to these data limitations, B&P is unable to estimate the potential revenue generated from this proposal.

This proposal should not impact their office.

[3] https://aspe.hhs.gov/poverty-guidelines

Officials from the **Office of State Courts Administrator** indicated there may be some impact on the courts but there is no way to quantify that currently.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated many bills considered by the General Assembly include provisions allowing or requiring agencies to submit rules and regulations to implement the act. Their office is provided with core funding to handle a certain amount of normal activity resulting from each year's legislative session. The fiscal impact for this fiscal note to their office for Administrative Rules is less than $5,000. Their office recognizes that this is a small amount and does not expect that additional funding would be required to meet these costs. However, they also recognize that many such bills may be passed by the General Assembly in a given year and that collectively the costs may be in excess of what their office can sustain with their core budget. Therefore, they reserve the right to request funding for the cost of supporting administrative rules requirements should the need arise based on a review of the finally approved bills signed by the governor.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of our publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.
Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for the initiative petition due to the inability to do a real benefit/cost analysis not knowing who would fit the description as defined in the bill.

143.012. 1. Beginning with the 2021 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference between the amount of taxes paid to the federal government by each taxpayer on long-term capital gains and qualified dividends earned, and the tax rate that would have been paid had the capital gains or qualified dividends been taxed as marginal ordinary income, based on each taxpayer's tax bracket.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they believe this petition, if successful, will have very little impact on their school.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from **Missouri Public Service Commission** indicated there is no fiscal impact to their organization.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri, St. Louis Community College,** and **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State governmental entities estimate unknown annual revenue increases to fund the proposed program, one-time costs of approximately $800,000, and annual operating costs of at least $3 million. Local governmental entities expect no fiscal impact.

Be it enacted by the people of the state of Missouri:

Two new sections of the Missouri Revised Statutes are hereby enacted, to be known as sections 286.131 and 143.012, to read as follows:

286.131. 1. A program to be known as "The Renewable Energy Project" is hereby created within the Missouri Department of Labor and Industrial Relations.
2. Funding for The Renewable Energy Project will be provided through revenues from a tax on long-term capital gains and qualified dividends, as provided for in Section 143.012.
3. The Missouri Department of Labor and Industrial Relations shall, within one (1) calendar year of the effective date of this section, promulgate rules necessary for the administration of this section, including a method for the expenditure of the funds collected pursuant to section 143.012 in a manner that maximizes the reduction of emissions of carbon dioxide in the process of providing electricity to residents, businesses, and government facilities within the state of Missouri, while promoting employment and economic development in economically-depressed areas of the state of Missouri.
4. Funds collected pursuant to this section and section 143.012 shall be used only for the purposes of improving energy efficiency in buildings, constructing and installing renewable energy resources as defined by section 386.890.2(6), modernizing public infrastructure to utilize energy from renewable energy resources, and planting trees on public lands.
5. Once the state of Missouri is producing 90% or more of its electricity from clean, renewable sources, the funds generated by this tax on long-term capital gains and qualified dividends may be used, as directed by appropriate legislation, for the construction and maintenance of state-owned highways and bridges.
6. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

143.012. 1. Beginning with the 2021 calendar year, a tax on capital gains and qualified dividends will be imposed, with the funds collected dedicated to providing funding for The Renewable Energy Project. The amount of the tax will be the difference, expressed as a percentage, of the rate paid to the federal government by each taxpayer on long-term capital gains and qualified dividends earned, and the tax rate that would have been paid for an equal amount of marginal ordinary income, based on each taxpayer's tax bracket.
2. Any taxpayer whose total family income is less than 110 percent of the dollar amount of the poverty threshold, based on the poverty guidelines published by the Department of Health and Human Services, is exempt from this tax.
3. All subsections and all clauses of this Section, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III, Version 2 (2020-046)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 22, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 5, 6, 7, 9, 11 and 20(d), to read as follows:

Article III Section 3. [(a) There is hereby established the post of "Nonpartisan State Demographer". The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing legislative redistricting maps on the basis of each federal census for presentation to the house apportionment commission and the senatorial apportionment commission.]

[(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent legislative redistricting map to the house apportionment commission or the senatorial apportionment commission.]

[(c)] The house of representatives shall consist of [one hundred sixty-three] <u>ten</u> members <u>from each congressional district</u> elected at each general election [and apportioned as provided in this section] <u>for a term of two years</u>.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of legislative districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. Legislative districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.]

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

Article III Section 5. The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Article III Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for [three] two years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Article III Section 7. [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.

(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from the party list or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's or candidate's total votes and the process repeated until the requisite number of candidates has been elected.

(g) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Article III Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[Article III Section 10. The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

Article III Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[Article III Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

Article III Section 20(d). If any provision of sections 2, 3, 5, 6, 7, 9, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-046)

Subject

Initiative petition from Winston Apple regarding a proposed constitutional amendment to Article III. (Received February 22, 2019)

Date

March 14, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Kansas City Board of Election Commissioners,** the **Platte County Board of Elections,** the **Jackson County Election Board,** the **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated there would be no impact to their department as a result of this initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated no fiscal impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated that this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated:

Start date of 1/1/23 or FY 23 with annualized savings of $6,974,989. Session starts in January so the first year would include a full session's worth of savings, but only half a year's savings for Member and LA (legislative assistant) salaries and member expense accounts.

Member salaries: 83 x $35,915 = $2,980,945
Member expense accounts: 83 x $8,400= $697,200
Member session per diem: 83 x $119.20 x 70 days = $692,552
Member session mileage: 83 x 267 x .37 x 19 weeks = $155,792
LA (Legislative Assistant) salary: 83 x $29,500 = $2,448,500

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would not have a fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

This proposal amends Article III of the Missouri Constitution by repealing Sections 10 and 14 and amending Sections 3, 5, 6, 7, 9, 11 and 20(d).

The proposed amendment would:

- Amend Section 3 by:
  - Removing language relating to the establishment of the post of non-partisan state demographer;
  - Removing provisions concerning the number of State House members (163);
  - Requiring that the House of Representatives consist of ten members from each of the State's Congressional districts; and
  - Removing language creating the House and Senatorial Apportionment Commissions.
- Amend Section 5 by:
  - Removing the requirement for senatorial districts; and
  - Striking the language voters of the "districts" and adding voters of the "state."
- Amend Section 6 by adding the requirement that state senatorial candidates be a resident of the State and changing the minimum duration from three years to two.
- Amend Section 7 by:
  - Striking all of the language referring to the drawing of legislative districts; and

    - Adding language that changes the election process and process to fill vacancies for State Representatives and Senators.
- Amend Section 9 by adding language starting the new election process in the year 2022 and requiring ten House members be elected from each U.S. Congressional district.
- Repeal Section 10, which requires that Census data be used in redistricting and which allows that "districts may be altered from time to time as public convenience may require."
- Amend Section 11 by adding language making clear that the Senate will have two classes with staggered elections beginning in the year 2022.
- Repeal Section 14, which grants the Governor the authority to issue writs of election to fill vacancies in either house of the general assembly.
- Amend Section 20(d) by adding Sections 5, 6, 9 and 11 to the list of applicable sections of Article III.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there may be some impact on the courts but there is no way to quantify that currently.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated petition 2020-046 would change the composition of the General Assembly and cause representatives to be elected by congressional district and senators on a statewide basis. At each primary election, voters would see a list of all representative candidates in their congressional district and a list of all senate candidates from the state, with the ability to vote for one candidate from each list. This consolidation into congressional districts may incur the following costs:

Re-programming voting machines: Voting machines in Missouri are currently programmed to accept only single-page ballots – each of these machines would need to be reprogrammed to accept multiple-page ballots due to the potential for large numbers of candidates to file for each congressional district's seats (at both the primary and general elections).

Postage Costs: mailing envelopes used to return absentee ballots are printed with business reply permits – pursuant to RSMo 115.285. Local Election Authorities are reimbursed for these costs by the Missouri Secretary of State's Office at a current cost of $1.80 per envelope based on the current size and weight of the envelope and ballot; multiple-page ballots would increase these costs.

Ballot printing costs: Local Election Authorities bear the cost of printing ballots for each election – paying to print multiple page ballots would substantially increase printing costs.

Due to situational variables, it is not possible to determine a concrete amount of fiscal impact to this measure. However, the costs to the state and to local election authorities could be significant.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from the **City of Kansas City** indicated this amendment would have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see this petition issue as having much fiscal impact on their school.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from **Kansas City Board of Election Commissioners** indicated they are assuming the fiscal impact to the Kansas City Election Board would be the checking of petition signatures and placing this amendment on a jurisdiction wide ballot. If that is the case, they would estimate a range of $150,000 to $500,000, depending on what other entities participate in the election and their share of pro-rated costs.

Officials from **Platte County Board of Elections** indicated this initiative will have no fiscal impact on the Platte County Board of Elections.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **St. Louis County Board of Elections,** the **Board of Election Commissioners City of St. Louis,** the **Jackson County Election Board,** and the **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State government legislative operating costs are estimated to decrease by approximately $7 million annually. State and local governments could incur unknown additional election-related costs that could be significant.

JOHN R. ASHCROFT

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III, Version 1 (2020-045)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 22, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 4, 5, 6, 7, 9, 11, and 20(d) to read as follows:

Article III Section 3. (a) There is hereby established the post of "Nonpartisan State Demographer". After each decennial census, or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction of the United States, it shall be the duty of the non-partisan state demographer to assist the governor in his or her duty to lay off the state into as many districts as shall be equal to the number of representatives to which this state shall then be entitled. The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing [legislative] congressional redistricting maps on the basis of each federal census for presentation to the [house apportionment commission and the senatorial apportionment commission] governor for his or her approval. In the event the governor and the non-partisan state demographer do not concur with regard to how the districts should be laid off, the plans of both the governor and the non-partisan state demographer shall be subject to a referendum, with the voters of the state choosing between the plans.

(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent [legislative] congressional redistricting map to the [house apportionment commission or the senatorial apportionment commission] governor.

[(c) The house of representatives shall consist of one hundred sixty-three members elected at each general election and apportioned as provided in this section.]

(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of [legislative] congressional districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. [Legislative] Congressional districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

Article III Section 4. <u>The house of representatives shall consist of ten members from each congressional district elected at each general election.</u> Each representative shall be twenty-four years of age, and next before the day of his election shall have been a qualified voter for two years and a resident of the county or district which he is chosen to represent for one year, if such county or district shall have been so long established, and if not, then of the county or district from which the same shall have been taken.

Article III Section 5. The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] <u>state of Missouri</u> for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Article III Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter <u>and a resident</u> of the state for [three] <u>two</u> years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Article III Section 7. [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.]

[(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.]

[(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from the party list or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's or candidate's total votes and the process repeated until the requisite number of candidates has been elected.

(g) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Article III Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[Article III Section 10. The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

Article III Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[Article III Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

Article III Section 20(d). If any provision of sections 2, 3, 5, 6, 7, 9, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III, Version 2 (2020-044)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 15, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 4, 5, 6, 7, 9, 11, and 20(d) to read as follows:

III Section 3. State demographer established and selected — [election of representatives —] [legislative] congressional districts established [— congressional district commission]. — (a) There is hereby established the post of "Nonpartisan State Demographer". After each decennial census, or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction of the United States, it shall be the duty of the non-partisan state demographer to assist the governor in his or her duty to lay off the state into as many districts as shall be equal to the number of representatives to which this state shall then be entitled. The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing [legislative] congressional redistricting maps on the basis of each federal census for presentation to the [house apportionment commission and the senatorial apportionment commission] governor for his or her approval. In the event the governor and the non-partisan state demographer do not concur with regard to how the districts should be laid off, the plans of both the governor and the non-partisan state demographer shall be subject to a referendum, with the voters of the state choosing between the plans.

(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent [legislative] congressional redistricting map to the [house apportionment commission or the senatorial apportionment commission] governor.

[(c) The house of representatives shall consist of one hundred sixty-three members elected at each general election and apportioned as provided in this section.]

(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of [legislative] congressional districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. [Legislative] Congressional districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

III Section 4. Qualifications of representatives – election of representatives. — The house of representatives shall consist of ten members from each congressional district elected at each general election. Each representative shall be twenty-four years of age, and next before the day of his election shall have been a qualified voter for two years and a resident of the county or district which he is chosen to represent for one year, if such county or district shall have been so long established, and if not, then of the county or district from which the same shall have been taken.

III Section 5. Senators — number [— senatorial districts]. — The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

III Section 6. Qualifications of senators. — Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for [three] two years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

III Section 7. [Senatorial districts established — senatorial apportionment commission] Qualifying for the ballot – apportionment of representatives and senators – filling vacancies. — [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.]

[(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.]

[(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from the party list or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's or candidate's total votes and the process repeated until the requisite number of candidates has been elected.

(g) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

III Section 9. Apportionment of representatives. — Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[III Section 10. Basis of apportionment — alteration of districts. — The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

III Section 11. Time of election of senators and representatives. — The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[III Section 14. Writs of election to fill vacancies. — Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

III Section 20(d). Severability provision. — If any provision of sections 2, 3, 5, 6, 7, 9, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III, Version 1 (2020-043)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 15, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 5, 6, 7, 9, 11 and 20(d), to read as follows:

III Section 3. [State demographer established and selected — e] Election of representatives [— legislative districts established — congressional district commission]. — [(a) There is hereby established the post of "Nonpartisan State Demographer". The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing legislative redistricting maps on the basis of each federal census for presentation to the house apportionment commission and the senatorial apportionment commission.]

[(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent legislative redistricting map to the house apportionment commission or the senatorial apportionment commission.]

[(c)] The house of representatives shall consist of [one hundred sixty-three] ten members from each congressional district elected at each general election [and apportioned as provided in this section] for a term of two years.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of legislative districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. Legislative districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.]

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

III Section 5. Senators — number [— senatorial districts]. — The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

III Section 6. Qualifications of senators. — Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for [three] two years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

III Section 7. [Senatorial districts established — senatorial apportionment commission] Qualifying for the ballot – apportionment of representatives and senators – filling vacancies. — [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.

(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from the party list or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's or candidate's total votes and the process repeated until the requisite number of candidates has been elected.

(g) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

III Section 9. Apportionment of representatives. — Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[III Section 10. Basis of apportionment — alteration of districts. — The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

III Section 11. Time of election of senators and representatives. — The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[III Section 14. Writs of election to fill vacancies. — Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

III Section 20(d). Severability provision. — If any provision of sections 2, 3, 5, 6, 7, 9, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

RE: Petition approval request from Christopher Pieper regarding a proposed constitutional amendment to Article VI (2020-042)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Christopher Pieper on February 11, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article VI of the Constitution is revised by repealing Sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 and adopting one new section to be known as Article VI, Section 30 to read as follows:

1. Definitions.

(1) When used in this section, the following terms shall have the following meanings:

(a) "Effective date of this section" shall mean January 1, 2021, which shall be the effective date of the enactment of section 30 of this article and the repeal of sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 of this article.

(b) "Financing obligation" means any bond, note, capital lease, or similar obligation of the metropolitan city, a municipality, a municipal district, or the St. Louis Municipal Corporation, as applicable, including any such obligations issued on behalf of any such entity and any such obligations issued to refinance or refund any such obligation.

(c) "General district service" shall mean any duty, service, or function of the metropolitan city, a county, or a city, now or in the future assigned by law, charter, or ordinance of the metropolitan city, including, without limitation: public health, safety, and general welfare; police, law enforcement, and municipal court; the licensing, taxing, and regulation of businesses, occupations, professions, activities, and things; transportation, infrastructure, and public works; and economic development.

(d) "Mayor" shall mean the mayor of the metropolitan city.

(e) "Metropolitan city" shall mean The Metropolitan City of St. Louis.

(f) "Municipal district" shall mean a municipal district of the metropolitan city, comprising the territory within the municipality immediately prior to the effective date of this section.

(g) "Municipal district service" shall mean any duty, service, or function of the municipality immediately prior to the effective date of this section or in the future assigned to the municipal district by law, charter, or ordinance of the metropolitan city, and which is not otherwise a general district service provided or secured by the metropolitan city within the territory of the municipal district, including, without limitation: fire protection, emergency medical, and related services; parks and recreation; proprietary and enterprise functions; facilities; and administration of the municipal district.

(h) "Municipality" shall mean any incorporated city, town, or village located wholly within the territory of the city of St. Louis or the county of St. Louis as of January 1, 2019, including the city of St. Louis.

(i) "Special district" shall mean, excluding school districts and fire protection districts, any political subdivision, municipal corporation, body corporate and politic, authority, metropolitan district, taxing district, taxing subdistrict, public corporation, or quasi-public corporation created pursuant to this constitution, law, charter, ordinance, or resolution, other than the county of St. Louis or a municipality, located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section.

(j) "This section" shall mean this article VI, section 30.

(k) "Transition mayor" shall mean the transition mayor of the metropolitan city.

(l) "Transition period" shall mean the period between the effective date of this section and January 1, 2023.

2. Metropolitan City.

(1)(a) Upon the effective date of this section, the territory of the county of St. Louis is extended to embrace the territory heretofore in the city of St. Louis and the county of St. Louis, and the county of St. Louis so expanded shall continue its corporate existence as a new political subdivision, body corporate and politic, and municipal corporation, which is hereby created, with its name "The Metropolitan City of St. Louis" and its seat of government within the territory heretofore in the city of St. Louis.

(b) All rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the county of St. Louis, including, without limitation, the payment of principal and interest on financing obligations, and any obligations related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, shall continue without impairment with the metropolitan city by operation of this section.

(2) The metropolitan city shall be a metropolitan city form of government, which is hereby created, and which shall possess all the powers and privileges of both a constitutional charter county and a constitutional charter city, including any city not within a county. The powers and privileges of the metropolitan city shall include, without limitation, all powers and privileges of the county of St. Louis and of any municipality immediately prior to the effective date of this section, and all powers and privileges now or in the future granted to the metropolitan city, to a county, or to a city under this constitution and the laws of this state. Such powers and privileges shall be cumulative and shall be construed broadly in favor of the metropolitan city.

(3) The metropolitan city shall be governed by a charter. Notwithstanding any provision of law or this constitution, the initial charter of the metropolitan city shall be the charter of the county of St. Louis as of January 1, 2019, except as otherwise provided in this section. The specific mention of or the failure to mention a particular power or privilege in the initial charter shall not limit in any way the powers and privileges granted herein to the metropolitan city. The initial charter shall be liberally construed to effectuate this section and in harmony therewith. The initial charter may be amended in the manner provided in this section and, following the transition period, in the manner provided by charter, provided that any amendment submitted by ordinance shall require the affirmative vote of two-thirds of the qualified electors voting thereon.

(4)(a) Unless otherwise provided by charter following the transition period, there shall be no elective officers of the metropolitan city other than the mayor, the members of the metropolitan council, the assessor, and the prosecuting attorney. Elective officers shall be qualified voters of the metropolitan city and shall possess such additional qualifications provided by charter. Except as otherwise provided in this section, elective officers of the metropolitan city shall be nominated and elected in the manner provided in the election laws for state and county officers. No person duly serving in any office of the county of St. Louis or of any municipality immediately prior to the effective date of this section shall be disqualified from candidacy for elective office of the metropolitan city or of a municipal district, but shall forfeit such office upon assuming elective office of the metropolitan city or of a municipal district. A vacancy shall exist in an office of the metropolitan city in the event of death, resignation, or inability to serve of the person designated by this section to assume such office.

(b) The salary for members of the metropolitan council shall be as provided for members of the board of aldermen of the city of St. Louis immediately prior to the effective date of this section and as may be fixed by ordinance. The salary for all other elective officers of the

metropolitan city shall be as provided for corresponding officers of the county of St. Louis immediately prior to the effective date of this section and as may be fixed by ordinance.

(5)(a) Except as otherwise provided in this section with respect to the transition period, the legislative power of the metropolitan city shall be vested in the metropolitan council and shall include the exercise of legislative power throughout the territory of the metropolitan city, including within the territory of any municipal district, pertaining to any and all duties, services, and functions now or in the future assigned to the metropolitan city, to a county, or to a city.

(b) The metropolitan council shall consist of thirty-three members, elected for terms of four years by the qualified voters of the districts in which they reside, except that members initially representing even-numbered districts shall be elected for terms of two years to provide for staggered terms. Members shall be elected at the general election in 2022, and so on at succeeding elections, and shall take office on January first following election. Notwithstanding the foregoing, the members of the county council of the county of St. Louis duly serving as of the effective date of this section shall be entitled to continue service as members of the county council of the county of St. Louis for the term of office for which they were elected or appointed and receive compensation therefor in the exercise of the duties specified in this section.

(c) Members of the metropolitan council shall be elected from districts established in the manner provided in this section.

(i) Before April 1, 2021, the mayor and transition mayor shall jointly appoint a member or members of the faculty, with relevant expertise and without partisan affiliation, of one or more universities located within the metropolitan city to prepare a plan to divide the metropolitan city into districts from which members of the metropolitan council shall be elected. The plan shall include a statement of the boundaries of the initial districts, together with a map of such districts. Districts shall contain as nearly equal population as practicable, shall be compact and contiguous, and shall comply with all requirements of the United States Constitution and federal laws, including, but not limited to, the Voting Rights Act of 1965, as amended. Such districts shall respect boundaries of municipal districts and communities of interest whenever practicable.

(ii) Before September 1, 2021, the plan shall be submitted for adoption, with or without amendment, by the county council of the county of St. Louis and the governing body of the municipal district within the territory heretofore in the city of St. Louis. If both shall fail to adopt identical plans with the characteristics required by this section, on or before December 31, 2021, the plan as submitted shall be deemed approved as of that date. Upon approval, the plan shall be filed with the official performing the duties of a county clerk and the office or officers charged with conducting elections in the metropolitan city and shall be deemed incorporated into the charter.

(iii) On or before December thirty-first of the year following a federal decennial census, beginning with the first federal decennial census following the transition period, the districts shall be reapportioned, if necessary, in the manner provided in the charter and with the characteristics provided in this section.

(d) At its first regular meeting following the transition period, and every two years thereafter, the members of the metropolitan council shall designate a president and vice-president, whose terms of office shall be for two years.

(e) Any vacancy in the metropolitan council shall be filled by appointment of the president of the metropolitan council. Any person appointed to fill such vacancy shall have the

same qualifications otherwise established for the office and shall serve until a successor is duly serving following a special election for the unexpired or full term.

(6)(a) Except as otherwise provided in this section with respect to the transition period, all executive and administrative power of the metropolitan city shall be vested in the mayor, who shall be the chief executive officer of the metropolitan city and shall possess and exercise all the powers and duties of the chief executive officer of a county and of a city now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial mayor shall be the person duly serving as county executive of the county of St. Louis on January 1, 2019, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The mayor shall be elected at the general election in 2024, and every four years thereafter, and shall take office on January first following election. Except as otherwise provided in this section with respect to the transition period, a vacancy in the office of mayor shall be filled by the president of the metropolitan council, who shall possess and exercise the powers and duties of the office until a successor is serving following a special election for the unexpired or full term. While so holding the office of mayor, a temporary vacancy shall exist in the office of the president of the metropolitan council. The vice-president of the metropolitan council shall hold the office of president of the metropolitan council during any such vacancy, with the right of succession to the office of mayor. Notwithstanding the foregoing, the transition mayor shall possess and exercise the powers and duties of the office of mayor in the event of a vacancy in such office during the transition period. The vacancy in the office of transition mayor thereby created shall be filled by appointment of the transition mayor, now serving as mayor, from a list of no less than three qualified voters nominated by resolution of the county council of the county of St. Louis. If the county council of the county of St. Louis shall fail to submit such list within seven days of the vacancy, the office shall be filled by appointment of the transition mayor, now serving as the mayor.

(b) The mayor shall appoint no fewer than four deputy mayors, to serve at the pleasure of the mayor and with such duties as directed by ordinance or executive order, with respect to public health and safety; economic development and innovation; community development and housing; community engagement and equity; and as otherwise designated by charter.

(c) There shall be an assessor of the metropolitan city who shall possess and exercise all the powers and duties of a county assessor now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial assessor shall be the person duly serving as assessor of the county of St. Louis as of January 1, 2019, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The assessor shall be elected at the general election in 2024, and every four years thereafter, and shall take office on January first following election. A vacancy in the office shall be filled by appointment of the mayor, and the person so appointed shall hold office until January first following the next general election at which a successor shall be elected for the unexpired or full term.

(d) There shall be a prosecuting attorney of the metropolitan city who shall possess and exercise all the powers and duties of a prosecuting attorney and the circuit attorney for the city of St. Louis now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial prosecuting attorney shall be the person duly serving as prosecuting attorney of the county of St. Louis on January 1, 2019, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The prosecuting attorney shall be elected at the general election in 2024, and every four years thereafter, and shall take office on January first following election. A vacancy in the office shall be filled by

appointment of the mayor, and the person so appointed shall hold office until January first following the next general election at which a successor shall be elected for the unexpired or full term.

(e) There shall be a metropolitan city counselor appointed by the mayor, with such qualifications provided by charter, who shall serve as the metropolitan city's attorney and counselor at law and shall possess and exercise all the powers and duties of a county counselor and a city attorney now or in the future granted.

(f) Except as provided in this section, the metropolitan city shall have such departments and offices as established by the county of St. Louis as of the effective date of this section and as may be subsequently established by the metropolitan city. Except for the heads of a department appointed by the majority of the circuit judges as provided by charter, the heads of each department shall be appointed by the mayor and shall assume office upon appointment. Upon the effective date of this section, a board or commission of the county of St. Louis, and which is not the governing body of a special district, shall continue as a board or commission of the metropolitan city, until otherwise provided by charter or by ordinance of the metropolitan city, with the members duly serving holding office until a successor is duly appointed. The members of boards and commissions of the metropolitan city shall be appointed by the mayor, or otherwise as designated by charter, and shall exercise such duties and functions as assigned by law, charter, ordinance, or order.

(7)(a) During the transition period, all executive and administrative power of the metropolitan city shall be vested jointly in the mayor and transition mayor, who shall together constitute the chief executive officer of the metropolitan city and who shall jointly undertake or order the exercise or performance of any power, duty, or function necessary and proper to faithfully execute the orderly administration and implementation of this section. Notwithstanding any provision of law or this constitution, the transition mayor shall be the person serving as mayor of the city of St. Louis on January 1, 2019, who shall assume the office of transition mayor upon the effective date of this section and hold office until January 1, 2023. During the transition period, the transition mayor shall concurrently exercise the powers, privileges, duties, and functions of the chief executive officer of the governing body of the municipal district within the territory heretofore in the city of St. Louis. A vacancy in the office of transition mayor shall be filled by appointment of the mayor from a list of no less than three qualified voters nominated by resolution of the governing body of the municipal district within the territory heretofore in the city of St. Louis. If the governing body of the municipal district shall fail to submit such list within seven days of the vacancy, the office shall be filled by appointment of the mayor.

(b) Notwithstanding any provision of law or this constitution, to the extent an executive or administrative power, duty, or function is required to be exercised or performed by the metropolitan city during the transition period, such power, duty, or function may be exercised or performed jointly by the mayor and transition mayor or, at their joint direction, by an official or employee of the metropolitan city or of a municipal district, but shall be deemed exercised or performed by the metropolitan city. Such powers, duties, and functions shall include, without limitation: (i) on or before February 1, 2021, establishing procedures related to the joint exercise and performance of the power, duties, and functions authorized by this section, including, without limitation, a procedure for the resolution of any nonconcurrence among the mayor and transition mayor; (ii) on or before April 1, 2021, making appointments to offices, departments, boards, and commissions, except for officers appointed by a majority of the circuit judges as provided in the charter, with such persons assuming office upon their appointment; (iii) ordering

the metropolitan city provide or secure the provision of a general district service within the territory of a municipal district; (iv) administering the budget for each year of the transition period in the manner provided in this section; (v) transferring and assigning the functions and duties of personnel; (vi) entering into contracts and agreements; (vii) transferring and accepting the transfer of property; and (viii) executing any necessary documents or instruments related thereto on behalf of the metropolitan city. The mayor and transition mayor shall jointly undertake or order the exercise or performance of such powers, duties, or functions pursuant to executive order contemporaneously transmitted to the county council of the county of St. Louis and the governing body of each municipal district.

(c) During the transition period, the mayor and transition mayor shall jointly solicit public comment and, before November 15, 2022, shall jointly present to the public, at meetings called for such purpose, a plan to create, organize, and abolish executive and administrative departments, divisions, bureaus, commissions, boards, offices, and employments, and transfer the functions and duties thereof, as necessary and proper to effectuate this section and to ensure the proper and efficient administration of the affairs of the metropolitan city. The plan shall provide for the exercise of executive and administrative powers and duties of counties and county officers prescribed by this constitution and laws of the state and shall provide for the exercise of executive and administrative powers, privileges, duties, and functions of the metropolitan city prescribed in this section, including, without limitation, providing or securing the provision of general district services throughout the territory of the metropolitan city. On or after January 1, 2023, the plan shall be submitted to the metropolitan council and shall take effect within thirty days of submission, unless disapproved by resolution adopted by two-thirds of all members voting in the affirmative, provided that if the plan would affect the department of judicial administration, such plan shall not become effective unless upon the concurrence of a majority of the circuit judges within the metropolitan city. Upon taking effect, the plan shall take the place of and supersede charter provisions, ordinances, resolutions, rules, regulations, and orders inconsistent therewith.

(d) Notwithstanding any provision of law or this constitution, during the transition period, the county council of the county of St. Louis and the governing body of the municipal district located within the territory heretofore of the city of St. Louis, upon the joint recommendation of the mayor and transition mayor, shall adopt resolutions, ordinances, and orders consistent with this section and its orderly implementation and administration, with such resolutions, ordinances, and orders deemed as on behalf of the metropolitan city upon their adoption by both such bodies and the joint approval thereof by the mayor and transition mayor, and may continue to separately adopt resolutions, ordinances, and orders consistent with this section and its orderly implementation and administration applying to their respective territories.

(e) During the transition period, the governing body of a municipal district shall administer the affairs of the municipal district, provided that, unless upon the joint approval of the mayor and transition mayor, no municipal district shall incur any new obligation extending beyond the transition period with respect to the provision of general district services, other than with respect to the refunding of financing obligations, nor dispose of its property, except as required by contract.

(f) During the transition period, it shall be the affirmative duty of any official or employee of the metropolitan city, the county of St. Louis, or a municipal district to cooperate in the orderly administration and implementation of this section under the joint direction of the

mayor and transition mayor and to refrain from any official action that would impair or frustrate its orderly administration and implementation.

(8) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the powers and duties of any county office of the city of St. Louis or the county of St. Louis shall be deemed exercised or performed on behalf of the metropolitan city. Except as otherwise provided in this section, on or before January 1, 2022, all property, contracts, records, and personnel related to any such county office shall be transferred to the corresponding office of the metropolitan city. Incumbents serving in such offices shall serve the remainder of the term for which they were elected or appointed, subject to any right of resignation, and shall receive compensation therefor in the performance of such duties directed by the metropolitan city.

(9) The entire territory of the metropolitan city shall be a general services district throughout which the metropolitan city shall provide or secure the provision of general district services, including within the territory of any municipal district. Notwithstanding the foregoing, a municipal district shall continue to provide or secure the provision of a general district service on behalf of the metropolitan city until provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city. Except as otherwise provided in this section and excluding any fund balance of a municipal district, any property, contracts, records, and personnel of a municipal district related to providing or securing a general district service shall be transferred to the metropolitan city upon the metropolitan city providing or securing the provision of a general district service within the territory of the municipal district.

(10)(a) The metropolitan city shall enforce its ordinances, resolutions, rules, regulations, and orders throughout its territory. Ordinances, resolutions, rules, regulations, and orders of the county of St. Louis in effect immediately prior to the effective date of this section shall remain effective as ordinances, resolutions, rules, regulations, and orders of the metropolitan city and shall be enforced by the metropolitan city until repealed, modified, or amended by the metropolitan city, except to the extent of any conflict with this section. Charter provisions, ordinances, resolutions, rules, regulations, and orders of any municipality in effect immediately prior to the effective date of this section shall become effective as ordinances, resolutions, rules, regulations, and orders of the metropolitan city as if enacted or promulgated by the metropolitan city and shall be enforced by the metropolitan city with respect to the territory to which they applied immediately prior to the effective date of this section until repealed, modified, or amended by the metropolitan city, except to the extent of any conflict with this section. Notwithstanding the foregoing, during the transition period, a municipal district may, under the direction of the metropolitan city, continue to enforce such ordinances, resolutions, rules, regulations, and orders within its territory, and such enforcement shall be deemed on behalf of the metropolitan city. All ordinances, resolutions, rules, regulations, or orders of the metropolitan city shall be construed to effectuate this section.

(b) The metropolitan city counselor shall review all charter provisions, ordinances, resolutions, rules, regulations, and orders and shall solicit public comments related thereto. By no later than November 15, 2022, the metropolitan city counselor shall issue a report on such modifications and revisions necessary or advisable, including, without limitation, to resolve any conflicts whereby any rights, remedies, entitlements, or the enforcement thereof, cannot reasonably be reconciled. The metropolitan council may adopt the report by ordinance, and, upon adoption, the charter, ordinances, resolutions, rules, regulations, and orders in effect shall be deemed modified to reflect the report so adopted.

(11)(a) Upon the effective date of this section, the jurisdiction of the municipal court for the county of St. Louis shall be extended to the entire territory of the metropolitan city and shall constitute the municipal court for the metropolitan city. The municipal court shall have jurisdiction to hear and determine cases involving violations of ordinances in the manner provided by this constitution or by law, rule, charter, or ordinance. Notwithstanding the foregoing, during the transition period, a municipal court within the metropolitan city immediately prior to the effective date of this section may continue to operate as a division of the municipal court of the metropolitan city, with any act of such division deemed performed on behalf of the municipal court of the metropolitan city. On or before January 1, 2023, property, contracts, records, and personnel of any municipal court within the metropolitan city immediately prior to the effective date of this section shall be transferred to the municipal court of the metropolitan city.

(b) The metropolitan city may authorize the municipal court to operate within divisions and in such locations as are convenient to residents of the metropolitan city and which may correspond with the geographic boundaries of one or more municipal courts immediately prior to the effective date of this section. Except as otherwise provided in this section, the municipal court shall have such municipal judges, and the necessary non-judicial personnel assisting them, as provided by law and ordinance. Unless otherwise provided by ordinance of the metropolitan city respecting a municipal court, the mayor shall appoint, with advice and consent of the metropolitan council, the judges of the municipal court. The metropolitan city shall prescribe by ordinance the tenure and compensation of the judges of the municipal court. Municipal judges and necessary non-judicial personnel shall serve full-time, unless otherwise provided by charter of the metropolitan city, provided that the compensation for any full-time judge of the municipal court shall not exceed the compensation for an associate circuit judge.

(c) The clear proceeds of all penalties, forfeitures, and fines collected by the municipal court shall be distributed annually to the schools of the metropolitan city according to law.

3. Municipal Districts.

(1)(a) Upon the effective date of this section, a municipality shall continue its corporate existence as a municipal district, with its name the term "Municipal District" preceded by the name of the municipality, less any previous designation as to city, town, or village, unless otherwise designated by the municipal district or by law. A municipal district of the metropolitan city, which is hereby created, shall be a political subdivision, body corporate and politic, and municipal corporation, exercising and performing such powers, privileges, duties, and functions of the municipality necessary and proper: (i) to provide or secure the provision of a municipal district service not otherwise provided or secured within its territory; (ii) to provide or secure the provision of a general district service until provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city; and (iii) for the satisfaction of outstanding obligations of any kind incurred by the municipality prior to the effective date of this section.

(b) All rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the municipality, including, without limitation, the payment of principal and interest on financing obligations and any obligation related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, shall continue without impairment with the municipal district by operation of this section. Except as otherwise provided in this section, the municipal district and the territory therein shall continue to be held

responsible for any such outstanding obligation to the same extent as the municipality immediately prior to the effective date of this section, and any tax, license, fee, or special assessment levied or imposed for the satisfaction of any outstanding obligation shall continue to be levied or imposed within its territory until such obligation is satisfied or the obligation terminates pursuant to the terms thereof. The municipal district may refinance or refund any outstanding financing obligation in the manner provided by law for the municipality. Any property or interest therein securing an outstanding financing obligation shall remain the property of the municipal district until such financing obligation is satisfied, unless otherwise provided pursuant to the terms thereof. Notwithstanding the foregoing, the metropolitan city may assume any outstanding obligation of the municipal district, provided that no such assumption shall impair any obligation of contract.

(2)(a) The governing body of a municipal district shall be the governing body of the municipality, exercising and performing such powers, privileges, duties, and functions of the governing body of the municipality necessary and proper to effectuate this section and for the proper and efficient administration of the municipal district, including, without limitation, serving the function of a planning commission and board of adjustment to the metropolitan city, in the manner authorized by the metropolitan city, with respect to zoning ordinances applicable to territory of the municipal district.

(b) Notwithstanding any provision of law or this constitution, the initial governing body shall consist of the members of the governing body of the municipality duly serving immediately prior to the effective date of this section, who shall assume office with the municipal district upon the effective date of this section and hold office until a successor is duly serving following election, beginning with the first general municipal election following the transition period.

(c) Upon the effective date of this section, a board or commission of the municipality, and which is not the governing body of a special district, shall continue as a board or commission of the municipal district, until otherwise provided by the municipal district, by the metropolitan city, or by law, with the members duly serving holding office until a successor is duly appointed in a manner consistent with that of the municipality or as provided by law.

(3) The boundaries of a municipal district shall not be altered except as approved by ordinance of the metropolitan city. Following the transition period, a municipal district may merge or consolidate with one or more municipal districts or may be dissolved as authorized by ordinance of the metropolitan city providing for the transfer of any rights, duties, personnel, property, contracts, assets, liabilities, and obligations and the procedure and effective date for such merger, consolidation, or dissolution. Such ordinance may provide for creation of a new municipal district to assume the powers, privileges, duties, and functions of any municipal districts so subsumed.

4. The St. Louis Municipal Corporation.

(1)(a) On January 1, 2023, the municipal district within the territory heretofore in the city of St. Louis shall continue its corporate existence as a political subdivision and municipal corporation, with its name "The St. Louis Municipal Corporation." The St. Louis Municipal Corporation shall exercise and perform such powers, privileges, duties, and functions of the municipal district necessary and proper: (i) for the satisfaction of outstanding obligations of any kind of the municipal district; and (ii) to provide or secure the provision of a municipal district service not otherwise provided or secured within its territory, except as otherwise provided by ordinance of the metropolitan city.

(b) Except as otherwise provided in this section, all rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the municipal district within the territory heretofore in the city of St. Louis, including, without limitation, the payment of principal and interest on financing obligations, and any obligation related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, shall continue without impairment with the St. Louis Municipal Corporation by operation of this section. Except as otherwise provided in this section, the St. Louis Municipal Corporation and the territory therein shall continue to be held responsible for any such outstanding obligation to the same extent as the municipal district within the territory heretofore in the city of St. Louis, and any tax, license, fee, or special assessment levied or imposed for the satisfaction of any outstanding obligation shall continue to be levied or imposed within its territory until such obligation is satisfied or the obligation terminates pursuant to the terms thereof. The St. Louis Municipal Corporation may refinance or refund any outstanding financing obligation in the manner provided by law for the municipality. Any property or interest therein securing any outstanding financing obligation shall remain the property of the St. Louis Municipal Corporation until such financing obligation is satisfied, unless otherwise provided pursuant to the terms thereof. Notwithstanding the foregoing, the metropolitan city may assume any outstanding obligation of the St. Louis Municipal Corporation, provided that no such assumption shall impair any obligation of contract.

(2) The governing body of the St. Louis Municipal Corporation shall be comprised of a board of directors of five qualified voters appointed by the transition mayor, with three directors appointed for terms of three years and two appointed for terms of two years. Such initial members shall assume office on January 1, 2023, and shall hold office until a successor is duly appointed by the mayor of the metropolitan city. Notwithstanding the foregoing, the members of the governing body of the municipal district shall serve the remainder of the term of office for which they were elected or appointed, subject to any right of resignation, and receive compensation therefor in the performance of such duties as directed by the governing body of the St. Louis Municipal Corporation.

(3)(a) As provided in this section for a municipal district, the territory of the St. Louis Municipal Corporation shall continue as a taxing subdistrict of the metropolitan city, and the St. Louis Municipal Corporation shall continue as a separate taxing district, provided that it may exercise only such taxing powers of the municipal district authorized for its exercise by ordinance of the metropolitan city, except as otherwise provided in this section for the satisfaction of any outstanding obligation.

(b) Unless otherwise provided by ordinance of the metropolitan city, the metropolitan city shall distribute funds to the St. Louis Municipal Corporation in the manner and for the purposes provided in this section with respect to a municipal district and may levy or impose a tax, license, fee, or special assessment solely within the territory of the St. Louis Municipal Corporation in the manner and for the purposes provided in this section with respect to a tax, license, fee, or special assessment of the metropolitan city levied or imposed solely within the territory of a municipal district.

(c) Unless otherwise provided by ordinance of the metropolitan city, the St. Louis Municipal Corporation shall be deemed a municipal district for purposes of determining the right to receive, and for the calculation and receipt of, distributions, allocations, remittances, and reimbursements of any kind from the state or United States government, or from any other agency, public or private.

5. Finances.

(1)(a) General district services and the satisfaction of outstanding obligations of any kind of the metropolitan city shall be financed with funds generated throughout the territory of the metropolitan city, including within the territory of any municipal district thereof, or otherwise secured by the metropolitan city. Municipal district services provided or secured by a municipal district within its territory and the satisfaction of outstanding obligations of any kind of a municipal district shall be financed with funds generated within the territory of the municipal district, or otherwise secured by the municipal district.

(b) Notwithstanding any provision of law or this constitution, the metropolitan city shall be empowered to take any and all actions necessary and proper to ensure the satisfaction of outstanding obligations incurred prior to the effective date of this section and to prevent any impairment thereof.

(2)(a) Except as otherwise provided in this section, the tax structure, tax rates, and level of services in effect immediately prior to the effective date of this section shall remain in effect until modified by the metropolitan city. Notwithstanding any provision of law or this constitution, in order to maintain the tax structure, tax rates, and level of services, all taxes, licenses, fees, and special assessments levied or imposed by the county of St. Louis or by a municipality shall continue as a tax, license, fee, or special assessment of the metropolitan city with respect to the territory to which the same applied immediately prior to the effective date of this section, until modified by the metropolitan city, but shall remain subject to any duty or requirement regarding the use of funds generated thereby and shall remain subject to any requirement imposed by law for voter approval of the continued levy or imposition of any such tax initially levied or imposed prior to the effective date of this section. Notwithstanding any provision of law or this constitution, the continuation of any such taxes, licenses, fees, and special assessments shall not be deemed an action by a political subdivision in levying, increasing, or broadening the base of an existing tax, license, or fee.

(b)(i) The metropolitan city shall distribute to the municipal district funds generated by any tax, license, fee, or special assessment of the metropolitan city initially levied by the municipality as required for the satisfaction of any outstanding obligation. If any outstanding obligation is subject to the appropriation of funds therefor, the governing body of the municipal district shall determine whether and to what extent funds shall be appropriated therefor.

(ii) Except as otherwise provided in this section, the metropolitan city shall distribute any remaining funds generated by any property tax or special assessment of the metropolitan city initially levied by the municipality to the municipal district for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(iii) Except as otherwise provided in this section, the metropolitan city shall, from any remaining funds generated by any sales or use tax of the metropolitan city initially levied or imposed by the municipality, distribute to the municipal district funds necessary for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(3) Each municipal district shall constitute a taxing subdistrict of the metropolitan city. Notwithstanding any provision of law or this constitution: (i) taxes, licenses, fees, or special assessments of the metropolitan city levied or imposed solely within the territory of a municipal district may be different than taxes, licenses, fees, or special assessments of the metropolitan city levied or imposed generally throughout its territory; (ii) the metropolitan city may levy or impose a tax, license, fee, or special assessment solely within the territory of a municipal district in order to ensure the satisfaction of any outstanding obligation, including, without limitation, financing obligations, incurred by the municipality prior to the effective date of this section; and (iii) the metropolitan city may levy or impose a tax, license, fee, or special assessment solely within the territory of a municipal district to provide or secure the provision of, or to increase the level of, any services provided or secured within the territory of the municipal district. Any such tax levied or imposed shall be subject to voter approval to the extent required by this constitution for the municipality, and the metropolitan city may issue financing obligations for the purposes provided herein, subject to the requirements of this constitution for voter approval thereof.

(4)(a) In addition to constituting a taxing subdistrict of the metropolitan city, each municipal district shall be a separate taxing district, with the taxing powers specified in this section and as may be provided by law. A municipal district may, in the manner and to the extent heretofore authorized for the municipality, exercise the following taxing powers for providing or securing the provision of municipal district services and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district: (i) continue to levy a property tax or special assessment previously levied by the municipality, or levy a property tax or special assessment, which new levy may be in addition to any such property tax or special assessment of the metropolitan city; and (ii) continue to levy a tax upon utilities previously levied by the municipality, or levy a tax upon utilities within the municipal district, which shall be in the place of any such tax upon utilities the metropolitan city is authorized to levy within the territory of the municipal district. The governing body of the municipal district shall set the rate of any property tax or special assessment levied by the municipal district in the manner provided by law and this constitution for the municipality.

(b) A municipal district may, in the manner and to the extent authorized for the municipality and as may be provided by law, charter, or ordinance of the metropolitan city, continue to impose and collect licenses and fees previously imposed and collected by the municipality, or impose and collect licenses and fees for providing or securing the provision of municipal district services, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district.

(c) A municipal district may issue financing obligations for the foregoing purposes in the manner provided by law and this constitution for the municipality.

(d) The fiscal year of each municipal district shall be the same as the fiscal year for the metropolitan city. The governing body of a municipal district shall administer the revenues generated from taxes, licenses, fees, and special assessments, along with any funds otherwise secured by the municipal district in a manner consistent with that provided for the municipality and as may be provided by law, charter, or ordinance of the metropolitan city, pursuant to an annual budget adopted by the governing body, beginning with an annual budget for the fiscal year beginning January 1, 2023.

(e) Except as otherwise provided by law, charter, or ordinance of the metropolitan city, not later than ninety days prior to the first day of each fiscal year, beginning with the fiscal year beginning January 1, 2023, the governing body of a municipal district shall submit to the metropolitan city a true and accurate estimate of: (i) all outstanding obligations of any kind, including, without limitation, the principal, interest, and other amounts required to be paid on any financing obligations for the ensuing fiscal year; (ii) the expenditures necessary to provide or secure the provision of services for the ensuing fiscal year; and (iii) the funds, revenues, taxes, licenses, fees, and special assessments for such purposes for the ensuing fiscal year. Except as otherwise provided in this section with respect to the transition period and as may be otherwise provided by law, charter, or ordinance of the metropolitan city following the effective date of this section, the metropolitan city shall make distributions pursuant to this section in accordance with the estimate so certified by the municipal district.

(5)(a) The metropolitan city shall be entitled to receive all funds from the state or United States government, or from any other agency, public or private, to the extent and in the manner in which any county or city of the state is, or may in the future be, entitled to receive such funds. The metropolitan city shall be deemed both a city and a county for determining the right to receive funds from the state or United States government, or from any other agency, public or private.

(b) A municipal district shall be entitled to receive all funds from the state or United States government, or from any other agency, public or private, that are in furtherance of any power conferred upon a municipal district. A municipal district shall be deemed a political subdivision of the state and a municipal corporation for the purpose of determining the right to receive funds from the state or United States government, or from any other agency, public or private.

(c) Notwithstanding any provision of law or this constitution, all apportionments, distributions, allocations, remittances, and reimbursements of any kind from the state or United States government, or from any other agency, public or private, to counties, cities, towns, or villages that the county of St. Louis or any municipality was eligible to receive immediately prior to the effective date of this section, including, without limitation, the proceeds of taxes, licenses, and fees apportioned and distributed pursuant to this constitution or law, shall be calculated in the same manner as if the reorganization pursuant to this section had not occurred, but any such apportionments, distributions, allocations, remittances, and reimbursements shall be made to the metropolitan city, which shall distribute to the municipal district such portion thereof required for the satisfaction of any outstanding obligation, or necessary for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district.

(6)(a) Notwithstanding any provision of law or this constitution, except as otherwise provided in this section, the budget of the metropolitan city and the municipal districts thereof for each year of the transition period shall be the combined adopted budgets for the county of St. Louis and for each municipality covering the twelve-month period beginning January 1, 2019, along with any supplemental or emergency appropriations, and any additional appropriations necessary for the satisfaction of any obligations of the county of St. Louis or any municipality adopted during the twelve-month period beginning January 1, 2020. Such budget shall be the complete financial plan for the metropolitan city and the municipal districts thereof for each year of the transition period. The amounts appropriated therein shall be deemed effective for each

year of the transition period, and the taxes, licenses, fees, and special assessments levied and imposed in support thereof are hereby levied and imposed at the rates provided therein for each year of the transition period in order to create and provide new revenues in support of such appropriations. Notwithstanding any provision of law or this constitution, no adjustment to the rate of any levy therein shall be required during the transition period.

(b) The mayor and transition mayor shall jointly administer the budget for each year of the transition period. The mayor and transition mayor may jointly control the rate at which any appropriation is expended by allotment, may jointly reduce expenditures below appropriations, and may jointly transfer appropriations to ensure the proper and efficient administration of the metropolitan city and the municipal districts thereof during the transition period, provided that the mayor and transition mayor shall not reduce any appropriation for the payment of principal and interest on financing obligations. Notwithstanding any provision of law or this constitution, if jointly recommended by the mayor and transition mayor, the county council of the county of St. Louis and the governing body of the municipal district located within the territory heretofore in the city of St. Louis shall by ordinance make supplemental or emergency appropriations from available funds, and such ordinances shall be deemed on behalf of the metropolitan city upon their adoption by both such bodies and the joint approval thereof by the mayor and transition mayor.

(c) During the transition period, the metropolitan city shall distribute, to the municipal district, funds generated from any tax, license, fee, or special assessment of the metropolitan city initially levied by the municipality: (i) as required for the satisfaction of any outstanding obligation of the municipal district, including, without limitation, financing obligations of the municipality; (ii) as necessary for providing or securing the provision of municipal district services within its territory; and (iii) as necessary for providing or securing the provision of a general district service until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(7)(a) Not later than November 15, 2022, the mayor and transition mayor shall jointly recommend and publish a balanced budget for the metropolitan city, which shall provide a complete financial plan for the metropolitan city for the ensuing fiscal year and shall include proposed tax rates, all estimated income and revenue, all proposed expenditures, and such other matters as may be necessary or advisable.

(b) The metropolitan city shall set the rate of any property tax or special assessment of the metropolitan city, including any property tax or special assessment of the metropolitan city levied solely within the territory of a municipal district, in the manner provided in this constitution and by law, except that the rate of the property tax levy for general county purposes levied solely within the territory heretofore in the county of St. Louis shall be reduced, for each subclass of real property and for personal property, to yield revenues no greater than half of the amount of revenues generated by such levy during the prior fiscal year.

(c) On or after January 1, 2023, the budget may be adopted in the manner provided by charter and ordinance, except as otherwise provided in this section. The amounts appropriated and the taxes, licenses, fees, and special assessments levied or imposed in support thereof for the current fiscal year shall be deemed appropriated and levied or imposed for the ensuing fiscal year on a month-to-month basis, with all items prorated accordingly, until such time as the metropolitan council does adopt the budget. The mayor may object to one or more items or portions of items of appropriation, other than an appropriation for the payment of principal and

interest on financing obligations, in any ordinance presented, and such items or portions of items shall not take effect unless separately reconsidered and adopted by the metropolitan council with two-thirds of all members voting in the affirmative, the objections of the mayor notwithstanding.

(d) Following adoption of the annual budget, the mayor may control the rate at which any appropriation is expended by allotment, may reduce expenditures below appropriations whenever the actual revenues are less than the revenues upon which the appropriations were based, and may transfer appropriations to ensure the proper and efficient administration of the metropolitan city, provided that the mayor shall not reduce any appropriation for the payment of principal and interest on financing obligations. If recommended by the mayor, the metropolitan council may by ordinance make supplemental or emergency appropriations from available funds during the fiscal year.

(8)(a) Not later than sixty days prior to each fiscal year, beginning with the fiscal year beginning January 1, 2024, the mayor shall recommend to the metropolitan council a balanced budget, which shall provide a complete financial plan for the metropolitan city for the ensuing fiscal year and shall include proposed tax rates, all estimated income and revenue, all proposed expenditures, and such other matters as may be necessary or advisable.

(b) The metropolitan city shall annually set the rate of any property tax or special assessment of the metropolitan city, including any property tax or special assessment of the metropolitan city levied solely within the territory of a municipal district, in the manner provided in this constitution and by law, except that the property tax levy of the metropolitan city for general county purposes levied solely within the territory heretofore in the county of St. Louis shall be levied throughout the territory of the metropolitan city, for each subclass of real property and for personal property, and shall be in place of the corresponding property tax levy of the metropolitan city for general county purposes levied solely within the territory heretofore in the city of St. Louis.

(c) The budget may be adopted in the manner provided by charter and ordinance, except as otherwise provided in this section. The amounts appropriated and the taxes, licenses, fees, and special assessments levied or imposed in support thereof for the current fiscal year shall be deemed appropriated and levied or imposed for the ensuing fiscal year on a month-to-month basis, with all items prorated accordingly, until such time as the metropolitan council does adopt the budget. The mayor may object to one or more items or portions of items of appropriation, other than an appropriation for the payment of principal and interest on financing obligations, in any ordinance presented, and such items or portions of items shall not take effect unless separately reconsidered and adopted by the metropolitan council with two-thirds of all members voting in the affirmative, the objections of the mayor notwithstanding.

(d) Following adoption of the annual budget, the mayor may control the rate at which any appropriation is expended by allotment, may reduce expenditures below appropriations whenever the actual revenues are less than the revenues upon which the appropriations were based, and may transfer appropriations within any department of the budget to ensure the proper and efficient administration of the metropolitan city, provided that the mayor shall not reduce any appropriation for the payment of principal and interest on financing obligations. If recommended by the mayor, the metropolitan council may by ordinance make supplemental or emergency appropriations from available funds during the fiscal year.

6. The St. Louis Fire Protection District.

(1)(a) Notwithstanding any provision of law or this constitution, on January 1, 2023, there is hereby established a fire protection district, coextensive with the boundaries of the

territory heretofore in the city of St. Louis, to exercise the powers, privileges, duties, and functions now vested or in the future granted to a fire protection district pursuant to chapter 321 of the revised statutes of Missouri, with its name "The St. Louis Fire Protection District." Such fire protection district shall be a political subdivision, municipal corporation, and a body corporate and politic, providing fire protection, emergency medical, and related services authorized by law for a fire protection district.

(b) The fire protection district shall be governed by a board of directors with the powers, privileges, duties, and functions now or in the future granted by law to such boards. The initial board shall be comprised of five qualified voters appointed by the transition mayor, with three directors appointed for terms of three years and two appointed for terms of two years. Thereafter, members shall be elected to terms as provided by law for a fire protection district and serve until successors are duly elected and qualified in the manner provided by law for a fire protection district.

(c) Except as otherwise provided in this section, any property, contracts, records, and personnel related to the provision of fire protection, emergency medical, and related services within the territory heretofore in the city of St. Louis shall be transferred to the fire protection district. Any employee so transferred who has completed the training and instruction requirements applicable within the territory of the city of St. Louis shall be deemed as having completed the training and instruction requirements applicable to the territory of the metropolitan city.

(2)(a) For the fiscal year beginning January 1, 2023, the board shall certify to the metropolitan city the amount necessary to be raised by taxation and, with other revenues, to support the fire protection district, and shall certify the rate of levy which, when levied upon taxable property within the district as shown by the last completed assessment, shall raise the amount of revenues necessary to be raised by taxation. During the fiscal year beginning January 1, 2023, the metropolitan city shall distribute to the fire protection district, from funds generated solely within the territory heretofore in the city of St. Louis, the amount of revenues necessary to be raised by taxation so certified by the board. In addition to such distribution, during such fiscal year, the metropolitan city may, by ordinance, make appropriations to the fire protection district from funds generated solely within the territory heretofore in the city of St. Louis.

(b) Notwithstanding any provision of law or this constitution, effective for the fiscal year beginning January 1, 2024, the board is hereby authorized to levy, on all taxable property within the territory of the district, a tax sufficient to produce from all taxable property, exclusive of new construction and improvements, substantially the same amount of revenue certified by the board as necessary to be raised by taxation for the prior fiscal year, subject to voter approval as required by this constitution. Upon such levy, the metropolitan city shall adjust the rates of taxes, licenses, and fees levied or imposed by the metropolitan city within the fire protection district, other than a tax, license, or fee levied for the satisfaction of any outstanding financing obligation, so to reduce the revenues generated overall thereby by substantially the same amount of revenues generated by the levy of the fire protection district.

(c) For each year beginning on or after January 1, 2025, the board shall determine the amount necessary to be raised by taxation and, with other revenues, to support the fire protection district, and shall set the rate of tax on all taxable property within the territory of the district to raise the amount required, in the manner provided by law and this constitution for a fire protection district. The board may fix an additional rate and may levy an additional tax for the purposes and in the manner authorized by law for a fire protection district.

(d) Until such time as the board has levied a tax authorized herein, the metropolitan city shall distribute funds annually to the fire protection district in the manner provided herein for the fiscal year beginning January 1, 2023.

(3) The fire protection district may assume any outstanding obligations related to the services to be provided by the district within the territory heretofore in the city of St. Louis, including, without limitation, the payment of principal and interest on financing obligations, and any obligations related to employee benefits, including, without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries, provided that no such assumption shall impair any obligation of contract. The board shall make provision for the payment of principal, interest, and other amounts required to be paid on any outstanding financing obligation so assumed by levy of a sufficient tax within the district in the manner authorized by law for a fire protection district.

7. Elections.

(1)(a) Following the effective date of this section, the general assembly shall provide by law for a board of election commissioners or other election authority to perform such duties and possess such powers as provided by law with respect to the conduct of elections within the metropolitan city. Until such time as the general assembly has provided for a board of election commissioners or other election authority, the respective boards of election commissioners shall cooperate in the performance of the duties provided by law for a board of election commissioners in the conduct of elections within the metropolitan city.

(b) Following the effective date of this section, the general assembly shall provide for party committees of the metropolitan city organized in the manner and to perform such duties provided by law for county party committees. Until such time as the general assembly has provided for such party committees, the respective party committees shall cooperate in the performance of duties provided by law for county party committees.

(2)(a) Notwithstanding any provision of law or this constitution, during the transition period, neither the metropolitan city nor any municipal district thereof shall have the power to submit any question to voters with respect to the continued levy or imposition of any tax initially levied or imposed by a municipality prior to the effective date of this section. Upon the failure to submit any question to voters with respect to the continued imposition or levy of any tax on earnings, such tax shall be reduced in the manner provided by law, and any tax on payroll expense initially levied or imposed by a municipality prior to the effective date of this section shall be reduced by one-twentieth of one percent annually until such tax is eliminated. Notwithstanding any provision of law or this constitution and notwithstanding any reduction of such levies, the St. Louis Municipal Corporation shall satisfy any outstanding financing obligations from available revenues, and the metropolitan city shall distribute to the St. Louis Municipal Corporation, from revenues generated within the territory of the St. Louis Municipal Corporation, such revenues as may be required for the satisfaction of any such outstanding financing obligation.

(b) Notwithstanding any provision of law or this constitution, in the event of the death, resignation, or inability to serve of both persons designated by this section to serve in the offices of mayor and transition mayor prior to the effective date of this section, the prosecuting attorney of the metropolitan city and the assessor of the metropolitan city shall jointly possess and exercise the powers and duties of the office of mayor and transition mayor, and shall jointly act as the chief executive officer of the metropolitan city until such time as a mayor is elected by the qualified voters of the metropolitan city at the general municipal election in 2021 and has

assumed office ten days thereafter. Notwithstanding any provision of this section, the mayor so elected shall constitute the chief executive officer of the metropolitan city and shall exercise and perform any power, duty, or function otherwise to be jointly exercised by the mayor and the transition mayor during the transition period and shall exercise and perform any power, duty, or function of mayor until January 1, 2025, when a successor elected at the general election in November 2024 is duly serving. Except for the election of the mayor as provided in this paragraph, during the transition period, neither the metropolitan city nor any municipal district thereof shall have the power to call an election or to submit any question to voters with respect to any other office of the metropolitan city or of any municipal district.

(c) Nothing herein shall be construed to prevent a special district from submitting any question to voters, and the costs of submitting such shall be borne according to law, unless otherwise provided by ordinance of the metropolitan city.

8. Judicial Circuit Boundaries.

(1) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the judicial conference of the state of Missouri, as established by law, is hereby authorized to submit a circuit realignment plan, in the manner provided by section 478.073 of the revised statutes of Missouri, for the alteration of the geographical boundaries of the judicial circuits to create a single judicial circuit for the metropolitan city, provided that no judge shall be removed from office during his or her term by reason of any alteration of the geographical boundaries of any judicial circuit. Such plan shall become effective January first of the year following the session of the general assembly to which it is submitted, unless a bill providing such is presented to the governor and is duly enacted. Nothing herein shall be construed to prohibit the general assembly from providing by law for the alteration of the geographical boundaries of the judicial circuits as authorized by this constitution.

(2) Notwithstanding any provision of law or this constitution, the judges of the circuit courts for the city of St. Louis and for the county of St. Louis shall continue as judges of any judicial circuit for the metropolitan city, and the number of judges for any such circuit shall be the number authorized by law for both circuits as of the effective date of this section, unless subsequently modified in the manner provided by law.

(3) Whenever a vacancy shall occur in the office of circuit judge or associate circuit judge of a circuit court within the metropolitan city, the vacancy shall be filled in the manner provided by article V, sections 25(a)-(g) of this constitution.

9. Special Districts.

(1)(a) Notwithstanding any provision of law or this constitution, upon the effective date of this section, all special districts and any provisions of this constitution or the laws of this state pertaining thereto, shall continue unaffected, and all special districts shall continue to exercise all powers, privileges, duties, and functions authorized as of the effective date of this section, except that any power to appoint, nominate, or recommend an appointment to the governing body of a special district possessed by any official of the county of St. Louis or of a municipality immediately prior to the effective date of this section shall be exercised by the mayor, and any other power related to a special district possessed by the county of St. Louis or by a municipality immediately prior to the effective date of this section shall be exercised by the metropolitan city, unless otherwise provided by law or pursuant thereto following the effective date of this section.

(b) Nothing herein shall be construed to prohibit the general assembly from providing by law for the consolidation of special districts made duplicative by the adoption of this section, provided that no such consolidation shall impair any obligation of contract.

10. School Districts and Fire Protection Districts.

(1) Notwithstanding any provision of law or this constitution, nothing herein shall be construed as affecting any school district or school, or any provisions of this constitution or the laws of this state pertaining thereto, and such laws and constitutional provisions shall continue in operation with respect to such school district or school, as if the reorganization adopted pursuant to this section had not occurred, including, without limitation, any law that constitutes the territorial boundaries of any school district based on the territorial boundaries of any municipality.

(2) Notwithstanding any provision of law or this constitution, nothing herein shall be construed as affecting any fire protection district located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section, or any provisions of this constitution or the laws of this state pertaining thereto, and such laws and constitutional provisions shall continue in operation with respect to such fire protection district, as if the reorganization adopted pursuant to this section had not occurred.

11. General Provisions.

(1)(a) Nothing in this section shall be construed to impair any obligation of contract, and the provisions of this section shall be administered so as to preserve and protect any vested rights therein. Any conflict in the provisions of contracts, bonds, franchises, deeds, obligations, and instruments shall be resolved in a manner that shall protect and preserve any vested rights and shall not impair the rights of any parties thereto.

(b) No action shall be taken to impair any contract with or any claim in favor of or against the county of St. Louis or any municipality in existence immediately prior to the effective date of this section or to impair or affect the validity of any outstanding obligation of any kind incurred prior to the effective date of this section.

(c) All actions, causes of action, rights, duties, titles, claims, debts, judgments, recognizances, fines, penalties, forfeitures, and obligations of any kind in favor of or against the county of St. Louis or any municipality as of the effective date of this section shall continue in full force and effect in favor of or against the metropolitan city or a municipal district, as the case may be.

(d) Except as otherwise provided in this section, all matters pending before or under consideration by the county of St. Louis or any municipality immediately prior to the effective date of this section may be acted upon and disposed of as if originated, initiated, or introduced with the metropolitan city or a municipal district, as the case may be.

(e) Notwithstanding any provision of law or this constitution, if the requisite vote of the electors of the county of St. Louis or of any municipality shall have occurred with respect to the issuance of financing obligations prior to the effective date of this section, the metropolitan city or a municipal district, as the case may be, shall have the right to take any and all steps necessary to issue the same, with the same effect as if such actions had been taken by the metropolitan city or a municipal district and as if the vote had been of the requisite vote of the electors of the metropolitan city or the municipal district, as the case may be.

(2)(a) Any employee transferred to the metropolitan city pursuant to this section shall be entitled to continue in service with the metropolitan city, with seniority, rank, compensation, and accrued benefits intact, until otherwise provided by ordinance or order of the metropolitan city. Any rights, protections, and privileges attributed to any such employee by a civil service or similar system shall continue unimpaired with respect to any such employee in a corresponding civil service or similar system of the metropolitan city. Notwithstanding any other provision of

this subsection or law, any employee transferred to the metropolitan city pursuant to this section who was serving as chief, director, commissioner, or similar rank or position as the head of a department or office of a municipality, or any employee who was serving as assistant chief, deputy director, or similar rank or position immediately subordinate to the head of such department or office, shall be entitled to continue in service with the metropolitan city as provided in this subsection, but shall not be entitled to the rank or position as the head of a department or office of the metropolitan city or the immediate subordinate to the head of a department or office of the metropolitan city.

(b) Any employee transferred to the St. Louis Fire Protection District pursuant to this section shall be entitled to continue in service with the St. Louis Fire Protection District, with seniority, rank, compensation, and accrued benefits intact, until otherwise provided by the St. Louis Fire Protection District. Any rights, protections, and privileges attributed to any such employee by a civil service or similar system shall continue unimpaired with respect to any such employee in a corresponding civil service or similar system of the St. Louis Fire Protection District.

(c) Unless otherwise provided by ordinance of the metropolitan city following the transition period, any employee of the metropolitan city previously employed by the county of St. Louis or any municipality, other than the city of St. Louis, who is not a resident of the territory heretofore within the city of St. Louis and who became an employee of the metropolitan city as a result of the adoption of this section, shall be entitled to receive annually from the metropolitan city a refundable tax credit in an amount equal to the amount of taxation collected by the metropolitan city upon the earnings of such employee.

(3)(a) All collective bargaining agreements under negotiation or in existence with the county of St. Louis or any municipality immediately prior to the effective date of this section shall, if being negotiated, continue to be negotiated and, if in existence, continue in effect until the expiration of the terms of such agreements, at which time new agreements shall be negotiated with the metropolitan city, municipal district, or the St. Louis Fire Protection District, as the case may be; provided that, upon the metropolitan city assuming the provision of a general district service, the metropolitan city shall be the sole successor to any existing collective bargaining agreement in effect immediately prior to the effective date of this section between a recognized or certified majority collective bargaining representative and the county of St. Louis or the city of St. Louis related to such general district service. The metropolitan city shall continue to recognize and bargain in good faith with such collective bargaining representatives and shall abide by the terms of any collective bargaining agreement then in effect.

(b) Should the adoption of this section result in the merger of one or more collective bargaining units with another such unit represented by recognized or certified collective bargaining representatives, any disputes concerning such merger with respect to collective bargaining agreements with the city of St. Louis or the county of St. Louis relating to the provision of a general district service assumed by the metropolitan city, including the status of a representative or conflicts between agreements, that cannot be resolved through negotiations shall be submitted to interest arbitration, which shall bind all required parties and which shall be conducted by an experienced labor interest arbitrator mutually selected by the metropolitan city and the affected collective bargaining representatives.

(c) Nothing herein shall be construed to affect, limit, or impair the rights of employees to organize and bargain collectively as provided in article I, section 29 of this constitution, and the provisions of this section shall be construed in harmony therewith.

(4)(a) Nothing herein shall deprive any person of any vested, non-forfeitable, and contractual right or privilege to retire or to retirement or pension benefits, including, without limitation, disability and death benefits, if any, earned prior to the effective date of this section. All vested, non-forfeitable, and contractual rights, protections, and privileges of employees, eligible dependents, and beneficiaries in any retirement fund or pension system related to the county of St. Louis or a municipality as of the effective date of this section shall continue unimpaired until all benefits due such employees, eligible dependents, and beneficiaries have been paid.

(b) Employee members of a retirement fund or pension system who are transferred to the metropolitan city or to the St. Louis Fire Protection District pursuant to this section shall remain members of and continue to earn service credit toward the benefits of such retirement fund or pension system, including, without limitation, disability and death benefits, during their employment with the metropolitan city. The metropolitan city or the St. Louis Fire Protection District, as the case may be, shall contribute proportionately to any such retirement fund or pension system for each such employee member with respect to their employment with the metropolitan city or the St. Louis Fire Protection District as required by law or ordinance, but any contribution or portion thereof attributed to benefits accrued prior to the transfer of such employee to the metropolitan city or to the St. Louis Fire Protection District shall remain an outstanding obligation satisfied solely from funds generated within the territory in which such obligation was incurred as provided in this section, provided that the St. Louis Fire Protection District may assume any such obligation for employees transferred to the district as provided in this section. The metropolitan city, municipal districts, and the St. Louis Municipal Corporation may purchase from an insurance company in accordance with federal fiduciary standards under the Employment Retirement Income Security Act of 1974 or its successor laws, annuities to provide for such retirement or pension benefits as necessary.

(c) Notwithstanding any provision of law or this constitution, the members of the board of trustees or similar governing body for any retirement fund or pension system created prior to the effective date of this section shall continue to hold office until a successor is appointed and serving. The successor for such members who are office holders of a municipality shall be the assessor of the metropolitan city, and the successor for such members who were required to be appointed by any official of a municipality prior to the effective date of this section shall be appointed by the mayor.

(d) Nothing herein shall be construed to prohibit the general assembly from providing by law for the modification of any pension or retirement system created by state law or to prohibit the metropolitan city from providing by charter or ordinance for the modification of any pension or retirement system created by charter or ordinance of a municipality or the county of St. Louis prior to the effective date of this section.

(5) Notwithstanding any provision of law or this constitution, a geographic designation in law or this constitution based upon the territorial boundaries of the county of St. Louis or of any municipality may continue to be construed as the territorial boundaries of the county of St. Louis or the municipality, as the case may be, as such boundaries existed immediately prior to the effective date of this section.

(6) Notwithstanding any provision of law or this constitution, any city, town, or village located partially but not wholly within the territory of the metropolitan city shall remain unaffected by this section, except that its territory located within the metropolitan city shall be detached and annexed to the metropolitan city upon the effective date of this section. The

metropolitan city shall distribute annually to such city, town, or village, funds in an amount equal to the revenues generated within the former territory of such city, town, or village and that would have otherwise been received if the reorganization adopted pursuant to this section had not occurred, until otherwise provided by law. Notwithstanding any provision of law or this constitution, any municipal district with territory outside of the metropolitan city may continue providing or securing the provision of municipal district services within such territory, and the metropolitan city may provide or secure the provision of general district services within such territory, until otherwise provided by law.

(7) Notwithstanding any provision of this section, any charter provision in effect immediately prior to the effective date of this section requiring a public vote related to the sale, lease, or disposition of any real estate designated as a public park shall continue to apply to the territory to which it applied immediately prior to the effective date of this section, until amended in the manner provided in this section for amending the charter of the metropolitan city.

(8) The general assembly may enact such laws as may be necessary and proper to aid in effectuating this section and may regulate the metropolitan city to the same extent and in the same manner as a constitutional charter county or a constitutional charter city.

12. Severability.

(1) The provisions of this section are severable, and if any portion, subsection, sentence, clause, or phrase of this section, or an application thereof to any person or circumstance, is held to be invalid, the remaining portions, subsections, sentences, clauses and phrases, and the application of the section and its provisions to other persons and circumstances, shall not be affected, but shall remain in full force and effect.

[Section 30(a). The people of the city of St. Louis and the people of the county of St. Louis shall have power (1) to consolidate the territories and governments of the city and county into one political subdivision under the municipal government of the city of St. Louis; or, (2) to extend the territorial boundaries of the county so as to embrace the territory within the city and to reorganize and consolidate the county governments of the city and county, and adjust their relations as thus united, and thereafter the city may extend its limits in the manner provided by law for other cities; or, (3) to enlarge the present or future limits of the city by annexing thereto part of the territory of the county, and to confer upon the city exclusive jurisdiction of the territory so annexed to the city; or, (4) to establish a metropolitan district or districts for the functional administration of services common to the area included therein; or, (5) to formulate and adopt any other plan for the partial or complete government of all or any part of the city and the county. The power so given shall be exercised by the vote of the people of the city and county upon a plan prepared by a board of freeholders consisting of nineteen members, nine of whom shall be electors of the city and nine electors of the county and one an elector of some other county. Upon the filing with the officials in general charge of elections in the city of a petition proposing the exercise of the powers hereby granted, signed by registered voters of the city in such number as shall equal three percent of the total vote cast in the city at the last general election for governor, and the certification thereof by the election officials to the mayor, and to the governor, then, within ten days after the certification the mayor shall, with the approval of a majority of the board of aldermen, appoint the city's nine members of the board, not more than five of whom shall be members of or affiliated with the same political party. Each member so appointed shall be given a certificate certifying his appointment signed by the mayor and attested by the seal of the city. Upon the filing with the officials in general charge of elections in the

county of a similar petition signed by registered voters of the county, in such number as shall equal three percent of the total vote cast in the county at the last general election for governor, and the certification thereof by the county election officials to the county supervisor of the county and to the governor, within ten days after the certification, the county supervisor shall, with the approval of a majority of the county council, appoint the county's nine members of the board, not more than five of whom shall be members of or affiliated with the same political party. Each member so appointed shall be given a certificate of his appointment signed by the county supervisor and attested by the seal of the county.]

[Section 30(b). Upon certification of the filing of such similar petitions by the officials in general charge of elections of the city and the county, the governor shall appoint one member of the board who shall be a resident of the state, but shall not reside in either the city or the county, who shall be given a certificate of his appointment signed by the governor and attested by the seal of the state. The freeholders of the city and county shall fix reasonable compensation and expenses for the freeholder appointed by the governor and the cost shall be paid equally by the city and county. The appointment of the board shall be completed within thirty days after the certification of the filing of the petition, and at ten o'clock on the second Monday after their appointment the members of the board shall meet in the chamber of the board of aldermen in the city hall of the city and shall proceed with the discharge of their duties, and shall meet at such other times and places as shall be agreed upon. On the death, resignation or inability of any member of the board to serve, the appointing authority shall select the successor. The board shall prepare and propose a plan for the execution of the powers herein granted and for the adjustment of all matters and issues arising thereunder. The members of the board shall receive no compensation for their services as members, but the necessary expenses of the board shall be paid one-half by the county and one-half by the city on vouchers signed by the chairman of the board. The plan shall be signed in duplicate by the board or a majority thereof, and one copy shall be returned to the officials having general charge of elections in the city, and the other to such officials in the county, within one year after the appointment of the board. Said election officials shall cause separate elections to be held in the city and county, on the day fixed by the freeholders, at which the plan shall be submitted to the qualified voters of the city and county separately. The elections shall not be less than ninety days after the filing of the plan with said officials, and not on or within seventy days of any state or county primary or general election day in the city or county. The plan shall provide for the assessment and taxation of real estate in accordance with the use to which it is being put at the time of the assessment, whether agricultural, industrial or other use, giving due regard to the other provisions of this constitution. If a majority of the qualified electors of the city voting thereon, and a majority of the qualified electors of the county voting thereon at the separate elections shall vote for the plan, then, at such time as shall be prescribed therein, the same shall become the organic law of the territory therein defined, and shall take the place of and supersede all laws, charter provisions and ordinances inconsistent therewith relating to said territory. If the plan be adopted, copies thereof, certified to by said election officials of the city and county, shall be deposited in the office of the secretary of state and recorded in the office of the recorder of deeds for the city, and in the office of the recorder of deeds of the present county, and the courts of this state shall take judicial notice thereof.]

[Section 31. The city of St. Louis, as now existing, is recognized both as a city and as a county unless otherwise changed in accordance with the provisions of this constitution. As a city it shall

continue for city purposes with its present charter, subject to changes and amendments provided by the constitution or by law, and with the powers, organization, rights and privileges permitted by this constitution or by law. As a county, it shall not be required to adopt a county charter but may, except for the office of circuit attorney, amend or revise its present charter to provide for the number, kinds, manner of selection, terms of office and salaries of its county officers, and for the exercise of all powers and duties of counties and county officers prescribed by the constitution and laws of the state.]

[Section 32(a). The charter of the city of St. Louis now existing, or as hereafter amended or revised, may be amended or revised for city or county purposes from time to time by proposals therefor submitted by the lawmaking body of the city to the qualified voters thereof, at a general or special election held at least sixty days after the publication of such proposals, and accepted by three-fifths of the qualified electors voting for or against each of said amendments or revisions so submitted.]

[Section 32(b). In the event of any amendment or revision of the charter of the city of St. Louis which shall reorganize any county office and/or transfer any or all of the duties, powers and functions of any county officer who is then in office, the officer shall serve out the remainder of his or her term, and the amendment or revision of the charter of the city of St. Louis shall take effect, as to such office, upon the expiration of the term of such office holder. In the event of any amendment or revision of the charter of the city of St. Louis which shall reorganize any county office and/or transfer any or all of the duties, powers and functions of any county officer, all of the staff of such office shall be afforded the opportunity to become employees of the city of St. Louis with their individual seniority and compensation unaffected and on such other comparable terms and conditions as may be fair and equitable.]

[Section 32(c). An amendment or revision adopted pursuant to section 32(a) of this article shall not deprive any person of any right or privilege to retire and to retirement benefits, if any, to which he or she was entitled immediately prior to the effective date of that amendment or revision.]

[Section 33. Copies of any new or revised charter of the city of St. Louis or of any amendments to the present, or to any new or revised charter, with a certificate thereto appended, signed by the chief executive and authenticated by the seal of the city, setting forth the submission to and ratification thereof, by the qualified voters of the city shall be made in duplicate, one of which shall be deposited in the office of the secretary of state, and the other, after being recorded in the office of the recorder of deeds of the city, shall be deposited among the archives of the city, and thereafter all courts of this state shall take judicial notice thereof.]

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-042)

Subject

Initiative petition from Christopher Pieper regarding a proposed constitutional amendment to Article VI. (Received February 13, 2019)

Date

March 5, 2019

Description

This proposal would amend Article VI of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, State Tax Commission, The Metropolitan Police Department - City of St. Louis, St. Louis County Board of Elections, Board of Election Commissioners City of St. Louis, Metropolitan Zoological Park and Museum District, Missouri Municipal League, Municipal League of Metro St. Louis,** the **City of Affton,** the **City of Ballwin,** the **City of**

Bellefontaine Neighbors, the **City of Berkeley,** the **City of Brentwood,** the **City of Bridgeton,** the **City of Chesterfield,** the **City of Clayton,** the **City of Crestwood,** the **City of Creve Coeur,** the **City of Des Peres,** the **City of Eureka,** the **City of Ferguson,** the **City of Florissant,** the **City of Hazelwood,** the **City of Jennings,** the **City of Kirkwood,** the **City of Manchester,** the **City of Maryland Heights,** the **City of Overland,** the **City of Pacific,** the **City of Richmond Heights,** the **City of St. Ann,** the **City of Town and Country,** the **City of University City,** the **City of Webster Groves,** and the **City of Wildwood.**

Matthew A. Jacober, Partner with Lathrop Gage LLP provided information to the State Auditor's office.

Christopher R. Pieper on behalf of Unite STL provided information as a proponent of the proposal to the State Auditor's office.

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated they report no fiscal impact.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact to their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated there is no impact to their department regarding this initiative petition. Their department is deferring to the Office of Administration - Budget and Planning for all the technical issues.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated they do not anticipate a fiscal impact as a result of this petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated they defer to the Department of Revenue for a fiscal impact.

Officials from the **Office of Administration** indicated this proposal amends Article VI of the Missouri Constitution by repealing Sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 and adopting a new Section 30 which would merge St. Louis City and St. Louis County into one Metropolitan City.

Article VI, Section 30.4(3)(b)
This section would allow the metropolitan city to levy a tax, license, fee, or special assessment solely within the St. Louis Municipal Corporation. Budget and Planning (B&P) notes that if a sales tax is levied, General Revenue could be increased through the 1% Department of Revenue collection fee.

Article VI, Section 30.5(2)(a)
This section clarifies that any taxing structure and tax rate in effect immediately prior to the effective date of this section (January 1, 2021) shall remain in effect until modified by the metropolitan city. In addition, all taxes, fees, and special assessments levied or imposed by St. Louis County or a municipality shall continue as a tax, fee, or special assessment. Therefore, B&P estimates that this provision will not impact state or local revenues.

Article VI, Section 30.5(3)
This section would allow the metropolitan city to levy a tax, license, fee, or special assessment solely within the territory of a municipal district upon voter approval. B&P notes that if a sales tax is levied, General Revenue could be increased through the 1% Department of Revenue collection fee.

Article VI, Section 30.5(7)(b)
This section states that the rate of property tax levied for general county purposes within St. Louis County shall be reduced to yield revenues no greater than half of the amount generated during the prior fiscal year. B&P notes that it is unclear whether this reduction would occur once or every year until the property tax in St. Louis County was abolished. B&P further notes that it is unclear in what tax year the reduction would begin. Section 30 would be enacted January 1, 2021; however, Section 30.5(7)(a) references November 15, 2022 and Section 30.5(7)(c) references January 1, 2023. Therefore, B&P cannot determine whether the property tax reduction would begin January 1, 2021, January 1, 2022, or January 1, 2023. B&P notes that abolishing the property tax for St. Louis County could have a significant negative impact on the revenues available for the newly created metropolitan city.

Section 30.5(7)(b) would only impact the property tax rate and not the assessed valuations of property; therefore, B&P estimates that the Blind Pension Trust Fund (which receives $0.03 per $100 of assessed valuation) will not be impacted.

Article VI, Section 30.5(8)(b)
This section would apply the lowered property tax rate (Section 30.5(7)(b)) of St. Louis County to all property located within St. Louis City. B&P notes that the property tax reduction language in Section 30.5(7)(b) is unclear as to how many reductions should occur. If the property tax rate under Section 30.5(7)(b) is to be decreased until no such property tax exists, then the property tax rate under this section will also decrease until no such tax is levied. B&P notes that this could have a significant negative impact on the revenues available for the newly created metropolitan city. B&P further notes that it is unclear in what tax year the new property tax would begin. Section 30 would be enacted January 1, 2021; however, Section 30.5(8)(a) references January 1, 2024. Therefore, B&P cannot determine whether the property tax reduction would begin January 1, 2021, January 1, 2024, or at the same time as the rate reduction in Section 30.5(7)(b).

Section 30.5(8)(b) would only impact the property tax rate and not the assessed valuations of property; therefore, B&P estimates that the Blind Pension Trust Fund (which receives $0.03 per $100 of assessed valuation) will not be impacted.

Article VI, Section 30.6(2)
Beginning January 1, 2023 Section 30.6(2)(a) allows the metropolitan city to levy a property tax to support the newly created fire protection district.

Beginning January 1, 2024 Section 30.6(2)(b) requires the metropolitan city to lower the rates of other taxes, licenses, and fees levied within the fire protection district to offset the

amount of revenue generated from the property tax created in Section 30.6(2)(a). B&P notes that if sales taxes are reduced as part of this adjustment, General Revenue could be reduced through the 1% Department of Revenue collection fee.

This section would allow the metropolitan city to levy an additional tax for the fire protection district. B&P notes that it is unclear as to what additional tax may be levied and whether additional refers only to an extra property tax levy or the use of other types of taxes. B&P notes that depending on the definition of "additional" the metropolitan city could levy a sales tax for the fire protection district. If the metropolitan district chooses to levy a sales tax, B&P notes that General Revenue could be increased through the 1% Department of Revenue collection fee.

Article VI, Section 30.7(2)(a)

This section states that during the transition period, the metropolitan city shall not submit any questions to voters regarding reauthorizations of any tax initially levied prior to January 1, 2021. B&P notes that this section could impact any sales taxes that require reauthorization during the transition period. If such taxes were to expire, this would reduce local revenues. This could reduce General Revenue by $0 to an unknown minimal amount if this provision results in the loss of funds through the Department of Revenue collection fee.

This section also states that upon the failure to submit the reauthorization of any tax on earnings and payroll, the earnings tax shall be reduced in the manner set out in in law and the payroll tax shall be reduced by $1/20^{th}$ of one percent (or 0.05%) annually until such tax is eliminated. Section 92.125, RSMo, states that the earnings tax shall be reduced by 0.1% annually until the tax is eliminated. B&P notes that the St. Louis City earnings and payroll tax is up for reauthorization in April 2021. Therefore, B&P estimates that the St. Louis City earnings and payroll tax would begin phasing out January 1, 2022 and would be completely eliminated beginning January 1, 2031. B&P notes that nothing prohibits the metropolitan city from authorizing a new earnings and payroll tax after the transition period.

Using data published by St. Louis City[1], B&P determined that the average earnings tax collections from 2013-2017 was $169,061,000 and the average payroll tax collections was $37,977,800. Therefore, B&P estimates that this proposal will reduce metropolitan city revenues by $207.0M ($169,061,000 + $37,977,800) once fully implemented in tax year 2031. The following two tables show the impact to metropolitan city revenues as the earnings and payroll taxes are phased out.

[1] https://www.stlouis-mo.gov/government/departments/comptroller/documents/current-comprehensive-annual-financial-report.cfm, FY17 CAFR – Table 9

Table 1: Impact from Earnings
Tax Phase-Out by Tax Year

Tax Year	Tax Rate	Metropolitan City Impact
2021	1.0%	$0
2022	0.9%	($16,906,100)
2023	0.8%	($33,812,200)
2024	0.7%	($50,718,300)
2025	0.6%	($67,624,400)
2026	0.5%	($84,530,500)
2027	0.4%	($101,436,600)
2028	0.3%	($118,342,700)
2029	0.2%	($135,248,800)
2030	0.1%	($152,154,900)
2031	0.0%	($169,061,000)

Table 2: Impact from Payroll Tax
Phase-Out by Tax Year

Tax Year	Tax Rate	Metropolitan City Impact
2021	0.50%	$0
2022	0.45%	($3,797,780)
2023	0.40%	($7,595,560)
2024	0.35%	($11,393,340)
2025	0.30%	($15,191,120)
2026	0.25%	($18,988,900)
2027	0.20%	($22,786,680)
2028	0.15%	($26,584,460)
2029	0.10%	($30,382,240)
2030	0.05%	($34,180,020)
2031	0.00%	($37,977,800)

Further, B&P notes that some taxpayers claim the amount of earnings tax paid to St. Louis City in their itemized deductions. Based on information provided by the Department of Revenue, B&P determined that 29% of Missouri taxpayers itemize their deductions. However, B&P notes that with the federal tax changes fewer taxpayers are likely to file itemized deductions, which may lower the actual amount of General Revenue received. B&P notes that currently the top rate of Missouri income tax is scheduled to decrease from 5.4% to 5.1% over a number of years depending on General Revenue growth. Therefore, B&P will show the range of impact from this section on General Revenue with a top tax rate of 5.4% and a top tax rate of 5.1%. Table 3 shows the revenue impact to the metropolitan city and General Revenue from the phase-out of the earnings tax.

Table 3: General Revenue Impact from Earnings/Payroll Tax Phase-Out

Tax Year	Metropolitan City Impact (Earnings Tax)	State Fiscal Year	GR Impact (top tax rate 5.4%)	GR Impact (top tax rate 5.1%)
2022	($16,906,100)	2022	$0	$0
2023	($33,812,200)	2023	$265,000	$250,000
2024	($50,718,300)	2024	$529,000	$500,000
2025	($67,624,400)	2025	$794,000	$750,000
2026	($84,530,500)	2026	$1,059,000	$1,000,000
2027	($101,436,600)	2027	$1,324,000	$1,250,000
2028	($118,342,700)	2028	$1,588,000	$1,500,000
2029	($135,248,800)	2029	$1,853,000	$1,750,000
2030	($152,154,900)	2030	$2,118,000	$2,000,000
2031	($169,061,000)	2031	$2,383,000	$2,250,000
2032	($169,061,000)	2032	$2,647,000	$2,500,000

B&P estimates that this provision may increase General Revenue by $250,000 to $265,000 in state FY 2023. Once fully implemented in state FY 2032, this provision may increase General Revenue by $2.5M to $2.6M. B&P notes that the delay in the estimated state impact reflects the lag between a tax year and the annual tax return filing period.

Article VI, Section 30.9

This section states that all special districts shall continue unaffected after January 1, 2021; however, the General Assembly has the ability to consolidate any special districts that have been made duplicative by the merger of St. Louis City and St. Louis County. B&P notes that this could include special taxing districts. The consolidation of special taxing districts could impact local revenues if each district to be consolidated levies a different tax rate. In addition, General Revenue could be impacted by $0 to unknown minimal amount if the amount collected through the Department of Revenue collection fee were to change after consolidation.

Article VI, Section 30.11(2)(b)

This section requires the metropolitan city to provide a refundable tax credit in the amount equal to the amount of earnings taxes paid by a metropolitan city employee who became subject to the city's earning tax as a result of this proposal. Such employee shall not be a resident of St. Louis City. B&P is unable to determine the amount of refundable credits that may have to be paid by the metropolitan city as a result of this section. B&P notes that this section will not directly impact General Revenue, as qualifying employees would not have been subject to the earnings tax without this proposal becoming effective.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated the initiative petition proposes a constitutional amendment to Article VI to modify the current provisions of the Missouri Constitution relating to the consolidation of St. Louis City and St. Louis County.

A resulting conciliation would have impacts as set forth below.

The combining of two circuit courts into one court has never been estimated since the creation of JIS (Justice Information System) and Show-Me Courts. There are many unknown and potential unforeseen circumstances. There are issues related to data conversion, system configuration, application limitations, application interfaces and procedure modification that would need to be considered. This will result in a cost range of at least a minimum of $100,000 to unknown.

These costs will be incurred for the conversion of program based reporting, complete set up of the database, consolidation planning, analysis and combination of court forms, reconciliation of accounts, analysis of court specific developed interfaces, conversion of JIS (Justice Information System), Show-Me Courts and many other unforeseen items.

There will be other potential unknown costs however these will not be known until they begin the conversion process.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated no fiscal impact to their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from **St. Louis County** indicated:

FISCAL NOTE RESPONSE: Proposed Constitutional Amendment to Article VI (2020-042) / Initiative Petition 2020-042

Prepared by the Office of the County Executive, St. Louis County

Contact: Jim Benoist – Direct (314) 615-7092 -or- MBenoist@stlouisco.com

FISCAL NOTE RESPONSE: Proposed Constitutional Amendment to Article VI (2020-042) / Initiative Petition 2020-042

Initiative petition 2020-042 would create a new class of government in the State of Missouri, a Metropolitan City, that would encompass the current boundaries of the City of St. Louis and St. Louis County. The new Metropolitan City would replace the current governments of the City of St. Louis and St. Louis County.

As St. Louis County government would be consolidated into the new class of government, initiative petition 2020-042 creates no direct obligation or requirement that would result in a fiscal impact.

However, based upon St. Louis County's knowledge of initiative petition 2020-042, we find financial projections associated with the proposal – in particular, projections pertaining to overall local government savings – to be reasonable and prudent. While detailed financial analysis would be dependent upon future decisions to be made by the new Metropolitan City government, we believe a fair and valid presumption is that economies of scale would be realized through the consolidation of municipal service providers and other municipal government functions.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **City of St. Louis** indicated:

NICOLE GALLOWAY
MISSOURI STATE AUDITOR
State Capitol Room 121
Jefferson City, MO 65101

Initiative Petition: **20-042**

Date: **2/22/2019**
Local Government: **City of St. Louis**

Short Description: **Proposes the merger of the City of St. Louis with St. Louis County and its municipalities.**

Fiscal Impact: **Whereas the City of St. Louis currently operates as a city not within a county, the proposed initiative petition seeks an amendment to the state constitution that would make the City of St. Louis part of a much larger municipal government encompassing St. Louis county and all its municipalities.**

The proposal provides the opportunity for operational savings through significant economies of scale but also eliminates over a ten year period existing major revenue sources in the earnings and payroll tax. A discussion of potential expenditure and revenue considerations of the proposal are discussed below.

Expenditures

Under its current city not within a county status, the City of St. Louis maintains a variety of offices and functions that are typically reserved for county governments. These include court functions, sheriff's office, correctional facilities, assessor, recorder of deeds, board of elections, medical examiner, collector of revenue, license collector and treasurer's offices. The total operating costs of these typical "county" functions totaled nearly $121M in the past fiscal year (FY18). Meanwhile, revenues either generated by these offices or allocated to offset their operating costs for the same period totaled nearly $35M. This left a net annual operating cost of county functions at over $86M . (see attached) While a large portion of these costs are certain to continue regardless of the City's "county" status, the merger into a larger municipal unit of St. Louis County would provide an opportunity to identify potential redundancies and realize economies of scale between the City of St. Louis and St. Louis County operations with the potential for a significant amount of cost savings. Additional economies of scale will also be found within combinations of the more traditional municipal department operations (e.g. Police, Parks, Streets, etc.) The City's existing expenditures related to the Fire Department are to be relegated to a Fire Protection district encompassing the existing boundaries of the City. The funding of this district is to be provided by a property tax levy subject to voter approval. If said levy is approved then other "taxes licenses and fees levied" are to be reduced so as to make this substantially revenue neutral.

Revenues - Earnings & Payroll Tax Elimination

The proposed amendment would preclude the City of St. Louis from seeking continued authorization of the 1% Earnings tax. Typically the next authorization vote would be scheduled in 2021, thus the elimination of the Earnings tax at the rate of 10% per year would begin under this proposal beginning in 2022. It also provides for elimination of the 0.5% City Payroll tax along the same schedule. Combined these two sources of revenue less commissions totaled $211.7M in general revenue in FY18. The loss of revenue would increase in increments over

the next ten years by over $21M per year until the entire amount of revenue is eliminated by 2031. Aside from any benefits from any operational savings described above, revenues from other sources would be necessary to make up this difference. (This does not take into account any additional expenditures related to accelerated payments on previous City debt which while not specified in the amendment has been reported as part of the merger plan.)

Revenues - TIF Considerations

In addition to the revenue amounts discussed above, in FY18 a total of $6.5M in Earnings and Payroll taxes were allocated specifically to TIF and other development agreements. Typically these obligations are to be paid solely from a portion of the economic activity taxes generated by the respective project. The proposed amendment leaves open the issue of how these obligations are to be addressed in light of the proposed changes in tax structure.

Officials from **Wellsville-Middletown R-1 School District** indicated they see no specific fiscal impact of this petition on their school district.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact on their college.

Officials from **Harris-Stowe State University** indicated Harris-Stowe State University traces its origin back to 1857 when it was founded by the St. Louis Public Schools as a normal school and thus became the first public teacher education institution west of the Mississippi River and the 12th such institution in the United States. The earliest predecessor of Harris-Stowe State University was a normal school established for white students only by the Public School System of the city of St. Louis. This school was later named Harris Teachers College in honor of William Torrey Harris who had been a Superintendent of Instruction in the St. Louis Public Schools and also a United States Commissioner of Education.

The College began offering in-service education for St. Louis white teachers as early as 1906. In 1920, Harris Teachers College became a four-year undergraduate institution authorized to grant a Bachelor of Arts in Education Degree.

A second predecessor institution was Stowe Teachers College, which began in 1890 as a normal school for future black teachers of elementary schools in the city of St. Louis. This normal school was also founded by the St. Louis Public School System and was an extension of Sumner High School. In 1924, the Sumner Normal School became a four-year institution with authority to grant the baccalaureate degree. In 1929, its name was changed to Stowe Teachers College, in honor of the abolitionist and novelist Harriet Beecher Stowe. These two teacher education institutions were merged by the Board of Education of the St. Louis Public Schools in 1954 as the first of several steps to integrate the public schools of St. Louis. The merged institution retained the name Harris Teachers College.

Later, in response to the many requests from alumni of Stowe Teachers College and members of the greater St. Louis community, the Board of Education agreed to restore to the College's name the word "Stowe" and to drop the word "Teachers." In 1979, the General Assembly of the State of Missouri enacted Senate Bill 703 under which Harris-Stowe College became the newest member of the State system of public higher education. The institution's name was again changed by the addition of the word "State" and became officially known as Harris-Stowe State College. In addition to the name change, the College's baccalaureate degree was changed to Bachelor of Science in Education. In compliance with the new state standards and teacher certification requirements, the College's Teacher Education curriculum was modified and three separate Teacher Education majors were approved: Early Childhood Education, Elementary School Education and Middle School/High School Education.

In 1981, the College received state approval for a new degree program — the Bachelor of Science in Urban Education. This program is the only one of its kind at the undergraduate level in the United States and is designed to prepare non-teaching urban education

specialists who will be effective in solving the many urban-related problems facing today's urban schools. In 1993, the State Governor signed into law Senate Bill 153, which authorized the College to expand its mission in order to address unmet needs of metropolitan St. Louis in various applied professional disciplines. In response to that authority, Harris-Stowe developed two new baccalaureate degree programs:

1. Business Administration, with professional options in Accounting, Management Information Systems, General Business and Marketing;

2. Secondary Teacher Education, with subject-matter options in Biology, English, Mathematics and Social Studies.

Finally, on August 25, 2005, by mandate of the State of Missouri, Harris-Stowe State College obtained university status. Today the University hosts collaborative graduate degree programs with Maryville University, the University of Missouri-St. Louis and Webster University. The University continues to expand, adding new campuses and buildings as part of its 21st-century initiative to offer opportunities for both undergraduate and graduate students seeking a variety of degrees.

Thus, from its beginnings as two normal schools in the mid and late 19th century to its present status as a state institution of public higher education, Harris-Stowe State University and its predecessor institutions have always been in the forefront of teacher education. Now, with its mission expanded to include other professional disciplines, the University will provide greatly needed additional opportunities to metropolitan St. Louisians in other important fields of endeavor. The University will continue its quest for excellence in all of its offerings and strive even more to meet the complex and demanding challenge of preparing students for effective roles in this region's various professions.

Because of this history and the historic nature of the proposed merger of the City and County of St. Louis, Harris-Stowe State University fiscal impact will be enhanced. Since the various school districts will not be a part of this merger, their recruiting in the City of St. Louis and St. Louis County school districts will continue uninterrupted. It may even increase since the city and the county will see itself as one region rather than separate entities which is similar to their history.

Officials from the **State Tax Commission** indicated the petition provides the current property tax structure, including levies and distribution, will remain in effect after passage and until such time as the governing authority modifies the provisions. The State Tax Commission has reviewed petition 20-042 and determined no fiscal impact.

Officials from **St. Louis County Board of Elections** indicated they believe under this petition that they would need to purchase new voting equipment and software to cover the city's portion of registered voters. This is an estimated cost of $1-3 million. They estimate that if new equipment for the County's voters would cost roughly $10 million, and the City would add about 30% more voters to the population, the total cost for this new equipment would be anywhere from $1-3 million depending on vendors and bids. This estimate is

based on the fact that the St. Louis County Board of Elections would be the new jurisdiction for City voters.

Officials from **Metropolitan Zoological Park and Museum District** indicated based on the information provided, they do not believe the proposed legislation will financially impact the Zoo Museum District.

Officials from the **Municipal League of Metro St. Louis** indicated:

MUNICIPAL LEAGUE
OF METRO ST. LOUIS

LINKING LOCAL COMMUNITIES
STRENGTHENING LOCAL
GOVERNMENT

February 22, 2019
Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, Missouri 65101

RE: Fiscal Note - Petition approval request from Christopher Pieper regarding a proposed constitutional amendment

The Municipal League of Metro St. Louis represent 85 municipalities including St. Louis City and County. The petition as submitted would negatively impact every municipality. The municipalities, which would become municipal district, would no longer be political subdivision of the state but instead a political subdivision of the new Metro St. Louis. The petition gives the new Metro City complete authority over the municipal districts, taxes, services, and zoning. The petition limits the municipal district sources of revenue to property and utility taxes and requires the municipal districts to increase these taxes to cover the loss in sales tax revenue.

The petition will negatively impact all municipalities in St. Louis County by the taking of local sales tax and all revenues associated municipal operations such as courts, police, business licensing and regulations which by current statutes are remitted to cities in St Louis County. There will also be an uncalculatable loss in real property assessed valuation due to the reduction in level of services; the areas in St. Louis County with the highest assessed valuations are serviced by municipalities at the local level; if this petition is approved, the new Metro St. Louis will receive the services at the current level of St. Louis City and unincorporated St. Louis County which have some of the lowest property values.

While the petition also takes away the authority of the cities and responsibilities associated the costs for courts, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal operations which will require either dissolution or substantial increases in real estate or utility taxes.

While some reduction in service levels and expenses would occur, the cities would be requirement to increase property taxes, gross receipts utility taxes, park & recreation fees and trash service fees to cover the cost of operation that were previously covered by general revenue funds generated by sales tax.

Pat Kelly
Executive Director

1034 S. Brentwood Blvd., Suite 410 • Richmond Heights, MO 63117
Phone: (314) 726-4747 • Fax: (314) 726-1520 • www.stlmuni.org • staff@stlmuni.org

Officials from the **City of Ballwin** indicated it is estimated that this measure would reduce the revenues for their city by $13,528,000. It is estimated to reduce expenses by $11,842,000. These figures are based on their 2019 budget. Because the reduction of revenues is greater than the reduction of costs, services beyond those outlined in the petition would have to be cut or new revenue sources would need to be added.

Under initiative petition 20-042, they anticipate a reduction in revenues of $13,528,000:

Sales taxes $9,626,000
Other intergovernmental taxes $1,917,000
Licenses and permits $1,070,200
Court fines $600,000
Police and communications $219,000
False alarm fines $6,800
Grants $36,000
Miscellaneous $53,000

They anticipate a reduction in costs of $11,842,000:

Police $6,514,000
Public Works personnel $1,561,000
operating expenses $1,954,000
Administration court $170,000
other personnel $924,000
operating expenses $719,000

Without additional revenue sources, remaining public works operations would be cut ($1,180,000) and additional administrative staff.

Officials from the **City of Bellefontaine Neighbors** indicated their annual budget is $4,895,911.00. It is estimated if the proposed merger were to happen their city would lose 73.9% of this amount, or $3,618,078.23. They indicated the proposal as submitted by Better Together will strip their City of St. Louis County sales tax revenue, all revenue associated with their police, courts, business licensing, any permits associated with zoning, leaves no money for Capital Improvements, leaves them with unfunded mandates which will lead to the dissolving of their city as a whole.

Officials from the **City of Berkeley** indicated the proposed amendments to Article VI are projected to decrease the revenue budget for their city by approximately $2,750,000. The effect on the personnel would be a reduction in the current staff of about 70%, which is about 74 jobs. The residents of the city will be impacted directly through the increase in taxes related to the Fire Department becoming part of a district and creating a new tax burden on the community. Funding for local programs for youth and seniors will have to be reduced.

Officials from the **City of Chesterfield** indicated per fiscal note request 20-042, their city, estimates implementing this petition would result in a deficit of $19,039,279 when compared with their city's 2019 budget as passed with a $904,374 surplus. This net decrease of an estimated $19,943,653 results primarily from sales taxes no longer being remitted to the city, offset in part, by the reductions of service cost in the courts, police, and street maintenance. In order to provide the services after the constitutional amendment, the deficit would necessarily be made up by a substantial dedicated real estate and personal property tax and/or a substantial increase in gross receipts taxes on utilities.

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-039)
City of Crestwood, Missouri

Auditor Galloway:

The State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under Section 116.332 RSMO on all initiative petitions. Please accept the following suggestions for inclusion in the fiscal note as to how this proposal will impact local government in the St. Louis Region. The below example is for the City of Crestwood.

Background

The proposal as presented strips all municipalities from control over sales tax revenues and budgeting. Any revenues associated with courts, police, business licensing and regulations, and roads are subject to the review and approval of a separate government entity. While the proposal also removes from "Municipal Districts" responsibility and costs for courts, police, business regulation including zoning and permits, the savings from these changes are not enough to make up for the expected loss of revenue due to losing control over sales taxes.

In Crestwood's case, the net result of changes proposed in the Constitutional Amendment is a deficit for the surviving Crestwood Municipal District of nearly $3.5 million per year. The Crestwood Municipal District would have no funds for capital improvements, such as maintaining our Government Center or Community Center. Crestwood also operates a Municipal Fire Department, and there would be no funds available for replacing our fire truck and other costly fire department equipment.

The dissolution of the Crestwood Municipal District would mean, among other things, that fire services would cease to be provided to residents of the former Crestwood Municipal District by the Municipal District, and therefore would need to be resumed by

CRESTWOOD

OFFICE OF THE CITY ADMINISTRATOR

some other entity - presumably, a neighboring Fire District. It should be noted that the property taxes for those neighboring districts are higher than that of the City of Crestwood/Crestwood Municipal District. Therefore, the dissolution of the City of Crestwood would likely result in a property tax increase to our residents.

As opposed to dissolution, the Crestwood Municipal District would have to resort to substantial increases to property owners in the surviving Crestwood Municipal District. There are three options: 1) increasing the real estate and personal property tax; 2) increasing the gross receipts taxes on utilities (the costs of which are borne by that utility's customers), or 3) an increase in fees charged by the city for parks and recreation and fire inspections.

Adjusted 2019 Crestwood Budget showing the impact of the Better Together proposal:

Chart 1. Crestwood 2019 Budget and Showing Impact of Better Together Proposal.

2019 Budget	General Fund	Park Fund	Capital Fund	Sewer Lateral Fund
Revenues	9,535,667	1,828,695	1,445,690	139,600
Expenses	9,444,238	1,812,475	1,423,682	135,000
Transfers In (Out)	-	-	-	-
Surplus (Deficit)	91,429	16,220	22,008	4,600

Better Together Proposal	General Fund	Park Fund	Capital Fund	Sewer Lateral Fund
Revenues	3,980,531	654,350	19,000	139,600
Expenses	5,613,664	1,812,475	681,500	135,000
Transfers In (Out)	-	-	-	-
Surplus (Deficit)	(1,633,133)	(1,158,125)	(662,500)	4,600

Footnotes:

1. The "General Fund" comprises the bulk of Crestwood operations, traditionally including police, fire, planning and zoning, public works administration, facilities maintenance staffing, municipal court and administrative services.
2. The above chart is a restatement of what the Crestwood 2019 Annual Budget would look like assuming the Better Together proposal was in effect on January 1, 2019.
3. The only revenue in the Capital Fund would be interest income on the current balance of that fund. The Better Together proposal would require deficit spending in the Capital Fund until that fund's balance were exhausted, thereby eliminating any interest income and effectively terminating this fund.

Even if the Crestwood Municipal District were to increase its authorized property and utility taxes to their statutory maximums, the district could NOT cover the operational deficit created by the Better Together proposal. Below is a chart identifying available additional revenue sources:

CRESTWOOD

One Detjen Drive
Crestwood, MO 63126
(314) 729-4780

OFFICE OF THE CITY ADMINISTRATOR

Chart 2. Additional Revenues Available by Increasing Taxes.

Revenue Source Available	Statutory Maximum	Added Revenue Potential
Real Estate Taxes	1.00	1,156,563
Personal Property Tax	1.00	44,655
Utility Tax Increases	10%	1,018,117

All additional revenue sources generate an estimated $2.2 million per year. As shown in Chart 1 above, Crestwood is facing a deficit of $3.4 million per year. Thus, the Crestwood Municipal District would be left with a $1.2 million deficit. With no other revenue sources available, Crestwood would have to reduce services, by either:

1) Reducing its Parks and Recreation operations (total annual expenditures $1.8 million).
2) Cease all Fire Department operations (total annual expenditures $3.2 million).

Sincerely,

Kris Simpson
City Administrator

Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, Missouri 65101

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-042)
City of Des Peres, Missouri

Dear Mrs. Galloway:

Please accept and consider the contents of this letter in drafting your fiscal note for initiative petition #2020-042 required under Section 116.332, RSMO on all initiative petitions. Specific example is given for the impact on the City of Des Peres.

SUMMARY:

The proposal as presented strips all existing municipalities in St Louis County of substantial revenues including sales tax and any revenues associated with courts, police, business licensing and regulations and roads which by current statutes are remitted to cities in St Louis County. While the proposal also strips from cities (now called Municipal Districts) all responsibility and associated costs for courts, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal district that will require either dissolution or substantial increases in real estate or utility taxes.

In the case of Des Peres, the net result of changes proposed in the Constitutional Amendment is a deficit for the surviving Des Peres Municipal District of nearly $6,000,000 per year with no funds allocated for capital equipment or projects which we expect would need to average $1,000,000 per year for parks, recreation and fire purposes and maintenance of public facilities. (Des Peres currently allocates $2.5 million per year from the capital improvement sales tax for capital equipment and projects with over 50% allocated to streets)

While some reduction in service levels and expenses would likely be appropriate, the end result would be requirement to substantially increase local taxes on the property owners in the surviving Des Peres Municipal District focused on only three options: (1) a substantial real estate and personal property tax); (2) a substantial increase in gross receipts taxes on utilities (passed thru to the underlying customers); or (3) an increase in fees charged by the city the area of trash services and parks & recreation fees.

For purposes of this analysis, we have adjusted the current 2019 Des Peres Budget to show the fiscal impact of Better Together Proposal if it were in place for this year.

2019 Budget	**General Fund**	**Park Fund**	**Operating Budget**	**Capital Budgets**
Revenues	11,833,825	6,269,400	18,103,2225	3,227,055
Expenses	(11,680,947)	(5,133,616)	(16,814,096)	(4,448,055)
Transfers In (Out)	29,000	(1,214,500)	(1,185,500)	1,213,000
Surplus (Deficit)	182,467	(78,816)	101,751	(8,000)
Post Better Together	**General Fund**	**Park Fund**	**Operating Budget**	**Capital Budgets**
Revenues	3,160,447	3,232,400	6,392,847	473,305
Expenses	(6,014,343)	(5,133,616)	(11,147,918)	(2,400,900)
Transfers In (Out)	0	(1,207,000)	(1,207,000)	1,234,500
Surplus (Deficit)	(2,853,896)	(3,108,175)	(5,962,000)	(729,095)

Footnotes:

1. The “General Fund” is a compilation of budgets for the General Fund, Fire Fund and Public Safety Fund
2. This analysis is a restatement of our current budget assuming the Better Together proposal was in effect on January 1, 2019. For purposed of the analysis, the ‘General Fund” also includes revenues and expenses from the Fire Fund and Public Safety Fund since revenues from both of those funds are largely transferred into the General Fund.
3. For purposes of this analysis, transfers out of the Park Fund to the Debt Service Fund ($1,050,000) are not included in the analysis since all outstanding debt for The Lodge will be fully retired in early 2020.
4. The major transfer in 2019 in the Park fund is to our Capital Improvement Fund to finance a large scale capital project to refurbish one of our major parks.
5. Capital Budgets: the city has funded an average of $2.5 million in capital projects per year utilizing a 0.5% capital improvement sales tax. No funds will be available as a dedicated income to the capital fund post Better Together.

The Des Peres Municipal District could cover the operational deficit created by the Better Together petition IF the city were to take all of its authorized taxes for real estate, personal property and gross receipts to their statutory maximums:

Revenue Source Available	Statutory Maximum	Added Revenue Potential
Real Estate Tax	$ 1.00	4,148,734
Personal Property Tax	$ 1.00	451,157
Gross Receipts Tax on Utilities	10.0%	1,563,488
Sanitation Fee	Actual Cost of Service	887,625

Major assumptions used in this analysis are attached hereto as Exhibit “A” along with associated excel spreadsheets using our 2019 budget as our baseline.

If you have any questions regarding our analysis please feel free to contact at 314-835-6110 or by e-mail at dharms@desperesmo.org and I will respond as quickly as possible.

Sincerely,

Douglas J. Harms
City Administrator
City of Des Peres, Missouri

EXHIBIT A
DES PERES, MISSOURI

MAJOR ASSUMPTIONS IN THE ANALYSIS:

REVENUES:

Sales Taxes – currently the city receives the proceeds from a 1.25% general sales tax (shared in St Louis County) that will flow to the new Metropolitan City under the proposal. In addition, the city has imposed a 0.25% Fire Sales Tax, a 0.5% Parks Sales Tax and a 0.5% Capital Sales Tax (shared in St Louis County)

Under the proposal as detailed in the proposed constitutional amendment, all sales and use taxes will go to the new Metropolitan City and no longer to current municipalities. The proposal provides that those taxes remain in place in the areas of the municipal districts and the Metro City shall remit to the municipal district those sales tax revenues necessary to meet outstanding obligations of any kind (which we assume to mean pensions and bonds tied to the revenue source) and may remit any remaining balance to the municipal district as necessary for providing municipal services within the district. Since the pass-thru of sales and use tax is discretionary and associated with a finding of "necessity" by the new Metropolitan City, these projections assume that no pass thru for dedicated sales taxes for municipal services except the Fire Sales Tax since the Metro City is not responsible for any fire services.

Intergovernmental Revenues – are assumed under the proposal to be redirected by the state to the Metro City since the Des Peres Municipal District is not a city under state law. Further, most of the shared revenues from the state are related to transportation – a function defined as a service reserved to the Metro City and not the municipal districts.

Licenses – all business license fees including merchants and liquor licenses are under the proposal the sole jurisdiction and are to be levied by the Metro City and not the municipal districts.

Permits – the proposal provides that all "public works" is reserved to the Metro City and not a function of the municipal district. While that term is not defined in the proposal, the prevailing document for interpretation is the current St Louis County Charter which provides for a Department of Public Works with responsibility for all "permits" which are assumed to include all building and related permits. That revenue, along with the responsibility for those services, would appear to be assigned to the Metro City and not the municipal district

Municipal Court - all municipal court functions are assigned by the proposal to the Metro City and one would then assume that all fines, costs and forfeitures would also flow to the Metro City.

Contracts - Des Peres has a contract with a Community Improvement District to provide additional police protection to West County Center. That contract and related revenue would no longer be collected since municipal districts are not allowed to provide police services.

EXPENSES

The proposal assigns as the sole responsibility of the Metropolitan City certain functions currently provided by the City of Des Peres including police, courts, business licensing and regulation, transportation, public works and economic development. Therefore, it is assumed that 100% of those costs for the city contained in its current budget for both operating and capital purposes will no longer be necessary and the Des Peres Municipal District budget reduced accordingly.

Expenses relating to Fire and EMS services, Parks & Recreation and Solid Waste Collection are retained as municipal district services and the costs associated with each such service are carried forward to the adjusted municipal district budget. In this analysis, the budget for Public Safety is assumed to be split evenly between the Police function and the Fire-EMS function. We believe that assumption not to be true since Des Peres enjoys some economies by having a combined Department of Public Safety with all employees cross trained and utilized in both functions, rather than separate police and fire agencies and expect that the cost of a stand alone Fire-Ems department to be greater than half cost of our current combined department. expect that the cost to operate a stand- alone Fire Department in lieu of our combined Public Safety Department.

I would assume that an additional $750,000 could be reduced from our operations budget due to a 50% in the reduction of administrative costs including general administrative and finance functions supporting operating departments resulting from the service levels to be provided by the successor Des Peres Municipal District.

Pensions – Des Peres Municipal Pension Plan is a 401 Defined Contribution Plan and there are no unfunded pension liability associated therewith to be carried over to the new municipal district. Current obligations are embedded in departmental operations budgets.

Debt Service – for purposes of this analysis, Des Peres current obligations for Debt Service ($1,455,000) in 2019 has been deleted from the analysis since all outstanding debt will be retired in 2020 before the effective date of the proposed reorganization.

Capital Improvements – the City of Des Peres currently receives $2.5 million from the capital improvement sales tax none of which is dedicated to repayment of outstanding general Obligation Bonds or Certificates of Participation. It is assumed that the proceeds from the capital improvement sales tax would not be remitted to the municipal district by Metro City. The adjusted 2019 budget deletes all projects or equipment relating to functions which are transferred to the metropolitan city (the largest of which is transportation and streets) and includes only equipment relating to fire-ems, parks & recreation and maintenance of public buildings being retained by the municipal district.

Officials from the **City of Eureka** indicated they have reviewed the petition regarding Constitutional Amendment to Article VI (2020-042) and determined the estimated costs this measure would have on their city.

The proposal as presented will strip all sales tax revenue not associated with debt from their city. During the FYE (fiscal year end) 2019, their city would lose approximately $2,525,000 of general sales tax, not associated with debt, under the initiative plan. Sales tax revenues fund Administration, Code Enforcement, Economic Development, Police, Court and Public Works. Under the proposed initiative, the Metropolitan City will assume all departments except for Administration. It is budgeted that the Administration Department will expend approximately $1,100,000 on payroll and operating expenses during FYE 2019, which would be funded by real property, personal property and gross tax receipts under the initiative plan. Their city estimated real property, personal property and gross receipt tax receipts are $2,317,000 for FYE 2019. Under the plan, it is unclear if this surplus will be retained by their city for future operating and capital expenses. In the event that there is a deficit, the District could be required to increase local taxes on personal property, real property and gross receipt taxes.

Their city currently receives approximately $1,200,000 from Capital Improvement Sales Tax, of which $685,700 is committed to paying off debt for Water System Enhancements and the Timbers Recreation Center. The remainder is used to fund capital expenditures such as vehicles, equipment, storm water management, Parks Department projects and Water and Sewer Department projects. The loss of this revenue will impact the water and sewer systems and the Park Department as noted below.

Their city operates a water and sewer system. The revenues and expenditures are recorded in two Enterprise Funds. It is projected that the water and sewer system Enterprise Funds will have to be subsidized by the General Fund in FYE 2021. Under the initiative petition, it is unclear how their city could subsidize the shortfall, if at all. The Capital Improvement Sales Tax funds capital improvements and major repairs to infrastructure of the water and sewer systems. The loss of the Capital Improvement Sales Tax not associated with debt would prohibit capital improvement projects and major repairs to the water and sewer systems. It is possible that the water and sewer systems would have to be sold, creating a loss of service or significant rate increases to the residents of their city.

The Parks Department will require a transfer beginning in FYE 2020 from the Capital Sales Tax fund to fund capital projects in the amount of $500,000. This transfer is considered in perpetuity. With the loss of this sales tax, the Parks Department would not be able to maintain or upgrade capital items. This would likely result in a loss of service or increased fees to the residents of their city or the Park Department being absorbed by the Metropolitan City.

There are other costs that are not easily measured. Under the plan, the Metropolitan City would assume all of the assets of their city. This will eliminate most to their city's balance sheet creating an unstable financial position. This could result in an elimination or withdraw of bond rating and higher borrowing costs. Since it is unclear how outstanding

obligations are to be handled, the sources of revenues described in the Official Statement will change, and management of their city's finances and economic development described in the Official Statement will change, making their city vulnerable to investor litigation.

This initiative would eliminate any control their city would have over economic development. Costs associated with the loss of economic development cannot be identified at this time.

Officials from the **City of Ferguson** indicated the city recognizes under state statute it is the responsibility of the MSAO (Missouri State Auditor's office) to provide a fiscal note and summary to the attorney general. That said the ambiguity and lack of specificity incorporated into the proposed constitutional amended preclude the assembly or computation of ANY reasonable response. The lack of specificity as to directed, special use sales taxes (e.g., fire, parks and storm water, capital improvement and economic development) makes any analysis impossible; unequivocally, plain and simply.

As an example the amendment specifies only three sources of revenue available to the municipal district: property taxes, franchise taxes and licenses and fees. Absent from that list is sales taxes. The city specifically has a sales tax that barely supports its extensive parks and recreation system. Loss of that tax would result in the loss of its parks system.

Officials from the **City of Florissant** indicated:

They attached an Op-Ed that they wrote that was published in the St. Louis Post-Dispatch editorial section on Thursday February 7 which will give a good idea of their objection to the success of the petition. They would also like to direct attention to an Op-Ed that was published in the Post-Dispatch on February 13, 2019 by St. Louis County Councilman and former St. Louis County Police Chief Tim Fitch which concludes that the City of Saint Louis and their region would be far better off if St. Louis would resolve their $1.6 billion dollar debt by declaring bankruptcy like Detroit did not long ago rather than pull the St. Louis County down in their hole with them. Detroit is reportedly experiencing a renaissance since declaring bankruptcy.

If this petition with its devastating proposal is successful it could result in a statewide vote to strip Florissant and all municipalities in St. Louis County of their sovereignty by taking away what makes them a city including their Police Department and Public Works Department leaving them with only their Parks Department. This proposal would also strip them of their major sources of revenue but leave them with all of their debt and pension obligations that their city and residents would still have to pay.

This concept is predicted to fail miserably in St. Louis and St. Louis County so if it were to pass in the rest of the state by more votes than it fails where it affects people then the result would be a hostile takeover of our home by outsiders and would amount to taxation without representation.

An alternate petition is being sponsored by the Municipal League of Metro St. Louis which would create a Board of Freeholders to be created to mandate public hearings to obtain

open input from only the residents of St. Louis and St. Louis County in order to contemplate changes in the governance of our Metropolitan Area. The Board of Freeholders would then decide what to place before the voters affected and would not ask the entire state to weigh in.

These matters were discussed at length at the Missouri Municipal League Legislative Conference and everyone in attendance felt that the Better Together proposal was an affront to democracy. Immediately after the conclusion of the conference the Missouri Mayors United for Progress unanimously passed a resolution opposing the Better Together statewide vote and endorsed the Municipal League of Metro St. Louis initiative to collect the necessary signatures to create a Board of Electors (Freeholders) to openly discuss potential changes to governance structures in St. Louis County and City.

Many feel that the extremely wealthy people who fund this and other hostile efforts to mold governance to their whims, especially when done outside the open public hearing format, are a threat to our State and to the Republic of the United States!

MAYOR THOMAS P. SCHNEIDER COMMENTS ON BETTER TOGETHER SIGNATURE PETITION THREAT THAT WOULD TERMINATE 233 YEARS OF FLORISSANT SOVEREIGNTY. February 1, 2019

Florissant is the oldest and largest city in St. Louis County and only St. Genevieve, St. Louis and St. Charles are older in the entire Louisiana Purchase Territory. Founded by the Spanish Governor of the Louisiana Territory in 1786 Florissant is older than St. Louis County, older than State of Missouri, and even a few years older than the Constitution of the United States. We have been a sovereign community under three countries, Spain, France or the United States for 233 years. We appreciate our long history as a sovereign city and wish it to continue for another 233 years.

We would like to continue to be protected by Police who we know and trust. The award winning Florissant Police Department is one of the best law enforcement agencies anywhere and was one of the first to receive the gold standard in public safety, the CALEA certification from The Commission on Accreditation for Law Enforcement Agencies. Other agencies including the County and City Police Departments have always had the highest respect and have tried to emulate our department. The Florissant Police department is our most valuable asset and is highly appreciated by our residents and is also one of reasons why many investors continue to locate and develop their business in Florissant.

We would prefer to maintain our streets, bridges, sidewalks and other infrastructure rather than surrender it to the Better Together Mega Metro. Florissant has a very proactive Public Works Department which has been validated by our voters with additional revenue to continue proven programs to maintain and systematically rebuild our streets and sidewalks. We are way ahead of the curve compared to the rest of the nation in that we have been systematically replacing our bridges and culverts for more than 40 years ever since I served under Mayor Eagan as City Engineer 1976-1978.

We want to participate in a conversation on how to be a part of a more competitive Metropolitan area but neither myself as Mayor or our City Council Members were asked by Better Together for our opinions nor were we consulted by the County Executive or the St. Louis Mayor despite the fact that we are acquainted and have been in the same room at the same time many times.

We find it contradictory and puzzling that one day the editorial page of the Post-Dispatch laments the dysfunction of St. Louis City or County or their chief executives or their law enforcement agencies one day and the next day's editorial page proclaims that everyone should happily embrace the idea of a Statewide vote to create a one size fits all mega government controlled by the remotest of leaders.

We think any regional decisions on governance change should be made by the citizens that would be affected. We would be reluctant to entertain the idea of voting to compromise the sovereignty or the method of governing of Rolla, Poplar Bluff, Independence, Springfield, and Hannibal et al. It is hoped that the information in the 160 page Better Together report and other reports such as the 25 page report prepared by UMSL's Terry Jones in 2014 entitled "TOWARD REGIONALISM: THE ST. LOUIS APROACH" and other relevant material such as the written position of SLACMA (St. Louis Area Police Chiefs Association) will be useful to the forthcoming Board of Freeholders.

We support and will participate in the initiative of the Municipal League of Metro St. Louis to collect the necessary signatures to enable a Board of Freeholders (also called Board of Electors) to be formed who will be mandated to hold open public meetings and hearings so that the will of the citizens can be heard in open dialogue and testimony. Open to the public discussions have been a bed rock traditional in our Republic called the United States of America for about as long as Florissant has been a sovereign city.

Officials from the **City of Hazelwood** indicated their city applied the assertions of the proposal to their FY2019 Budget. Based on that analysis they determined that:

Revenue Lost: $19,152,000
Costs Eliminated: $14,600,000

Net Loss to the City: $4,552,000

These figures would be on an annual basis.

The analysis that they performed to determine their response is in the following financial information. All of the figures presented were taken from the City of Hazelwood Budget for the FYE ended June 30, 2019.

City of Hazelwood

Revenues lost to Municipal City		Costs turned over to Metropolitan City		
General Fund

Officials from the **City of Kirkwood** indicated:

WHERE COMMUNITY AND SPIRIT MEET

February 25, 2019

Honorable Nicole Galloway
State Auditor
State Capital Building
Jefferson City, Mo 65101

RE: Fiscal Note regarding Constitutional amendment (20-042) City of Kirkwood, Missouri

Dear Ms. Galloway:

I understand that the State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under section 116.332 RSMO on all initiative petitions. Please accept the following suggestions for inclusion in the fiscal note as to how this proposal will impact local government in the St. Louis region. Specific example is for the City of Kirkwood.

SUMMARY:

The proposal as presented strips all existing municipalities in St. Louis Count of substantial revenues including sales taxes and any revenues associated with courts, police, business licenses, and regulations and roads which by current statutes are remitted to cities in St. Louis County . While the proposal also strips from cities (now called Municipal Districts) all responsibility and associated costs for court, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal district that may require service reductions and/or substantial increases in real state or utility taxes.

In the case of Kirkwood, the net result of the changes proposed in the Constitutional Amendment is a deficit for the surviving Kirkwood Municipal District of nearly $2,144,551 per year with no funds allocated for capital equipment or projects. (Kirkwood currently allocates $4.7 million per year from the capital improvement sales taxes for capital equipment and projects) Post Better Together we will not have the

funding for crucial capital equipment. For example in our fire department we have scheduled replacements of ambulances and fire rescue pumpers. Post Better Together leaves us with the responsibility of fire rescue and emergency response with no funding for any of the equipment needed for this operation.

While some reduction in service levels and expenses would be appropriate, the end result would be requirement to substantially increase local taxes on the property owner's in the surviving Kirkwood Municipal District focused on three options: 1) a substantial real estate and personal property tax; 2) a substantial increase in gross receipts taxes on utilities (passed thru to the underlying customer); an increase in the fees charged by the Kirkwood Municipal District for parks & recreation fees.

2019/2020 Budget	General Fund	Capital Improvement	Parks/Stormwater Capital	Park Fund
Revenues	23,182,471	6,299,750	2,644,822	2,024,532
Expenses	24,994,874	5,687,796	2,010,687	1,673,874
Transfers IN (Out)	2,055,489	1,966,845	(1,030,000)	621,120
Surplus/(Deficit)	243,086	2,578,799	(395,865)	971,778
Post Better Together	**General Fund**	**Capital Improvement**	**Parks/Stormwater Capital**	**Park Fund**
Revenues	13,094,960	-	1,318,307	1,474,532
Expenses	15,040,169	-	1,318,307	1,673,874
Transfers IN (Out)	-	-	-	71,120
Surplus/(Deficit)	(1,945,209)	-	-	(199,342)

1. Expenses in pre Better Together 2019/2020 General Fund are estimated at 95% of budgeted amount.

2. Parks/Stormwater monies(post Better Together) are for debt service

3. Kirkwood's capital improvement and parks/stormwater capital improvement sales taxes will no longer be available post Better Together.

4. Park Fund would lose a transfer from the Parks/Stormwater Fund (post Better Together) in the amount of $550,000

The Kirkwood Municipal District to cover our proposed post Better Together deficit would need a substantial increase in real estate taxes and/or utility gross receipts taxes.

If you have any questions regarding the City of Kirkwood's analysis please call me at 314-822-5833 or e-mail me at adamsjr@kirkwoodmo.org.

Sincerely,

John Adams

RE: Fiscal note regarding Constitutional Amendment to Article VI (2020-042)
City of Maryland Heights, Missouri

Dear Mrs. Galloway:

It is my understanding the Missouri State Auditor's Office is required to submit a fiscal Note and fiscal note summary under Section 116.332, RsMO on all initiative petitions. Please consider the following response for inclusion.

SUMMARY OF IMPACT
The proposed constitutional amendment strips all existing municipalities in St. Louis County of substantial revenues including gaming taxes and sales taxes and all revenues associated with courts, business licenses and various shared taxes and grants. The proposal also eliminates all authority and responsibility and related costs for infrastructure (roads, bridges, sidewalks, streetlights) maintenance, police services, court, business regulation including zoning, building permits and economic development. Presumably the City (to be renamed Municipal District) would continue to provide Parks and Recreation services and Trash Hauling but be limited to funding these services with property taxes (the City currently levies none) and utility gross receipts taxes. Further, the City would continue to be responsible for debt incurred prior to the effective date and any enterprise activities.

The impact on Maryland Heights would be a reduction in annual revenues to the General Fund of about $19.6 million (from $24.7 million to $5.1 million). Expenditures would be reduced by $20.8 million. The Park Fund would experience a reduction of $3.7 million in sales tax revenues with no reduction in expenditures in order to maintain the current level of services. The City currently uses 30% of Gaming taxes to fund capital improvements; the proposal would eliminate the funding of $3 million annually. Other services funded by specific taxes (tourism, sewer lateral repair, streetlights) would be eliminated totaling $1.2 million annually.

BOTTOM LINE

Total current annual revenues (all funds) would be reduced by over $27.5 million. Annual expenditures would be reduced $22 million not including capital improvements.

In order to continue to provide the current level of services related to trash collection and parks the City would have an annual shortfall of $1.8 million.

Further, the City would no longer provide services that will be shifted to the new entity for police, infrastructure maintenance, capital improvements, planning and zoning, economic development, code enforcement, sewer lateral repair, streetlights and tourism.

Sincerely,

James S. Krischke
City Administrator

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-042)
City of Overland, Missouri

Dear Mrs. Galloway:

Please accept and consider the contents of this letter in drafting your fiscal note for initiative petition #2020-042 required under Section 116.332, RSMO on all initiative petitions. Specific example is given for the impact on the City of Overland.

SUMMARY:

The proposal as presented strips all existing municipalities in St Louis County of substantial revenues including sales tax and any revenues associated with courts, police, business licensing and regulations and roads which by current statutes are remitted to cities in St Louis County. While the proposal also strips from cities (now called Municipal Districts) all responsibility and associated costs for courts, police, business regulation including zoning, permits and general economic development, the net result will be a substantial deficit for the remaining municipal district that will require either dissolution or substantial increases in real estate or utility taxes.

In the case of the City of Overland, the net result of changes proposed in the Constitutional Amendment is a ***deficit*** for the surviving Overland Municipal District of approximately $362,767.00, across all funds, per year with no funds allocated for capital equipment or projects. We would anticipate the need to average $330,000.00 per year for parks, recreation and maintenance of public facilities. Overland currently allocates approximately $950,000.00 per year from the capital improvement sales tax for capital equipment and projects with over 50% allocated to streets.

While some reduction in service levels and expenses would likely be appropriate, the end result would require a significant increase in local taxes on the property owners or an increase in fees for the user of our parks and recreation facilities. Potential areas of increase would be limited to only three options: (1) a substantial real estate and personal property tax); (2) a substantial increase in gross receipts taxes on utilities (passed thru to the underlying customers); or (3) an increase in fees charged by the city related to parks & recreation fees.

For purposes of this analysis, we have adjusted the current FY 18/19 Overland Budget to show the fiscal impact of Better Together Proposal if it were in place for this year.

FY 18/19 Budget

Current	General Fund	Park Fund	Cap. Imp. Fund	Total
Revenues	$8,566,045.00	$1,000,100.00	$950,100.00	$10,516,245.00
Expenses	$8,517,933.00	$990,390.00	$794,700.00	$10,303,023.00
Surplus (Deficit)	**$48,112.00**	**$9,710.00**	**$155,400.00**	**$213,222.00**

After BT	General Fund	Park Fund	Cap. Imp. Fund	Total
Revenues	$2,580,475.00	$0.00	$0.00	$2,580,475.00
Expenses	$1,627,617.00	$979,625.00	$336,000.00	$2,943,242.00
Surplus (Deficit)	**$952,858.00**	**($979,625.00)**	**($336,000.00)**	**($362,767.00)**

Footnotes:

1. This analysis is a restatement of our current FY 18/19 Budgets assuming the Better Together proposal was in effect on July 1, 2018.
2. The General Fund is used to account for all general operating expenses for all departments except for the Parks and Recreation Department, Community Center, Summer Youth Program and building maintenance at 2500 Ashby Road.
3. The Park Fund is used to account for all expenses related to the Parks and Recreation Department, Community Center, Summer Youth Program and building maintenance at 2500 Ashby Road.
4. Post Better Together, all expenses related to Parks and Recreation Department, Community Center, Summer Youth Program and building maintenance at 2500 Ashby Road would have to be paid for out of the General Fund as revenue from the Parks Sales Tax would go to the Metro City not the Overland Municipal District.
5. Capital Budgets: the city has funded an average of $950,000.00 in capital projects per year utilizing a 0.5% capital improvement sales tax. No funds will be available as a dedicated income to the capital fund post Better Together.

Major assumptions used in this analysis are attached hereto as Exhibit "A" along with associated excel spreadsheets using our FY 18/19 budget as our baseline.

If you have any questions regarding this analysis, please feel free to contact me at (314) 227-2911 or by e-mail at jmcconachie@overlandmo.org.

Sincerely,

Jason McConachie
City Administrator
City of Overland, Missouri

CITY OF OVERLAND
9119 Lackland Road, Overland Mo 63114

EXHIBIT A

MAJOR ASSUMPTIONS IN THE ANALYSIS:

REVENUES:

Sales Taxes – Currently the city receives revenue from a 1.25% general sales tax (shared in St Louis County), a 0.5% Parks Sales Tax and a 0.5% Capital Sales Tax (shared in St Louis County).

Under the proposed constitutional amendment, all sales and use taxes will go to the new Metropolitan City and no longer to current municipalities. The proposal provides that those taxes remain in place in the areas of the municipal districts and the Metro City shall remit to the municipal district those sales tax revenues necessary to meet outstanding obligations of any kind (which we assume to mean pensions and bonds tied to the revenue source) and may remit any remaining balance to the municipal district as necessary for providing municipal services within the district. Since the pass-thru of sales and use tax is discretionary and associated with a finding of "necessity" by the new Metropolitan City, these projections assume that no pass thru for dedicated sales taxes for municipal services.

Utility Taxes – Assumes no decrease or rate cap in Utility Tax Rates in future years. The concept of a reduction or a rate cap routinely seems to be a topic of discussion by the Missouri General Assembly. Any reduction or rate cap below our current rates would result in a reduction in revenue for the Municipal District.

Intergovernmental Revenues – are assumed under the proposal to be redirected by the state to the Metro City since the Overland Municipal District is not a city under state law. Further, most of the shared revenues from the state are related to transportation – a function defined as a service reserved to the Metro City and not the municipal districts.

Licenses – all business license fees including merchants and liquor licenses are under the proposal the sole jurisdiction and are to be levied by the Metro City and not the municipal districts.

Permits – the proposal provides that all "public works" is reserved to the Metro City and not a function of the municipal district. While that term is not defined in the proposal, the prevailing document for interpretation is the current St Louis County Charter which provides for a Department of Public Works with responsibility for all "permits" which are assumed to include all building and related permits. That revenue, along with the responsibility for those services, would appear to be assigned to the Metro City and not the municipal district

Municipal Court - all municipal court functions are assigned by the proposal to the Metro City and one would then assume that all fines, costs and forfeitures would also flow to the Metro City.

EXPENSES:

The proposal assigns as the sole responsibility of the Metropolitan City certain functions currently provided by the City of Overland including police, courts, business licensing and regulation, transportation, public works and economic development. Therefore, it is assumed that 100% of those costs for the city contained in its current budget for both operating and capital purposes will no longer be necessary and the Overland Municipal District budget reduced accordingly.

Expenses relating to Administration, Finance, MIS and Parks & Recreation and pension obligations are retained as municipal district services and the costs associated with each such service are carried forward to the adjusted municipal district budget. One can assume that additional reductions related to Administration, Finance, MIS and Parks & Recreation may occur in the future, however given that the proposal does not address a multitude of operational issues of the new metro city, those assumptions have not been incorporated into this analysis.

Pensions – The City of Overland maintains both a non-uniform and uniform (Police) pension plans. The Non-Uniform Pension Plan is funded through General Fund revenues of the City at a cost of approximately $500,000.00 per year. The Uniform Pension Plan is funded through a dedicated property tax at a cost of approximately $650,000.00 per year.

While the proposal addresses the issue of a dedicated property tax for pension obligations, it does not address the issue of the use of General Fund Revenues for such pension obligations. The analysis assumes no reimbursement of the Overland Metro District for pension obligations that have historically been paid for out of the General Fund.

Capital Improvements – the City Overland currently receives approximately $950,000.00 from the capital improvement sales tax. It is assumed that the proceeds from the capital improvement sales tax would not be remitted to the municipal district by Metro City. The adjusted FY 18/19 Budget deletes all projects or equipment relating to functions which are transferred to the metropolitan city (the largest of which is transportation and streets) and includes only equipment relating to street lights, parks & recreation and maintenance of public buildings being retained by the municipal district.

Parks Sales Tax – The City currently receives approximately $1,000,000.00 from the Parks Sales Tax. It is assumed that the proceeds from the Parks Sales Tax would not be remitted to the municipal district by Metro City. The adjusted FY 18/19 Budget transfers all expenses currently accounted for the in the Park Fund to the General Fund. Those expenses include costs associated with the operation of the Parks Department, Community Center, and maintenance of 2500 Ashby Road. Expenses related to the Summer Youth Program that are previously accounted for in the Park Fund would be eliminated.

Officials from the **City of Pacific** indicated their city is located only partially within St. Louis County; roughly 10 percent of their total incorporated area is within St. Louis County. For cities like theirs, the language of the proposed constitutional amendment provides that the St. Louis County portion of Pacific would be "detached" and "annexed" into the new Metropolitan City upon the amendment's passage, and further that their city would receive an annual payment "equal to" the revenues generated by this territory had the detachment and annexation by the Metro City not occurred.

This language appears to make the proposal "revenue neutral" to their city, meaning the revenue lost from the deannexation would be returned in an annual payment by the new Metro City. How these revenues would be calculated, however, is not clear.

Their city realizes numerous sources of revenues from the part of its territory located within St. Louis County. Annual sales tax and property tax receipts from this territory range from $350,000 to $400,000. They also receive gross receipts taxes, business license and other license taxes, water and sanitary sewer service revenue, and other permits and fees revenue. They do not have time to analyze these revenues in depth in the time they were allotted for their response. If you do not count utility revenues, which their city almost certainly would continue to receive in its capacity as utility provider to those customers located within St. Louis County, it would appear that their annual tax, licenses, permits and fees revenues from their portion within St. Louis County are in the $500,000 range.

They understand that the language of the proposal may be interpreted to be "revenue neutral" to their city. However, given that it is unclear how these revenues would be calculated, and further that revenues in any one year are subject to fluctuation due to any number of factors, their city believes that the Better Together initiative would result in a net loss to their city in an amount at least equal to the current net revenue (not including utility revenues) or approximately $500,000 annually.

Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, Missouri 65101

RE: Fiscal Note for Initiative Petition 20-042 proposing to amend Article VI

Dear Ms. Galloway,

It is my understanding the State Auditor's Office is required to submit a Fiscal Note and Fiscal Note Summary under Section 116.322, RSMO on any and all initiative petitions.

Please accept the following for inclusion in the fiscal note for the local government impact of the proposed Constitutional Amendment to Article VI proposed by Better Together, Initiative Petition 20-042.

SUMMARY

The proposal seems to sweep all local sales tax revenues, use taxes, local Road & Bridge sales taxes, business and merchant license fees, and any revenues associated with municipal policing and court fines from all municipalities within St. Louis County, except perhaps the Fire & EMS quarter-cent sales tax and Parks & Stormwater half-cent sales tax. The proposal also removes the power for municipalities in St. Louis County to provide policing, zoning, property maintenance inspections/regulations, permitting, and courts services. It allows for Fire, EMS, parks and recreation, and solid waste removal services to be provided by Municipal Districts, but very little funding to provide such without significant increase in property and real estate taxes.

For the City of Richmond Heights, the net result proposed in the Constitutional Amendment is a deficit of over $5.5 million per year with no revenues for solid waste removal, or capital projects such as road and bridge repairs. Currently, Richmond Heights allocates over $1 million annually for road and bridge maintenance and $1 million annually for solid waste/trash removal.

While the Amendment would allow the discontinuation of some services, the end result would be the dissolution of many municipal services or the need for a substantial increase to property owners in the Municipal District of Richmond Heights through real estate and personal property

taxes; and significant fees for solid waste/trash removal and parks and recreation services and maintenance. Currently, residents pay no fees for solid waste/trash removal service.

FISCAL IMPACT

Please see Estimated 2019 Budget without and with Article VI Better Together Proposal impact:

2019 BUDGET	General Fund	Parks and Rec Fund	Operating Budgets	Capital Budget
Revenues	$13,304,627	$4,626,140	$17,930,767	$2,775,139
Expenses	$13,432,406	$3,757,470	$17,189,876	$1,162,886

Surplus (Deficit)	$202,060	$2,599	$204,659	$257,975
Post Better Together				
Revenues	$5,194,404	$3,863,520	$9,057,924	$0
Expenses	$7,032,781	$3,942,958	$10,975,739	$1,403,663
Transfers In (Out)	$63,792	($872,214)	($808,422)	($1,386,213)
Surplus (Deficit)	($1,774,585)	($951,652)	($2,726,237)	($2,789,876)

("General Fund" General Fund and Fire & EMS Services Fund combined.)

Other Assumptions used in this analysis are:

REVENUES
No local sales tax or use tax revenues other than the Fire & EMS quarter-cent sales tax and the Parks and Stormwater half-cent sales tax, no road and bridge tax revenues, no cigarette tax revenues. This does assume all local property tax revenues and utility tax revenues remain with the "municipal district".

EXPENSES
No police, public works, or inspections operations and no police capital purchases

Please contact me at (314) 645-4595 or by email at ahamilton@richmondheights.org should you have any questions regarding the above information.

Sincerely,

Amy Hamilton

RE: Fiscal Note Regarding Constitutional Amendment to Article VI (2020-042)
City of University City, Missouri

Dear Ms. Galloway:

It's my understanding; the State Auditor's Office is required to submit a Fiscal note and Fiscal Note Summary under Section 116.332, RSMO on all initiative petitions. Please accept the following suggestions for inclusion in the fiscal note as to how this proposal will impact local government in the St. Louis Region. The below example is for the City of University City.

Summary

The proposal as presented strips all municipalities in St. Louis County of sales tax revenues, and any revenues associated with courts, police, business licensing and regulations, and roads. While the proposal also removes from "Municipal Districts" responsibility and costs for courts, police, business regulations including zoning and permits, the end result will be a substantial deficit for the remaining municipal district that will require either dissolution or substantial increases in real estate or utility taxes.

In the case of University City, the net result of changes proposed in the Constitutional Amendment is a deficit for the surviving University City Municipal District of nearly $4.8 million per year. The University City Municipal District would have no funds for capital improvements, such as maintaining our City Hall, Community Center, and capital equipment or projects. University City also operates a Municipal Fire Department, and there would be no funds available for replacing our fire trucks and other costly fire department equipment.

While some reduction in service levels and expense would likely be appropriate, the end result would be requirement to substantially increase local taxes on the property owners in the surviving University City Municipal District. There are three options: (1) increase the real estate and property tax; (2) increase the gross receipts tax on utilities, which are passed thru to the underlying customers; or (3) an increase in fees charged by the City for trash services, parks and recreation fees, and fire inspections.

Adjusted 2019 University City Budget showing the impact of the Better Together proposal:

	General Fund	Capital Improvement	Park & Stormwater	Public Safety	Sewer Lateral	Economic Development Sales tax	Loop Business District
2019 Budget							
Revenues	22,802,800	2,402,000	1,301,000	1,700,000	576,000	703,400	75,000
Expenses	(23,744,300)	(3,197,800)	(1,413,400)	(1,799,300)	(576,000)	(494,400)	(142,300)
Transfers In(Out)	1,058,000	(400,000)	-	(300,000)	-	(133,000)	75,000
Surplus (Deficit)	116,500	(1,195,800)	(112,400)	(399,300)	-	76,000	7,700
Post Better Together

	Parkview Garden Special District	Grant	Internal Service Fund	Solid Waste	Public Parking Garage	Golf Course
2019 Budget						
Revenues	95,300	1,077,700	1,559,900	3,122,500	161,200	725,000
Expenses	(94,800)	(1,077,700)	(1,534,000)	(3,263,600)	(158,500)	(715,800)
Transfers In(Out)	-	-	-	(75,000)	-	(150,000)
Surplus (Deficit)	500	-	25,900	(216,100)	2,700	(140,800)
Post Better Together						
Revenues	95,300	-	1,557,900	3,122,500	161,200	725,000
Expenses	(94,800)	(525,000)	(1,534,000)	(3,263,600)	(158,500)	(715,800)
Transfers In(Out)	-	-	-	(75,000)	-	(150,000)
Surplus (Deficit)	500	(525,000)	23,900	(216,100)	2,700	(140,800)

Footnotes:

1. The "General Fund" comprises the bulk of University City's operations, traditionally including police, fire, planning and development, public works, parks and recreation, facilities maintenance, municipal court, and administration services.
2. The above chart is an assumption restatement of what the University City 2019 Annual Budget would look like assuming the Better Together proposal was in effect on July 1, 2019.
3. The only revenue in the Capital Improvement, Park & Stormwater, and Economic Development Sales Tax Fund would be interest income on the current balance of that fund. The Better Together proposal would require deficit spending in the Capital Improvement Fund, Park & Stormwater Fund, and Economic Development Fund until their fund balance is exhausted, thereby eliminating any interest income and effectively terminating the fund.

The University City Municipal District could help offset the operational deficit created by the Better Together petition IF the City were to take all of its authorized taxes for real estate, personal property and gross receipts to their statutory maximums:

Revenue Source Available	Statutory Maximum	Added Revenue Potential
Real Estate Tax	$ 1.00	1,431,954
Personal Property Tax	$ 1.00	137,440
Gross Receipts Tax on Utilities	10.00%	718,811

Major assumptions used in this analysis were used from the City's 2019 budget as a baseline.

If you have further questions, please feel free to contact me at 314-505-8542 or by email at kcole@ucitymo.org.

Sincerely,

Keith Cole

Re: Fiscal Note Regarding Initiative Petition 20-042 Proposing to Amend Article VI
City of Webster Groves, MO

Dear Ms. Galloway:

This letter is in response to an email you sent to me requesting that I review the above-named petition and determine the estimated cost or savings that this measure will have on my City government entity. Attached to this letter, I am providing a spreadsheet that identifies this information for the City of Webster Groves, and have also provided a summary of major assumptions made in my analysis.

The spreadsheet covers all City governmental funds. The first column to the left identifies the City's revenue sources and uses. In the second column from the left, actual numbers from the City's 2018 Comprehensive Annual Financial Report demonstrate how we are operating currently. The third column from the left is titled "Changes to Muni District". This column illustrates how both revenues and expenditures will dramatically change as a result of the proposed changes to the Muni District if the Better Together petition is approved. It demonstrates a significant drop in the City's fund balance by over $5 million dollars. Finally, the fourth column from the left shows the mathematical difference of the Better Together Impact on both Revenues and Expenditures.

The City of Webster Groves is an affluent residential community in St. Louis County and was recently named one of the safest cities in Missouri. The City had fund balance reserves totaling $21,182,159 as of June 30, 2018. Plans to draw down on these reserves to invest in a few large City projects while maintaining a healthy fund balance is a long-term goal. Available reserves can then be drawn down upon during economic hardships. However, it the Better Together Plan, it appears that they will take almost all of our reserves. If that happens, the City will, for the first time, have a demonstrable problem where it has an operating deficit in all funds but two. Money will have to be raised through property taxes in order to get us in an operationally positive position. Even though we currently have enough revenues and reserves to cover our expenditures, the Better Together Plan will financially devastate our City and our residents.

Please feel free to contact me regarding this submittal at jadalij@webstergroves.org or 314-963-5323.

Sincerely,

Joan Jadali

CITY OF WEBSTER GROVES, MO

MAJOR ASSUMPTIONS IN THIS ANALYSIS:

Sales Taxes-Currently the City receives the proceeds from a 1.25% general sales tax (shared with St. Louis County) that will flow to the new Metropolitan City under the proposal. In addition, the city has imposed a 0.25% Fire Sales Tax, a 0.5% Parks and Stormwater Sales Tax, a .5% Capital Sales Tax (shared with St. Louis County), and a .5% Public Safety Tax (shared with St. Louis County). These combined sales taxes of $7,890,005 comprise about 32% of the City's annual budget.

While it makes sense to remove from the Municipal District and pass through to the Metropolitan City those sales taxes that we would no longer need, based on the fact that we would not be providing certain services, there are certain taxes that we are passing through that we should be able to just retain. The claim is that the Metro City shall remit to the municipal district those sales tax revenues necessary to meet outstanding obligations of any kind. Instead, we should get all of the Fire Sales Tax and all of the Parks and Stormwater Tax to fund the services that we are allowed to keep.

Intergovernmental Revenue-Most of these are assumed under the proposal to be redirected by the state to the Metro City since most of this revenue is from sales taxes. However, grants are considered to still be held here as the proposal stated that each Municipal District would still be treated as a political subdivision and therefore could receive federal grants, etc.

Licenses, Fees and Permits-All business licenses, building permits, etc, are to be levied by the Metro City and not the Municipal District.

Fines and Forfeitures-All municipal court functions are assigned by the proposal to the Metro City and it is thus assumed that all fines, costs and forfeitures would also flow to the Metro City.

Investment Income-It is assumed that the Metro City will take over the City's reserve money in all funds except for the Police and Fire Pension Fund and the General Obligation Debt Service Fund since these are specific to Municipal District requirements. The interest earned on these two funds would be minimal to non-existent.

Expenses-The proposal assigned as the sole responsibility of the Metropolitan City certain functions currently provided by the City of Webster Groves including police, courts, business licensing and regulation, public works, and economic development. Therefore, it was assumed that 100% of the police and courts would become the responsibility of the Metropolitan City. However, in some areas the sanitary sewer lateral program wasn't discussed and that still needs to be managed by the Municipal District, as well as building maintenance issues. Therefore, money was retained in the Public Works line to account for this. The Planning and Development department estimated expenses was also decreased significantly, but not completely. This is a result of the fact that the proposal stated that there would still need to be local meetings for certain zoning items.

Pensions-Webster Groves provides two defined benefit plans to its employees through Missouri Local Government Employee Retirement Systems (LAGERS). The non-uniformed plan is partially funded from the general fund and the remainder comes from the Police and Fire Pension (through an amended agreement). The uniformed plan is funded completely through the Police and Fire Pension Fund, where money comes from a specific property tax levy.

Debt Service-Currently the City of Webster Groves has General Obligation debt paid for by a special property tax that will mature in 2024.

Capital Improvements-The City of Webster Groves currently receives $1,567,000 from the capital improvement sales tax fund. This money is currently used to pay for on-going capital projects that are a part of our 5-year Capital Improvement Program. It is assumed that the proceeds from the capital improvement sales tax would not be remitted to the Municipal District by the Metro City. This is a huge problem because the City needs these funds to purchase equipment for the Fire Department and Parks and Recreation Department.

Fund Balances-Finally, it is assumed that the Metropolitan City will absorb all of our reserves that we have available that is not used for debt issues or personnel issues (such as pension liabilities). The City had a combined fund balance at June 30, 2018 of $21,182,159. It is assumed that almost all of this will be absorbed by the City, and then the City has to figure out, once again, how to make Revenues and Expenditures for a particular year be in line to avoid a deficit.

RE: Fiscal concerns regarding Initiative Petition 2020-042 ("petition")

Dear Auditor Galloway:

This firm has been retained to represent the interests of the Police Retirement System of St. Louis ("retirement system") regarding the above referenced ballot initiative and the proposed merger of the City and County of St. Louis. In this letter, we will begin to outline our significant concerns with the petition, however, we believe an in-person meeting to review these issues will be best for all involved. The most recent petition was filed on February 11, 2019. Pursuant to the authority set out in section 116.175, RSMo, the retirement system is timely expressing its statement of fiscal impact in accordance with section 23.140, RSMo. If the proposed consolidation initiative is approved by voters, the retirement system is concerned with the cost of the proposed legislation, and the significant direct fiscal impact it has on the City of St. Louis (or the St. Louis Municipal Corporation) to provide the required future employer contributions to the retirement system. We urge your office to consider the fiscal impact on local government entities who will become not only a taxing sub-district of the Metro City but also a separate taxing district – and exactly how this revision will affect their ability to meet current statutory obligations. The proposed constitutional amendment is voluminous and has far reaching impact. It deserves a comprehensive fiscal review.

Sections 86.200-86.366, RSMo controls the retirement system. Since October 1, 1957 this system has helped to ensure the financial security of Police Officers and their dependents. The board of trustees of the retirement system certifies every year the cost of one-half of the expenses for the next year and the cost of benefits as determined by section 86.337, RSMo. This information is submitted to the city and shall be appropriated and delivered to the retirement system every year. Section 86.350 provides:

> The payment of the cost of providing all benefits granted under the provisions of sections 86.200 to 86.366, as determined pursuant to section 86.337, and the payment of fifty percent of all expenses described in subsection 2 of section 86.343 incurred in connection with the administration and operation of the retirement system are hereby made obligations of the cities.

This obligation is in the tens of millions of dollars annually and has been paid faithfully by the city, allowing our client to meet its obligations and provide a dignified retirement to its vested members. The initiative petition directs the new Metropolitan City will provide general services, including public safety. At some point after the transition period, the Metropolitan City will form a

new police force. The petition is silent as to how exactly a new police force will be formed. The current initiative petition provides a framework of future services, indicates existing obligations will remain obligations of the original municipality, describes numerous taxing responsibilities of these municipal districts but provides no substance as to how or if these "existing obligations" will be paid. The petition's silence on the "how" or "if" is deafening – in particular to a pension system whose charge is to provide for Police Officers and their families in retirement. As you are no doubt aware, while serving, Police Officers are vastly more susceptible to loss of life and suffering debilitating injuries than the general population.

The initiative petition repeals six sections of the Missouri Constitution including Article VI, section 32(c). We highlight section 32(c) because it mandates any amendment or revision under the current constitutional structure not impair retirement benefits to which one is entitled prior to the amendment. The recent revisions of the current initiative petition add language suggesting (but not directly stating) any person with "any vested, non-forfeitable, and contractual right or privilege to retire or retirement or pension benefits..." will retain those rights unimpaired until all benefits have been paid. *See* Initiative Petition 11. (4)(a).

The initiative petition has a significant direct fiscal impact upon the St. Louis City municipality, after it becomes the St. Louis Municipal Corporation following transition. This impact factors into how the entity will honor its pension obligations for the Police Officers and their families who depend on them (and accept the risks attendant with their careers, at least in part based on this security). The initiative petition is, again, silent as to how the St. Louis Municipal Corporation will meet these obligations. Failure to address this issue casts doubt on the fiscal soundness of the proposed consolidation. Further, failure to address funding for pension obligations amounts to a "just trust us" position. Active duty officers, retirees and their dependents should not be placed in such jeopardy. The initiative's proponents have not engaged in dialogue with interested parties about how issues like this will be worked out. To fulfill their fiduciary obligations to their members our clients must move these important questions - not addressed at all in the petition - to the forefront of this debate.

Two examples illustrate the significant fiscal impact the proposed St. Louis Municipal Corporation will face.

First, the initiative petition mandates municipal districts and the St. Louis Municipal Corporation continue as a taxing sub-district of the metropolitan city and as a separate taxing district. *See* Initiative Petition 4. (3)(a) and (5)(3) and (4)(a). This might mean businesses and citizens might be taxed by the metro city and the St. Louis Municipal Corporation simultaneously. Until it is better understood what items will be taxed and by who, it is impossible to determine whether the St. Louis Municipal Corporation can meet its now existing obligations, such as the ongoing annual obligation to our client. Second, how taxes will be imposed and what taxes will be levied is unknown. However, it is known the initiative petition, over time eliminates the earnings tax and appears to preclude an opportunity for a vote on the issue. This will significantly and directly impact the ability of the St. Louis Municipal Corporation's ability to make payments like the annual obligation to the retirement system. *See* Initiative Petition 7. (2)(a). This may explain the additional language in the second petition:

> Notwithstanding any provision of law or this constitution and notwithstanding any reduction of such levies, the St. Louis Municipal Corporation shall satisfy any outstanding financing obligations from available revenues, and the metropolitan city shall distribute to the St. Louis Municipal Corporation, from revenues generated within the territory of the St. Louis Municipal Corporation, such revenues

as may be required for the satisfaction of any such outstanding financing obligation. *See* Second Initiative Petition 7. (2)(a).

Better Together explained this addition was to provide greater specificity regarding the responsibility of the St. Louis Municipal Corporation to meet its existing obligation from the revenue generated in its territory. Arguably this was already required under the general provisions related to satisfaction of outstanding obligations. However, the Petition's language concerning funding appears to propose funding and take it away simultaneously. In a separate section the largest revenue generator in the territory is removed, without an explanation of how this revenue source would be replaced. Stating obligations must be satisfied appears to be window dressing when a deeper look reveals–there is no method outlined to actually satisfy the obligations.

In conclusion, the retirement system asks the auditor to see the petition for what it demonstrates – a lot of the "right words", but no "right actions" to explain any payment method to satisfy the significant outstanding obligations owed on an annual basis to our client as fiduciary to its members and their dependents. We have demonstrated "significant direct fiscal impact upon a political subdivision of the state" and the petitioners should have to demonstrate how those concerns will be addressed before being given the right to present this ballot initiative to the people of Missouri. Thank you for the opportunity to comment.

Very truly yours,

LATHROP GAGE LLP

February 20, 2019

***Contribution Settlement in City's Fiscal Year 2008**

The Police Retirement System filed lawsuits against the City and the Board of Estimate and Apportionment to require the City to contribute the actuarially determined annual contribution for the Police Retirement System for the City's 2004, 2005, 2006 and 2007 fiscal years. The City received an unfavorable ruling in the initial court proceedings relative to the fiscal year 2004 suit, and appealed the decision. In August 2006, the Missouri Court of Appeals affirmed the lower court's decision but transferred the case to the Missouri Supreme Court (Supreme Court). On March 13, 2007, the Supreme Court affirmed the judgments of the Circuit Court.

In response to the judgments, the Board of Aldermen had authorized and approved the issuance and sale of bonds for the purpose of paying certain judgments and other amounts in connection with the Retirement System. During fiscal year 2008, Pension Funding Leasehold Revenue Bonds Series 2007 and Pension Funding Series 2008A were issued funding the Police's System in the amounts of $29,587 and $6,000, respectively (in thousands).

Jefferson City, MO 65101

Re: Follow up Information Concerning the Police Retirement System of St. Louis (PRS) and Fiscal concerns regarding Initiative Petition 2020-042 ("petition")

Dear Auditor Galloway:

We appreciated the opportunity to meet with Susan Beeler of your staff and to discuss our client's concerns regarding the fiscal impact of the petition. In the meeting, we indicated that demographic and actuarial information concerning PRS might better illustrate the negative fiscal impact of the initiative.

PRS Demographics.

Before discussing present and future financial impacts of a successful initiative, we provide the following statistics concerning PRS. As of October 1, 2018, PRS served the following:

Participant	Number	Description
Active	1,138	Currently employed police officers
DROP	123	Former officers who have a deferred vested pension eligible to collect when they turn age 55
Retired and Disabled	1,433	PRS pays benefits to retired officers and officers who became disabled while employed.
Surviving Spouses and Children	475	PRS pays benefits to both surviving spouses and their children
Total Participants	3,169	
Total Receiving Benefits	1,908	Number of Retired, disabled and surviving spouses and children receiving benefits.
Number of Actives supporting those receiving benefits	.66	According to the actuaries in 2000 .83 actives supported in-activities – retirees and all other beneficiaries – Retired, disabled, surviving spouses and children

As you can see, over the last 9 years, the number of active duty police officers contributing 7.5% of their pay has decreased as the number of beneficiaries has increased. This means the investment returns, which suffered during the 2007-2013 period. and the City of St. Louis' obligations pursuant to MO. REV. STAT. §§ 86.200-86.364 bear over 94.4% of PRS actuarial funding obligations.

PRS Future Funding Obligations.

PRS' independent actuaries determine annually the unfunded Entry Age Normal (EAN) actuarial liability and the Present Value of Future Benefits. Both are measures of current value of benefits PRS will owe to members and their beneficiaries. The EAN is used for financial statements but the Present Value of Future Benefits presents a more complete picture for purposes of your evaluation of the fiscal impact of the initiative. The Present Value of future Benefits is the amount of money needed today to fully fund all PRS benefits both earned as of the valuation date and those expected to be earned in the future by the current plan participants, under the current plan provisions if all of the actuarial assumptions (morbidity, mortality, investment returns, economy etc.) are met. PRS' actuaries determine this number for Active, DROP and Currently retired, disabled and surviving spouse and children beneficiaries. If the initiative passes, it is possible that obligations to active participants may be assumed by another plan (the initiative is silent on that point). As the chart below illustrates, even if active participants are not included, the Present Value of Future Benefits to those currently receiving benefits and with deferred vested pension benefits exceeds **$800,000,000.** Porting active participants to another plan does not significantly change PRS obligations to beneficiaries.

Present Value of Future Benefits - 10/1/18

Benefit Category	**10/1/18 PV of FB**	
Active	$306,011,501.00	
DROP and Re Entered	$193,779,042.00	
Retired, Disabled, Surviving Spouse and Children	$622,510,814.00	
Total not including active	**$816,289,856.00**	
Total including Active		$1,122,301,357.00

Fiscal Impact of the Initiative on Present and Future PRS Obligations.

We believe that the petition creates an unfunded liability as to PRS obligations to current and future beneficiaries. As we read the initiative, there is no post passage revenue stream adequate to satisfy PRS funding obligations and voters need to be aware of this. We expect other plans similarly situated will have the same problems. At present, police officer participants in the plan pay 7.5% of payroll into the plan. This amounts to about $5.3 MM annually and the city pays the actuarially-determined amount necessary to fund the plan's obligations to present and future beneficiaries. We provided the payment amounts for the last 10 years which average approximately $33 MM per year. According to the most recent PRS independent actuarial report, over the next 20 years, assuming investment returns of 7.5% and no significant downturn in the

economy the range of payments from the City of St. Louis or its successor will likely range from $32.4 MM to $36.2MM per year.

Results for the year ended September 30, 2017 provide a tool for illustrating this point. The chart below shows PRS funding, expenses and benefits paid and how those results would differ if there were no employee contributions (actives are in another plan) and if the City of St. Louis or its successor did not pay the amount required by Chapter 86. There are not sufficient funds to pay benefits, without eroding fund balances. Without city funding there will not be sufficient funds, over time, to pay the benefits owed.

Additions to PRS	**Value as of 9/30/17**	**Assuming passage and no funding of employer obligations**	**Comments**
Payments from members	$5,129,154.00	$-	Assumes no future payments from EEs
Employer Contributions	$33,104,561.00	$-	Assumes no ER contribution
Interest and Dividends	$8,631,971.00	$8,631,971.00	Not adjusted for changes in rates
Investment Returns	$45,322,802.00	$45,322,802.00	Not adjusted for investment performance
Total Additions	$92,188,488.00	$53,954,773.00	
Deductions from PRS			
Investment Expenses	$2,865,515.00	$2,865,515.00	Assumes same expenses
Benefit Payments	$63,603,561.00	$63,603,561.00	Assumes no increase in payments
Refunds of Employee Contributions	$4,972,550.00	$4,972,550.00	Refunds arise if employees are vested in their contributions and resign prior to retirement
Administrative Expense	$1,165,930.00	$1,165,930.00	Expense is less than 2% of earnings
Total Deductions	$72,607,556.00	$72,607,556.00	
Gain or Shortfall	$19,580,932.00	$(18,652,783.00)	Without additions from the employer and employees the funding gap increases.

As illustrated above, investment returns and interest and dividends are not sufficient to pay pension obligations. As written, the initiative creates what amounts to an unfunded mandate.

The Initiative Does not Provide Funding for Obligations.

The initiative petition makes clear that the St. Louis Municipal Corporation is responsible for funding Obligations such as those benefits PRS owes to members. However, the initiative provides no funding for any of these obligations after the effective date. During the period after the effective date of 1/1/21 and the date that general services such as law enforcement are to be undertaken by the Metropolitan City, the municipal districts and St. Louis Corporation continue to provide these services. They continue as taxing districts, but can only tax utilities and property and can only tax these for the provision of services – not the payment of obligations such as those owed by PRS. Further, in Section 7, the earnings tax will end effective 1/1/21 and cannot be reinstated. According to the City Collector of Revenue the earnings tax provides 33% of the City of St. Louis general revenue. https://www.stlouis-mo.gov/collector/earnings-tax-home.cfm.

Conclusion.

As information from the 2018 Actuarial Report makes clear, the initiative's proposal for creating a new form of government while saddling all prior governments with financial obligations and providing no meaningful revenue stream creates an untenable fiscal problem and jeopardizes benefits owed under Police Retirement System of St. Louis.

Very truly yours,

Lathrop Gage LLP

Re: Follow up Information Concerning the Police Retirement System of St. Louis (PRS) and Fiscal concerns regarding Initiative Petition 2020-042 ("petition") – Correction, p. 2, final par., line 5.

Dear Auditor Galloway, Susan and Kim:

After we finalized our letter of 2-21-19 we noted a typo on page 2 in the final paragraph. At line 5 of that paragraph we stated that police officer participants pay 7.5% of payroll into the plan. That percentage was incorrect. Police officer participants pay 7% of payroll into the plan. However, the dollar value quoted, $5.3MM is correct.

Very truly yours,

Lathrop Gage LLP

Christopher R. Pieper on behalf of Unite STL provided the following information as a proponent of this initiative petition.

Proposed Statement of Fiscal Impact for Initiative Petition for a constitutional amendment related to Article VI, (2020-042)

Submitted by:

Christopher R. Pieper, Mo. Bar No. #57564
414 E. Broadway, Suite 100
Columbia, MO 65201
Telephone No.: (573) 355-5045
E-mail: cpieper@bbdlc.com

on behalf of Unite STL, Proponent of the Proposed Measure

Initiative Petition 2020-042
Proponent's Proposed Statement of Fiscal Impact

The following information is submitted on behalf of the proponent of the proposed measure as a proposed statement of fiscal impact for the Initiative Petition 2020-042 (hereinafter "the measure"), pursuant to Section 116.175.1, RSMo.

The fiscal note and fiscal summary should reflect that the measure will result in savings for local governments of up to $55 million annually in 2023 and up to $1 billion annually by 2032. The fiscal note and fiscal summary should reflect that the measure will result in $4.9 billion in savings to local governments from 2023 to 2032.

The fiscal note and fiscal summary should reflect that the measure will result in increased state revenues of up to $636,695 in 2023, increasing to up to $6.95 million annually in 2032 and each year thereafter. The fiscal note and fiscal summary should reflect that the measure would generate up to $40 million in new state revenue from 2022 to 2032.

I. The Measure

If enacted, the measure would reorganize local governments in St. Louis County (hereinafter "the County") and the City of St. Louis (hereinafter "the City") to reduce fragmentation and achieve greater efficiency and cost-effectiveness. To accomplish this purpose, the measure combines the County and the City in a newly-created, Metropolitan City of St. Louis (hereinafter the "Metro City"), with the powers of both a charter city and a charter county. Art. VI, Section 30.2. The entire territory of the Metro City is designated a "general services district" in which the Metro City is empowered to provide "general district services." Art. VI, Section 30.2(9).[1] Current Municipalities (including the City, until after the transition period) continue as "Municipal Districts," which are political subdivisions empowered to provide "municipal district services" and required to satisfy outstanding obligations of the municipality. Art. VI, Section 30.3.[2]

A. Finances

General district services and outstanding obligations of the Metro City would be financed by revenues generated throughout the Metro City, while municipal district

[1] Examples of "general district services" include the licensing and regulation of businesses, occupations, professions, activities, or things; public health, public safety, and general welfare; police, law enforcement, and municipal court; transportation, infrastructure, and public works; and economic development. *See* Art. VI, Section 30.1(1)(c).

[2] Examples of municipal district services include fire protection, parks and recreation, proprietary and enterprise functions, facilities, and administration of the Municipal District. *See* Art. VI, Section 30.1(1)(g).

services and outstanding obligations of a Municipal District would be financed by revenues generated within the Municipal District or otherwise secured by the Municipal District. Art. VI, Section 30.5(1)(a).[3]

The measure initially continues existing levels of services, and taxes, licenses, fees, or special assessments levied by the County, the City, or Municipalities with respect to the territory to which such applied prior to the effective date. Art. VI, Section 30.5(2)(a). The Metro City is required to distribute revenues generated from such taxes, licenses, fees, and special assessments levied solely within a Municipal District to that Municipal District for use in satisfying outstanding obligations and for the services the Municipal District provides. Art. VI, Section 30.5(2)(a). In particular, the measure requires the Metro City to distribute to Municipal Districts:

(1) All revenues generated from taxes, licenses, fees, or special assessments levied solely within the Municipal District required for the satisfaction of any outstanding obligation. Art. VI, Section 30.5(2)(b)(i).

(2) Revenues generated from property taxes levied solely within the Municipal District. Art. VI, Section 30.5(2)(b)(ii).

(3) Revenues generated from any sales or use tax levied solely within the Municipal District necessary to provide municipal district services or to provide a general district service until such service is provided by the Metro City. Art. VI, Section 30.5(2)(b)(iii).

(4) Revenues that would have otherwise been received by the Municipality from the state or federal government, including gaming revenues and county pool sales taxes, required to satisfy outstanding obligations or necessary to provide municipal district services, or provide a general district service until such service is provided by the Metro City. Art. VI, Section 30.5(5)(c).

Revenues collected within a Municipal District over and above the foregoing would be retained by the Metro City and used for providing general district services such as police. *See* Art. VI, Sections 30.2(9), 30.5(1)(a). Until such time as the Metro City provides a general district service, the Municipal District would continue to receive distributions of revenue necessary to continue providing such service. *See* Art. VI, Sections 30.5(2)(b); 30.5(5)(c).

90 days prior to each fiscal year, a Municipal District would submit to the Metro City an estimate of outstanding obligations, the expenditures necessary for services provided by the Municipal District, and the revenues required for such purposes. Art. VI,

[3] Outstanding obligations include, but are not limited to, contracts; financing obligations, such as bonds, notes, capital leases and similar obligations; and other long-term obligations such as pensions. *See* Art. VI, Section 30.1(1)(b).

Section 30.5(4)(e). The Metro City is required to distribute funds to the Municipal District for such purposes and in such amounts for the ensuing fiscal year. *Id.*

If a Municipal District wanted to increase the level of services, it could levy an additional property tax, levy a utility tax, charge fees for service, and issue financing obligations for such purposes. Art. VI, Section 30.5(4). The Municipal District would administer the revenues generated thereby pursuant to an annual budget adopted in the manner provided for the current Municipality. Art. VI, Section 30.5(4)(d).

The measure provides a two-year transition period from the effective date on January 1, 2021, through the end of the transition period on January 1, 2023. Art. VI, Section 30.1(1)(l). The budget for the Metro City and Municipal Districts for each year of the transition period would be the combined annual budgets for the County, the City, and Municipalities for the twelve month-period beginning January 1, 2019, along with any supplemental appropriations and any appropriations for the satisfaction of outstanding financing obligations. Art. VI, Section 30.5(6)(a). The first budget for the Metro City post-transition period would be adopted on or after January 1, 2023. Art. VI, Section 30.5(7)(c).

B. <u>Tax Relief</u>

Beginning in 2022, the one-percent earnings tax imposed by the City would be reduced annually by one-tenth of one percent until eliminated in the manner provided in current law, Section 92.015, RSMo, due to the failure to reauthorize the tax in 2021. Art. VI, Section 30.7(2)(a). Each reduction would result in approximately $18.3 million in tax relief each year. Also beginning in 2022, the one-half of one percent payroll expense tax imposed by the City would be reduced annually by one-twentieth of one percent until eliminated. *Id.* Both taxes would be fully phased-out over a period of ten years.[4]

In 2023, the general revenue property tax levied in the former County would be reduced to yield no greater than half the revenue generated by the levy during the prior year. Art. VI, Section 30.5(7)(b). Based on the Auditor's 2017 report of tax rates, the County's general revenue property tax levy for each class of property would generate approximately $47.1 million.[5] An adjustment to generate half the amount of revenue is estimated to result in tax relief of approximately $23.6 million annually.

In 2024, the general revenue county purposes property tax levy in the former City would be replaced with the lowered general revenue property tax levied in the former

[4] *See Better Together Policy Recommendations: Analysis of New State Tax Revenue*, submitted herewith and hereby incorporated by reference herein. Available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5c6d500324a694e2f1da31ca/1550667780395/Better+Together+Policy+State+Revenue+Compiled+with+Analysis.pdf.

[5] *See id.*

County. Art. VI, Section 30.5(8)(b). Based on the Auditor's 2017 report of tax rates, the City's county purposes levy would generate approximately $14.1 million.[6] Replacing this levy with the newly-lowered County levy is estimated to result in tax relief of approximately $8.1 million annually.[7]

C. St. Louis Municipal Corporation and St. Louis Fire Protection District

On January 1, 2023, the Municipal District within the former City would continue as the St. Louis Municipal Corporation, primarily to satisfy outstanding obligations of the City. Art. VI, Section 30.4.

Also, on January 1, 2023, the St. Louis Fire Protection District would be created within the boundaries of the former City. Art. VI, Section 30.6. During 2023, the fire protection district is funded out of revenues generated from within the former territory of the City. Art. VI, Section 30.6(2)(a). In 2024, the fire protection district would be authorized to levy a property tax and, upon such levy, the Metro City would be required to correspondingly reduce the rates of taxes, licenses, and fees within the former City to ensure that the fire protection district levy is revenue neutral. Art. VI, Section 30.4(2)(b).

II. Local Government Positive Fiscal Impact

A. Local Government Savings

The measure would result in a significant savings to local governments. Specific areas targeted for savings, such as general administration, are analyzed in a series of studies published by Better Together over the past five years and in the recently-released City-County Task Force Report and Recommendations.[8] Better Together has also analyzed revenue, expenditures, and savings from its policy recommendations as reflected in the proposed measure.[9]

---

[6] *See id.*

[7] *See id.*

[8] *See Better Together: Report and Recommendations of City-County Governance Task Force*, available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5c68551e4785d32318b184c5/1550341501871/Task+Force+Report+Final.pdf.

[9] *See Better Together Policy Recommendations: Analysis of Local Government Savings*, submitted herewith and hereby incorporated by reference herein. Available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5c6d4f06085229dcf73eeb73/1550667526841/Analysis+of+Local+Government+Savings.pdf; *see also St. Louis Metro City – Pro Forma Budget*, submitted herewith and hereby incorporated by reference herein. Available at https://static1.squarespace.com/static/59790f03a5790abd8c698c9c/t/5c6d5041eb393157f0303840/1550667841801/STL+Metro+City+-+Pro+Forma+Budget.pdf. The supplemental data cited therein reflecting revenues and expenditures of the City, County, and Municipalities has been previously submitted to the State Auditor's Office and is hereby incorporated by reference herein.

As discussed more fully in Better Together's analysis, savings to local governments result from both reduced expenditures and the availability of surplus revenue over expenditures. The measure creates a structure for reducing expenditures on a system-wide, rather than jurisdiction-by-jurisdiction basis, which would enable modest expenditure reductions of 3% annually, offset by 2% inflation in expenditures, for net annual expenditure reductions of 1%. In addition, the structure results in annual surpluses of revenue, which enables accelerated debt repayment that would in turn achieve additional savings from reduced interest and financing costs. Initial savings for local governments from the measure are estimated at $55 million annually in 2023.[10] By 2032, annual savings for local governments are estimated at $1 billion annually. From 2023 to 2032, the measure is estimated to result in up to $3.2 billion in expenditure reductions and surplus revenues of $1.7 billion, for total savings to local governments of $4.9 billion over the ten-year period.

B. Local Government Costs

Local governments will not incur any new costs as a result of the proposed measure. Local governments would continue to provide the same functions and services currently provided separately by 90 different local governments. However, the proposed measure would reallocate these functions and services *among* local governments. Therefore, any cost incurred by the Metro City in assuming a function or service would result in savings to the local government from which the function or service was assumed.[11]

Current local governments may claim a "cost" to their particular local government because, following enactment of the measure, their particular local government may not continue to receive all of the revenues it receives today. However, the measure requires that a Municipal District receive all revenues required to satisfy outstanding obligations

---

[10] Several aspects of the measure support the reasonableness of the $55 million estimated savings to local governments by 2023 by requiring specific consolidations to occur during the transition period. For example, effective January 1, 2022, all county offices of the City are required to be fully consolidated into the corresponding offices of the Metro City. *See* Art. VI, Section 30.2(8). In addition, all municipal courts within the Metro City are to be fully consolidated by January 1, 2023. *See* Art. VI, Section 30.2(11)(a). The reasonableness of the $55 million estimated savings to local governments by 2023 is supported by fiscal note responses to a previously proposed constitutional amendment consolidating the City of St. Louis with St. Louis County, which estimated net savings of approximately $60.6 million annually from the consolidation of county functions. *See* Fiscal Note, SJR 3 (2015), L.R. No. 0525-01, *available at* http://www.moga.mo.gov/OverSight/Over20151//fispdf/0525-01N.ORG.pdf

[11] The Missouri Supreme Court has recognized that a new activity or service is not established when a governmental entity is simply required to continue an existing activity or service, *see Breitenfeld v. School Dist. of Clayton*, 399 S.W.3d 816, 826 (Mo. banc 2013); *see also State ex rel. City of Desloge v. St. Francois Cty.*, 245 S.W.3d 855, 861 (Mo. App. E.D. 2007) (requiring showing that County was "forced to hire additional employees or pay higher salaries to existing employees in order to carry out its duties" in order to establish a "new service or activity required of the County" as opposed to being "part of the County's existing duties."), nor when a measure merely reallocates obligations or revenues among various political subdivisions. *Berry v. State*, 908 S.W.2d 682, 685 (Mo. banc 1995); *see also Cty. of Jefferson v. Quiktrip Corp.*, 912 S.W.2d 487, 491 (Mo. banc 1995) (holding that reallocation of local revenue does not shift tax burden to local government and the act of distributing tax revenue is "part of the normal operations of any county" and therefore only a *de minimis* administrative activity not in violation of Hancock).

and necessary to provide municipal district services and a general district service until such service is assumed by the Metro City. *See* Art. VI, Section 30.5(2)(b). Moreover, all existing taxes, licenses, and fees are initially continued in order to ensure the same overall amount of revenue to local governments. *See* Art. VI, Section 30.5(2)(a). Thus, no local government would lose any revenues necessary to perform the functions they remain authorized to perform, although a portion of the revenue a particular local government previously received would be reallocated to another local government—the Metro City—for services now provided by that local government—the Metro City. Indeed, the difference between the amount of revenue currently received by a particular local government and the amount of revenue actually required to satisfy outstanding obligations and necessary to provide services represents potential overall savings to local governments from the more efficient allocation of service provision and supporting revenues.

With respect to elections, no cost to local governments should be reflected in the fiscal note and fiscal summary. The proposed measure requires the Missouri General Assembly to enact legislation to provide for an election authority for the Metro City. Art. VI, Section 30.7(1)(a). Until such time, the current Board of Election Commissioners in the City and County are required to cooperate in the conduct of elections within the Metro City. *Id.* Therefore, any costs related to the conduct of elections should be reflected in connection with legislation to create such election authority, as opposed to in the fiscal note and fiscal summary for the measure.

III. State Government Positive Fiscal Impact

A. Increased State Revenues

The measure will have a significant positive impact on state revenues resulting from the required reduction, and ultimate elimination, of the earnings tax and payroll expense tax and the required reduction of property taxes. As such taxes are reduced, the amount of deductions that can be claimed by individual taxpayers against Missouri income and the expenses claimed by businesses for the payment of such taxes will also be reduced. Both will generate new state revenues.

Better Together has performed a detailed analysis of the additional state revenue generated by reductions in Missouri income tax from 2023 through 2032 as a result of the local tax reductions required under the measure.[12] Based on this analysis, the fiscal note and fiscal summary should reflect that the measure will result in increased state revenues of up to $636,695 in 2023, increasing up to $6.95 million annually in 2032 and each year thereafter. The fiscal note and fiscal summary should reflect that the measure would generate up to $40 million in new state revenue from 2022 to 2032.

[12] *See Better Together Policy Recommendations: Analysis of New State Tax Revenue.*

B. State Costs

The proposed measure would neither establish a new program or state agency, nor duplicate an existing program or state agency. Any one-time implementation costs can be assumed within existing resources. Moreover, new state revenues generated by the proposed measure would more than offset any one-time implementation costs.

IV. Other Political Subdivisions

The proposed measure will be cost neutral to other political subdivisions. School districts, fire protection districts, and other special districts are not reorganized pursuant to the amendment. *See* Art. VI, Sections 30.1(1)(i); 30.9(1)(a); 30.10(1)(1).[13] Accordingly, the fiscal note and fiscal summary should not reflect any costs or savings to any other political subdivisions.

V. Small Business

The proposed measure would provide a significant positive fiscal impact for small business by eliminating bureaucracy and unnecessary regulatory complexity, by streamlining government operations affecting small businesses, and by reducing earnings, payroll expense, and property taxes.

VI. Proposed Fiscal Note Summary

This proposal is estimated to generate savings to local governments of up to $55 million annually by 2023 and up to $1 billion annually by 2032. Reduced earnings, payroll, and property taxes are estimated to increase state revenues by up to $40 million through 2032.

[13] "Special districts" are defined to include "any political subdivision, municipal corporation, body corporate and politic, authority, metropolitan district, taxing district, taxing subdistrict, public corporation, or quasi-public corporation created pursuant to this constitution, law, charter, ordinance, or resolution, other than the county of St. Louis or a municipality, located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section." Art. VI, Section 30.1(1)(i).

Better Together Policy Recommendation
Analysis of New State Tax Revenue

Better Together's policy recommendation is estimated to result in increased state revenues of up to $636,695 in 2023, increasing to up to $6.95 million in new state revenue annually in 2032 and each year thereafter. Over the ten-year period from 2022 to 2032, the Better Together policy recommendation would generate up to $40 million in new state revenue.

Beginning in 2022, the one-percent earnings tax will be reduced annually by one-tenth of one percent until eliminated in the manner provided in current law, Section 92.015, RSMo., due to the failure to reauthorize the tax in 2021. Beginning in 2022, the one-half of one percent payroll expense tax imposed by the City will be reduced annually by one-twentieth of one percent until eliminated. In 2023, the general revenue property tax levied in the former County is to be reduced to yield no greater than half the revenue generated by the levy during the prior year. In 2024, the general revenue county purposes property tax levy in the former City is replaced with the lowered general revenue property tax levied in the former County.

As the earnings tax, payroll tax, and property taxes decrease, the taxable income of individuals and corporations increase. The state tax revenue base thereby increases resulting in new state tax revenue.

The following is a description of the methodology used in analyzing the additional state tax revenue resulting from Better Together's policy recommendation. The following also includes a description of other estimates of additional state revenue from the reduction of the earnings tax and payroll expense tax to support the reasonableness of this analysis and its conclusions.

I. Earnings Tax Analysis

Pursuant to the City of St. Louis FY 2018 CAFR, the earnings tax revenue base was $3,787,500,000 for business and $14,558,200,000 for individuals.[1] This equates to a split of the earnings tax revenue base of approximately 20.65% business and 79.35% individual. The split between business and individual is relevant to state tax impact due to the method by which the payment of the tax may be utilized by taxpayers. In particular, an individual must itemize deductions and take such tax payment as a deduction to have an impact. However, a business uses the payment of tax as an expense, which reduces income and is either reported by the entity (corporation) or is passed to its owners (partnership/LLC). Thus, the analysis segregates the business and individual allocation between the earnings tax revenue base.

A. Individuals subject to Earnings Tax

Based on the City of St. Louis 2018 CAFR, the total earnings tax revenue base is $18,345,700,000. The individual portion of the earnings tax revenue base is approximately

[1] City of St. Louis, 2018 Comprehensive Annual Financial Report, Pg. 210, *available at* https://www.stlouis-mo.gov/government/departments/comptroller/documents/upload/CityofStLouisMO_CAFR-FY18.PDF.

79.35% of such base or approximately $14,558,200,000. Based on this information, 2018 aggregate individual earnings tax is $145,582,000.

The earnings tax paid by individuals impacts state tax revenue when such individuals itemize deductions and claim a deduction for such tax payment. An individual that itemizes deductions thereby reduces his/her taxable income. Based on the 2008 Fiscal Note prepared by the State Auditor's Office related to a ballot measure to phase-out the earnings tax if not reauthorized by voters, approximately 28.06% of Missouri individual tax filers itemized deductions.[2] Thus, the analysis assumes that only 28.06% of the earnings tax paid by individuals has an impact on the state tax revenue. Data is not available to show a different deduction rate, such as any change in deduction rates due to recent changes to federal tax laws.

The analysis uses the statutory individual income tax rate and reflects a decrease in the rate based on current Missouri statutes. The calculations in Section I.A. of the analysis reflect the foregoing, along with the assumption that the earnings tax revenue base is constant.

B. Businesses subject to Earnings Tax

Based on the St. Louis City FY2018 CAFR, the total earnings tax revenue base is $18,345,700,000. The business portion of the earnings tax revenue base is approximately 20.65% of such base or approximately $3,787,500,000. Based on such information, 2018 aggregate business earnings tax is $37,875,000.

Payment of the earnings tax is a business expense which will reduce the income of the business. Such reduced income is then taxed on either a corporate income tax return for a corporation or an individual income tax return if the business does not pay income tax but instead passes the income to its owners, such as a partnership. To analyze the tax impact, the tax effect must be segregated between corporation income tax and individual income tax. The corporate income tax rate is different than the individual income tax rate. Thus, the impact on state revenue depends in part on whether a corporation or an individual is reporting the income.

Per the Missouri Department of Revenue Financial and Statistical Report FYE June 30, 2017, 3,002,736 individual returns were filed and 146,282 corporate returns were filed.[3] Thus, 95.35% of income tax returns were individual returns and 4.65% were corporate returns. Such percentages can be applied to the business portion of the earnings tax to determine an approximate amount reported by individuals and corporations respectively.

The analysis in Section I.B. applies these percentages to the earnings tax applicable to the business portion of the earnings tax revenue base. Section I.B.1. analyzes the impact using the foregoing percentages and the applicable individual income tax rate. The individual taxpayer will

---

[2] *See* Fiscal Note (09-62), Office of the Missouri State Auditor, *available at* https://app.auditor.mo.gov/Repository/Notes/09-62.pdf. This is consistent with the 29% deduction rate assumed by the Office of Administration Division of Budget and Planning (OA-B&P) in its response to a prior initiative petition seeking to enact the Better Together policy recommendation (IP 2020-039).

[3] Missouri Department of Revenue Financial and Statistical Report FYE June 30, 2017, Pg. 18, Income Tax Summary of Activities, *available at* https://dor.mo.gov/cafr/documents/financialstatreport17.pdf.

be reporting the net business income, which has already been reduced by the earnings tax paid by the business. Therefore, unlike the analysis in Section I.A. above, the analysis does not include factoring in the deduction rate. Instead, the analysis looks at what happens to state tax revenue as the income of a business increases due to the reduced earnings tax expense. The difference in the expense amount from the original 2018 data is taxed at the individual income tax rate.

The analysis in Section I.B.2 addresses the business portion of the earnings tax, which can be attributable to corporations based on the corporate return rate above. The analysis looks at what happens to state tax revenue as the income of a corporation increases due to the reduced earnings tax expense. The difference in the expense amount from the original 2018 data is taxed at the corporate income tax rate.

II. Payroll Expense Tax Analysis

The payroll expense tax is applicable to businesses with payroll expenses. Such taxes are paid by the business and reduce business income. Similar to the analysis in I.B. above, the business income is either reported by a corporation or an individual owner of the business. The analysis is similar to I.B. above and is apportioned between individual reporting and corporation reporting. The individual reporting again does not factor in the deduction since the tax reduces the business income and is not an itemized deduction. The reduction in the payroll expense tax results in increased income of individuals and corporations, which in return results in new state tax revenue.

III. Property Tax Analysis

The Better Together policy recommendations include a reduction in the County general revenue property tax in 2023 followed by application of the lower County general revenue property tax in place of the higher City county purposes property tax in 2024.

A. County Property Tax Analysis

The assessed values for each class of property in the County are individually reported in the St. Louis County 2017 CAFR.[4] The Missouri Auditor's Office 2017 Property Tax Rates ("2017 Rates Report") sets forth the permitted rates for the County general revenue property tax for each class of property.[5] The assessed values and rates were utilized to determine such portion of the property tax currently. Per the policy recommendation, the general revenue levy of the County will be reduced to generate approximately 50% of the revenue for the prior year. For purposes of the analysis, 50% of the rates reported in the 2017 Rates Report has been utilized.

---

[4] St. Louis County Comprehensive Annual Financial Report for the Year Ended December 31, 2017, Pg. 180, *available at* https://www.stlouisco.com/Portals/8/2017%20CAFR.pdf

[5] Office of Missouri State Auditor Nicole Galloway, CPA, 2017 Property Tax Rates, Appendix VIII, Pg. 116, *available at* https://app.auditor.mo.gov/Repository/Press/2017143113567.pdf?_ga=2.196564524.1676225323.1550249944-1961047601.1502219957

To determine the impact on state revenue of this property tax reduction, the reductions must be apportioned between individual taxpayers and businesses. Available information does not fully apportion property tax payments in the County, although the County 2017 CAFR does report the principal property taxpayers, which are businesses and which account for 5.8% of the assessed value.[6] This percentage is utilized to allocate property taxes 94.2% for individuals and at least 5.8% for businesses.

The allocation between business and individual is relevant to state tax impact due to the method by which the payment of tax may be utilized by taxpayers. As discussed above in section I.A., an individual must itemize deductions and take such tax payment as a deduction to have an impact. However, a business uses the payment of tax as an expense, which reduces income and is either reported by the entity (corporation) or is passed to its owners (partnership/LLC). Thus, the analysis segregates the business and individual allocation of the property tax.

Based on the St. Louis County 2017 CAFR and Auditor's 2017 Rates Report, the applicable general revenue property tax generated approximately $47,124,464. For purposes of this analysis and based on the information set forth below, this property tax is allocated 94.2% to individuals, such that individual taxpayers paid $44,391,245 of the total general revenue property tax. Such individual amount will be subject to itemized deductions for reporting and the methodology applies the deduction percentage as stated in Section I.A. above. The 5.8% of the general revenue property tax apportioned to businesses is allocated between corporations and individuals similar to the analysis in Section I.B. above based on the percentage of returns filed.

The analysis uses the statutory individual income tax rate and corporate tax rates similar to the analysis in Sections I and II above. The assessed value of property was constant in the analysis.

B. City Property Tax Analysis

St. Louis City levies property tax on all classes of property at a single tax rate. The assessed value of City property subject to the property tax for county purposes and the rate of such tax is reported in the Auditor's 2017 Rates Report.[7] In 2024, the county purposes property tax in the former City would be replaced with the County general revenue property tax as reduced per the recommendation, resulting in a reduced rate applicable to all classes of property.

Similar to the analysis for the reduction of the County general revenue property tax in Section III.A., the county purpose property tax in the City must be apportioned between individuals and businesses. The principal taxpayers of the property tax reported in the St. Louis City 2018 CAFR are all businesses and account for 11.99% of the assessed value.[8] This percentage is used to allocate the county purposes property tax between individuals 88.01% and businesses 11.99%. The analysis utilizes a similar approach as in Section III.A. above to allocate and calculate the current apportionment to determine future state tax revenue impact.

---

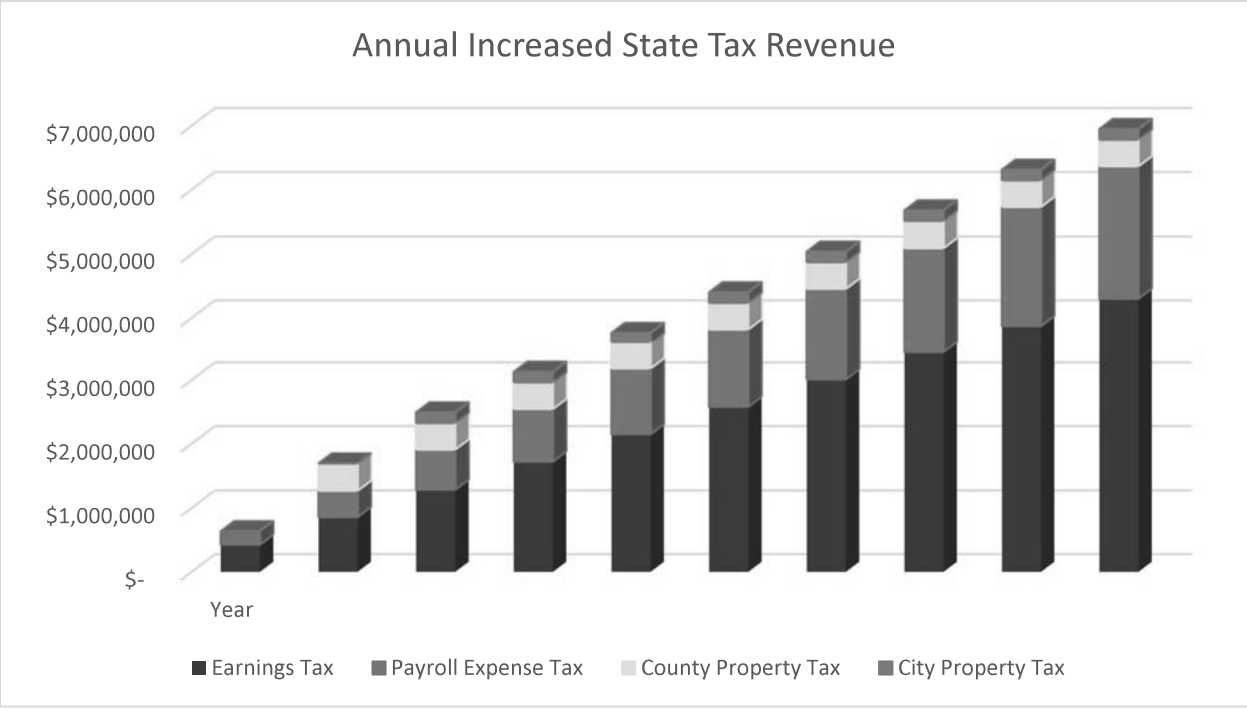
[6] St. Louis County 2017 CAFR, Pg. 182.
[7] Auditor's 2017 Rate Report, Appendix VII, Pg. 108.
[8] St. Louis City 2018 CAFR, Table 7, Pg. 208.

Under the policy recommendation, in 2024, when the County property tax would replace the City's county purposes property tax, the classes of property will become relevant. The City 2018 CAFR reports classifications of property and the assessed values thereof.[9] These values are used to apply the reduced County property tax rates provided in the analysis in Section III.A. above to the relevant class of property (with manufacturer's machinery tools and equipment added to personal property classification). The analysis does not factor in tax-exempt property, since sufficient information is not provided in the CAFR to allocate such amount to the classes of property.

IV. New State Revenues

Based on the foregoing analysis and as reflected in the enclosed materials, the phase-out of the earnings tax and payroll expense tax and the reduction in property tax would result in new state revenues beginning in 2023 and increasing each year until 2032. The tables below summarize the new state revenue each year resulting from the policy recommendation.

	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032
Additional State Tax Revenue	$636,695	$1,690,146	$2,491,446	$3,128,142	$3,764,837	$4,401,533	$5,038,228	$5,674,923	$6,311,619	$6,948,314



[9] St. Louis City 2018 CAFR, Table 5, Pg. 206.

V. Additional Information

A. Prior Fiscal Notes on Earnings Tax Measures

The above estimate of new state revenue is consistent with prior estimates of new state revenue from the phase-out of the earnings tax over a period of ten years. This additional information is provided merely for comparison, with differences between the present analysis noted below.

For example, Senate Substitute for Senate Bill 575 (2016) would have phased-out the City of St. Louis earnings tax by one-tenth of one percent each year for ten years.[10] Relying on an estimated $160 million annually in earnings tax revenue and a six percent income tax rate, the Oversight Division assumed an increase in state revenue of up to $1.92 million in the first full tax year and up to $9.6 million annually once the tax is fully eliminated.

Unlike the present analysis, this estimate does not apportion the taxes paid between individuals and businesses and does not apply a deduction factor. Therefore, this estimate likely overstates the additional state revenues that would be generated by the earnings tax phase-out. The payroll expense tax was not phased-out as part of the proposal analyzed by the fiscal note, and therefore the fiscal note does not reflect additional state revenue from the phase-out of the payroll expense tax as provided in the Better Together policy recommendation.

The State Auditor's Office similarly reflected a positive impact to state revenues as a result of the ten year phase-out of the earnings tax.[11] The State Auditor's fiscal note for an initiative petition related to the earnings tax in St. Louis and Kansas City adopted in November 2010 noted that in 2008, the City of St. Louis collected $174.9 million annually in earnings tax and the City of Kansas City collected $202.5 million annually, for a total of $377.4 million in annual earnings taxes paid. The Missouri Department of Revenue reported that $105.9 million in deductions were claimed for earnings taxes in St. Louis and Kansas City in tax year 2008. Assuming a 4.5-percent effective individual income tax rate, the Office of Administration estimated a $4.8 million annual increase in state revenues when fully implemented, and a $500,000 increase in state revenues in the first year of the phase-out. Accordingly, the fiscal summary issued by the Auditor and presented to the voters indicated that if the earnings tax was fully-phased out, "[r]educed earnings tax deductions could increase state revenues by $4.8 million."

Unlike the present analysis, this estimate does not apportion the taxes paid between individuals and businesses and therefore likely understates the additional state revenues that would be generated by the earnings tax phase-out. The payroll expense tax was not phased-out as part of the proposal analyzed by the fiscal note, and therefore the fiscal note does not reflect the additional state revenue from the phase-out of the payroll expense tax provided in the Better Together policy recommendation.

B. OA-B&P Response to 2020-039

In its fiscal note response to a prior initiative petition seeking to enact the Better Together policy recommendations (IP 2020-039), the Office of Administration Division of Budget and Planning (OA-B&P) estimated that the Better Together policy recommendations could increase state revenues by $3.2 million once fully implemented. However, OA-B&P assumed that the phase-out of the earnings tax and payroll expense tax would occur over a period of twenty years, rather than over a period of ten years as provided in the language of the policy recommendations. Specifically, the language of the policy recommendation requires the one percent earnings tax to phase out by one-tenth-of-one percent annually for ten years pursuant to existing law, *see* Section 92.015, RSMo., and the one half-percent payroll expense to phase out by one-twentieth of one percent annually over ten years.[12] Based on its assumption that the phase-out was over a 20-year period rather than a 10-year period, OA-B&P reflected an annual increase in state revenues over a period of 20 years from 2022 through 2042, rather than over a 10-year period from 2022 through 2032.

In addition to the longer phase-out period assumed, the OA-B&P fiscal note response also understated the positive impact to state revenue by failing to account for the distinction between individual and business taxpayers, both of whom pay the earnings tax. As discussed above, during FY 2018, the earnings tax revenue base was $3,787,500,000 for businesses and $14,558,200,000 for individuals, which equates to an apportionment of approximately 20.65% business and 79.35% individual. This apportionment affects state tax revenues as individuals who pay the tax report the payment as an itemized deduction on their tax returns. However, a business that pays the tax treats the tax as an expense, which affects the net income of the business. Accordingly, applying a deduction rate to the entire earnings tax, as the OA-B&P fiscal note response does, fails to recognize that a portion of the tax is not required to be itemized in order to impact the income of taxpayers and thereby impact state revenues. The methodology discussed above and reflected in the supporting materials recognizes the apportionment between individuals and businesses in determining state revenue impact by applying a deduction rate to the tax paid by individuals, while not applying a deduction rate to the tax apportioned to businesses.

There are a number of additional distinctions between the present analysis and the OA-B&P response. First, unlike the OA-B&P analysis, the present analysis uses statutory rates of tax recognizing that a portion of the businesses paying the tax are corporations based on the Department of Revenue's apportionment between individual and corporate tax returns. Second, the OA-B&P response does not distinguish between the positive state revenue impact from the earnings tax and payroll expense tax, which further understates the estimated new state revenues. Unlike the earnings tax, which is largely assessed against individual earnings, the payroll expense tax is assessed based on the payroll expenses of businesses. As such, the payroll expense tax is a business cost that would reduce the income of the business and is not a separate itemizable deduction of an individual. Accordingly, no deduction rate should be applied to the payroll

[12] *See* Article VI, Section 30.7(2)(a) ("Upon the failure to submit any question to voters with respect to the continued levy or imposition of any tax on earnings, such tax shall be reduced in *the manner provided by law*, and any tax on payroll expense levied or imposed by a municipality prior to the effective date of this section shall be reduced by one-twentieth of one percent annually until such tax is eliminated.") (emphasis added).

expense tax reduction, and, by doing so, the OA-B&P fiscal note response understates the positive state revenue impact of the Better Together policy proposal.

Finally, the OA-B&P response understates the additional state revenue generated by the Better Together policy recommendation because it does not address the required property tax reductions and the additional state revenues such reductions would generate.

Assumptions:

1. Earnings Tax Revenue Base as reported in St. Louis City FY 2018 CAFR, Table 9 of Statistical Section. Such amounts are constant throughout the term and are not adjusted to reflect inflation.
2. Percentage of Earnings Tax Revenue reported by individuals or business based on FY 2018 Revenue Base as reported at St. Louis City FY 2018 CAFR, Table 9 of Statistical Section.
3. Deductions are based on the same proportion of deductions to the earnings tax per the State Auditor November 2010 Note.
4. 2018 Individual Income Tax Rate is the adjusted rate per RSMo. §§143.011.1 and 143.011.2. Thereafter, the rate is the rate provided per §143.011.3 without additional adjustments.
5. Percentage of Income Tax Returns of Individuals and Corporations based on Missouri DOR Financial and Statistical Report FYE June 20, 2017, Income Tax Summary of Activities.
6. 2018 Corporate Tax Rate is per RSMo. §143.071.2 and 2020 and thereafter is based on §143.071.3.
7. State Tax Revenue impact will be recognized in the year following the taxation. Summary information accounts for such delay by reporting the impact the year following the calculations above.

Assumptions:

1. Earnings Tax Revenue Base as reported in St. Louis City FY 2018 CAFR, Table 9 of Statistical Section. Such amounts are constant throughout the term and are not adjusted to reflect inflation.
2. Percentage of Earnings Tax Revenue reported by individuals or business based on FY 2018 Revenue Base as reported at St. Louis City FY 2018 CAFR, Table 9 of Statistical Section.
3. Deductions are based on the same proportion of deductions to the earnings tax per the State Auditor November 2010 Note.
4. 2018 Individual Income Tax Rate is the adjusted rate per RSMo. § §143.011.1 and 143.011.2. Thereafter, the rate is the rate provided per §143.011.3 without additional adjustments.
5. Percentage of Income Tax Returns of Individuals and Corporations based on Missouri DOR Financial and Statistical Report FYE June 20, 2017, Income Tax Summary of Activities.
6. 2018 Corporate Tax Rate is per RSMo. §143.071.2 and 2020 and thereafter is based on §143.071.3.
7. State Tax Revenue impact will be recognized in the year following the taxation. Summary information accounts for such delay by reporting the impact the year following the calculations above.

Better Together Policy Recommendations
Analysis of Local Government Savings

Executive Summary

Better Together's policy recommendation will result in significant savings in local government spending in the St. Louis region, beginning with savings of up to $55 million annually in 2023 and increasing to savings of up to $1 billion annually by 2032.

The enclosed analysis demonstrates savings to local governments over the ten-year period post-reorganization (2023 through 2032). The components of this savings include reductions in expenditures and surplus revenues over expenditures. During that period, the Metro City would reduce expenditures by up to $3.2 billion versus the current trend of expenditures over the same time period. In addition, over the same period, the Metro City would generate surplus revenues of $1.7 billion. This would result in a total savings to local governments over the ten-year period of up to $4.9 billion.

The following is a summary of the methodology used in analyzing savings to local governments pursuant to Better Together's policy recommendation.

Key Takeaways

- The Metro City, St. Louis Municipal Corporation, and Municipal Districts will have excess revenues over expenditures following reorganization, even with the phase-out of the earnings tax, payroll expense tax, and reduction in property taxes.

- During the first-year post-reorganization (2023) savings are estimated at up to $55 million based on the conservative assumptions set forth in the accompanying fiscal analysis.

- Because services within the former City of St. Louis will be provided by the Metro City, the St. Louis Municipal Corporation will have the revenue capacity to accelerate the satisfaction of outstanding obligations and debt, including through a refinancing or accelerated debt payments, which would result in additional savings in interest and carrying costs.

- The approximately $351 million in expenditures estimated for Municipal Districts is projected to decrease over time as outstanding obligations are satisfied. As with the St. Louis Municipal Corporation, this is expected to result in additional savings to local governments through the reduction in interest and carrying costs. It will also make additional sales and use tax revenue available to the Metro City to support the provision of general district services.

- The Metro City is estimated to have sales tax revenues in excess of $1 billion by 2025.

- As outstanding obligations are satisfied and continued efficiencies and economies of scale are realized, including through attrition of employees, the consolidation of services, and the implementation of state-of-the-art technology, revenues to the Metro City are expected to exceed expenditures by up to $342 million by 2032.

Savings

Based on modest 1% annual expenditure reduction above inflation, the Metro City will realize an initial reduction in expenditures and surplus of $55 million in 2023. The Metro City will achieve these savings despite additional expenditures necessary to ensure compliance with state law regarding appropriation to a 3% emergency fund and to fund the initial year operating costs of the St. Louis Fire Protection District. The St. Louis Fire Protection District is projected to increase expenditures by $21 million over the status quo. Revenues are available to cover these additional expenditures, while still leaving the Metro City with revenues in excess of expenditures and savings of up to $55 million.

Savings for local governments will reach as much as $250 million annually in 2026, and up to $1 billion annually by 2032. Even with Municipal Districts continuing to spend approximately $350 million annually and fire protection districts continuing to spend $300 million annually, Better Together's policy recommendation would capture much of the estimated overspend in government services compared to peer regions identified in Better Together's prior research—between $750 million and $1 billion annually.[1]

The enclosed analysis demonstrates savings to local governments over the ten-year period post-reorganization (2023 through 2032). The components of this savings to local governments include both reductions in expenditures and surplus revenues over expenditures. During that period, the Metro City would reduce expenditure by up to $3.2 billion, versus the current trend of expenditures over the same time period. In addition, over the same period, the Metro City would generate surplus revenues of $1.7 billion. This would result in a total savings to local governments over the ten-year period of up to $4.9 billion.

Better Together's regional spending comparison report showed that residents of the St. Louis region spend $1,912.84 per capita to deliver services.[2] To provide context, Better Together compared this cost to the budgets of metropolitan peers Louisville (KY) and Indianapolis (IN). Both Louisville and Indianapolis were at one time fragmented but have since consolidated their city and county governments. This research revealed that the per capita cost to fund municipal services in Indianapolis-Marion County was $1,208.11 and $1,094.76 in Louisville-Jefferson County.

By 2032, the Metro City will expend $2,170,858,488 annually on the provision of services in the region, a per capita cost of $1,657.16. This represents a per capita annual savings of $255.68. In 2032, a family of four would save $1,022.72 compared to status quo spending.

Solvency: Revenues Over Expenditures

In the status quo, expenditures are increasing by at least 2% annually due to inflation. The St. Louis Metro City will achieve modest cost savings of 3% annually through the consolidation of services, attrition, and implementation of technology - outpacing inflation to generate a net reduction in local government expenditures of at least 1% annually. This modest annual savings

[1] *See* Report and Recommendations of the City-County Governance Task Force.
[2] *See id.*

leads to increased revenues in excess of expenditures, which can be used to accelerate the servicing and retirement of debt and similar financing obligations.

Status Quo Revenues

As detailed in the enclosed materials, local governments in the City and County collected approximately $2.4 billion in revenues in 2017. Due to the current fragmented government structure, this revenue is divided among the following local governments:

- City of St. Louis: $790 million
- St. Louis County: $700 million
- Municipalities: $730 million
- Fire Protection Districts: $200 million

Better Together's 2017 regional spending comparison showed $2.5 billion in combined spending among the 90 local governments providing municipal services to the St. Louis region, as well as the 23 fire protection districts.[3]

Transition Revenues

Under Better Together's policy recommendation, during each year of the Transition Period (January 1, 2021 through December 31, 2022), revenues from current taxes, licenses, and fees of the City of St. Louis, St. Louis County, and the 88 municipalities would be distributed by the Metro City to the Municipal Districts as required for satisfaction of outstanding obligations and for providing services. Estimated distributions are based on the 2017 Comprehensive Annual Financial Reports (CAFRs) for the Municipalities and the 2017 actual expenditures of the City and County and rely on the following assumptions:

- 2% increase in property tax per standard adjustment/new construction;
- $100 million in additional sales tax revenue to reflect a full year of revenues generated by Prop P in the City and County and an annual 1% growth in sales tax;
- A 20% reduction in Court Fines & Fees due to consolidation of municipal courts;
- The initial one-tenth of one-percent phase-out of the earnings tax and the initial one-twentieth of one-percent phase-out of the payroll expense tax beginning in 2022.

Post-Reorganization Revenues

Post-reorganization (January 1, 2023 and thereafter), revenues from taxes, licenses, and fees of the former City of St. Louis, St. Louis County, and 88 municipalities would be distributed to the Municipal Districts and the St. Louis Municipal Corporation as required for the satisfaction of outstanding obligations and as necessary for services provided by Municipal Districts. In addition, all revenues from property taxes levied solely within the territory of a Municipal District will be distributed to the Municipal District. Municipal districts will also be authorized to levy property taxes or special assessments, levy and collect utility gross receipts taxes, make charges for services, and receive investment income.

---

[3] *See* Report and Recommendation of the City-County Governance Task Force.

St. Louis Metro City Revenues - Assumptions

- 2% annual increase in property tax per standard adjustment/new construction;
- 1% annual growth in sales tax revenues;
- One-tenth of one percent annual phase-out of earnings tax and one-twentieth of one-percent annual phase out of payroll expense tax;
- One-time 50% reduction of revenue generated by county property tax levied in the former County (approximately $24 million reduction in property taxes);
- Beginning in 2024, replacing the county purposes property tax levy in former City with the lowered general revenue levy within former County (approximately $10 million reduction in property taxes);
- Continued reduction in Court Fines & Fees, with amounts generated in excess of costs distributed to school districts.

Distributions to Municipal Districts - Assumptions

- 2% annual increase in property tax per standard adjustment/new construction;
- Declining sales tax distributions over time as outstanding obligations are satisfied and only sales tax revenues necessary for providing municipal district services are distributed as general district services are assumed by the Metro City.
    - Sales tax revenues necessary for Municipal Districts to provide municipal district services are estimated at approximately $63 million annually.

Distributions to St. Louis Municipal Corporation – Assumptions

- 2% annual increase in property tax per standard adjustment/new construction;
- Declining sales tax revenues distributed to the Municipal Corporation as obligations are satisfied over time;
- One-tenth of one percent annual phase-out of earnings tax and one-twentieth of one-percent annual phase-out of payroll expense tax.

Metro City Expenditures

To demonstrate expenditures and savings, Better Together developed a pro forma budget for the Metro City. Assumptions represent a conservative allocation of greater than or equal to the anticipated cost. Subsequent year budgets assume annual savings of 3%, offset by inflation at a rate of 2%. The specific areas of the Metro City budget targeted for savings would be determined by elected officials of the Metro City during the annual budget process.

Municipal District Expenditures

Municipal Districts will continue to provide municipal services such as parks and recreation, fire protection (for Municipal Districts operating a fire department), trash removal, maintenance of facilities related to municipal district services, and general administration. Municipal Districts may also continue to provide a general district services until such service is provided by the Metro City within the Municipal District. Expenditures reflect the newly-limited authority of Municipal Districts.

- Over time, it is anticipated that Municipal Districts operating a municipal fire department may discontinue doing so and instead contract with neighboring departments or become part of neighboring fire protection districts.

- Expenditures for general administration are likely to decrease over time given the newly-limited authority of Municipal Districts. For example, as reported in Better Together's General Administration Study, Municipal Governance and Management (January 2016), approximately $6 million was expended in 2015 on salaries for city managers, administrators, and clerks throughout the 88 municipalities.[4]

Expenditure Comparison

Based on a comparison of status quo expenditures and expenditures during the first-year post-reorganization, an estimated savings as much as $55 million would be realized during 2023.

- The expenditure comparison also reflects an $21 million increase in fire protection district expenditures to reflect the creation of the St. Louis Fire Protection District. This estimate is 33% more than the City of St. Louis Fire Department's expenditure, which is necessary to account for the district's operation as an independent political subdivision, requiring administrative services such as human resources, legal, accounting, facilities management, etc. The district's operations will be funded out of a dedicated property tax levy and fee revenues, but until such time as voters approve a property tax levy for the district, the Metro City will distribute revenues collected from within the former City to support the district.

- The expenditure comparison also reflects a distribution of $47.3 million to the Metro City's emergency fund as required by state law.

Municipal Corporation Debt Service

- There will be a greater capacity to accelerate the satisfaction of outstanding obligations, particularly within the former City, due to the provision of general district services on a regional basis. This greater capacity is expected to reduce debt-related expenditures over time.
- The $952 million in total outstanding debt is based on the City's FY19 Annual Operating Plan.

[1] Reflects 2% Annual Inflation

[2] Assumes Metro City will achieve annual savings of 3%, outpacing 2% inflation and resulting in a 1% decrease in annual spending.

[3] City: FY18 Cash Basis Governmental Funds
County: FY17 Cash Basis Governmental Funds
Municipalities: 16-17 CAFRs

[4] Includes "Other" & "Miscellaenous"

[5] Includes:
Other: $2,755
PS Pensions: $44,674

[6] Includes:
Debt Service: $67,354
Capital Other: $22,418

[7] 2% increase in property tax per standard adjustment/new construction

[8] $89.9 additional sales tax revenue to reflect a full year of revenues generated by Prop P in the City and County and an annual 1% growth in sales tax

[9] 20% reduction in Court Fines & Fees due to consolidation of municipal courts

[10] One-tenth of one-percent phase-out of the earnings tax beginning in 2022

[11] One-twentieth of one-percent phase-out of the payroll expense tax beginning in 2022.

[12] 2% increase in property tax per standard adjustment/new construction

[13] Annual 1% growth

[14] City Municipal Court Revenues multiplied by 4.

$2,340,000 x 4 = $9,360,000

[15] Deducts $9,366,904 to reflect EMS fees of City of St. Louis Fire Department being received by newly created St. Louis FPD

[16] One-tenth of one-percent phase-out of the earnings tax beginning in 2022

[17] One-twentieth of one-percent phase-out of the payroll expense tax beginning in 2022.

[18] See Supplemental Sales Tax Revenue. Dedicated sales taxes for Parks/Stormwater, Fire, Debt Service, Capital Improvements continue to be received by Municipal Districts until obligations they secure are retired or municipal district services to which they relate are no longer provided by the Municipal District.

[19] Municipal Districts will have the authority to assess a charge for service for the provision of services of parks and recreation, community programs, fire services, and other municipal services provided by the Municipal District.

[20] See Supplemental Sales Tax Revenue. Dedicated sales taxes for Parks/Stormwater, Fire, Debt Service, Capital Improvements continue to be received by Municipal Districts until obligations they secure are retired or municipal district services to which they relate are no longer provided by the Municipal District.

City of St. Louis: $42,962,000 based on FY18 Cash Basis

[21] $9,366,904 increase to reflect EMS fees of City of St. Louis Fire Department being received by newly created St. Louis FPD

[22] Municipal Court consolidation occurs in 2022. Cost projection based on City expenditure x 4.

$2,272,000 x 4 = $9,088,000

[23] Reflects Status Quo $215M expenditure with added $84,204,960M expenditure of new STL FPD

STL FPD expenditure derived from STL Fire Department $63M expenditure + 33%

[24] Includes:
City Debt Service: $67,354
City Capital Other: $22,418
City PS Pensions: $44,674

[25] City of St. Louis Annual Operating Plan FY19, p.A-5

Total Outstanding Debt: $1.7Billion
44% Revenue Bonds

56% of $1.7B = $952M

[26] Distributions to Municipal Corporation for Municipal Corporation Obligations less the required debt payment.

Jefferson City, MO 65101

RE: Initiative Petition 2020-042
Supplemental Submission by Proponent Unite STL

Dear Auditor Galloway:

We are providing this supplemental information regarding the positive fiscal impact of Initiative Petition 2020-042 (hereinafter "the proposed measure") to the Police Retirement System of St. Louis (hereinafter "PRS"), its members and beneficiaries.

As described in greater detail in our initial submission, the proposed measure ensures that all outstanding obligations as of the effective date of the amendment remain with the taxpayers incurring the obligation, but also requires that the Metro City distribute to the Municipal Districts or the St. Louis Municipal Corporation all revenues necessary to satisfy any such obligations. While this submission specifically addresses outstanding obligations of the City of St. Louis with respect to PRS, this structure applies equally to all outstanding obligations incurred prior to the effective date of the proposed measure.

As indicated in the fiscal analysis provided with initial submission, more revenue will be available to satisfying outstanding obligations of PRS than would otherwise be available today. Today, the City's annual payment to PRS required by Section 86.350, RSMo is made solely from City revenues. However, City revenues are currently devoted to providing various services which, under the proposal, would instead be provided by the Metro City. This means that services currently funded solely by City taxpayers would instead be funded by revenues generated throughout the Metro City, allowing a greater proportion of the revenue generated within the City

to be directed toward outstanding obligations of the City, including the required annual PRS payment.

The proposal would also benefit PRS by making the proportion of the required PRS payment attributable to benefits for employees transferred to the Metro City the obligation of the Metro City. This ongoing obligation would be funded not from revenues generated solely within the former City, as would be the case today, but would instead be funded by revenues generated throughout the Metro City, providing a new and significantly larger revenue source than what is available to PRS today from City revenues alone.

The proposed measure provides the following structure to ensure that the required PRS payment is made by the St. Louis Municipal Corporation with respect to benefits accrued prior to the effective date and by the Metro City with respect to benefits earned by PRS members through their employment with the Metro City.

- The proposed measure continues all outstanding obligations of the City, including "any obligation related to employee benefits, including without limitation, pension, retirement, disability, death, medical, life insurance, and similar benefits for employees, eligible dependents, and beneficiaries," first with the St. Louis Municipal District, *see* Section 30.3(1)(b), and then with the St. Louis Municipal Corporation, *see* Section 30.4(1)(b). Included within the foregoing is the City's obligation under Section 86.350, RSMo to make the annual payment to PRS.

- Under the proposed measure, the St. Louis Municipal Corporation "shall continue to be held responsible for any such outstanding obligation to the same extent as the municipal district within the territory" of the former City, *see* Section 30.4(1)(b), just as its predecessor the St. Louis Municipal District "shall continue to be held responsible for any such outstanding obligation to the same extent as the municipality immediately prior to the effective date of this section." Section 30.3(1)(b). These provisions ensure the St. Louis Municipal Corporation remains obligated to make the City's required payment under Section 86.350, RSMo with respect to benefits accrued prior to the effective date.

- Under the proposed measure, the Metro City is required to distribute funds to the St. Louis Municipal Corporation in the manner and for the purpose provided for a Municipal District; one such purpose is for the satisfaction of any outstanding obligations incurred by the City prior to the effective date. *See* Section 30.4(b); 30.5(2)(a)-(b)(i). The Metro City is required to make this distribution from funds generated within the territory of the St. Louis Municipal Corporation, regardless of the source from which such funds are derived. *See* Section 30.4(b); 30.5(2)(a)-(b)(i). These provisions ensure that while outstanding obligations related to PRS remain the responsibility of the St. Louis Municipal District and, after the transition period, the St. Louis Municipal Corporation, the Metro City is obligated to distribute the revenues generated in the former City required to satisfy any such obligation, including for the St. Louis Municipal Corporation's portion of the PRS payment.

- The proposed measure protects all pension benefits vested as of the effective date and requires all such benefits to be paid:

> Nothing herein shall deprive any person of any vested, non-forfeitable, and contractual right or privilege to retire or to retirement or pension benefits, including, without limitation, disability and death benefits, if any, earned prior to the effective date of this section. All vested, non-forfeitable, and contractual rights, protections, and privileges of employees, eligible dependents, and beneficiaries in any retirement fund or pension system related to the county of St. Louis or a municipality[1] as of the effective date of this section shall continue unimpaired until all benefits due such employees, eligible dependents, and beneficiaries have been paid.

See Section 30.11(4)(a). This protection is enforced through the mandatory duty of the Metro City to distribute all revenues generated within the St. Louis Municipal Corporation required to satisfy any outstanding obligation, which includes obligations related to pension benefits. *See* Sections 30.3(1)(b), 30.4(1)(b); 30.5(2)(a)-(b)(i).

- In addition to protecting pension rights vested prior to the effective date, the proposal also protects the rights of current employee members—vested and non-vested—by providing that upon transfer to the Metro City, all employee members remain in PRS and continue to earn service credit in PRS during their employment with the Metro City:

> Employee members of a retirement fund or pension system who are transferred to the metropolitan city . . . pursuant to this section shall remain members of and continue to earn service credit toward the benefits of such retirement fund or pension system, including, without limitation, disability and death benefits, during their employment with the metropolitan city.

Section 30.11(4)(b). This provision ensures that PRS employee members who are vested remain vested after their transfer, and PRS employee members who are not yet vested keep their service credit and continue earning service credit through their employment with the Metro City. Protections for current employee members are further reinforced by the provision automatically transferring employees to the Metro City upon the Metro City's assumption of a general district service (e.g. policing) within the territory of the former employer, by requiring that the employees transfer "with seniority, rank, compensation, and accrued benefits intact. . ." Section 30.11(2)(a).

- One of the most significant benefits of the proposed measure to PRS is the requirement for the Metro City contribute to PRS that portion of the statutorily-mandated annual payment attributable to benefits earned by transferred employees through their employment with the Metro City.

> The metropolitan city . . . shall contribute proportionately to any such retirement fund or pension system for each such employee member with respect to their employment with the metropolitan city . . . as required by law or ordinance, but any

[1] The City of St. Louis is defined as a "municipality" under the proposal. *See* Section 30.1(1)(h).

> contribution or portion thereof attributed to benefits accrued prior to the transfer of such employee to the metropolitan city . . . shall remain an outstanding obligation satisfied solely from funds generated within the territory in which such obligation was incurred.

See Section 30.11(4)(b). By requiring the Metro City to assume this portion of the annual PRS payment, a new revenue source would become available by as early as 2021 to support PRS on a going forward basis—revenues generated throughout the Metro City. This new revenue source will be available long after the earnings tax and payroll expense tax has finally phased-out in 2032. In addition to revenues generated throughout the Metro City to fund the portion of the PRS payment attributed to employment with the Metro City, revenues generated within the former City would continue to be distributed to the St. Louis Municipal Corporation for the portion of the PRS payment attributable to benefits accrued prior to the effective date.

- Under the proposed measure, the St. Louis Municipal Corporation will also continue as a taxing subdistrict of the Metro City in which the Metro City may levy or impose a tax license, fee, or special assessment to ensure the satisfaction of any outstanding obligation (including pension obligations) incurred by the City prior to the effective date. *See* Sections 30.4(3)(a)-(b); 30.5(3)(ii). Such tax, license, fee, or special assessment would be in addition to taxes, licenses, and fees levied solely within the territory of the former City today, and would provide an additional resource to support the portion of the PRS payment attributed to benefits accrued prior to the effective date.

- Finally, the proposed measure reserves the Missouri General Assembly's authority with respect to pension and retirement systems created by state law such as PRS. *See* Section 30.11(4)(d). In addition, the proposed measure makes clear that the General Assembly may regulate the Metro City to the same extent as any other charter city or charter county. *See* Section 30.11(8). Accordingly, the General Assembly would continue with the authority it has to today to legislate with regard to the obligation of the Metro City to distribute to the St. Louis Municipal Corporation the revenues required for its portion of the PRS payment and the obligation of the Metro City with respect to the PRS payment for benefits earned by employees transferred to the Metro City but who remain members of PRS during such employment.

We hope that you find this additional information helpful in understanding the benefits of the proposal to PRS, its members, and its beneficiaries. Please do not hesitate to contact me if you have any questions or if there is any additional information we can provide.

Sincerely,

Chris Pieper

Fiscal Note Summary

Individual St. Louis County municipalities expect decreased revenues to exceed savings with a total unknown impact. The overall savings for the new metropolitan city is unknown but estimated to be as much as $1 billion annually by 2032. State revenue is estimated to increase between $2.5 million to $7 million annually by 2032.

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2020-041)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on February 1, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 5, 6, 7, 9, 11 and 20(d), to read as follows:

III Section 3. [State demographer established and selected — e] Election of representatives [— legislative districts established — congressional district commission]. — [(a) There is hereby established the post of "Nonpartisan State Demographer". The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing legislative redistricting maps on the basis of each federal census for presentation to the house apportionment commission and the senatorial apportionment commission.]

[(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent legislative redistricting map to the house apportionment commission or the senatorial apportionment commission.]

[(c)] The house of representatives shall consist of [one hundred sixty-three] ten members from each congressional district elected at each general election [and apportioned as provided in this section] for a term of two years.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of legislative districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. Legislative districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.]

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

III Section 5. Senators — number [— senatorial districts]. — The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

III Section 6. Qualifications of senators. — Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for [three] two years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

III Section 7. [Senatorial districts established — senatorial apportionment commission] Qualifying for the ballot – apportionment of representatives and senators – filling vacancies. — [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.

(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

(g) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(h) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

III Section 9. Apportionment of representatives. — Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[III Section 10. Basis of apportionment — alteration of districts. — The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

III Section 11. Time of election of senators and representatives. — The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[III Section 14. Writs of election to fill vacancies. — Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

III Section 20(d). Severability provision. — If any provision of sections 2, 3, 5, 6, 7, 9, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2020-040)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on January 31, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 4, 5, 6, 7, 9, 11, and 20(d) to read as follows:

III Section 3. State demographer established and selected — [election of representatives —] [legislative] congressional districts established [— congressional district commission]. — (a) There is hereby established the post of "Nonpartisan State Demographer". After each decennial census, or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction of the United States, it shall be the duty of the non-partisan state demographer to assist the governor in his or her duty to lay off the state into as many districts as shall be equal to the number of representatives to which this state shall then be entitled. The nonpartisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing [legislative] congressional redistricting maps on the basis of each federal census for presentation to the [house apportionment commission and the senatorial apportionment commission] governor for his or her approval. In the event the governor and the non-partisan state demographer do not concur with regard to how the districts should be laid off, the plans of both the governor and the non-partisan state demographer shall be subject to a referendum, with the voters of the state choosing between the plans.

(b) The nonpartisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the nonpartisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the nonpartisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the nonpartisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The nonpartisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the nonpartisan state demographer position, an individual shall not have served in a partisan, elected position for four years prior to the appointment. The nonpartisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent [legislative] congressional redistricting map to the [house apportionment commission or the senatorial apportionment commission] governor.

[(c) The house of representatives shall consist of one hundred sixty-three members elected at each general election and apportioned as provided in this section.]

(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer shall begin the preparation of [legislative] congressional districting plans and maps using the following methods, listed in order of priority:

a. Districts shall be established on the basis of total population. [Legislative] Congressional districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census;

b. Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. **"Partisan fairness"** means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. **"Competitiveness"** means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the nonpartisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the nonpartisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. **"Wasted votes"** are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the nonpartisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the nonpartisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The nonpartisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable;

c. Subject to the requirements of paragraphs a. and b. of this subdivision, districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous;

d. To the extent consistent with paragraphs a. to c. of this subdivision, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county;

e. Preference shall be that districts are compact in form, but the standards established by paragraphs a. to d. of this subdivision take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

[(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.]

[(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

III Section 4. Qualifications of representatives – election of representatives. — The house of representatives shall consist of ten members from each congressional district elected at each general election. Each representative shall be twenty-four years of age, and next before the day of his election shall have been a qualified voter for two years and a resident of the county or district which he is chosen to represent for one year, if such county or district shall have been so long established, and if not, then of the county or district from which the same shall have been taken.

III Section 5. Senators — number [— senatorial districts]. — The senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

III Section 6. Qualifications of senators. — Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for [three] two years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

III Section 7. [Senatorial districts established — senatorial apportionment commission] Qualifying for the ballot – apportionment of representatives and senators – filling vacancies. — [(a) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the nonpartisan state demographer authorized in Article III, Section 3 shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the house of representatives.]

[(b) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.]

[(c) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the nonpartisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the nonpartisan state demographer provided that such changes are consistent with this section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the house of representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the primary election.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

(g) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(h) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

III Section 9. Apportionment of representatives. — Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of Congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[III Section 10. Basis of apportionment — alteration of districts. — The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

III Section 11. Time of election of senators and representatives. — The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[III Section 14. Writs of election to fill vacancies. — Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

III Section 20(d). Severability provision. — If any provision of sections 2, 3, 5, 6, 7, 9, 10, 11, 19, or 20(c) or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

RE: Petition approval request from Christopher Pieper regarding a proposed constitutional amendment to Article VI (2020-039)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Christopher Pieper on January 28, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article VI of the Constitution is revised by repealing Sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 and adopting one new section to be known as Article VI, Section 30 to read as follows:

1. Definitions.

(1) When used in this section, the following terms shall have the following meanings:

(a) "Effective date of this section" shall mean January 1, 2021, which shall be the effective date of the enactment of Section 30 of this article and the repeal of Sections 30(a), 30(b), 31, 32(a), 32(b), 32(c), and 33 of this article.

(b) "General district service" shall mean any duty, service, or function of the metropolitan city, a county, or a city, now or in the future assigned by law, charter, or ordinance, of the metropolitan city including, without limitation: public health, safety, and general welfare; police, law enforcement, and municipal court; the licensing, taxing, and regulation of businesses, occupations, professions, activities, and things; transportation, infrastructure, and public works; and economic development.

(c) "Mayor" shall mean the mayor of the metropolitan city.

(d) "Metropolitan city" shall mean The Metropolitan City of St. Louis.

(e) "Municipal district" shall mean a municipal district of the metropolitan city, comprising the territory within the municipality immediately prior to the effective date of this section.

(f) "Municipal district service" shall mean any duty, service, or function of the municipality immediately prior to the effective date of this section or in the future assigned to the municipal district by law, charter, or ordinance of the metropolitan city, and which is not otherwise a general district service provided or secured by the metropolitan city within the territory of the municipal district, including, without limitation: fire protection, emergency medical, and related services; parks and recreation; proprietary and enterprise functions of the municipality; and administration of the municipal district.

(g) "Municipality" shall mean any incorporated city, town, or village located wholly within the territory of the city of St. Louis or the county of St. Louis as of January 1, 2019, including the city of St. Louis.

(h) "Special district" shall mean, excluding school districts, any political subdivision, municipal corporation, body corporate and politic, authority, taxing district, taxing subdistrict, public corporation, or quasi-public corporation, other than the county of St. Louis or a municipality, located wholly or partially within the territory in the city of St. Louis or the county of St. Louis immediately prior to the effective date of this section.

(i) "Transition mayor" shall mean the transition mayor of the metropolitan city.

(j) "Transition period" shall mean the period between the effective date of this section and January 1, 2023.

2. Metropolitan City.

(1)(a) Upon the effective date of this section, the territory of the county of St. Louis is extended to embrace the territory heretofore in the city of St. Louis and the county of St. Louis, and the county of St. Louis so expanded shall continue its corporate existence as a new political subdivision, body corporate and politic, and municipal corporation, which is hereby created, with

its name "The Metropolitan City of St. Louis" and its seat of government within the territory heretofore in the city of St. Louis.

(b) All rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the county of St. Louis, including, without limitation, the payment of principal and interest on indebtedness, and any obligations related to employee benefits, including, without limitation, pension, retirement, medical, life insurance, and similar benefits for employees and beneficiaries, shall continue without impairment with the metropolitan city by operation of this section to continue the corporate existence of the county of St. Louis as the metropolitan city.

(2) The metropolitan city shall be a metropolitan city form of government, which is hereby created and which shall possess all the powers and privileges of both a constitutional charter county and a constitutional charter city, including any city not within a county. The powers and privileges of the metropolitan city shall include, without limitation, all powers and privileges of the county of St. Louis and of any municipality immediately prior to the effective date of this section, and all powers and privileges now or in the future granted to the metropolitan city, to a county, or to a city under this constitution and the laws of this state. Such powers and privileges shall be cumulative and shall be construed broadly in favor of the metropolitan city.

(3) The metropolitan city shall be governed by a charter. Notwithstanding any provision of law or this constitution, the initial charter of the metropolitan city shall be the charter of the county of St. Louis as of January 1, 2019, except as otherwise provided in this section. The specific mention of or the failure to mention a particular power or privilege in the initial charter shall not limit in any way the powers and privileges granted herein to the metropolitan city. The initial charter shall be liberally construed to effectuate this section and in harmony therewith. The initial charter may be amended in the manner provided in this section and, following the transition period, in the manner provided by charter, provided that any amendment submitted by ordinance shall require the affirmative vote of two-thirds of the qualified electors voting thereon.

(4)(a) Unless otherwise provided by charter following the transition period, there shall be no elective officers of the metropolitan city other than the mayor, the members of the metropolitan council, the assessor, and the prosecuting attorney. Elective officers shall be qualified voters of the metropolitan city and shall possess such additional qualifications provided by charter. Except as otherwise provided in this section, elective officers of the metropolitan city shall be nominated and elected in the manner provided in the election laws for state and county officers. No person duly serving in any office of the county of St. Louis or of any municipality immediately prior to the effective date of this section shall be disqualified from candidacy for elective office of the metropolitan city or of a municipal district, but shall forfeit such office upon assuming elective office of the metropolitan city or of a municipal district.

(b) The salary for members of the metropolitan council shall be as provided for members of the board of aldermen of the city of St. Louis immediately prior to the effective date of this section and as may be fixed by ordinance. The salary for all other elective officers of the metropolitan city shall be as provided for corresponding officers of the county of St. Louis immediately prior to the effective date of this section and as may be fixed by ordinance.

(5)(a) Except as otherwise provided in this section with respect to the transition period, the legislative power of the metropolitan city shall be vested in the metropolitan council and shall include the exercise of legislative power throughout the territory of the metropolitan city,

including within the territory of any municipal district, pertaining to any and all duties, services, and functions now or in the future assigned to the metropolitan city, to a county, or to a city.

(b) The metropolitan council shall consist of thirty-three members, elected for terms of four years by the qualified voters of the districts in which they reside, except that members initially representing even-numbered districts shall be elected for terms of two years to provide for staggered terms. Members shall be elected at the general election in 2022, and so on at succeeding elections, and shall take office on January first following election. Notwithstanding the foregoing, the members of the county council of the county of St. Louis duly serving as of the effective date of this section shall be entitled to continue service as members of the county council of the county of St. Louis for the term of office for which they were elected or appointed and receive compensation therefor in the exercise of the duties specified in this section.

(c) Members of the metropolitan council shall be elected from districts established in the manner provided in this section.

(i) Before April 1, 2021, the mayor and transition mayor shall jointly appoint a member or members of the faculty, with relevant expertise and without partisan affiliation, of one or more universities located within the metropolitan city to prepare a plan to divide the metropolitan city into districts from which members of the metropolitan council shall be elected. The plan shall include a statement of the boundaries of the initial districts, together with a map of such districts. Districts shall contain as nearly equal population as practicable, shall be compact and contiguous, and shall comply with all requirements of the United States Constitution and federal laws, including, but not limited to, the Voting Rights Act of 1965, as amended. Such districts shall respect boundaries of municipal districts and communities of interest whenever practicable.

(ii) Before September 1, 2021, the plan shall be submitted for adoption, with or without amendment, by the county council of the county of St. Louis and the governing body of the municipal district within the territory heretofore in the city of St. Louis. If both shall fail to adopt identical plans on or before December 31, 2021, the plan as submitted shall be deemed approved as of that date. Upon approval, the plan shall be filed with the official performing the duties of a county clerk and the office or officers charged with conducting elections in the metropolitan city and shall be deemed incorporated into the charter.

(iii) On or before December thirty-first of the year following a federal decennial census, beginning with the first federal decennial census following the transition period, the districts shall be reapportioned, if necessary, in the manner provided in the charter and with the characteristics provided in this section.

(d) At its first regular meeting following the transition period, and every two years thereafter, the members of the metropolitan council shall designate a president and vice-president, whose terms of office shall be for two years.

(e) Any vacancy in the metropolitan council shall be filled by appointment of the president of the metropolitan council. Any person appointed to fill such vacancy shall have the same qualifications otherwise established for the office and shall serve until a successor is duly serving following a special election for the unexpired or full term.

(6)(a) Except as otherwise provided in this section with respect to the transition period, all executive and administrative power of the metropolitan city shall be vested in the mayor, who shall be the chief executive officer of the metropolitan city and shall possess and exercise all the

powers and duties of the chief executive officer of a county and of a city now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial mayor shall be the person duly serving as county executive of the county of St. Louis on January 1, 2019, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The mayor shall be elected at the general election in 2024, and every four years thereafter, and shall take office on January first following election. Except as otherwise provided in this section with respect to the transition period, a vacancy in the office of mayor shall be filled by the president of the metropolitan council, who shall possess and exercise the powers and duties of the office until a successor is serving following a special election for the unexpired or full term. While so holding the office of mayor, a temporary vacancy shall exist in the office of the president of the metropolitan council. The vice-president of the metropolitan council shall hold the office of president of the metropolitan council during any such vacancy, with the right of succession to the office of mayor. Notwithstanding the foregoing, the transition mayor shall possess and exercise the powers and duties of the office of mayor in the event of a vacancy in such office during the transition period. The vacancy in the office of transition mayor thereby created shall be filled by appointment of the transition mayor, now serving as mayor, from a list of no less than three qualified voters nominated by the county council of the county of St. Louis. If the county council of the county of St. Louis shall fail to submit such list within seven days of the vacancy, the office shall be filled by appointment of the transition mayor, now serving as the mayor.

(b) The mayor shall appoint no fewer than four deputy mayors, to serve at the pleasure of the mayor and with such duties as directed by ordinance or executive order, with respect to public health and safety; economic development and innovation; community development and housing; community engagement and equity; and as otherwise designated by charter.

(c) There shall be an assessor of the metropolitan city who shall possess and exercise all the powers and duties of a county assessor now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial assessor shall be the person duly serving as assessor of the county of St. Louis as of January 1, 2019, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The assessor shall be elected at the general election in 2024, and every four years thereafter, and shall take office on January first following election. A vacancy in the office shall be filled by appointment of the mayor, and the person so appointed shall hold office until January first following the next general election at which a successor shall be elected for the unexpired or full term.

(d) There shall be a prosecuting attorney of the metropolitan city who shall possess and exercise all the powers and duties of a prosecuting attorney and the circuit attorney for the city of St. Louis now or in the future granted. Notwithstanding any other provision of law or this constitution, the initial prosecuting attorney shall be the person duly serving as prosecuting attorney of the county of St. Louis on January 1, 2019, who shall assume office upon the effective date of this section and hold office until a successor is duly serving. The prosecuting attorney shall be elected at the general election in 2024, and every four years thereafter, and shall take office on January first following election. A vacancy in the office shall be filled by appointment of the mayor, and the person so appointed shall hold office until January first following the next general election at which a successor shall be elected for the unexpired or full term.

(e) There shall be a metropolitan city counselor appointed by the mayor, with such qualifications provided by charter, who shall serve as the metropolitan city's attorney and

counselor at law and shall possess and exercise all the powers and duties of a county counselor and a city attorney now or in the future granted.

(f) Except as provided in this section, the metropolitan city shall have such departments and offices as established by the county of St. Louis as of the effective date of this section and as may be subsequently established by the metropolitan city. Except for the heads of a department appointed by the majority of the circuit judges as provided by charter, the heads of each department shall be appointed by the mayor and shall assume office upon appointment. Upon the effective date of this section, a board or commission of the county of St. Louis, and which is not the governing body of a special district, shall continue as a board or commission of the metropolitan city, until otherwise provided by charter or by ordinance of the metropolitan city, with the members duly serving holding office until a successor is duly appointed. The members of boards and commissions of the metropolitan city shall be appointed by the mayor, or otherwise as designated by charter, and shall exercise such duties and functions as assigned by law, charter, ordinance, or order.

(7)(a) During the transition period, all executive and administrative power of the metropolitan city shall be vested jointly in the mayor and transition mayor, who shall together constitute the chief executive officer of the metropolitan city and who shall jointly undertake or order the exercise or performance of any power, duty, or function necessary and proper to faithfully execute the orderly administration and implementation of this section. Notwithstanding any provision of law or this constitution, the transition mayor shall be the person serving as mayor of the city of St. Louis on January 1, 2019, who shall assume the office of transition mayor upon the effective date of this section and hold office until January 1, 2023. During the transition period, the transition mayor shall concurrently exercise the powers, privileges, duties, and functions of the chief executive officer of the governing body of the municipal district within the territory heretofore in the city of St. Louis. A vacancy in the office of transition mayor shall be filled by appointment of the mayor from a list of no less than three qualified voters nominated by the governing body of the municipal district within the territory heretofore in the city of St. Louis. If the governing body of the municipal district shall fail to submit such list within seven days of the vacancy, the office shall be filled by appointment of the mayor.

(b) Notwithstanding any provision of law or this constitution, to the extent a power, duty, or function is required to be exercised or performed by the metropolitan city during the transition period, such power, duty, or function may be exercised or performed jointly by the mayor and transition mayor or, at their joint direction, by an official or employee of the metropolitan city or of a municipal district, but shall be deemed exercised or performed by the metropolitan city. Such powers, duties, and functions shall include, without limitation: (i) on or before February 1, 2021, establishing procedures related to the joint exercise and performance of the power, duties, and functions authorized by this section, including, without limitation, a procedure for the resolution of any nonconcurrence among the mayor and transition mayor; (ii) on or before April 1, 2021, making appointments to offices, departments, boards, and commissions, except for officers appointed by a majority of the circuit judges as provided in the charter, with such persons assuming office upon their appointment; (iii) ordering the metropolitan city provide or secure the provision of a general district service within the territory of a municipal district; (iv) administering the budget for each year of the transition period in the manner provided in this section; (v) transferring and assigning the functions and duties of personnel; (vi) entering into contracts and agreements; (vii) transferring and accepting the transfer of property; and (viii) executing any necessary documents or instruments related thereto on behalf of the metropolitan

city. The mayor and transition mayor shall jointly undertake or order the exercise or performance of such powers, duties, or functions pursuant to executive order contemporaneously transmitted to the county council of the county of St. Louis and the governing body of each municipal district.

(c) During the transition period, the mayor and transition mayor shall jointly solicit public comment and, before November 15, 2022, shall jointly present to the public, at meetings called for such purpose, a plan to create, organize, and abolish departments, divisions, bureaus, commissions, boards, offices, and employments, and transfer the functions and duties thereof, as necessary and proper to effectuate this section and to ensure the proper and efficient administration of the affairs of the metropolitan city. The plan shall provide for the exercise of all powers and duties of counties and county officers prescribed by this constitution and laws of the state and shall provide for the exercise of all powers, privileges, duties, and functions of the metropolitan city prescribed in this section, including, without limitation, providing or securing the provision of general district services throughout the territory of the metropolitan city. On or after January 1, 2023, the plan shall be submitted to the metropolitan council and shall take effect within thirty days of submission, unless disapproved by resolution adopted by two-thirds of all members voting in the affirmative, provided that if the plan would affect the department of judicial administration, such plan shall not become effective unless upon the concurrence of a majority of the circuit judges within the metropolitan city. Upon taking effect, the plan shall take the place of and supersede all charter provisions, ordinances, resolutions, rules, regulations, and orders inconsistent therewith.

(d) Notwithstanding any provision of law or this constitution, during the transition period, the county council of the county of St. Louis and the governing body of the municipal district located within the territory heretofore of the city of St. Louis, upon the joint recommendation of the mayor and transition mayor, shall adopt resolutions, ordinances, and orders consistent with this section and its orderly implementation and administration, with such resolutions, ordinances, and orders deemed as on behalf of the metropolitan city upon their adoption by both such bodies and the joint approval thereof by the mayor and transition mayor.

(e) During the transition period, the governing body of a municipal district shall administer the affairs of the municipal district in the manner provided in this section, provided that no municipal district shall incur any new obligation extending beyond the transition period no dispose of its property without the joint approval of the mayor and transition mayor.

(f) During the transition period, it shall be the affirmative duty of any official or employee of the metropolitan city, the county of St. Louis, or a municipal district to cooperate in the orderly administration and implementation of this section under the joint direction of the mayor and transition mayor and to refrain from any action that would impair or frustrate its orderly administration and implementation.

(8) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the powers and duties of any county office of the city of St. Louis or the county of St. Louis shall be deemed exercised or performed on behalf of the metropolitan city. Except as otherwise provided in this section, on or before January 1, 2022, all property, contracts, records, and personnel related to any such county office shall be transferred to the corresponding office of the metropolitan city. Incumbents serving in such offices shall serve the remainder of the term for which they were elected or appointed, subject to any right of resignation, and shall receive compensation therefor in the performance of such duties directed by the metropolitan city.

(9) The entire territory of the metropolitan city shall be a general services district throughout which the metropolitan city shall provide or secure the provision of general district services, including within the territory of any municipal district. Notwithstanding the foregoing, a municipal district shall continue to provide or secure the provision of a general district service on behalf of the metropolitan city until provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city. Except as otherwise provided in this section, property, contracts, records, and personnel of a municipal district related to providing or securing a general district service shall be transferred to the metropolitan city.

(10)(a) The metropolitan city shall enforce its ordinances, resolutions, rules, regulations, and orders throughout its territory. Ordinances, resolutions, rules, regulations, and orders of the county of St. Louis in effect immediately prior to the effective date of this section shall remain effective as ordinances, resolutions, rules, regulations, and orders of the metropolitan city and shall be enforced by the metropolitan city until repealed, modified, or amended by the metropolitan city, except to the extent of any conflict with this section. Charter provisions, ordinances, resolutions, rules, regulations, and orders of any municipality in effect immediately prior to the effective date of this section shall become effective as ordinances, resolutions, rules, regulations, and orders of the metropolitan city as if enacted or promulgated by the metropolitan city and shall be enforced by the metropolitan city with respect to the territory to which they applied immediately prior to the effective date of this section until repealed, modified, or amended by the metropolitan city, except to the extent of any conflict with this section. Notwithstanding the foregoing, during the transition period, a municipal district may, under the direction of the metropolitan city, continue to enforce such ordinances, resolutions, rules, regulations, and orders within its territory, and such enforcement shall be deemed on behalf of the metropolitan city. All ordinances, resolutions, rules, regulations, or orders of the metropolitan city shall be construed to effectuate this section.

(b) The metropolitan city counselor shall review all charter provisions, ordinances, resolutions, rules, regulations, and orders and shall solicit public comments related thereto. By no later than November 15, 2022, the metropolitan city counselor shall issue a report on such modifications and revisions necessary or advisable, including, without limitation, to resolve any conflicts whereby any rights, remedies, entitlements, or the enforcement thereof, cannot reasonably be reconciled. The metropolitan council may adopt the report by ordinance, and, upon adoption, the charter, ordinances, resolutions, rules, regulations, and orders in effect shall be deemed modified to reflect the report so adopted.

(11)(a) Upon the effective date of this section, the jurisdiction of the municipal court for the county of St. Louis shall be extended to the entire territory of the metropolitan city and shall constitute the municipal court for the metropolitan city. The municipal court shall have jurisdiction to hear and determine cases involving violations of ordinances in the manner provided by this constitution or by law, rule, charter, or ordinance. Notwithstanding the foregoing, during the transition period, a municipal court within the metropolitan city immediately prior to the effective date of this section may continue to operate as a division of the municipal court of the metropolitan city, with any act of such division deemed performed on behalf of the municipal court of the metropolitan city. On or before January 1, 2023, property, contracts, records, and personnel of any municipal court within the metropolitan city immediately prior to the effective date of this section shall be transferred to the municipal court of the metropolitan city.

(b) The metropolitan city may authorize the municipal court to operate within divisions and in such locations as are convenient to residents of the metropolitan city and which may correspond with the geographic boundaries of one or more municipal courts immediately prior to the effective date of this section. Except as otherwise provided in this section, the municipal court shall have such municipal judges, and the necessary non-judicial personnel assisting them, as provided by law and ordinance. Unless otherwise provided by ordinance of the metropolitan city respecting a municipal court, the mayor shall appoint, with advice and consent of the metropolitan council, the judges of the municipal court. The metropolitan city shall prescribe by ordinance the tenure and compensation of the judges of the municipal court. Municipal judges and necessary non-judicial personnel shall serve full-time, unless otherwise provided by charter of the metropolitan city, provided that the compensation for any full-time judge of the municipal court shall not exceed the compensation for an associate circuit judge.

(c) The clear proceeds of all penalties, forfeitures, and fines collected by the municipal court shall be distributed annually to the schools of the metropolitan city according to law.

3. Municipal Districts.

(1)(a) Upon the effective date of this section, a municipality shall continue its corporate existence as a municipal district, with its name the term "Municipal District" preceded by the name of the municipality, less any previous designation as to city, town, or village, unless otherwise designated by the municipal district or by law. A municipal district of the metropolitan city, which is hereby created, shall be a political subdivision, body corporate and politic, and municipal corporation, exercising and performing such powers, privileges, duties, and functions of the municipality necessary and proper: (i) to provide or secure the provision of a municipal district service not otherwise provided or secured within its territory; (ii) to provide or secure the provision of a general district service until provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city; and (iii) for the satisfaction of outstanding obligations of any kind incurred by the municipality prior to the effective date of this section.

(b) All rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the municipality, including, without limitation, the payment of principal and interest on indebtedness and any obligation related to employee benefits, including, without limitation, pension, retirement, medical, life insurance, and similar benefits for employees and beneficiaries, shall continue without impairment with the municipal district by operation of this section to continue the corporate existence of the county of St. Louis as the metropolitan city. Except as otherwise provided in this section, the municipal district and the territory therein shall continue to be held responsible for any such outstanding obligation, and any tax, fee, or special assessment levied or imposed for the satisfaction of any outstanding obligation shall continue to be levied or imposed within its territory until such obligation is satisfied. Any property securing an outstanding obligation shall remain the property of the municipal district until such obligation is satisfied. Notwithstanding the foregoing, the metropolitan city may assume any outstanding obligation of the municipal district, provided that no such assumption shall impair any obligation of contract.

(2)(a) The governing body of a municipal district shall be the governing body of the municipality, exercising and performing such powers, privileges, duties, and functions of the governing body of the municipality necessary and proper to effectuate this section and for the proper and efficient administration of the municipal district, including, without limitation, serving the function of a planning commission and board of adjustment to the metropolitan city,

in the manner authorized by the metropolitan city, with respect to zoning ordinances applicable to territory of the municipal district.

(b) Notwithstanding any provision of law or this constitution, the initial governing body shall consist of the members of the governing body of the municipality duly serving immediately prior to the effective date of this section, who shall assume office with the municipal district upon the effective date of this section and hold office until a successor is duly serving following election, beginning with the first general municipal election following the transition period.

(c) Upon the effective date of this section, a board or commission of the municipality, and which is not the governing body of a special district, shall continue as a board or commission of the municipal district, until otherwise provided by the municipal district, by the metropolitan city, or by law, with the members duly serving holding office until a successor is duly appointed in a manner consistent with that of the municipality or as provided by law.

(3) The boundaries of a municipal district shall not be altered except as approved by ordinance of the metropolitan city. Following the transition period, a municipal district may merge or consolidate with one or more municipal districts or may be dissolved as authorized by ordinance of the metropolitan city providing for the transfer of any rights, duties, personnel, property, contracts, assets, liabilities, and obligations and the procedure and effective date for such merger, consolidation, or dissolution. Such ordinance may provide for creation of a new municipal district to assume the powers, privileges, duties, and functions of any municipal districts so subsumed.

4. The St. Louis Municipal Corporation.

(1)(a) On January 1, 2023, the municipal district within the territory heretofore in the city of St. Louis shall continue its corporate existence as a political subdivision and municipal corporation, with its name "The St. Louis Municipal Corporation." The St. Louis Municipal Corporation shall exercise and perform such powers, privileges, duties, and functions of the municipal district necessary and proper: (i) for the satisfaction of outstanding obligations of any kind of the municipal district; and (ii) to provide or secure the provision of a municipal district service not otherwise provided or secured within its territory, if authorized to do so by ordinance of the metropolitan city.

(b) Except as otherwise provided in this section, all rights, duties, personnel, property, contracts, records, assets, liabilities, and obligations of any kind of the municipal district within the territory heretofore in the city of St. Louis, including, without limitation, the payment of principal and interest on indebtedness, and any obligation related to employee benefits, including, without limitation, pension, retirement, medical, life insurance, and similar benefits for employees and beneficiaries, shall continue without impairment with the St. Louis Municipal Corporation by operation of this section to continue the corporate existence of the municipal district as the St. Louis Municipal Corporation. Except as otherwise provided in this section, the St. Louis Municipal Corporation and the territory therein shall continue to be held responsible for any such outstanding obligation, and any tax, fee, or special assessment levied or imposed for the satisfaction of any outstanding obligation shall continue to be levied or imposed within its territory until such obligation is satisfied. Any property securing any outstanding obligation shall remain the property of the St. Louis Municipal Corporation until such obligation is satisfied. Notwithstanding the foregoing, the metropolitan city may assume any outstanding obligation of the St. Louis Municipal Corporation, provided that no such assumption shall impair any obligation of contract.

(2) The governing body of the St. Louis Municipal Corporation shall be comprised of a board of directors of five qualified voters appointed by the transition mayor, with three directors appointed for terms of three years and two appointed for terms of two years. Such initial members shall assume office on January 1, 2023, and shall hold office until a successor is duly appointed by the mayor of the metropolitan city. Notwithstanding the foregoing, the members of the governing body of the municipal district shall serve the remainder of the term of office for which they were elected or appointed, subject to any right of resignation, and receive compensation therefor in the performance of such duties as directed by the governing body of the St. Louis Municipal Corporation.

(3)(a) As provided in this section for a municipal district, the territory of the St. Louis Municipal Corporation shall continue as a taxing subdistrict of the metropolitan city, and the St. Louis Municipal Corporation shall continue as a separate taxing district, provided that it may exercise only such taxing powers of the municipal district authorized for its exercise by ordinance of the metropolitan city.

(b) Unless otherwise provided by ordinance of the metropolitan city, the metropolitan city shall distribute funds to the St. Louis Municipal Corporation in the manner and for the purposes provided in this section with respect to a municipal district and may levy or impose a tax, fee, or special assessment solely within the territory of the St. Louis Municipal Corporation in the manner and for the purposes provided in this section with respect to a tax, fee, or special assessment of the metropolitan city levied or imposed solely within the territory of a municipal district.

(c) Unless otherwise provided by ordinance of the metropolitan city, the St. Louis Municipal Corporation shall be deemed a municipal district for purposes of determining the right to receive, and for the calculation and receipt of, distributions, allocations, remittances, and reimbursements of any kind from the state or United States government, or from any other agency, public or private.

5. Finances.

(1)(a) General district services and the satisfaction of outstanding obligations of any kind of the metropolitan city shall be financed with funds generated throughout the territory of the metropolitan city, including within the territory of any municipal district thereof, or otherwise secured by the metropolitan city. Municipal district services provided or secured by a municipal district within its territory and the satisfaction of outstanding obligations of any kind of a municipal district shall be financed with funds generated within the territory of the municipal district, or otherwise secured by the municipal district.

(b) Notwithstanding any provision of law or this constitution, the metropolitan city shall be empowered to take any and all actions necessary and proper to ensure the satisfaction of outstanding obligations incurred prior to the effective date of this section and to prevent any impairment thereof.

(2)(a) Except as otherwise provided in this section, the tax structure, tax rates, and level of services in effect immediately prior to the effective date of this section shall remain in effect until modified by the metropolitan city. Notwithstanding any provision of law or this constitution, in order to maintain the tax structure, tax rates, and level of services, all taxes, fees, and special assessments levied or imposed by the county of St. Louis or by a municipality shall continue as a tax, fee, or special assessment of the metropolitan city with respect to the territory to which the same applied immediately prior to the effective date of this section, until modified by the metropolitan city, but shall remain subject to any duty or requirement regarding the use of

funds generated thereby and shall remain subject to any requirement imposed by law for voter approval of the continued levy or imposition of any such tax initially levied or imposed prior to the effective date of this section.

(b)(i) The metropolitan city shall distribute funds generated by any tax, fee, or special assessment of the metropolitan city initially levied by the municipality to the municipal district as required for the satisfaction of any outstanding obligation.

(ii) Except as otherwise provided in this section, the metropolitan city shall distribute any remaining funds generated by any property tax or special assessment of the metropolitan city initially levied by the municipality to the municipal district for providing or securing the provision of municipal district services within its territory, and for providing or securing the provision of a general district service, until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(iii) Except as otherwise provided in this section, the metropolitan city may distribute, from any remaining funds generated by any sales or use tax of the metropolitan city initially levied or imposed by the municipality, to the municipal district as necessary for providing or securing the provision of municipal district services within its territory, or for providing or securing the provision of a general district service, until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(3) Each municipal district shall constitute a taxing subdistrict of the metropolitan city. Notwithstanding any provision of law or this constitution, taxes, fees, or special assessments of the metropolitan city levied or imposed solely within the territory of a municipal district may be different than taxes, fees, or special assessments of the metropolitan city levied or imposed generally throughout its territory. The metropolitan city may levy or impose a tax, fee, or special assessment solely within the territory of a municipal district in order to ensure the satisfaction of any outstanding obligation incurred by the municipality prior to the effective date of this section, and may levy or impose a tax, fee, or special assessment solely within the territory of a municipal district to provide or secure the provision of, or to increase the level of, any services provided or secured by the metropolitan city within the territory of the municipal district, and to incur indebtedness related thereto, upon the affirmative vote of a majority of the qualified electors of the municipal district voting thereon.

(4)(a) In addition to constituting a taxing subdistrict of the metropolitan city, each municipal district shall be a separate taxing district, with the taxing powers specified in this section and as may be provided by law. A municipal district may, in the manner and to the extent authorized for the municipality, exercise the following taxing powers for providing or securing the provision of municipal district services, and to incur indebtedness related thereto: (i) the levy of a property tax or special assessment, which may be in addition to any such tax or special assessment of the metropolitan city; and (ii) the levy of a tax upon utilities within the municipal district, which shall be in the place of any such tax upon utilities the metropolitan city is authorized to levy within the territory of the municipal district. The governing body of the municipal district shall set the rate of any property tax or special assessment levied by the municipal district in the manner provided by law and this constitution for the municipality.

(b) A municipal district may, in the manner and to the extent authorized for the municipality and as may be provided by law, charter, or ordinance of the metropolitan city,

impose and collect fees related to providing or securing the provision of municipal district services within its territory.

(c) The fiscal year of each municipal district shall be the same as the fiscal year for the metropolitan city. The governing body of a municipal district shall administer the revenues generated from taxes, fees, and special assessments, along with any funds otherwise secured by the municipal district, in a manner consistent with that provided for the municipality and as may be provided by law, charter, or ordinance of the metropolitan city, pursuant to an annual budget adopted by the governing body, beginning with an annual budget for the fiscal year beginning January 1, 2023.

(d) Except as otherwise provided by law, charter, or ordinance of the metropolitan city, not later than ninety days prior to the first day of each fiscal year, beginning with the fiscal year beginning January 1, 2023, the governing body of a municipal district shall submit to the metropolitan city a true and accurate estimate of: (i) all outstanding obligations of any kind, including, without limitation, the payment of principal and interest on indebtedness, for the ensuing fiscal year; (ii) the expenditures necessary to provide or secure the provision of municipal district services for the ensuing fiscal year; and (iii) the funds, revenues, taxes, fees, and special assessments for such purposes for the ensuing fiscal year.

(5)(a) The metropolitan city shall be entitled to receive all funds from the state or United States government, or from any other agency, public or private, to the extent and in the manner in which any county or city of the state is, or may in the future be, entitled to receive such funds. The metropolitan city shall be deemed both a city and a county for determining the right to receive funds from the state or United States government, or from any other agency, public or private.

(b) A municipal district shall be entitled to receive all funds from the state or United States government, or from any other agency, public or private, that are in furtherance of any power conferred upon a municipal district. A municipal district shall be deemed a political subdivision of the state and a municipal corporation for the purpose of determining the right to receive funds from the state or United States government, or from any other agency, public or private.

(c) Notwithstanding any provision of law or this constitution, all apportionments, distributions, allocations, remittances, and reimbursements of any kind from the state or United States government, or from any other agency, public or private, to counties, cities, towns, or villages that the county of St. Louis or any municipality was eligible to receive immediately prior to the effective date of this section shall be calculated in the same manner as if the reorganization pursuant to this section had not occurred, but any such apportionments, distributions, allocations, remittances, and reimbursements shall be made to the metropolitan city, which shall distribute to the municipal district only such portion thereof required for the satisfaction of any outstanding obligation or required to be used by the municipal district for providing or securing the provision of municipal district services within its territory.

(6)(a) Notwithstanding any provision of law or this constitution, except as otherwise provided in this section, the budget of the metropolitan city and the municipal districts thereof for each year of the transition period shall be the combined adopted budgets for the county of St. Louis and for each municipality covering the twelve-month period beginning January 1, 2019, along with any supplemental or emergency appropriations, and any additional appropriations necessary for the satisfaction of any indebtedness of the county of St. Louis or any municipality adopted during the twelve-month period beginning January 1, 2020. Such budget shall be the

complete financial plan for the metropolitan city and the municipal districts thereof for each year of the transition period. The amounts appropriated therein shall be deemed effective for each year of the transition period, and the taxes, fees, and special assessments levied and imposed in support thereof are hereby levied and imposed at the rates provided therein for each year of the transition period in order to create and provide new revenues in support of such appropriations. Notwithstanding any provision of law or this constitution, no adjustment to the rate of any levy therein shall be required during the transition period.

(b) The mayor and transition mayor shall jointly administer the budget for each year of the transition period. The mayor and transition mayor may jointly control the rate at which any appropriation is expended by allotment, may jointly reduce expenditures below appropriations, and may jointly transfer appropriations to ensure the proper and efficient administration of the metropolitan city and the municipal districts thereof during the transition period, provided that the mayor and transition mayor shall not reduce any appropriation for the payment of principal and interest on indebtedness. Notwithstanding any provision of law or this constitution, if jointly recommended by the mayor and transition mayor, the county council of the county of St. Louis and the governing body of the municipal district located within the territory heretofore in the city of St. Louis shall by ordinance make supplemental or emergency appropriations from available funds, and such ordinances shall be deemed on behalf of the metropolitan city upon their adoption by both such bodies and the joint approval thereof by the mayor and transition mayor.

(c) During the transition period, the metropolitan city shall distribute, to the municipal district, funds generated from any tax, fee, or special assessment of the metropolitan city initially levied by the municipality: (i) as required for the satisfaction of any outstanding obligation of the municipal district; (ii) as necessary for providing or securing the provision of municipal district services within its territory; or (iii) as necessary for providing or securing the provision of a general district service, until such service is provided or secured by the metropolitan city within the territory of the municipal district pursuant to executive order or ordinance of the metropolitan city.

(7)(a) Not later than November 15, 2022, the mayor and transition mayor shall jointly recommend and publish a balanced budget for the metropolitan city, which shall provide a complete financial plan for the metropolitan city for the ensuing fiscal year and shall include proposed tax rates, all estimated income and revenue, all proposed expenditures, and such other matters as may be necessary or advisable.

(b) The metropolitan city shall set the rate of any property tax or special assessment of the metropolitan city, including any property tax or special assessment of the metropolitan city levied solely within the territory of a municipal district, in the manner provided in this constitution and by law, except that the rate of the property tax levy for general county purposes levied solely within the territory heretofore in the county of St. Louis shall be reduced, for each subclass of real property and for personal property, to yield revenues no greater than half of the amount of revenues generated by such levy during the prior fiscal year.

(c) On or after January 1, 2023, the budget may be adopted in the manner provided by charter and ordinance, except as otherwise provided in this section. The amounts appropriated and the taxes, fees, and special assessments levied or imposed in support thereof for the current fiscal year shall be deemed appropriated and levied or imposed for the ensuing fiscal year on a month-to-month basis, with all items prorated accordingly, until such time as the metropolitan council does adopt the budget. The mayor may object to one or more items or portions of items of appropriation, other than an appropriation for the payment of principal and interest on

indebtedness, in any ordinance presented, and such items or portions of items shall not take effect unless separately reconsidered and adopted by the metropolitan council with two-thirds of all members voting in the affirmative, the objections of the mayor notwithstanding.

(d) Following adoption of the annual budget, the mayor may control the rate at which any appropriation is expended by allotment, may reduce expenditures below appropriations whenever the actual revenues are less than the revenues upon which the appropriations were based, and may transfer appropriations to ensure the proper and efficient administration of the metropolitan city, provided that the mayor shall not reduce any appropriation for the payment of principal and interest on indebtedness. If recommended by the mayor, the metropolitan council may by ordinance make supplemental or emergency appropriations from available funds during the fiscal year.

(8)(a) Not later than sixty days prior to each fiscal year, beginning with the fiscal year beginning January 1, 2024, the mayor shall recommend to the metropolitan council a balanced budget, which shall provide a complete financial plan for the metropolitan city for the ensuing fiscal year and shall include proposed tax rates, all estimated income and revenue, all proposed expenditures, and such other matters as may be necessary or advisable.

(b) The metropolitan city shall annually set the rate of any property tax or special assessment of the metropolitan city, including any property tax or special assessment of the metropolitan city levied solely within the territory of a municipal district, in the manner provided in this constitution and by law, except that the property tax levy of the metropolitan city for general county purposes levied solely within the territory heretofore in the county of St. Louis shall be levied throughout the territory of the metropolitan city, for each subclass of real property and for personal property, and shall be in place of the corresponding property tax levy of the metropolitan city for general county purposes levied solely within the territory heretofore in the city of St. Louis.

(c) The budget may be adopted in the manner provided by charter and ordinance, except as otherwise provided in this section. The amounts appropriated and the taxes, fees, and special assessments levied or imposed in support thereof for the current fiscal year shall be deemed appropriated and levied or imposed for the ensuing fiscal year on a month-to-month basis, with all items prorated accordingly, until such time as the metropolitan council does adopt the budget. The mayor may object to one or more items or portions of items of appropriation, other than an appropriation for the payment of principal and interest on indebtedness, in any ordinance presented, and such items or portions of items shall not take effect unless separately reconsidered and adopted by the metropolitan council with two-thirds of all members voting in the affirmative, the objections of the mayor notwithstanding.

(d) Following adoption of the annual budget, the mayor may control the rate at which any appropriation is expended by allotment, may reduce expenditures below appropriations whenever the actual revenues are less than the revenues upon which the appropriations were based, and may transfer appropriations within any department of the budget to ensure the proper and efficient administration of the metropolitan city, provided that the mayor shall not reduce any appropriation for the payment of principal and interest on indebtedness. If recommended by the mayor, the metropolitan council may by ordinance make supplemental or emergency appropriations from available funds during the fiscal year.

6. The St. Louis Fire Protection District.

(1)(a) On January 1, 2023, there is hereby established a fire protection district, coextensive with the boundaries of the territory heretofore in the city of St. Louis, to exercise the

powers, privileges, duties, and functions now vested or in the future granted to a fire protection district, with its name "The St. Louis Fire Protection District." Such fire protection district shall be a political subdivision, municipal corporation, and a body corporate and politic, providing fire protection, emergency medical, and related services.

(b) The fire protection district shall be governed by a board of directors with the powers, privileges, duties, and functions now or in the future granted by law to such boards. The initial board shall be comprised of five qualified voters appointed by the transition mayor, with three directors appointed for terms of three years and two appointed for terms of two years. Thereafter, members shall be elected to terms of three years and serve until successors are duly elected and qualified in the manner provided by law for a fire protection district.

(c) Except as otherwise provided in this section, any property, contracts, records, and personnel related to the provision of fire protection, emergency medical, and related services within the territory heretofore in the city of St. Louis shall be transferred to the fire protection district.

(2)(a) For the fiscal year beginning January 1, 2023, the board shall certify to the metropolitan city the amount necessary to be raised by taxation and, with other revenues, to support the fire protection district, and shall certify the rate of levy which, when levied upon taxable property within the district as shown by the last completed assessment, shall raise the amount of revenues necessary to be raised by taxation, provided that the rate of levy shall not exceed one dollar and eighty-two cents per hundred dollars of assessed valuation. During the fiscal year beginning January 1, 2023, the metropolitan city shall distribute to the fire protection district, from funds generated solely within the territory heretofore in the city of St. Louis, the amount of revenues necessary to be raised by taxation so certified by the board. In addition to such distribution, during such fiscal year, the metropolitan city may, by ordinance, make appropriations to the fire protection district from funds generated solely within the territory heretofore in the city of St. Louis.

(b) Notwithstanding any provision of law or this constitution, effective January 1, 2024, there is hereby levied by the fire protection district, on all taxable property within the territory of the district, a tax sufficient to produce from all taxable property, exclusive of new construction and improvements, substantially the same amount of revenue certified by the board as necessary to be raised by taxation for the prior fiscal year.

(c) For each year beginning on or after January 1, 2025, the board shall determine the amount necessary to be raised by taxation and, with other revenues, to support the fire protection district, and shall set the rate of tax on all taxable property within the territory of the district to raise the amount required, in the manner provided by law and this constitution for a fire protection district. The board may fix an additional rate and may levy an additional tax for the purposes and in the manner authorized by law for a fire protection district.

(3)(a) The fire protection district may assume any outstanding obligations related to the provision of fire protection and related services within the territory heretofore in the city of St. Louis, including, without limitation, the payment of principal and interest on indebtedness, and any obligations related to employee benefits, including, without limitation, pension, retirement, medical, life insurance, and similar benefits for employees and beneficiaries, provided that no such assumption shall impair any obligation of contract. The board shall make provision for the payment of principal and interest on any outstanding obligation so assumed by levy of a sufficient tax within the district in the manner authorized by law for a fire protection district.

(b) Notwithstanding any provision of law or this constitution, the members of the board of trustees or similar governing body for any retirement fund or pension system created prior to the effective date of this section shall continue to hold office until a successor is appointed and serving. Unless otherwise provided by law or by ordinance of the metropolitan city, the successors for such members who are officials of a municipality or who were required to be appointed by any official of a municipality prior to the effective date of this section shall be appointed by the mayor.

7. Elections.

(1)(a) Following the effective date of this section, the general assembly shall provide by law for a board of election commissioners or other election authority to perform such duties and possess such powers as provided by law with respect to the conduct of elections within the metropolitan city. Until such time as the general assembly has provided for a board of election commissioners or other election authority, the respective boards of election commissioners shall cooperate in the performance of the duties provided by law for a board of election commissioners in the conduct of elections within the metropolitan city.

(b) Following the effective date of this section, the general assembly shall provide for party committees of the metropolitan city organized in the manner and to perform such duties provided by law for county party committees. Until such time as the general assembly has provided for such party committees, the respective party committees shall cooperate in the performance of duties provided by law for county party committees.

(2)(a) Notwithstanding any provision of law or this constitution, during the transition period, neither the metropolitan city nor any municipal district thereof shall have the power to submit any question to voters with respect to the continued levy or imposition of any tax initially levied or imposed by a municipality prior to the effective date of this section. Upon the failure to submit any question to voters with respect to the continued imposition or levy of any tax on earnings, such tax shall be reduced in the manner provided by law, and any tax on payroll expense initially levied or imposed by a municipality prior to the effective date of this section shall be reduced by one-twentieth of one percent annually until such tax is eliminated.

(b) Notwithstanding any provision of law or this constitution, in the event of the death or incapacity of both persons designated by this section to serve in the offices of mayor and transition mayor prior to the effective date of this section, the prosecuting attorney of the metropolitan city and the assessor of the metropolitan city shall jointly possess and exercise the powers and duties of the office of mayor and transition mayor and shall jointly act as the chief executive officer of the metropolitan city until such time as a mayor is elected by the qualified voters of the metropolitan city at the general municipal election in 2021 and has assumed office ten days thereafter. Notwithstanding any provision of this section, the mayor so elected shall constitute the chief executive officer of the metropolitan city and shall exercise and perform any power, duty, or function otherwise to be jointly exercised by the mayor and the transition mayor during the transition period and shall exercise and perform any power, duty, or function of mayor until January 1, 2025, when a successor elected at the general election in November 2024 is duly serving. Except for the election of the mayor as provided in this paragraph, during the transition period, neither the metropolitan city nor any municipal district thereof shall have the power to call an election or to submit any question to voters with respect to any other office of the metropolitan city or of any municipal district.

(c) Nothing herein shall be construed to prevent a special district from submitting any question to voters, and the costs of submitting such shall be borne according to law, unless otherwise provided by ordinance of the metropolitan city.

8. Judicial Circuit Boundaries.

(1) Notwithstanding any provision of law or this constitution, upon the effective date of this section, the judicial conference of the state of Missouri, as established by law, is hereby authorized to submit a circuit realignment plan, in the manner provided by section 478.073 of the revised statutes of Missouri, as such section existed on January 1, 2019, for the alteration of the geographical boundaries of the judicial circuits to create a single judicial circuit for the metropolitan city, provided that no judge shall be removed from office during his or her term by reason of any alteration of the geographical boundaries of any judicial circuit. Such plan shall become effective January first of the year following the session of the general assembly to which it is submitted, unless a bill providing such is presented to the governor and is duly enacted. Nothing herein shall be construed to prohibit the general assembly from providing by law for the alteration of the geographical boundaries of the judicial circuits as authorized by this constitution.

(2) Notwithstanding any provision of law or this constitution, the judges of the circuit courts for the city of St. Louis and for the county of St. Louis shall continue as judges of any judicial circuit for the metropolitan city, and the number of judges for any such circuit shall be the number authorized by law for both circuits as of the effective date of this section, unless subsequently modified in the manner provided by law.

(3) Whenever a vacancy shall occur in the office of circuit judge or associate circuit judge of a circuit court within the metropolitan city, the vacancy shall be filled in the manner provided by article V, sections 25(a)-(g) of this constitution.

9. Special Districts.

(1)(a) Notwithstanding any provision of law or this constitution, upon the effective date of this section, all special districts shall continue unaffected, unless otherwise provided by law or in the manner authorized thereby, and shall continue to exercise all powers, privileges, duties, and functions authorized by law as of the effective date of this section, except that any power to appoint, nominate, or recommend an appointment to the governing body of a special district possessed by any official of the county of St. Louis or of a municipality immediately prior to the effective date of this section shall be exercised by the mayor, and any other power related to a special district possessed by the county of St. Louis or by a municipality immediately prior to the effective date of this section shall be exercised by the metropolitan city, unless otherwise provided by law or pursuant thereto.

(b) Nothing herein shall be construed to prohibit the general assembly from providing by law for the consolidation of special districts made duplicative by the adoption of this section, provided that no such consolidation shall impair any obligation of contract.

10. School Districts.

(1) Notwithstanding any provision of law or this constitution, nothing herein shall be construed as affecting any school district or any provisions of this constitution or the laws of this state pertaining thereto, and such laws and constitutional provisions shall continue in operation with respect to such school districts as if the reorganization adopted pursuant to this section had not occurred, including, without limitation, any law that constitutes the territorial boundaries of any school district based on the territorial boundaries of any municipality.

11. General Provisions.

(1)(a) Nothing in this section shall be construed to impair any obligation of contract, and the provisions of this section shall be administered so as to preserve and protect any vested rights therein. Any conflict in the provisions of contracts, bonds, franchises, deeds, obligations, and instruments shall be resolved in a manner that shall protect and preserve any vested rights and shall not impair the rights of any parties thereto.

(b) No action shall be taken to impair any contract with or any claim in favor of or against the county of St. Louis or any municipality in existence immediately prior to the effective date of this section or to impair or affect the validity of any indebtedness or any other outstanding obligation of any kind incurred prior to the effective date of this section.

(c) All actions, causes of action, rights, duties, titles, claims, debts, judgments, recognizances, fines, penalties, forfeitures, and obligations of any kind in favor of or against the county of St. Louis or any municipality as of the effective date of this section shall continue in full force and effect in favor of or against the metropolitan city or a municipal district, as the case may be.

(d) Except as otherwise provided in this section, all matters pending before or under consideration by the county of St. Louis or any municipality immediately prior to the effective date of this section may be acted upon and disposed of as if originated, initiated, or introduced with the metropolitan city or a municipal district, as the case may be.

(e) Notwithstanding any provision of law or this constitution, if the requisite vote of the electors of the county of St. Louis or of any municipality shall have occurred with respect to the issuance of bonds or other indebtedness prior to the effective date of this section, the metropolitan city or a municipal district, as the case may be, shall have the right to take any and all steps necessary to issue the same, with the same effect as if such actions had been taken by the metropolitan city or a municipal district and as if the vote had been of the requisite vote of the electors of the metropolitan city or the municipal district, as the case may be.

(2)(a) Any employee transferred to the metropolitan city pursuant to this section shall be entitled to continue in service with the metropolitan city, with seniority, rank, compensation, and accrued benefits intact, until otherwise provided by ordinance or order of the metropolitan city. Any rights, protections, and privileges attributed to any such employee by a civil service or similar system shall continue unimpaired with respect to any such employee in a corresponding civil service or similar system of the metropolitan city.

(b) Unless otherwise provided by ordinance of the metropolitan city following the transition period, any employee of the metropolitan city previously employed by the county of St. Louis or any municipality, other than the city of St. Louis, who is not a resident of the territory heretofore within the city of St. Louis and who became an employee of the metropolitan city as a result of the adoption of this section, shall be entitled to receive annually from the metropolitan city a refundable tax credit in an amount equal to the amount of taxation collected by the metropolitan city upon the earnings of such employee.

(3)(a) All collective bargaining agreements under negotiation or in existence with the county of St. Louis or any municipality immediately prior to the effective date of this section shall, if being negotiated, continue to be negotiated and, if in existence, continue in effect until the expiration of the terms of such agreements, at which time new agreements shall be negotiated with the metropolitan city or municipal district, as the case may be. The metropolitan city shall be the successor to any existing collective bargaining agreement in effect immediately prior to the effective date of this section between a recognized or certified majority collective bargaining representative and the county of St. Louis or the city of St. Louis related to a general district

service. The metropolitan city shall continue to recognize and bargain in good faith with such collective bargaining representatives and shall abide by the terms of any collective bargaining agreement then in effect.

(b) Should the adoption of this section result in the merger of one or more collective bargaining units with another such unit represented by recognized or certified collective bargaining representatives, any disputes concerning such merger, including the status of a representative or conflicts between agreements, that cannot be resolved through negotiations shall be submitted to interest arbitration, which shall bind all required parties and which shall be conducted by an experienced labor interest arbitrator mutually selected by the metropolitan city and the affected collective bargaining representatives.

(4)(a) Nothing herein shall deprive any person of any right or privilege to retire or to retirement or pension benefits, if any, to which he or she was entitled immediately prior to the effective date of this section. All rights, protections, and privileges of beneficiaries in any retirement fund or pension system related to the county of St. Louis or a municipality as of the effective date of this section shall continue unimpaired until all benefits due such beneficiaries have been paid.

(b) Employee members of a retirement fund or pension system who are transferred to the metropolitan city pursuant to this section shall remain members of and continue to earn service credit toward the benefits of such retirement fund or pension system during their employment with the metropolitan city. The metropolitan city shall contribute proportionately to any such retirement fund or pension system for each such employee member with respect to their employment with the metropolitan city as required by law or ordinance, but any contribution or portion thereof attributed to benefits accrued prior to the transfer of such employee to the metropolitan city shall remain an outstanding obligation satisfied solely from funds generated within the territory in which such obligation was incurred as provided in this section.

(c) Notwithstanding any provision of law or this constitution, the members of the board of trustees or similar governing body for any retirement fund or pension system created by state law prior to the effective date of this section shall continue to hold office until a successor is appointed and serving. The successors for such members who are officials of a municipality or who were required to be appointed by any official of a municipality prior to the effective date of this section shall be appointed by the mayor.

(d) Nothing herein shall be construed to prohibit the general assembly from providing by law for the modification of any pension or retirement system created by state law or to prohibit the metropolitan city from providing by charter or ordinance for the modification of any pension or retirement system created by charter or ordinance of a municipality or the county of St. Louis prior to the effective date of this section.

(5) Notwithstanding any provision of law or this constitution, a geographic designation in law or this constitution based upon the territorial boundaries of the county of St. Louis or of any municipality may continue to be construed as the territorial boundaries of the county of St. Louis or the municipality, as the case may be, as such boundaries existed immediately prior to the effective date of this section.

(6) Notwithstanding any provision of law or this constitution, any city, town, or village located partially but not wholly within the territory of the metropolitan city shall remain unaffected by this section, except that its territory located within the metropolitan city shall be detached and annexed to the metropolitan city upon the effective date of this section. The metropolitan city shall distribute annually to such city, town, or village, funds in an amount equal

to the revenues generated within the former territory of such city, town, or village and that would have otherwise been received if the reorganization adopted pursuant to this section had not occurred, until otherwise provided by law.

(7) Notwithstanding any provision of this section, any charter provision in effect immediately prior to the effective date of this section requiring a public vote related to the sale, lease, or disposition of any real estate designated as a public park shall continue to apply to the territory to which it applied immediately prior to the effective date of this section, until amended in the manner provided in this section for amending the charter of the metropolitan city.

(8) The general assembly may enact such laws as may be necessary and proper to aid in effectuating this section.

12. Severability.

(1) The provisions of this section are severable, and if any portion, subsection, sentence, clause, or phrase of this section, or an application thereof to any person or circumstance, is held to be invalid, the remaining portions, subsections, sentences, clauses and phrases, and the application of the section and its provisions to other persons and circumstances, shall not be affected, but shall remain in full force and effect.

[Section 30(a). The people of the city of St. Louis and the people of the county of St. Louis shall have power (1) to consolidate the territories and governments of the city and county into one political subdivision under the municipal government of the city of St. Louis; or, (2) to extend the territorial boundaries of the county so as to embrace the territory within the city and to reorganize and consolidate the county governments of the city and county, and adjust their relations as thus united, and thereafter the city may extend its limits in the manner provided by law for other cities; or, (3) to enlarge the present or future limits of the city by annexing thereto part of the territory of the county, and to confer upon the city exclusive jurisdiction of the territory so annexed to the city; or, (4) to establish a metropolitan district or districts for the functional administration of services common to the area included therein; or, (5) to formulate and adopt any other plan for the partial or complete government of all or any part of the city and the county. The power so given shall be exercised by the vote of the people of the city and county upon a plan prepared by a board of freeholders consisting of nineteen members, nine of whom shall be electors of the city and nine electors of the county and one an elector of some other county. Upon the filing with the officials in general charge of elections in the city of a petition proposing the exercise of the powers hereby granted, signed by registered voters of the city in such number as shall equal three percent of the total vote cast in the city at the last general election for governor, and the certification thereof by the election officials to the mayor, and to the governor, then, within ten days after the certification the mayor shall, with the approval of a majority of the board of aldermen, appoint the city's nine members of the board, not more than five of whom shall be members of or affiliated with the same political party. Each member so appointed shall be given a certificate certifying his appointment signed by the mayor and attested by the seal of the city. Upon the filing with the officials in general charge of elections in the county of a similar petition signed by registered voters of the county, in such number as shall equal three percent of the total vote cast in the county at the last general election for governor, and the certification thereof by the county election officials to the county supervisor of the county and to the governor, within ten days after the certification, the county supervisor shall, with the approval of a majority of the county council, appoint the county's nine members of the board, not more than five of whom shall be members of or affiliated with the same political

party. Each member so appointed shall be given a certificate of his appointment signed by the county supervisor and attested by the seal of the county.]

[Section 30(b). Upon certification of the filing of such similar petitions by the officials in general charge of elections of the city and the county, the governor shall appoint one member of the board who shall be a resident of the state, but shall not reside in either the city or the county, who shall be given a certificate of his appointment signed by the governor and attested by the seal of the state. The freeholders of the city and county shall fix reasonable compensation and expenses for the freeholder appointed by the governor and the cost shall be paid equally by the city and county. The appointment of the board shall be completed within thirty days after the certification of the filing of the petition, and at ten o'clock on the second Monday after their appointment the members of the board shall meet in the chamber of the board of aldermen in the city hall of the city and shall proceed with the discharge of their duties, and shall meet at such other times and places as shall be agreed upon. On the death, resignation or inability of any member of the board to serve, the appointing authority shall select the successor. The board shall prepare and propose a plan for the execution of the powers herein granted and for the adjustment of all matters and issues arising thereunder. The members of the board shall receive no compensation for their services as members, but the necessary expenses of the board shall be paid one-half by the county and one-half by the city on vouchers signed by the chairman of the board. The plan shall be signed in duplicate by the board or a majority thereof, and one copy shall be returned to the officials having general charge of elections in the city, and the other to such officials in the county, within one year after the appointment of the board. Said election officials shall cause separate elections to be held in the city and county, on the day fixed by the freeholders, at which the plan shall be submitted to the qualified voters of the city and county separately. The elections shall not be less than ninety days after the filing of the plan with said officials, and not on or within seventy days of any state or county primary or general election day in the city or county. The plan shall provide for the assessment and taxation of real estate in accordance with the use to which it is being put at the time of the assessment, whether agricultural, industrial or other use, giving due regard to the other provisions of this constitution. If a majority of the qualified electors of the city voting thereon, and a majority of the qualified electors of the county voting thereon at the separate elections shall vote for the plan, then, at such time as shall be prescribed therein, the same shall become the organic law of the territory therein defined, and shall take the place of and supersede all laws, charter provisions and ordinances inconsistent therewith relating to said territory. If the plan be adopted, copies thereof, certified to by said election officials of the city and county, shall be deposited in the office of the secretary of state and recorded in the office of the recorder of deeds for the city, and in the office of the recorder of deeds of the present county, and the courts of this state shall take judicial notice thereof.]

[Section 31. The city of St. Louis, as now existing, is recognized both as a city and as a county unless otherwise changed in accordance with the provisions of this constitution. As a city it shall continue for city purposes with its present charter, subject to changes and amendments provided by the constitution or by law, and with the powers, organization, rights and privileges permitted by this constitution or by law. As a county, it shall not be required to adopt a county charter but may, except for the office of circuit attorney, amend or revise its present charter to provide for the number, kinds, manner of selection, terms of office and salaries of its county officers, and for

the exercise of all powers and duties of counties and county officers prescribed by the constitution and laws of the state.]

[Section 32(a). The charter of the city of St. Louis now existing, or as hereafter amended or revised, may be amended or revised for city or county purposes from time to time by proposals therefor submitted by the lawmaking body of the city to the qualified voters thereof, at a general or special election held at least sixty days after the publication of such proposals, and accepted by three-fifths of the qualified electors voting for or against each of said amendments or revisions so submitted.]

[Section 32(b). In the event of any amendment or revision of the charter of the city of St. Louis which shall reorganize any county office and/or transfer any or all of the duties, powers and functions of any county officer who is then in office, the officer shall serve out the remainder of his or her term, and the amendment or revision of the charter of the city of St. Louis shall take effect, as to such office, upon the expiration of the term of such office holder. In the event of any amendment or revision of the charter of the city of St. Louis which shall reorganize any county office and/or transfer any or all of the duties, powers and functions of any county officer, all of the staff of such office shall be afforded the opportunity to become employees of the city of St. Louis with their individual seniority and compensation unaffected and on such other comparable terms and conditions as may be fair and equitable.]

[Section 32(c). An amendment or revision adopted pursuant to section 32(a) of this article shall not deprive any person of any right or privilege to retire and to retirement benefits, if any, to which he or she was entitled immediately prior to the effective date of that amendment or revision.]

[Section 33. Copies of any new or revised charter of the city of St. Louis or of any amendments to the present, or to any new or revised charter, with a certificate thereto appended, signed by the chief executive and authenticated by the seal of the city, setting forth the submission to and ratification thereof, by the qualified voters of the city shall be made in duplicate, one of which shall be deposited in the office of the secretary of state, and the other, after being recorded in the office of the recorder of deeds of the city, shall be deposited among the archives of the city, and thereafter all courts of this state shall take judicial notice thereof.]

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Rik Combs regarding a proposed constitutional amendment to Article X (2020-038)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Rik Combs on January 18, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article X is amended by adding one new section to be known as Section 27, to read as follows:

Section 27. After the effective date of this section, the state, counties, and all other political subdivisions are hereby prohibited from imposing or collecting any tax on personal property other than sales tax which may be collected each time the property is purchased.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-038)

Subject

Initiative petition from Rik Combs regarding a proposed constitutional amendment to Article X. (Received January 22, 2019)

Date

February 11, 2019

Description

This proposal would amend Article X of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, State Tax Commission,** and **Missouri Joint Municipal Electric Utility Commission.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact to their department.

Officials from the **Department of Elementary and Secondary Education** indicated other than the potential impact on the revenue stream of state and local governments (which their department has no means to calculate), this proposal does not impact their department.

Officials from the **Department of Higher Education** indicated they defer to the Office of Administration (OA) on this revenue proposal but see no direct cost for their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact to their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this legislation.

Officials from the **Department of Social Services** indicated initiative petition 20-038 adds Section 27 to Article X of the Missouri Constitution.

This proposed constitutional amendment would prohibit any state, county, or political subdivision from imposing or collecting tax on personal property, other than sales tax at the time of purchase and would impact the Department of Social Services (DSS) Blind Pension (BP) Program within the Family Support Division (FSD).

The BP Program fund would be impacted as all taxable property is assessed with BP funded at 0.03% of each $100 valuation.

According to the Missouri Department of Revenue State Tax Commission Annual Report 2017, $20,226,071,288 of the $107,634,108,198 Total Assessed Valuation for the State of Missouri comes from tangible personal property (TPP). Therefore, TPP comprises about 18.8% ($20,226,071,288/$107,634,108,198 = 18.79 rounded up) of total taxable property in Missouri. Because funding for BP program is based on a percentage of total taxable property, the FSD expects a decrease in program funding proportionate to the decrease in countable taxable property, or approximately 18.8%.

Property Tax income for the BP fund in SFY (state fiscal year) 2018 was $33,390,653, or approximately $33.4 million (rounded up). Based on the expected 18.8% decrease in funding, BP fund income will reduce by approximately $6.3 million ($33,390,653*18.8%, rounded up) to approximately $27.1 million ($33.4 million - $6.3 million). In SFY 2018, an average of 3,876 BP recipients received a cash grant from the BP fund. The BP cash grant amount for SFY 2019 is $750 per person per month. The FSD assumes that this amount will decrease by approximately $135 to $615 per month ($6.3 million/3,876/12 = $135. $750 - $135 = $615), or the additional amount needed for the BP fund will have to be funded by General Revenue or a designated revenue stream.

Therefore, the fiscal impact to the FSD is $6.3 million.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would have an unknown fiscal impact on their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal would end property tax on tangible personal property. For the purpose of this fiscal note, Budget and Planning assumes that if this proposal were approved by voters at the November 2020 election, it

would end the property tax beginning January 1, 2021 and begin impacting revenues during Fiscal Year 2022.

Based on information provided by the State Tax Commission, Budget and Planning estimates that from 2013-2017 the average total assessed value of taxable personal property within Missouri was $20.153 billion. Budget and Planning notes that the Blind Pension Fund receives $0.03 per $100 valuation on all taxable property. Therefore, Budget and Planning estimates that if personal property were no longer taxable, revenues to the Blind Pension Fund would decrease by $6.0 million annually ($20.153 billion x $0.03/$100), beginning in Fiscal Year 2022.

It should be noted that this proposal could have a significant negative impact to local revenues in counties dependent on property taxes.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there may be some impact on the courts but there is no way to quantify that currently.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over $5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of

their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Secretary of State's office - State Library** indicated this initiative petition affects public library districts.

Missouri public libraries reported to the State Library via the Public Library Survey, income from local taxes of $239,826,149 in 2017. The Missouri State Tax Commission web page indicates that 11.81% of property taxes derive from the personal property tax on motor vehicles, while 6.36% comes from other personal property taxes income. That means approximately 18%, or an estimated $43,168,707 of library local income comes from the tax on personal property. https://stc.mo.gov/

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this proposal would have no fiscal impact to their office.

Officials from **Greene County** indicated there are estimated costs to County of Greene for initiative petition, 20-038 proposing to amend Article X.

With the removal of personal property tax the following funds would lose approximately the following amounts annually.

Greene County General Revenue	-	$1.2 million approximately
Greene County Road and Bridge	-	$1.2 million approximately
Greene Senior Citizens' Service Fund	-	$460,000 thousand approximately

It is also important to add that a reduction in the diversity of the County's revenue sources would be a factor used by outside rating agencies like Moody's when rating the credit worthiness of Greene County to meet payment obligations to investors.

With the potential to receive a lower bond rating it is possible that funds available for services could be reduced due to increased future bond interest rates.

Officials from **Jackson County** indicated the estimated loss in revenue that would result from this proposed constitutional change if enacted would be the following:

Jackson County – more than $10,000,000 annually
All other taxing jurisdictions in Jackson County – more than $163,000,000 annually

Officials from the **City of Kansas City** indicated this amendment will have a negative fiscal impact on their city, of at least approximately $25.7 million.

Officials from the **City of St. Louis** indicated passage of this legislation would have very negative consequences for their city's revenue collection. Based on 2018 tax rates and assessed personal property values, their city would lose approximately $16.2 million in revenue annually. In addition, their city's Assessment Fund and Collector of Revenue would lose a combined $2.3 million in revenue annually.

Officials from the **Wellsville-Middletown R-1 School District** indicated unless there is a substantial overhaul of the state's tax structure or unless local communities are willing to increase their local levies, this potential amendment will have a substantial negative fiscal impact on local school districts.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from the **State Tax Commission** indicated the proposed constitutional amendment to Article X (2020-038) would eliminate taxation on personal property, the State Tax Commission provides the following fiscal impact:

Total Personal Property Tax 2017

1. $897 million motor vehicles
2. $483 million other personal property
3. $72 million state assessed

TOTAL $1.452 Billion

The proposed constitutional amendment eliminates the collection of personal property taxes, this would result in the loss of $1.3 to $1.5 billion to political subdivisions (school districts, cities, counties, and other taxing jurisdictions). The State has over 2800 taxing jurisdictions which would realize a negative fiscal impact of $1.3 to $1.5 billion in annual revenue.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri, St. Louis Community College,** and **Missouri Joint Municipal Electric Utility Commission.**

Fiscal Note Summary

State and local governmental entities estimate reduced tax revenues ranging from $1.3 billion to $1.5 billion annually.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Section 14 and amending Sections 3, 5, 6, 7, 9, 10 and 11, to read as follows:

Section 3.

[(a) There is hereby established the post of "non-partisan state demographer." The non-partisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing legislative redistricting maps on the basis of each federal census for presentation to the house apportionment commission and the senatorial apportionment commission.

(b) The non-partisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the non-partisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the non-partisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the non-partisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The non-partisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the non-partisan state demographer position an individual shall not have served in a partisan, elected position for four years prior to the appointment. The non-partisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent legislative redistricting map to the house apportionment commission or the senatorial apportionment commission.]

[(c)] The house of representatives shall consist of [one hundred sixty-three] ten members from each congressional district elected at each general election [and apportioned as provided in this section] for a term of two years.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer shall begin the preparation of legislative districting plans and maps using the following methods, listed in order of priority:

(a) Districts shall be established on the basis of total population. Legislative districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census.

(b) Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. Partisan fairness means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. Competitiveness means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the non-partisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the non-partisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. Wasted votes are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the non-partisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the non-partisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The non-partisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

(c) Subject to the requirements of subdivisions (1)(a) and (1)(b), Districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous.

(d) To the extent consistent with subdivisions (1)(a) – (1)(c) of this subsection, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county.

(e) Preference shall be that districts are compact in form, but the standards established by subdivisions (1)(a) – (1)(d) of this subsection take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days [after notification by the governor] that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected

members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, [on the fifteenth day, excluding Sundays and holidays, after all members have been selected] within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary[and]. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non- 2 partisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

Section 5. The Senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter and a resident of the state for three years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Section 7.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer authorized in Article III Section 3, shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the House of Representatives.

(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the

tentative plan of apportionment and map of the proposed districts received from the non-partisan state demographer provided that such changes are consistent with this Section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the House of Representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and the number of senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(g) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

Section 10. [The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.] If any provision of sections 3, 5, 6, 7, 9, 10 or 11, or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III, version 1 (2020-034)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on January 8, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Section 14 and amending Sections 3, 4, 5, 6, 7, 9, 10 and 11, to read as follows:

Section 3.

(a) There is hereby established the post of "non-partisan state demographer." After each decennial census, or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction of the United States, it shall be the duty of the non-partisan state demographer to assist the governor in his or her duty to lay off the state into as many districts as shall be equal to the number of representatives to which this state shall then be entitled. The non-partisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing [legislative] congressional redistricting maps on the basis of each federal census for presentation to the [house apportionment commission and the senatorial apportionment commission] governor for his or her approval. In the event the governor and the non-partisan state demographer do not concur with regard to how the districts should be laid off, the plans of both the governor and the non-partisan state demographer shall be subject to a referendum, with the voters of the state choosing between the plans.

(b) The non-partisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the non-partisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the non-partisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the non-partisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The non-partisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the non-partisan state demographer position an individual shall not have served in a partisan, elected position for four years prior to the appointment. The non-partisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent [legislative] congressional redistricting map to the [house] congressional apportionment commission [or the senatorial apportionment commission].

[(c) The house of representatives shall consist of one hundred sixty-three members elected at each general election and apportioned as provided in this section.]

([1]c) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer shall begin the preparation of [legislative] congressional districting plans and maps using the following methods, listed in order of priority:

([a]1) Districts shall be established on the basis of total population. [Legislative] Congressional districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census.

([b]2) Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. Partisan fairness means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. Competitiveness means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the non-partisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the non-partisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. Wasted votes are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the non-partisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the non-partisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The non-partisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

([c]3) Subject to the requirements of subdivisions (1)(a) and (1)(b), Districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous.

([d]4) To the extent consistent with subdivisions (1)(a) – (1)(c) of this subsection, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county.

([e]5) Preference shall be that districts are compact in form, but the standards established by subdivisions (1)(a) – (1)(d) of this subsection take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

[(2). Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for

governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall make public and file with the secretary of state and with the house apportionment commission a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, [on the fifteenth day, excluding Sundays and holidays, after all members have been selected] within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non- 2 partisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

Section 4. <u>The house of representatives shall consist of ten members from each congressional district elected at each general election.</u> Each representative shall be twenty-four years of age, and next before the day of his election shall have been a qualified voter for two years and a resident of the county or district which he is chosen to represent for one year, if such county or district shall have been so long established, and if not, then of the county or district from which the same shall have been taken.

Section 5. The Senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] <u>state of Missouri</u> for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter <u>and a resident</u> of the state for three years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Section 7.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer authorized in Article III Section 3, shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the House of Representatives.

(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, [and] or within sixty days after [notification by the governor that] a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non-partisan state demographer provided that such changes are consistent with this Section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the House of Representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

(a) An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, the number of representatives to be elected from a congressional district, and senators to be elected state-wide. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

(b) A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

(c) The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.

(d) In each general election, each voter will cast a single vote for the election of representatives and a single vote for the election of senators, in each case voting for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

(e) To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

(f) A political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election, specifying the political party or independent candidate that is to receive their surplus votes, under these conditions.

(g) The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

(h) In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

(i) If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Section 9. Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965. Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

Section 10. [The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.] If any provision of sections 3, 4, 5, 6, 7, 9, 10 or 11, or the application thereof to anyone or to any circumstance is held invalid, the remainder of those provisions and the application of such provisions to others or other circumstances shall not be affected thereby.

Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators will continue to be divided into two classes, with senators from each class, as the term of that class expires, to be elected at large on a state-wide basis.

[Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

RE: Petition approval request from Shetova Hayes regarding a proposed statutory amendment to Chapter 558 (2020-033)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Shetova Hayes on January 7, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

PROPOSED MEASURE

Be it enacted by the *people of the state of Missouri:*

Section 558.019, RSMo, subsection 3 would be repealed. In lieu of it a new subsection relating to prison commitment terms for first-time dangerous felony offenders and offenders with multiple convictions of dangerous felonies. The current law reads as follows (with the matter to be deleted in [brackets], and the new matter shown underlined):

§ 558.019 R.S.Mo. (2017)

§ 558.019. Prior felony convictions, minimum prison terms -- prison commitment defined -- dangerous felony, minimum term prison term, how calculated -- sentencing commission created, members, duties -- expenses -- cooperation with commission -- restorative justice methods -- restitution fund

1. This section shall not be construed to affect the powers of the governor under article IV, section 7, of the Missouri Constitution. This statute shall not affect those provisions of section 565.020, section 566.125, or section 571.015, which set minimum terms of sentences, or the provisions of section 559.115, relating to probation.

2. The provisions of subsections 2 to 5 of this section shall be applicable to all classes of felonies except those set forth in chapter 579, or in chapter 195 prior to January 1, 2017, and those otherwise excluded in subsection 1 of this section. For the purposes of this section, "prison commitment" means and is the receipt by the department of corrections of an offender after sentencing. For purposes of this section, prior prison commitments to the department of corrections shall not include an offenders first incarceration prior to release on probation under section 217.362 or an offenders incarceration prior to release on probation under section 559.115. Other provisions of the law to the contrary notwithstanding, any offender who has been found guilty of a felony other than a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve the following minimum prison terms:

(1) If the offender has one previous prison commitment to the department of corrections for a felony offense, the minimum prison term which the offender must serve shall be forty percent of his or her sentence or until the offender attains seventy years of age, and has served at least thirty percent of the sentence imposed, whichever occurs first;

(2) If the offender has two previous prison commitments to the department of corrections for felonies unrelated to the present offense, the minimum prison term which the offender must serve shall be fifty percent of his or her sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first;

(3) If the offender has three or more previous prison commitments to the department of corrections for felonies unrelated to the present offense, the minimum prison term which the offender must serve shall be eighty percent of his or her sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.

[3. Other provisions of the law to the contrary notwithstanding, any offender who has been found guilty of a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve a minimum prison term of eighty-five percent of the sentence imposed by the court or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.]

3. Other provisions of the law to the contrary notwithstanding, any offender who has more than once been found guilty of a dangerous felony as defined in section 556.061 and is committed to the department of corrections shall be required to serve a minimum prison term of eighty-five percent of the sentence imposed by the court or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first.:

(1) If the offender has one previous prison commitment to the department of corrections for a dangerous felony offense, the minimum prison term which the offender must serve shall be fifty percent of their sentence or until the offender attains seventy years of age, and has served at least forty percent of the sentence imposed, whichever occurs first. If the offender has maintained the best possible institutional score for the year prior to their scheduled parole hearing date, then parole shall be granted. If parole is denied, a hearing shall be scheduled every two years until the offender is paroled. The first-time conviction exception of this subsection shall be applicable to all dangerous felonies occurring on or after August 28, 1994.

4. For the purpose of determining the minimum prison term to be served, the following calculations shall apply:

(1) A sentence of life shall be calculated to be thirty years;

(2) Any sentence either alone or in the aggregate with other consecutive sentences for offenses committed at or near the same time which is over seventy-five years shall be calculated to be seventy-five years.

5. For purposes of this section, the term "minimum prison term" shall mean time required to be served by the offender before he or she is eligible for parole, conditional release or other early release by the department of corrections.

6. (1) A sentencing advisory commission is hereby created to consist of eleven members. One member shall be appointed by the speaker of the house. One member shall be appointed by the president pro tem of the senate. One member shall be the director of the department of corrections. Six members shall be appointed by and serve at the pleasure of the governor from among the following: the public defender commission; private citizens; a private member of *the* Missouri Bar; the board of probation and parole; and a prosecutor. Two members shall be appointed by the supreme court, one from a metropolitan area and one from a rural area. All members shall be appointed to a four-year term. All members of the sentencing commission appointed prior to August 28, 1994, shall continue to serve on the sentencing advisory commission at the pleasure of the governor.

(2) The commission shall study sentencing practices in the circuit courts throughout the state for the purpose of determining whether and to what extent disparities exist among the various circuit courts with respect to the length of sentences imposed and the use of probation for offenders convicted of the same or similar offenses and with similar criminal histories. The commission shall also study and examine whether and to what extent sentencing disparity among economic and social classes exists in relation to the sentence of death and if so, *the* reasons therefor, if sentences are comparable to other states, if the length of the sentence is appropriate, and the rate of rehabilitation based on sentence. It shall compile statistics, examine cases, draw conclusions, and perform other duties relevant to the research and investigation of disparities in death penalty sentencing among economic and social classes.

(3) The commission shall study alternative sentences, prison work programs, work release, home-based incarceration, probation and parole options, and any other programs and report the feasibility of these options in Missouri.

(4) The governor shall select a chairperson who shall call meetings of the commission as required or permitted pursuant to the purpose of the sentencing commission.

(5) The members of the commission shall not receive compensation for their duties on the commission, but shall be reimbursed for actual and necessary expenses incurred in the performance of these duties and for which they are not reimbursed by reason of their other paid positions.

(6) The circuit and associate circuit courts of this state, the office of the state courts administrator, the department of public safety, and the department of corrections shall cooperate with the commission by providing information or access to information needed by the commission. The office of the state court administrator will provide needed staffing resources.

7. Courts shall retain discretion to lower or exceed the sentence recommended by the commission as otherwise allowable by law, and to order restorative justice methods, when applicable.

8. If the imposition or execution of a sentence is suspended, the court may order any or all of the following restorative justice methods, or any other method that the court finds just or appropriate:

(1) Restitution to any victim or a statutorily created fund for costs incurred as a result of the offender's actions;

(2) Offender treatment programs;

(3) Mandatory community service;

(4) Work release programs in local facilities; and

(5) Community-based residential and nonresidential programs.

9. The provisions of this section shall apply only to offenses occurring on or after August 28, 2003.

10. Pursuant to subdivision (1) of subsection 8 of this section, the court may order the assessment and payment of a designated amount of restitution to a county law enforcement restitution fund established by the county commission pursuant to section 50.565. Such contribution shall not exceed three hundred dollars for any charged offense. Any restitution moneys deposited into the county law enforcement restitution fund pursuant to this section shall only be expended pursuant to the provisions of section 50.565.

11. A judge may order payment to a restitution fund only if such fund had been created by ordinance or resolution of a county of the state of Missouri prior to sentencing. A judge shall not have any direct supervisory authority or administrative control over any fund to which the judge is ordering a person to make payment.

12. A person who fails to make a payment to a county law enforcement restitution fund may not have his or her probation revoked solely for failing to make such payment unless the judge, after evidentiary hearing, makes a finding supported by a preponderance of the evidence that the person either willfully refused to make the payment or that the person willfully, intentionally, and purposefully failed to make sufficient bona fide efforts to acquire the resources to pay.

13. Nothing in this section shall be construed to allow the sentencing advisory commission to issue recommended sentences in specific cases pending in the courts of this state.

Jefferson City, MO 65101

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article III (2020-032)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on January 7, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article III section 50 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.
Section 50. Initiative petitions proposing amendments to the constitution shall be signed by eight percent of the legal voters in each of two-thirds of the congressional districts in the state, and petitions proposing laws shall be signed by five percent of such voters. Every such petition shall be filed with the secretary of state not less than six months before the election and shall contain an enacting clause and the full text of the measure. Petitions for constitutional amendments shall not contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith, and the enacting clause thereof shall be "Be it resolved by the people of the state of Missouri that the Constitution be amended:". Petitions for laws shall contain not more than one subject which shall be expressed clearly in the title, and the enacting clause thereof shall be "Be it enacted by the people of the state of Missouri:". A petition may be filed following a November election and no filing fee shall be imposed. Any adult 18 years old or older may collect signatures for any petition approved for circulation. A petitioner may volunteer or be paid. An employer may pay per signature, by the hour, or any way agreed to. Changes to election laws are prohibited without voter approval. The Secretary of State shall host and maintain a web based system for the purpose of providing voters the option to sign petitions electronically. The office of the Secretary of State shall provide a verified voter with a unique identification number and collect identical information as required by existing initiative petition law. The electronic signature process is in addition to existing signature requirements and allows an individual to choose between the electronic signature or personally signing a hard copy of the petition. Voters shall have the option of receiving a confirmation text, confirmation email, or any electronic message within the capacity of Secretary of State or a postcard confirming the electronic signature. Voters are also provided a 20 day period to respond with any corrections or objections to the electronic signature.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-032)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article III. (Received January 7, 2019)

Date

January 28, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated no impact relating to electronic signatures of initiative petitions.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

This proposal amends Article III, Section 50 of the MO Constitution with the following:

- Prohibits filing fees for initiative petitions and allows them to be filed following a November election.
- Allows any adult over age 18 to collect signatures as a volunteer or paid staff.
- Prohibits changes to election laws without voter approval.
- Requires the Secretary of State to provide verified voters a unique identification number and collect identical information; host and maintain a web based system to provide an option for voters to sign petitions electronically; provide voters confirmation of electronic signatures; and provide a 20 day time period for the voter to respond with any corrections or objections to the electronic signature.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated:

Petition 2020-032 would require their office to develop a web page to allow electronic signature of initiative and referendum petitions. The Information Technology Division estimates the labor costs for this project at $238,767.96. The Elections Division would require an additional FTE to process the queue of electronic signatures at an initial salary of $38,148 beginning in FY (fiscal year) 2021.

This proposed amendment would also require their office to contact each voter within 20 days of receipt of an electronic petition signature. The proposal does authorize electronic methods such as e-mail or text messages to be used. However, currently the only contact information collected in the initiative petition process is the individual's registered voting address. This leaves a physical mailing to each voter utilizing an electronic signature as the only feasible option. While they cannot determine the specific number of voters that will utilize the electronic system, they can determine an estimate based on the petitions received in the 2018 cycle.

For the 2018 cycle, their office processed signatures for five initiative petitions, with the largest petition having approximately 423,024 signatures checked by local election authorities. If five petitions with that number of signatures on each are received in one petition cycle, that number would total up to 2,115,120 signatures for the cycle, any or all of which could be submitted electronically. Assuming a going rate of postage and processing at $0.35 per postcard, a reasonable estimated cost of mailing could equal up to $740,292.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated:

There are many factors and/or variables that are unknown as to the additional costs that the language of this amendment would add to the signature verification cost during the course of a fiscal year. For this reason it was determined that the best reference point to attain an estimated cost is the data from the 2018 initiative petition signature verification process.

The total cost for the 2018 initiative petition signature verification process as indicated in the spreadsheets below is $57,051.22. There were a total of 136,149 signatures checked. The rounded cost per signature for the 2018 initiative petition signature verification process was 42 cents per signature.

The future is unknown, but based on the signatures verified in 2018; we estimate conservatively that the office will verify a minimum of 100,000 signatures in 2020 through the initiative petition process. We estimate conservatively that approximately 20,000 voters out of the 100,000 signatures will request a confirmation text, email or postcard if this amendment is passed into law.

The postcards will be purchased in advance to ensure a reduction in printing costs due to volume. A minimum of 50,000 postcards at an estimated 5.8 cents a postcard would be purchased for a total cost of $2,900. In addition, the unique printing identifier information cost for the postcard is estimated to be 3.7 cents a postcard and so it will cost $740.00 if 20,000 postcards are mailed. Postage for the postcards is currently at 47 cents a postcard. Assuming postage costs do not increase by 2022 and 20,000 postcards are mailed at 47 cents a postcard, the cost would be $9,400.00. The estimated total costs for 20,000 postcards being mailed is $13,040.

To send a text message it will cost approximately 7.5 cents a text. If 20,000 text messages are sent to each voter who requests a text, the current estimated cost would be $1,500.

As stated earlier, it is hard to anticipate how many voters who sign a petition would request a confirmation text, email or postcard if this amendment is passed into law. If all costs remain the same prior to the signature verification process in 2022, the minimum cost if only a confirmation text is requested would be $1,500, which means the estimated total cost per signature would be 43 cents. The maximum cost if all costs remain the same for a confirmation mailer would be $13,040, which means the estimated total cost per signature would 51 cents.

Greene County Hourly Cost Summary for 2018 Initiative Petition Signature Verification Process		
Cost Per Petition Breakdown	**Hours**	**Total**
R2W		9688.563
Bruce Earnhart	64	958.72
Craig O'Dear	8	149.2
18-204	780.88	10153.91
18-48	995.01	12934.5
18-271	390.75	5254.31
18-41	683	8018.33
18-51	785.13	9893.69
2018 Total		**$57,051.22**

Greene County Employee Breakdown/Total Hours Cost for 2018 Initiative Petition Signature Verification Process			
Employee	**Rate of Pay**	**Hours Worked**	**Total Cost**
Employee	11.31	365.25	4130.9775
Employee	11.31	207	2341.17
Employee	11.31	400	4524
Employee	11.31	32	361.92
Employee	11.31	173.75	1965.1125
Employee	11.31	167	1888.77
Employee	11.31	429.5	4857.645
Employee	11.31	427.25	4832.1975
Employee	11.31	21.75	245.9925
Employee	11.31	137.5	1555.125
Employee	11.31	186.75	2112.1425
Employee	11.48	295.5	3392.34
Employee	18.65	701.02	13074.023
Employee	16.25	128.07	2081.244
Total Cost		3672.34	47362.66
R2W Cost			9688.563
2018 Total			**$57,051.22**

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not know the cost of postage to the state for post cards but they believe the cost of mailing a response to the electronic signature process has the potential to be substantial which could have a trickle down fiscal effect on their school's budget.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from the **Department of Higher Education, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities estimate one-time costs of $239,000 and increased annual costs of $38,000. State and local governmental entities estimate unknown costs during each 2-year election cycle of up to $740,000.

RE: Petition approval request from Theodis Brown regarding a proposed statutory amendment to Chapter 320 (2020-031)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Theodis Brown on January 7, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article III (2020-030)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on January 2, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article III section 50 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.
Section 50. Initiative petitions proposing amendments to the constitution shall be signed by eight percent of the legal voters in each of two-thirds of the congressional districts in the state, and petitions proposing laws shall be signed by five percent of such voters. Every such petition shall be filed with the secretary of state not less than six months before the election and shall contain an enacting clause and the full text of the measure. Petitions for constitutional amendments shall not contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith, and the enacting clause thereof shall be "Be it resolved by the people of the state of Missouri that the Constitution be amended:". Petitions for laws shall contain not more than one subject which shall be expressed clearly in the title, and the enacting clause thereof shall be "Be it enacted by the people of the state of Missouri:". A petition may be filed following a November election and no filing fee shall be imposed. Any adult 18 years old or older may collect signatures for any petition approved for circulation. A petitioner may volunteer or be paid. An employer may pay per signature, by the hour, or any way agreed to. Changes to election laws are prohibited without voter approval. The Secretary of State shall host and maintain a web based system for the purpose of providing voters the option to sign petitions electronically. The office of the Secretary of State shall provide a verified voter with a unique identification number and collect identical information as required by existing initiative petition law. The electronic signature process is in addition to existing signature requirements and allows an individual to choose between the electronic signature or personally signing a hard copy of the petition. Voters shall have the option of receiving a confirmation text, confirmation email, or any electronic message within the capacity of Secretary of State or a postcard confirming the electronic signature. Voters are also provided a 20 day period to respond with any corrections or objections to the electronic signature.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-030)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article III. (Received January 2, 2019)

Date

January 22, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

This proposal amends Article III, Section 50 of the Missouri Constitution with the following:

- Prohibits filing fees for initiative petitions and allows them to be filed following a November election.
- Allows any adult over age 18 to collect signatures as a volunteer or paid staff.
- Prohibits changes to election laws without voter approval.
- Requires the Secretary of State to provide verified voters a unique identification number and collect identical information; host and maintain a web based system to provide an option for voters to sign petitions electronically; provide voters confirmation of electronic signatures; and provide a 20 day time period for the voter to respond with any corrections or objections to the electronic signature.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated:

Petition 2020-030 would require their office to develop a web page to allow electronic signature of initiative and referendum petitions. The Information Technology Division estimates the labor costs for this project at $238,767.96. The Elections Division would require an additional FTE to process the queue of electronic signatures at an initial salary of $38,148 beginning in FY (fiscal year) 2021.

This proposed amendment would also require their office to contact each voter within 20 days of receipt of an electronic petition signature. The proposal does authorize electronic methods such as e-mail or text messages to be used. However, currently the only contact information collected in the initiative petition process is the individual's registered voting address. This leaves a physical mailing to each voter utilizing an electronic signature as the only feasible option. While they cannot determine the specific number of voters that will utilize the electronic system, they can determine an estimate based on the petitions received in the 2018 cycle.

For the 2018 cycle, their office processed signatures for five initiative petitions, with the largest petition having approximately 423,024 signatures checked by local election authorities. If five petitions with that number of signatures on each are received in one petition cycle, that number would total up to 2,115,120 signatures for the cycle, any or all of which could be submitted electronically. Assuming a going rate of postage and processing at $0.35 per postcard, a reasonable estimated cost of mailing could equal up to $740,292.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated:

There are many factors and/or variables that are unknown as to the additional costs that the language of this amendment would add to the signature verification cost during the course of a fiscal year. For this reason it was determined that the best reference point to attain an estimated cost is the data from the 2018 initiative petition signature verification process.

The total cost for the 2018 initiative petition signature verification process as indicated in the spreadsheets below is $57,051.22. There were a total of 136,149 signatures checked. The rounded cost per signature for the 2018 initiative petition signature verification process was 42 cents per signature.

The future is unknown, but based on the signatures verified in 2018; we estimate conservatively that the office will verify a minimum of 100,000 signatures in 2020 through the initiative petition process. We estimate conservatively that approximately 20,000 voters out of the 100,000 signatures will request a confirmation text, email or postcard if this amendment is passed into law.

The postcards will be purchased in advance to ensure a reduction in printing costs due to volume. A minimum of 50,000 postcards at an estimated 5.8 cents a postcard would be purchased for a total cost of $2,900. In addition, the unique printing identifier information cost for the postcard is estimated to be 3.7 cents a postcard and so it will cost $740.00 if 20,000 postcards are mailed. Postage for the postcards is currently at 47 cents a postcard. Assuming postage costs do not increase by 2022 and 20,000 postcards are mailed at 47 cents a postcard, the cost would be $9,400.00. The estimated total costs for 20,000 postcards being mailed is $13,040.

To send a text message it will cost approximately 7.5 cents a text. If 20,000 text messages are sent to each voter who requests a text, the current estimated cost would be $1,500.

As stated earlier, it is hard to anticipate how many voters who sign a petition would request a confirmation text, email or postcard if this amendment is passed into law. If all costs remain the same prior to the signature verification process in 2022, the minimum cost if only a confirmation text is requested would be $1,500, which means the estimated total cost per signature would be 43 cents. The maximum cost if all costs remain the same for a confirmation mailer would be $13,040, which means the estimated total cost per signature would 51 cents.

Greene County Hourly Cost Summary for 2018 Initiative Petition Signature Verification Process		
Cost Per Petition Breakdown	**Hours**	**Total**
R2W		9688.563
Bruce Earnhart	64	958.72
Craig O'Dear	8	149.2
18-204	780.88	10153.91
18-48	995.01	12934.5
18-271	390.75	5254.31
18-41	683	8018.33
18-51	785.13	9893.69
2018 Total		**$57,051.22**

Greene County Employee Breakdown/Total Hours Cost for 2018 Initiative Petition Signature Verification Process			
Employee	**Rate of Pay**	**Hours Worked**	**Total Cost**
Employee	11.31	365.25	4130.9775
Employee	11.31	207	2341.17
Employee	11.31	400	4524
Employee	11.31	32	361.92
Employee	11.31	173.75	1965.1125
Employee	11.31	167	1888.77
Employee	11.31	429.5	4857.645
Employee	11.31	427.25	4832.1975

Employee	11.31	137.5	1555.125
Employee	11.31	186.75	2112.1425
Employee	11.48	295.5	3392.34
Employee	18.65	701.02	13074.023
Employee	16.25	128.07	2081.244
Total Cost		3672.34	47362.66
R2W Cost			9688.563
2018 Total			**$57,051.22**

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not know the cost of postage to the state for post cards but they believe the cost of mailing a response to the electronic signature process has the potential to be substantial which could have a trickle down fiscal effect on their school's budget.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from the **Department of Higher Education, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities estimate one-time costs of $239,000 and increased annual costs of $38,000. State and local governmental entities estimate unknown costs during each 2-year election cycle of up to $740,000.

RE: Petition approval request from Rik Combs regarding a proposed constitutional amendment to Article X (2020-029)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Rik Combs on January 2, 2019.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

To provide for the ability to vote by mail, the following Articles and Sections of the Constitution of Missouri: Article VIII, and the following Sections of the Missouri Revised Statutes: Sections 115.129, 115.133, and 115.135 are amended to read as follows:

Effective [11-07-18]**01-10-2021**

[11/7/2018

115.129. Notice of election by mail authorized, contents of. — Not later than the fifth day prior to any election, the election commissioner may mail to each registered voter in the area of its jurisdiction in which the election is to be held, a notice of election which shall include the date and time of the election, the location of the voter's polling place and the name of the agency calling the election. The notice may also include a sample ballot. The election commissioner may provide any additional notice of the election it deems desirable.]

115.129. Ballots by mail. Each registered voter of the state, overseas voter, and service voter shall automatically be issued a mail ballot for each general election, special election, or primary. Overseas voters and service voters are authorized to cast the same ballots, including those for special elections, as a registered voter of the state would receive under this chapter. Each registered voter shall continue to receive a ballot by mail until death, cancellation by the voter of their registration, or not residing in the voting district. All ballots mailed will include a "Do Not Forward, forwarding address requested" notice located near the address of the recipient. Voters who have moved will be mailed a reminder to change their residence address so they can continue to receive ballots in the mail. Each ballot will include return postage affixed on enclosed return envelope.

(L. 1977 H.B. 101 § 6.020, A.L. 1978 S.B. 582, A.L. 1997 S.B. 132)

A. **Request for ballot from an overseas voter or service voter.**
   a. A request for a ballot from an overseas voter or service voter must include the address of the last residence where registered in the state of Missouri.
   b. No person, organization, or association may distribute any ballot materials that contain a return address other than that of the appropriate county auditor.

B. Date ballots mailed—Replacement ballots

(1 Except where a recount or litigation is pending, the election commissioner must mail ballots to each voter at least thirty days before each primary or election, and as soon as possible for all subsequent registration changes made by the voter.

(2) Except where a recount or litigation is pending, the election commissioner must mail ballots to each service and overseas voter at least thirty days before each special election, and at least forty-five days before each primary or general election, or any special election that involves a federal office. A request for a ballot made by an overseas or service voter after that day must be processed immediately.

(3) A registered voter may obtain a replacement ballot if the ballot is destroyed, spoiled, lost, or not received by the voter. The voter may obtain the ballot by telephone request, by mail, electronically, or in person. The election commissioner shall keep a record of each request for a replacement ballot. If ballot mailed, then no other identification needed.

(4) Each election commissioner shall certify to the office of the secretary of state the dates the ballots were mailed, or the reason and date the ballots will be mailed if the ballots were not mailed in a timely fashion.

(5) Failure to mail ballots as prescribed in this section does not by itself provide a basis for an election contest or other legal challenge to the results of a primary, general election, or special election.

C. Envelopes, declaration, and instructions—Voter's oath—Overseas and service voters—Return of ballots—election commissioner's name.

(1) The election commissioner shall send each voter a ballot, a security envelope in which to conceal the ballot after voting, a larger envelope in which to return the security envelope, attached with paid return postage, a declaration that the voter must sign, and instructions on how to obtain information about the election, how to mark the ballot, and how to return the ballot to the election commissioner.

(2) The voter must swear under penalty of perjury that he or she meets the qualifications to vote, and has not voted in any other jurisdiction at this election. The declaration must clearly inform the voter that it is illegal to vote if he or she is not a United States citizen; it is illegal to vote if he or she has been convicted of a felony and has not had his or her voting rights restored; and it is illegal to cast a ballot or sign a ballot declaration on behalf of another voter. The ballot materials must provide space for the voter to sign the declaration and indicate the date on which the ballot was voted.

(3) For overseas and service voters, the signed declaration constitutes the equivalent of a voter registration. Return envelopes for overseas and service voters must enable the ballot to be returned postage free if mailed through the United States postal service, United States armed forces postal service, or the postal service of a United States foreign embassy under 39 U.S.C. 3406.

(4) The voter must be instructed to either return the ballot to the election commissioner no later than 8:00 p.m. the day of the election or primary, or mail the ballot to the election commissioner with a postmark no later than the day of the election or primary. Service and overseas voters must be provided with instructions and a privacy sheet for returning the ballot and signed declaration by fax or email. A voted ballot and signed declaration returned by fax or email must be received by 8:00 p.m. on the day of the election or primary.

(5) The election commissioner's name may not appear on the security envelope, the return envelope, or on any voting instructions or materials included with the ballot if he or she is a candidate for office during the same year.

(6) Ballots may be counted in advance of election day as received, but no public notice shall be made notifying how votes have been cast or how many ballots have been received.

01-10-2021

115.133. Qualifications of voters. — 1. Except as provided in subsection 2 of this section, any citizen of the United States who is a resident of the state of Missouri and seventeen years and six months of age or older and has a Social Security number shall be entitled to register and to vote in any election which is held on or after his eighteenth birthday. 2. No person who is adjudged incapacitated shall be entitled to register or vote. No person shall be entitled to vote:

(1) While confined under a sentence of imprisonment;

(2) While on probation or parole after conviction of a felony, until finally discharged from such probation or parole; or

(3) After conviction of a felony or misdemeanor connected with the right of suffrage.

3. Except as provided in federal law or federal elections and in section 115.277, no person shall be entitled to vote if the person has not registered to vote in the jurisdiction of his or her residence prior to the deadline to register to vote.

4. Suspicions of invalid qualification will be sent privately (to protect "innocence until proven guilty") directly to the Secretary of State (through the election commissioner if desired).

(a) The Secretary of State will check with Social Security if citizenship is doubted.

(b) The Secretary of State will check with appropriate Justice Systems if conviction of crimes are suspected.

(c) The Secretary of State will make inquiry through postal mail if residency is suspected.

(L. 1977 H.B. 101 § 7.010, A.L. 1979 S.B. 275, A.L. 1982 H.B. 1600, A.L. 1983 S.B. 44 & 45, A.L. 1993 H.B. 23, A.L. 2002 S.B. 675, A.L. 2003 H.B. 511)

[8/28/2003] **01-10-2021**

115.135. Persons entitled to register, when — identification required — military service, registration, when. —

1. Any person who is qualified to vote, or who shall become qualified to vote on or before the day of election, shall be entitled to register in the jurisdiction within which he or she resides. The only identification required is a social security number and an address where you live in order to receive your ballot in the mail. In order to vote in any election for which registration is required, a person must be registered to vote in the jurisdiction of his or her residence no later than 5:00 p.m. or the normal closing time of any public building where the registration is being held if such time is later than 5:00 p.m., on the [fourth] second Wednesday prior to the election, unless the voter is an interstate former resident, an intrastate new resident, a new resident, or a covered voter, as defined in section 115.275. Except as provided in subsection 4 of this section, in no case shall registration for an election extend beyond 10:00 p.m. on the [fourth] second Wednesday prior to the election. Any person registering after such date shall be eligible to register at their polling place and then vote as well in subsequent elections.

2. A person applying to register with an election commissioner or a deputy registration official shall identify himself or herself by presenting a copy [of a birth certificate, a Native American tribal document, other proof of United States citizenship, a varlid Missouri drivers license or other form of personal identification at the time of registration.] of their social security card and mail with current address printed on it (a rent receipt or utility bill will meet requirements).

3. Except as provided in federal law or federal elections and in section 115.277, no person shall be entitled to vote if the person has not registered to vote in the jurisdiction of his or her residence prior to the deadline to register to vote.

4. A covered voter as defined in section 115.275 who has been discharged from military service, has returned from a military deployment or activation, or has separated from employment outside the territorial limits of the United States after the deadline to register to vote, and who is otherwise qualified to register to vote, may register to vote in an election in person before the election commissioner until 5:00 p.m. or poll closing time [on the Friday before such election. Such persons shall produce sufficient documentation showing evidence of qualifying for late registration pursuant to this section]. Proof of residence will be required.

5. Students who live on campus during the school year and at a separate residence while school is not in session may choose which address they will use as their voting residence. Changes of voting residence if in state as a MO residence must have a change of address sent to prior county auditor if already registered or presented to election authorities by the poll closing time on the election date. Out of state students may vote as resident if affidavit is signed signifying that they are not a registered voter from previous state.

(L. 1977 H.B. 101 § 7.015, A.L. 1982 S.B. 526, A.L. 1985 H.B. 620, A.L. 1988 H.B. 933, et al., A.L. 1993 H.B. 551 & 552, A.L. 1994 H.B. 1411, A.L. 2002 S.B. 675, A.L. 2003 H.B. 511, A.L. 2005 H.B. 353, A.L. 2015 S.B. 34 & 105)

RE: Petition approval request from Gerald Peterson regarding a proposed statutory amendment to Chapter 208 (2020-027)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Gerald Peterson on December 27, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Address of notary

Be it enacted by the people of the state of Missouri:

To utilize the Federal Expanded Medicaid Program, Chapter 208.RSMo, is amended by adding thereto one new section, to be known as section 208.207, to read as follows:

208.207. 1. Beginning January 1, 2021, individuals age nineteen to sixty-four, who are not otherwise eligible for MO HealthNet services under this chapter, who qualify for MO HealthNet services under section 42 U.S.C. 1396a(a)(10()(A)(i)(VIII) and as set forth in 42 CFR 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. 1396a(e)(14) and as set forth om 42 CFR 435.603, shall be eligible for medical assistance under Mo HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean, subject to federal approval, benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. 1396a(k)(1).

3. The reimbursement rate to MO HealthNet providers for MO HealthNet services provided to individuals qualifying under the provisions of this section shall be comparable to commercial reimbursement payment levels with trend adjustment for comparable services. The rates shall be determined annually by the department of social services, and the department may develop such rates through a contracted actuary. The higher commercial comparable rates shall only apply for services provided to individuals qualifying under this section.

4. (1) The department of social services shall discontinue eligibility for persons who are eligible under subsection 1 of this section if:

(a) The federal medical assistance percentage established under 42 U.S.C. Section 1396d(y) or 1369d(z) is less than ninety percent as specified for 2020 each year thereafter or an amount determined by the MO HealthNet oversight committee to be necessary to maintain state budget solvency, whichever is lower; and

(b) The general assembly votes to discontinue eligibility for persons who are eligible under subsection 1 of this section. Prior to any vote under this paragraph, the MO HealthNet oversight committee and the department of social services shall provide the general assembly with information on the current and projected expenses incurred due to expanding eligibility to persons under subsection 1 of this section in relation to health-related savings and revenues and health outcomes of individuals and families receiving benefits under subsection 1 of this section.

(2) The department of social services shall inform persons eligible under subsection 1 of this section that their benefits may be reduced or eliminated if federal funding decreases of is eliminate.

5. The MO HealthNet oversight committee shall conduct research and investigate any potential health-related savings and revenues associated with expanding eligibility to persons under subsection 1 of this section. The committee shall investigate the federal matching rate below which the state could not maintain the expanded eligibility to persons under subsection 1 of this section. If the amount is determined to be greater than ninety percent, the committee shall report its findings to the general assembly for its consideration prior to any vote under paragraph (b) of subdivision (1) of subsection 4 of

this section. In conducting its research and investigation, the committee shall also determine the feasibility of:

(1) Implementing capped cost sharing for persons eligible under subsection 1 of this section which may be reduced based on healthy behaviors of participants.

(2) Expanding Medicaid coverage for certain health care services that are currently financed by the state; and

(3) Enrolling persons under subsection 1 of this section in private health benefit plans.

6. Birth control and family planning will be available to all MO women and male residents 13 years of age and over with proof of age and residence. Applications for birth control and family planning will not need permission from family, spouses or guardians (those under the age of 14 will need permission of guardians or parent). Confidentially will be ensured at all levels. If insurance coverage would come from parent or guardian to cover procedure, on request by patient, this charge will go directly to the state to ensure privacy of applicant. Birth control and family planning covered by this bill will begin on April 1, 2021. There will be no cost for family planning services, including office visits and drugs/devices to the patient. The patient will not have to pay a co-payment for family planning services covered by other health insurance as the state will pick up these non-insurance covered expenses. The patient can go to any health provider who offers family planning services such as:

(a) An ob/gyn or gynecologist, a certified nurse-midwife, a nurse practitioner or other advanced practice nurse, a family planning clinic, your regular doctor or primary care provider or Planned Parenthood. The patient may see 'out of network' doctors as the state will be billed directly covering the costs.

(b) Services covered will include:

(1) Birth control pills, Patches (like the OrthoEvra Patch), Vaginal rings (like the NuvaRing), Injections (like the Depo shot), Implants (like Implanon), Intrauterine devices (IUDs – like Mirena or Paragard), Emergency birth control ("the morning-after pill"), Diaphragms, Condoms,

(2) Surgical sterilization for clients 21 years old and older (like vasectomies or tubal ligation, including the Essure procedure) or any future approved medical procedures will be included at the patient's choice.

(3) The state will make available to all schools and health care offices information for teens announcing the birth control plans provided by the state including long-term, reversible contraceptives.

7. If the Missouri State governing body refuses to appropriate the state's share of Medicaid Expansion, then the cost to the state for expanding medical coverage and birth control to all residents will be borne by the hospitals in the state of Missouri as follows:

(a) All hospitals in MO will be assessed a fee to pay for the expense of this expansion. The first year will be an estimate by the 'department of health and senior services'. Assessment will be made based on the most recent records of 'department of health and senior services' for a full year and adjustments for new assessments will begin on the first of April of each following year. Each hospital will pay a share equal to the percentage of patient days of each hospital of the total MO visits. If MO Assembly has not provided appropriations for this measure,then MO Hospitals will begin monthly payments on Jan 1, 2021. Hospitals will make monthly payments to the state of MO into a fund that will only be used for the full Federal Medicaid Expansion, Planned Parenthood and birth control for residents of Missouri.

(b) Missouri will accept the full federal program of Medicaid Expansion. No adjustments will be allotted for employment status of those receiving expansion benefits. If the funds generated by the hospitals will be used to pay for the cost to the state for Medicaid expansion, Missouri will make immediate application and if fees for implementation have not occurred from the hospitals on implementation, the state will borrow from reserve funds to expedite enrollment. These funds will be paid back upon receipt of funds beginning on April 1, 2021 unless the State of Missouri appropriates the necessary funds.

(c)Any savings to the state from Medicaid expansion that is not used for family planning and birth control will go toward the reduction of the levy on hospitals if this bill mandates.

8. If at any time funding for Planned Parenthood by the federal government is discontinued or if it has already been discontinued at the passage of this amendment, the hospital levy will be increased enough to replace the federal funding of Planned Parenthood to a level at least equal to that of 2015 adjusted for inflation. The state of MO will fund Planned Parenthood at a level at least equal to 2015 adjusted for inflation beginning on Jan 1, 2021, and if by the time this measure is accepted, the state of MO has stopped or reduced funding for Planned Parenthood, the state will begin funding Planned Parenthood again at a level equal to 2015 inflation-adjusted.

9. The 'MO HealthNet" oversight committee shall conduct research and investigation for any potential health related savings and revenues associated with expanding Medicaid eligibility and for extended free birth control resulting in fewer births and associated costs as well as savings from continuing 'Planned Parenthood'. Any savings will go to the reduction or elimination of hospital levy if that levy is necessary. Any additional savings will go to the mental health budget. The 'health and senior services' budget in future years will remain at least at the same percent of total MO budget as in 2015 with the excess not needed going to the mental health budget with *priorities* for communities with the highest percent of poverty.

10. No insurance company will be allowed to sell short-term limited-duration insurance (STLDI) plans in the state of Missouri. No insurance company will be allowed to utilize Pre-Existing Conditions to either prevent enrollment or increase prices for any health plan.

11. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-027)

Subject

Initiative petition from Gerald Peterson regarding a proposed amendment to Chapter 208 of the Revised Statutes of Missouri. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Chapter 208 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they anticipate that, if enacted, this proposition would result in increased litigation involving the State and its agencies. However, at this time, they are unable to estimate with specificity the volume of increased litigation. Thus, at this time, they cannot estimate with specificity what additional costs, if any, this proposition would impose on their office.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated they defer to the Department of Social Services to calculate the fiscal impact of the proposed legislation.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, is anticipated to have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated they defer to the Department of Social Services for an estimate of fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated they defer to the Department of Social Services.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated this initiative petition will impact the budgets of the Department of Social Services, Department of Mental Health, the Department of Corrections, and the Department of Health & Senior Services by proposing the expansion of Medicaid eligibility and other provisions relating to birth control and family planning, payment for expanding Medicaid, Planned Parenthood, and short-term limited-duration insurance plans.

Section 208.207.1 – 208.207.2

- Today, Missouri covers custodial parents below 19% of the federal poverty level (FPL), which for a family of four is currently $4,769 per year. In addition, non-custodial adults and childless adults without other qualifying criteria are not currently eligible for Medicaid in Missouri regardless of income.

- The Affordable Care Act allows states to expand health care coverage under the Medicaid program to non-elderly, non-Medicare, low-income adults up to 133% of the FPL. The same law includes a 5% disregard of income when determining eligibility for health care benefits; thus, adults with incomes up to 138% FPL will qualify. For a family of four in Missouri, this is currently income up to $34,638 per year.

- The Family Support Division estimates a need of an additional 56 Eligibility Specialists, 6 Eligibility Supervisors, and 1 Social Services Manager to assist in enrolling new participates. The estimated cost for the new FTEs is $4.6 million.

- The Family Support Division estimates increased costs for the call center for eligibility questions is $18.2 million.

- MO HealthNet would need to contract with an actuary to provide actuary sound managed care rates. MO HealthNet estimates this cost to be approximately $500,000 based on the previous scope for expansion.

- MO HealthNet estimates a need of an additional 15 Correspondence and Info Specialists, 18 Medicaid Specialist, 15 MASII, and 2 Social Services Managers to provide call center and customer service support, tracking, and reporting claims data. The estimated cost for the new FTEs is $4.1 million.

- MO HealthNet estimates changes to the Medicaid Management Information System (MMIS) would be in excess of $5 million.

- OA-ITSD (Office of Administration - Information Technology Services Division) estimates costs for system changes related to Medicaid Expansion to be approximately $657,000 for the first year and $289,000 for the second year.

- The expansion of eligibility for Medicaid benefits under the proposed federal program could potentially include coverage for an estimated 250,000 additional Missourians. The costs for this expansion would be in excess of $2 billion per year. The expansion

population state match would be at least 10%; however, that match is subject to change as federal law is amended. Depending on implementation requirements from CMS, there could be some cost shift from state funds to federal funds; however, the cost of implementing this proposal will result in a significant cost in state general revenue. The overall estimated general revenue cost for implementation of this proposal is estimated to exceed $700 million.

Section 208.207.3

This section states the "reimbursement rate to MO HealthNet providers for MO HealthNet services provided to individuals qualifying under the provisions of this section shall be comparable to commercial reimbursement payment levels with trend adjustment for comparable services."

- DSS assumes expansion members added will be placed on a managed care organization (MCO) health plan. DSS assumes it will make a higher capitation payment to MCOs directing they pay providers commercial rates.
- If expansion members are placed on Fee-for-service; provider rates must not surpass the federal Upper Payment Limit which may or may not be the equivalent to commercial rate required in the proposal.
- MO HealthNet estimates the cost to bring reimbursement rates up to commercial rates for the expansion population would be greater than $500 million.
- It is unknown if CMS will allow the expansion population to be reimbursed at commercial rates.

Section 208.207.6

This section expands birth control and family planning to all Missouri men and women ages 13 and older with proof of age and residence. There will be no cost for family planning services, including office visits and drugs/devices to the patient. The patient can go to any health provider who offers family planning services and confidentially will be ensured at all levels. Covered services include birth control pills, patches, vaginal rings, injections, and surgical sterilization for clients 21 years and older.

- There are approximately 4.6 million Missourians between the ages of 13-64 that may utilize this provision to receive a covered service listed that are not currently covered by MO HealthNet. DSS also assumes that insurer may elect to no longer cover birth control as part of their benefit package in the state Missouri.
- Based on an average per member per month cost of $3.29 for females and $0.02 for males, MO HealthNet Division estimates birth control costs of $44.7 million for females and $11.9 million for males. Total estimated cost $56.6 million per year.
- This provision appears to be in conflict with Missouri informed consent provisions (Chapter 431.061) and medical practice standards of care. Medical professionals are unlikely to legally obtain consent for treatment from minors. If required to do so by this law DSS assumes medical malpractice insurance prices will increase.

- The proposal states, "Confidentiality will be ensured at all levels". The level of confidentiality required by this proposal is unclear. If DSS is unable to disclose information for payment purposes or coordination of care/treatment then a new payment model may need to be developed. In addition, DSS would not have the ability to audit providers to ensure accurate charges for services rendered.
- The proposal also states copay amounts shall be paid by DSS; however, if DSS is unable to determine those amounts due to confidentiality DSS will not be able to make the copayments.
- The proposal is unclear if entities that provide a covered service should be enrolled as a MO HealthNet provider. It is also unclear if participants that utilize this service should be enrolled as a MO HealthNet participant. MO HealthNet estimates changes to the Medicaid Management Information System (MMIS) would be in excess of $15 million.

Section 208.207.7

This section states if the General Assembly does not appropriate funds for Medicaid Expansion, costs for expanding medical coverage and birth control to all residents will be borne by the hospitals in the state through an assessed fee.

- Article III Section 36 requires that any funds used by a department be appropriated by the General Assembly. The proposal seeks to circumvent General Assembly approval by directing DSS to levy a hospital tax or seek a loan and use the proceeds to fund the expansion and birth control provisions.
- This proposal violates Article III §§16-24, 18(e) because it imposes a new tax levy without a voter approval.
- Subdivision (c) states any savings to the state from Medicaid expansion that is not used for family planning and birth control will go toward the reduction of the levy on hospitals. Any savings realized as a result of this proposal must be appropriated by the General Assembly before it can be utilized for any DSS program.

Section 208.207.8

This section states if the federal government discontinues funding for Planned Parenthood, the hospital levy will be increased to replace federal funding to a level at least equal to 2015, adjusted for inflation.

- See concerns above on an assessed fee for hospitals.
- As enacted by the 99th General Assembly, DSS is currently prohibited from expending appropriated funds to abortion facilities, associates and or affiliates of abortion facilities. If the provision remains in effect for FY (fiscal year) 2020 it will be in direct conflict with this proposal.

Section 208.708.10

This section states that no insurance company will be allowed to sell short-term limited-duration insurance plans in the state of Missouri.

- This subsection is in conflict with the Missouri Constitution's single-subject clause.
- It is unclear whether the Department of Insurance would have the proper authority to enact a ban on the sale of short-term insurance. DSS defers to the Department of Insurance regarding its authority to promulgate rules related to this ban.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated they are deferring to the Department of Social Services on this initiative petition.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment if passed would have a positive fiscal impact on their city in an indeterminate amount because it would increase the amount received by the city's health levy.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from **University of Central Missouri** indicated there is insufficient information to determine the fiscal impact of this proposed change. Additional clarifying information is needed to determine the actual or estimated fiscal impact.

Officials from **Missouri State University** indicated there is no fiscal impact to their university.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia**, the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State government entities estimate one-time costs in excess of $21 million and additional costs in excess of $2.5 billion annually. Revenues from the federal government to offset these costs are estimated to be $1.8 billion annually, subject to changes in federal law. Local governments expect unknown changes in revenues.

STATE AUDITORS OFFICE

The Honorable Nicole Galloway
State Auditor
State Capitol Building
Jefferson City, MO 65101

RE: Petition approval request from Gerald Peterson regarding a proposed statutory amendment to Chapter 147 (2020-026)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Gerald Peterson on December 27, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

The annual franchise tax of Chapter 147.RSMo will be amended to be reinstated as follows with the revenue to be distributed to the Missouri Road Fund, to the higher education fund and to school districts with a 12% or more poverty level as directed by this amendment:

147.010 1. For the transitional year defined in subsection 4 of this section and each taxable year beginning on or after January 1, 1980, but before January 1, 2000, every corporation organized pursuant to or subject to chapter 351 or pursuant to any other law of this state shall, in addition to all other fees and taxes now required or paid, pay an annual franchise tax to the state of Missouri equal to one-twentieth of one percent of the par value of its outstanding shares and surplus if its outstanding shares and surplus exceed two hundred thousand dollars, or if the outstanding shares of such corporation or any part thereof consist of shares without par value, then, in that event, for the purpose contained in this section, such shares shall be considered as having a value of five dollars per share unless the actual value of such shares exceeds five dollars per share, in which case the tax shall be levied and collected on the actual value and the surplus if the actual value and the surplus exceed two hundred thousand dollars. If such corporation employs a part of its outstanding shares in business in another state or country, then such corporation shall pay an annual franchise tax equal to one-twentieth of one percent of its outstanding shares and surplus employed in this state if its outstanding shares and surplus employed in this state exceed two hundred thousand dollars, and for the purposes of sections 147.010 to 147.120, such corporation shall be deemed to have employed in this state that proportion of its entire outstanding shares and surplus that its property and assets employed in this state bears to all its property and assets wherever located. A foreign corporation engaged in business in this state, whether pursuant to a certificate of authority issued pursuant to chapter 351 or not, shall be subject to this section. Any corporation whose outstanding shares and surplus as calculated in this subsection does not exceed two hundred thousand dollars shall state that fact on the annual report form prescribed by the secretary of state. For all taxable years beginning on or after January 1, 2000, but ending before December 31, 2009, the annual franchise tax shall be equal to one-thirtieth of one percent of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed one million dollars. Any corporation whose outstanding shares and surplus do not exceed one million dollars shall state that fact on the annual report form prescribed by the director of revenue. For taxable years beginning on or after January 1, 2010, but before December 31, 2011, the annual franchise tax shall be equal to one-thirtieth of one percent of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed ten million dollars. For all taxable years beginning on or after January 1, 2010, but before December 31, 2015, any corporation whose outstanding shares and surplus do not exceed ten million dollars shall state that fact on the annual report form prescribed by the director of revenue. For all taxable years beginning on or after January 1, 2011, but before December 31, 2015, a corporation's annual tax liability under this chapter shall not exceed the amount of annual franchise tax liability of such corporation for the taxable year ending on or before December 31, 2010. If the corporation had no annual franchise tax liability under this chapter for the taxable year ending on or before December 31, 2010, because such corporation was not in existence or doing business in Missouri, the annual franchise tax for the first taxable year in which such corporation exists shall be determined by applying the applicable rate of tax provided under the provisions of this subsection to the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed ten million dollars, but in no case shall such corporation's tax liability for any subsequent taxable year exceed the amount of annual franchise tax liability of such corporation for the first full taxable year such corporation was in existence or doing business in Missouri. For taxable years beginning on or after January 1, 2012, the annual franchise tax shall be equal to the percentage rate prescribed in this subsection for the corresponding taxable year of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed the corresponding minimum threshold amount prescribed as follows:

(1) For tax year 2012, the rate shall be one-thirty-seventh of one percent and the threshold amount shall be ten million dollars;

(2) For tax year 2013, the rate shall be one-fiftieth of one percent and the threshold amount shall be ten million dollars;

(3) For tax year 2014, the rate shall be one-seventy-fifth of one percent and the threshold amount shall be ten million dollars;
(4) For tax year 2015, the rate shall be one-hundred-fiftieth of one percent and the threshold amount shall be ten million dollars;
(5) For tax years beginning on or after January 1, 2016, no annual franchise tax shall be imposed under this section until the tax year of 2021.

(6) For the tax year 2021, the rate shall be one percent and the threshold amount shall be ten million dollars and shall remain at that rate unless changed through a ballot of the citizens of the state of Missouri. The first quarterly estimated payments will be due on April 15th of 2021.

(7) Forty percent of the revenue of the annual franchise tax will go into the Missouri State Road Fund.

(8) Fifty percent of the revenue of the annual franchise tax will be to provide funds for the schools with a 12% or more poverty level of the citizens in the Missouri public-school system including pre-kindergarten, elementary and secondary education. The revenue generated from the franchise tax for this section will go to a dedicated fund that will be distributed to these schools with a 12% or more poverty level. Distribution will be to those schools that have met the poverty level in at least 5 of the previous 10 years. Distribution will be the total amount distributed equally based on the average daily attendance of all eligible schools. Each school receiving funds will investigate "Communities in Schools" (https://www.communitiesinschools.org/) and utilize funds if deemed appropriate for this program. To combat the "Pipeline to Prison", a penalty of 10% per year (limited to 30% and cancelled once conditions are met) will be imposed on those schools with a 10% or more minority student representation that does not have an ongoing program of strategic planning with Administrators and School Leaders on Restorative Justice, Discipline and behavior systems including:

- A Peace Room which serves as a hub for restorative practices and interventions including: Peace Circles, Mediations, Restorative Chats & Re-entry Circles
- A disciplinary intervention curriculum which teaches critical social-emotional & leadership skills
- Professional development for teachers and school staff

And for schools with potential of 20 pre-Kindergarten students, this penalty will be imposed for not providing every 4-year-old with high-quality, full-day pre-K.

(9) Ten percent of the revenue of the of the annual franchise tax will go to qualified students from families or individuals with an income below 12% poverty level as scholarships only for public Missouri colleges and universities. Scholarships amounts to each individual will include tuition and associated fees and books with an additional amount equal to that amount for their living expenses. Out of the same fund, scholarships will be available for any Missouri medical school or university providing medical training or Doctors of Medicine degrees. These scholarships will cover all tuition and fees, but only half of that amount for living expenses. These scholarships will also be available for any Missouri student who attended a school that served families with an income below the 12% level. Qualified applicants will be granted in order of receipt of application. At the end of each calendar year, any amounts not used for scholarships will be available to pay off student loans of teachers who have taught at schools serving areas with income areas with an income below 12% poverty level. The debts will be paid off beginning with those teachers who have taught the longest and then proceeding to the next longest serving teachers. Any funds not used from this fund will go into funds for higher education. The Missouri budget for elementary and secondary education will not be replaced by this bill. The elementary and secondary education budgets will remain as specified in Chapter 163. Failure of the legislatures to fulfill this

obligation will require the shortfall to be filled with funds from the Elected Officials, & General Assembly budget.

2. Sections 147.010 to 147.120 shall not apply to corporations not organized for profit, nor to corporations organized pursuant to the provisions of chapter 349, nor to express companies, which now pay an annual tax on their gross receipts in this state, nor to insurance companies, which are subject to an annual tax on their premium receipts in this state, nor to state, district, county, town and farmers' mutual companies now organized or that may be hereafter organized pursuant to any of the laws of this state, organized for the sole purpose of writing fire, lightning, windstorm, tornado, cyclone, hail and plate glass and mutual automobile insurance and for the purpose of paying any loss incurred by any member by assessment, nor to any mutual insurance corporation not having shares, nor to a company or association organized to transact business of life or accident insurance on the assessment plan for the purpose of mutual protection and benefit to its members and the payment of stipulated sums of moneys to the family, heirs, executors, administrators or assigns of the deceased member, nor to foreign life, fire, accident, surety, liability, steam boiler, tornado, health, or other kind of insurance company of whatever nature coming within the provisions of section 147.050 and doing business in this state, nor to savings and loan associations and domestic and foreign regulated investment companies as defined by Section 170 of the Act of Congress commonly known as the Revenue Act of 1942, nor to electric and telephone corporations organized pursuant to chapter 351 and chapter 392 prior to January 1, 1980, which have been declared tax-exempt organizations pursuant to Section 501(c) of the Internal Revenue Code of 1986, nor for taxable years beginning after December 31, 1986, to banking institutions subject to the annual franchise tax imposed by sections 148.010 to 148.110; but bank deposits shall be considered as funds of the individual depositor left for safekeeping and shall not be considered in computing the amount of tax collectible pursuant to the provisions of sections 147.010 to 147.120.

3. A corporation's taxable year for purposes of sections 147.010 to 147.120 shall be its taxable year as provided in section 143.271.

4. A corporation's transitional year for the purposes of sections 147.010 to 147.120 shall be its taxable year which includes parts of each of the years 1979 and 1980.

5. The franchise tax payable for a corporation's transitional year shall be computed by multiplying the amount otherwise due for that year by a fraction, the numerator of which is the number of months between January 1, 1980, and the end of the taxable year and the denominator of which is twelve. The franchise tax payable, if a corporation's taxable year is changed as provided in section 143.271, shall be similarly computed pursuant to regulations prescribed by the director of revenue.

6. All franchise reports and franchise taxes shall be returned to the director of revenue. All checks and drafts remitted for payment of franchise taxes shall be made payable to the director of revenue.

7. Pursuant to section 32.057, the director of revenue shall maintain the confidentiality of all franchise tax reports returned to the director.

8. The director of the department of revenue shall honor all existing agreements between taxpayers and the director of the department of revenue.

9. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-026)

Subject

Initiative petition from Gerald Peterson regarding a proposed amendment to Chapter 147 of the Revised Statutes of Missouri. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Chapter 147 of the Revised Statutes of Missouri.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated this proposal will have an impact on the revenue stream of state and local governments; however, their department has no means to calculate such impact.

There does not appear to be any revenue estimates which makes it difficult to determine the financial impact to schools. There is no definition of "poverty level" which is problematic since their department uses free and reduced lunch rates as an indicator of poverty in districts. If that is the measure, upward of 75% of the schools in the state could be deemed to be in poverty. Regarding the distribution of funding, the use of the term "schools" could cause problems because their department distributed funds by district, not by school. Finally, there is no mechanism to distribute the funds nor monitor the implementation of the programs described in subsection 1.8. If their department were to be charged with this, there would be a fiscal responsibility placed on their department for the oversight.

Officials from the **Department of Higher Education** indicated they defer to the Office of Administration on the revenues to be generated by this change.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated:

Section 147.010

This section reinstates the annual franchise tax beginning with tax year 2021 at a rate of one percent with a threshold amount of ten million dollars, unless otherwise changed through a ballot of the citizens of Missouri.

Disposition of the tax is as follows:

- Forty percent to the Missouri State Road Fund
- Fifty percent to schools with a twelve percent or more poverty level of the citizens in the Missouri public-school system including pre-kindergarten, elementary, and secondary education.
- Ten percent to qualified students from families or individuals with an income below twelve percent poverty level as scholarships for public Missouri colleges and universities.

The corporate franchise tax is a tax on a corporation's outstanding shares and surplus within this state. In order to find the fiscal impact, they utilized data reported on the Corporate Franchise Tax Schedule (MO-FT).

In FY (fiscal year) 15, the total dollar amount of assets apportioned to Missouri was $285,488,613,202, take that amount by the proposed tax rate of one percent for an estimated collections of $2,854,886,132. The chart below reflects the estimated fiscal impact in the appropriate funds.

	FY20	FY21	FY22
Missouri State Road Fund	$570,977,227	$1,141,954,453	$1,141,954,453
Public Schools	$713,721,533	$1,427,443,066	$1,427,443,066
Scholarships	$142,744,307	$285,488,613	$285,488,613

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated this initiative petition would reinstate the corporate franchise tax and then require that forty percent of the new proceeds would be deposited into the State Road Fund. Therefore, it will have a positive fiscal impact on their department. The amount of such impact is unknown. The Department of Revenue is best equipped to estimate a fiscal impact for this initiative petition, so their department therefore defers to them for a fiscal impact.

Officials from the **Office of Administration** indicated this proposal amends Section 147.010, RSMo, to enact a one-percent franchise tax beginning with tax year 2021. The first quarterly estimated payment shall be due on April 15th, 2021.

Forty percent of the proceeds will be deposited in the Missouri State Road Fund.

Fifty percent of the proceeds will go to a dedicated fund to distribute to schools with 12% or more poverty level. Schools with 10% or more minority students receiving proceeds from the dedicated fund must have a program with Administrators and School Leaders on Restorative Justice, Discipline and behavior systems or face a 10% penalty per year with a total penalty up to 30%.

Ten percent of the proceeds will go to qualified students from families or individuals with income below 12% poverty level as scholarships for use at Missouri public colleges and universities. At the end of each calendar year, any money remaining shall be used to pay off student loans of teachers at schools serving areas with incomes below 12% poverty level. Any funds remaining shall then be transferred into funds for higher education. This language also specifies that the budget for elementary and secondary education will not be replaced by this bill and that its budget will remain as specified in Chapter 163.

Based on franchise tax collections in CY (calendar year) 15, the last year a franchise tax was in place, gross collections were $29.9 million. At a tax rate of 0.0067%, B&P (Budget and Planning) estimates that total estimates of corporations with at least $10 million in assets was $446.67 billion. At a tax rate of 1%, this proposal would generate approximately $4.47 billion in new revenues once fully implemented in FY (fiscal year) 22. While the franchise tax is an annual tax, historically payments have lagged the annual due date by as much as 18 months. Therefore, B&P estimates that this proposal would increase revenues by $2.77 billion in FY21 and $4.47 billion in FY22 and thereafter.

The distribution of the tax revenue is shown below:

Fund	% deposited	FY21	FY22
State Road Fund	40.0%	$1,108,000,000	$1,786,800,000
Unspecified Dedicated Fund (for school districts with at least 12% poverty level)	50.0%	$1,385,000,000	$2,233,500,000
Unspecified Dedicated Fund (for use by DHE)	10.0%	$277,000,000	$446,700,000

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office so long as funding would be appropriated as proposed.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **State Technical College of Missouri** indicated this could have an indirect positive fiscal impact as it could benefit students that choose to attend their college.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Fiscal Note Summary

State governmental entities expect no additional costs and estimate additional annual revenues ranging from $2.9 billion to $4.5 billion. Local governmental entities expect no costs or savings.

RE: Petition approval request from Damien Johnson regarding a proposed constitutional amendment to Article III (2020-025)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Damien Johnson on December 26, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article III section 50 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.
Section 50. Initiative petitions proposing amendments to the constitution shall be signed by eight percent of the legal voters in each of two-thirds of the congressional districts in the state, and petitions proposing laws shall be signed by five percent of such voters. Every such petition shall be filed with the secretary of state not less than six months before the election and shall contain an enacting clause and the full text of the measure. Petitions for constitutional amendments shall not contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith, and the enacting clause thereof shall be "Be it resolved by the people of the state of Missouri that the Constitution be amended:". Petitions for laws shall contain not more than one subject which shall be expressed clearly in the title, and the enacting clause thereof shall be "Be it enacted by the people of the state of Missouri:". A petition may be filed following a November election and no filing fee shall be imposed. Any adult 18 years old or older may collect signatures for any petition approved for circulation. A petitioner may volunteer or be paid. An employer may pay per signature, by the hour, or any way agreed to. Changes to election laws are prohibited without voter approval. The Secretary of State shall host and maintain a web based system for the purpose of providing voters the option to sign petitions electronically. The office of the Secretary of State shall provide a verified voter with a unique identification number and collect identical information as required by existing initiative petition law. The electronic signature process is in addition to existing signature requirements and allows an individual to choose between the electronic signature or personally signing a hard copy of the petition. Voters shall have the option of receiving a confirmation text, confirmation email, or any electronic message within the capacity of Secretary of State or a postcard confirming the electronic signature. Voters are also provided a 20 day period to respond with any corrections or objections to the electronic signature.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-025)

Subject

Initiative petition from Damien Johnson regarding a proposed constitutional amendment to Article III. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article III of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

This proposal amends Article III, Section 50 of the MO Constitution with the following:

- Prohibits filing fees for initiative petitions and allows them to be filed following a November election.
- Allows any adult over age 18 to collect signatures as a volunteer or paid staff.
- Requires the Secretary of State to provide verified voters a unique identification number and collect identical information; host and maintain a web based system to provide an option for voters to sign petitions electronically; provide voters confirmation of electronic signatures; and provide a 20 day time period for the voter to respond with any corrections or objections to the electronic signature.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated:

Petition 2020-025 would require their office to develop a web page to allow electronic signature of initiative and referendum petitions. The Information Technology Division estimates the labor costs for this project at $238,767.96. The Elections Division would require an additional FTE to process the queue of electronic signatures at an initial salary of $38,148 beginning in FY (fiscal year) 2021.

This proposed amendment would also require their office to contact each voter within 20 days of receipt of an electronic petition signature. The proposal does authorize electronic methods such as e-mail or text messages to be used. However, currently the only contact information collected in the initiative petition process is the individual’s registered voting address. This leaves a physical mailing to each voter utilizing an electronic signature as the only feasible option. While they cannot determine the specific number of voters that will

utilize the electronic system, they can determine an estimate based on the petitions received in the 2018 cycle.

For the 2018 cycle, their office processed signatures for five initiative petitions, with the largest petition having approximately 423,024 signatures checked by local election authorities. If five petitions with that number of signatures on each are received in one petition cycle, that number would total up to 2,115,120 signatures for the cycle, any or all of which could be submitted electronically. Assuming a going rate of postage and processing at $0.35 per postcard, a reasonable estimated cost of mailing could equal up to $740,292.

Unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. The SOS estimates $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated:

There are many factors and/or variables that are unknown as to the additional costs that the language of this amendment would add to the signature verification cost during the course of a fiscal year. For this reason it was determined that the best reference point to attain an estimated cost is the data from the 2018 initiative petition signature verification process.

The total cost for the 2018 initiative petition signature verification process as indicated in the spreadsheets below is $57,051.22. There were a total of 136,149 signatures checked. The rounded cost per signature for the 2018 initiative petition signature verification process was 42 cents per signature.

The future is unknown, but based on the signatures verified in 2018; we estimate conservatively that the office will verify a minimum of 100,000 signatures in 2020 through the initiative petition process. We estimate conservatively that approximately 20,000 voters out of the 100,000 signatures will request a confirmation text, email or postcard if this amendment is passed into law.

The postcards will be purchased in advance to ensure a reduction in printing costs due to volume. A minimum of 50,000 postcards at an estimated 5.8 cents a postcard would be purchased for a total cost of $2,900. In addition, the unique printing identifier information cost for the postcard is estimated to be 3.7 cents a postcard and so it will cost $740.00 if 20,000 postcards are mailed. Postage for the postcards is currently at 47 cents a postcard. Assuming postage costs do not increase by 2022 and 20,000 postcards are mailed at 47 cents a postcard, the cost would be $9,400.00. The estimated total costs for 20,000 postcards being mailed is $13,040.

To send a text message it will cost approximately 7.5 cents a text. If 20,000 text messages are sent to each voter who requests a text, the current estimated cost would be $1,500.

As stated earlier, it is hard to anticipate how many voters who sign a petition would request a confirmation text, email or postcard if this amendment is passed into law. If all costs remain the same prior to the signature verification process in 2022, the minimum cost if only a confirmation text is requested would be $1,500, which means the estimated total cost per signature would be 43 cents. The maximum cost if all costs remain the same for a confirmation mailer would be $13,040, which means the estimated total cost per signature would 51 cents.

Greene County Hourly Cost Summary for 2018 Initiative Petition Signature Verification Process

NOTICE: You are advised that in addition to the express amendments, repeals, and modifications as set forth below, this proposal may repeal, change or modify by implication, or may be construed by some persons to repeal, change or modify by implication, Article IV, Section 4, Article V, Sections 8, 19, 25(a), 25(c)(1), 25(c)(2), 25(d), 25(e), 25(f), and 25(g), and Article VIII, Section 23 of the Constitution of Missouri.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

To amend Sections 8, 19, 25(a), and 25(f), and enact Sections 1(a), 25(c)(3), 25(c)(4), 25(c)(5), and 25(c)(6) of Article V of the Constitution of Missouri to read as follows:

Section 1(a). 1. Judges of the supreme court and court of appeals shall be elected in nonpartisan elections.

2. The election of judges derives from the principle that all political power is vested in and derived from the people, and all government of right originates from the people, is founded upon their will only, and is instituted solely for the good of the whole, and further, that all courts of justice shall be open to every person without sale, denial, or delay. Judges shall therefore be accountable to the citizens of this state, this constitution, and the United States Constitution, and not beholden to any particular association or alliance of lawyers, judges, or interest groups. To accomplish this purpose, as set forth in sections 25(a) through (g), judges of the supreme court and court of appeals shall henceforth stand for election, and shall no longer be selected by the governor from nominations made by commissions of lawyers, judges, and the governor's chosen appointees. Voters in most circuits shall continue to have the ability to choose the method by which circuit and associate circuit judges are selected. Section 1(a) and sections 25(a) through (g) shall be known as the "Missouri Nonpartisan Court Plan."

Section 8. [The judges of the supreme court shall elect from their number a] The chief justice [to] shall preside over the supreme court en banc, and the judges of the court of appeals in each district shall elect from their number a chief judge of the district. The terms of the [chief justice and] chief judges shall be fixed by the courts over which they preside. The chief justice of the supreme court shall be the chief administrative officer of the judicial system and, subject to the supervisory authority of the supreme court, shall supervise the administration of the courts of this state.

Section 19. Judges of the supreme court, including the chief justice, and judges and of the court of appeals shall be selected for terms of [twelve] six years, judges of the circuit courts for terms of six years, and associate circuit judges for terms of four years. No supreme court judge, supreme court chief justice, or court of appeals judge shall be elected to a particular judicial seat for more than two consecutive terms.

Section 25(a). Whenever a vacancy shall occur in the office of [judge of any of the following courts of this state, to wit: The supreme court, the court of appeals, or in the office of] circuit or associate circuit judge within the city of St. Louis and Jackson County, the governor shall fill such vacancy by appointing one of three persons possessing the qualifications for such office, who shall be nominated and whose names shall be submitted to the governor by a nonpartisan judicial commission established and organized as hereinafter provided. If the governor fails to appoint any of the nominees within sixty days after the list of nominees is submitted, the nonpartisan judicial commission making the nomination shall appoint one of the nominees to fill the vacancy. Whenever a vacancy shall occur in the office of judge of the supreme court, supreme court chief justice, or judge of the court of appeals, it shall be promptly filled under article 4, section 4 of this constitution and such appointee shall hold office for the remainder of the vacating judge's term.

Section 25(c)(1). Each judge appointed to the office of circuit or associate circuit judge pursuant to the provisions of sections 25(a)-(g) shall hold office for a term ending December thirty-first following the next general election after the expiration of twelve months in the office. Any circuit or associate circuit judge holding office, or elected thereto, at the time of the election by which the provisions of sections 25(a)-(g) become applicable to his office, shall, unless removed for cause, remain in office for the term to which he would have been entitled had the provisions of sections 25(a)-(g) not become applicable to his office. Not less than sixty days prior to the holding of the general election next preceding the expiration of his term of office, any circuit or associate circuit judge whose office is subject to the provisions of sections 25(a)-(g) may file in the office of the secretary of state a declaration of candidacy for election to succeed himself. If a declaration is not so filed [by any judge], the vacancy resulting from the expiration of his term of office shall be filled by appointment as herein provided. If such declaration is filed, his name shall be submitted at said next general election to the voters eligible to vote [within the state if his office is that of judge of the supreme court, or within the geographic jurisdiction limit of the district where he serves if his office is that of a judge of the court of appeals, or] within the circuit if his office is that of circuit judge, or within the county if his office is that of associate circuit judge on a separate judicial ballot, without party designation, reading:

"Shall Judge .....

(Here the name of the judge shall be inserted) of the .....

(Here the title of the court shall be inserted) be retained in office? Yes No

(Mark an "X" in the box you prefer.)" If a majority of those voting on the question vote against retaining him in office, upon the expiration of his term of office, a vacancy shall exist which shall be filled by appointment as provided in section 25(a); otherwise, said judge shall, unless removed for cause, remain in office for the number of years after December thirty-first following such election as is provided for the full term of such office, and at the expiration of each such term shall be eligible for retention in office by election in the manner here prescribed.

Section 25(c)(3). Judges of the court of appeals and supreme court shall be elected at the general election by the voters eligible to vote within the appellate district of the seat being elected as set forth in sections 25(c)(4) and 25(c)(5). Except as set forth in section 25(a), they shall hold office for a term expiring December thirty-first in the sixth year after their election. The provisions of sections 25(c)(1) and 25(c)(2) shall not apply to court of appeals or supreme court judges.

Section 25(c)(4). Supreme court judges shall be elected as follows. If the general assembly has provided by law for three appellate districts, a chief justice shall be elected at large and two supreme court judges shall be elected from each court of appeals district by the voters eligible to vote within that district, but if greater than three court of appeals districts are established or the geographical boundaries of the districts change such that the following divisions cannot be made, then elections for supreme court judges other than the chief justice shall be as established by law, or if no law timely establishes procedures for such elections, then elections for all supreme court seats shall be at large. Seats E1 and E2 shall be elected from the court of appeals district which includes the City of St. Louis. Seats S1 and S2 shall be elected from the court of appeals district which includes the City of Springfield. Seats W1 and W2 shall be elected from the court of appeals district which includes the City of Kansas City. Seat CJ, the seat of the chief

judge, shall be elected at large. Seats E1 and S1 shall be known as "Class 1" and elected in 2022 and every sixth successive year. Seats W1 and E2 shall be known as "Class 2" and elected in 2024 and every sixth successive year. Seats S2, W2, and the chief justice's at-large seat, CJ, shall be known as "Class 3" and elected in 2026 and every sixth successive year. A supreme court judge shall be a resident of the appellate district from which he or she is elected no later than the day of his or her election.

Section 25(c)(5). The following transition provisions shall apply: 1. Those supreme court judges holding office as of 5:00 p.m. on December 3, 2020, shall not be required to reside in any particular appellate district but on that date shall nonetheless be assigned the following seat designations for purposes of implementing elections and filling vacancies. The seat designations shall be assigned in the following order: CJ, W2, S2, E2, W1, S1, E1. First, beginning with Seat CJ, seats will be assigned to judges who have been retained by voters, starting with the judge most recently retained by voters. For judges retained at the same time, the judge having served the least time on the supreme court shall be assigned first. After all judges who have been retained have been assigned seats, judges who have been appointed shall be assigned, with judges most recently appointed to be assigned first. If all judges who have been retained or appointed have been assigned seats, and it appears that one or more supreme court seats was vacated on or before December 3, 2020, but remained unfilled by the end of that date, these vacancies will be immediately assigned a class and seat, using the order set forth in this section until all seats through Seat S1 are filled, and in assigning seat designations to vacancies, vacancies created by a judge whose last name is first in alphabetical order will have precedence. A seat held by any judge who lost a retention election in the 2020 general election shall be treated as vacant solely for purposes of assigning a class and seat under this transition provision, even though the judge shall hold office until December 31, 2020, and the seat shall be treated as vacant for purposes of section 25(a) on January 1, 2021, and thereafter filled under the provisions of that section.
2. Court of appeals judges who were last retained in the 2010 or 2012 general elections, or the successors to vacancies left by such judges, shall stand in the 2022 general election, court of appeals judges who were last retained in the 2014 or 2016 general elections, or the successors to vacancies left by such judges, shall stand in the 2024 general election, and court of appeals judges who were last retained in the 2018 or 2020 general elections, or the successors to vacancies left by such judges, shall stand in the 2026 general election. The candidate elected in each such election shall serve for the term prescribed by section 19, and every succeeding six years, a new election shall be held for that judicial office. Court of appeals judges first eligible for retention in the 2022 general election under the immediately prior version of section 25(c)(1), which was effective until the end of thirty days after the election adopting this section, shall stand for election in the 2022 general election. Any seat held by a court of appeals judge who loses a retention election in the 2020 general election shall be treated as vacant on January 1, 2021, and shall thereafter be filled under the provisions of section 25(a). Any law providing for additional court of appeals seats shall specify the first general election at which the seat shall be filled.
3. A supreme court or court of appeals vacancy that opened before the end of thirty days after the election adopting this section but was not yet filled as of that time and date shall be filled by the governor under the provisions of section 25(a).
4. The transition provisions of this section 25(c)(5) shall be severable from the remainder of section 25(a) through (g).

Section 25(c)(6). 1. Elections for the offices of judge of the supreme court and court of appeals shall be non-partisan elections. No political party may or shall nominate any candidate for these judicial offices, and no primary or general election ballot shall include a party designation for any of these judicial offices. However, the general assembly shall make no law prohibiting a candidate from declaring himself or herself a supporter of a political party, or prohibiting a political party from declaring its support for a candidate.
2. All declarations for candidacy for the offices of judge of the supreme court and court of appeals shall be filed in the office of the secretary of state no later than 120 days before the primary election. A candidate, whether or not an incumbent, may file such declaration using a form provided by the secretary of state. All declarations shall be accompanied by either a nominating petition or a nomination form. A nominating petition shall have been signed no earlier than 180 days before the primary election by twenty voters eligible to vote in the applicable appellate district, or in the case of the chief justice, in the state. A nomination form shall be signed by all members of the Appellate Judicial Commission no earlier than 180 days before the primary. The Appellate Judicial Commission may issue nomination forms for up to three individuals per race, but this shall include individuals who do not file declarations and therefore do not become candidates.
3. The two candidates receiving the highest number of votes in the primary election shall stand in the general election. The candidate achieving the greatest number of votes in the general election shall be elected to the judicial office.
4. Primary and general elections for the offices of judge of the supreme court and court of appeals shall be held in the same manner as gubernatorial elections to the greatest extent possible for nonpartisan elections, or as may otherwise be provided by law. Contests to the results of an election under this section, whether on the basis of qualification, irregularity, or other cause, or for recount other than any automatic recount as may be provided by law, shall be heard and determined in the same manner as gubernatorial elections to the greatest extent possible for nonpartisan elections, or as otherwise provided by law.
5. The provisions of this section 25(c)(6) shall be severable from the remainder of section 25(a) through (g).

Section 25(f). No judge of any court in this state, appointed or elected to or retained in office in the manner prescribed in sections 25(a)-(g), shall directly or indirectly make any contribution to or hold any office in a political party or organization, or take part in any political campaign[.] except as provided in sections 25(a)–(g). A judge or judicial candidate may announce his or her views on disputed legal or political issues provided that the judge or judicial candidate does not make pledges or promises to render specific rulings or decisions on pending litigation. Judicial candidates and judges who are judicial candidates shall be allowed to solicit, receive and make campaign contributions, and make and receive the benefit of campaign expenditures for their own campaigns as may be provided by law. Nothing herein shall preclude the application of laws or rules of the supreme court governing judicial participation in specific cases based on a judge's political activity with respect to the subject matter or parties. The provisions of this section 25(f) shall be severable from the remainder of section 25(a) through (g), except that nothing shall prohibit a candidate for the supreme court or court of appeals from making or accepting contributions to or taking part in his or her own political campaign.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-024)

Subject

Initiative petition from Patricia Thomas regarding a proposed constitutional amendment to Article V. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article V of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, St. Louis County Board of Elections, Board of Election Commissioners City of St. Louis, Kansas City Board of Election Commissioners, Platte County Board of Elections, Jackson County Election Board,** and **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article V of the Constitution of Missouri by requiring nonpartisan elections for judges of the Supreme Court and Court of Appeals. Judges would be elected for six-year terms and would not be allowed to be elected to a particular judicial seat for more than two consecutive terms. Judges would be elected at a general election. The Chief Justice shall be elected at large and two Supreme Court justices will be elected from each Court of Appeals district. This proposal also allows judges to announce their views on disputed legal or political issues; solicit, receive and make campaign contributions; and receive the benefit of campaign expenditures for their own campaigns.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The initiative petition proposing to amend Article V, would require the election of all Supreme Court, Courts of Appeal, Circuit Court and Associate Circuit Court Judges, if approved by the voters.

The proposed legislation would eliminate the appellate judicial commission, which would save $7,741 annually.

Under the proposed legislation a Supreme Court judge, the Chief Justice or court of appeals judge may not serve more than two consecutive terms, which would result in a complete turnover every twelve years. As a result, the cost to training the new judges will increase. New judge orientation class can be from 20 participants to 50 participants and cost $29,168 to $54,568. There are 39 judicial positions in the state that this proposed legislation would affect so the cost of training is estimated to between $29,168 and $54,568 per year.

Judicial vacancies in the Supreme Court, Supreme Court Chief Justice and Court of Appeals, happen throughout the year. Under the proposed legislation, whenever a vacancy shall occur the Governor would appoint the judge to serve the remaining term. Some judicial positions could be vacant for an extended period. During this time, the courts would need to transfer sitting judges or bring in senior judges to handle the existing workload. Since there is no way to quantify the amount of transfers or senior judges that

would be needed, the fiscal impact to the judiciary is unknown at this time. Any significant changes will be reflected in future budget request.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from the **St. Louis County Election Board** indicated they believe this will have no fiscal impact on their board.

Officials from the **Platte County Board of Elections** indicated they expect no fiscal impact from this petition.

Officials from the **Jackson County Election Board** indicated this initiative petition has no fiscal impact to their board.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph**, the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Board of Election Commissioners City of St. Louis, Kansas City Board of Election Commissioners,** and **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State court officials estimate cost savings of approximately $8,000 annually, increased training costs ranging from approximately $29,000 to $55,000 annually, and unknown annual costs related to judicial vacancies. Local governments estimate no costs or savings.

RE: Petition approval request from Patricia Thomas regarding a proposed constitutional amendment to Article V, version 1 (2020-023)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Patricia Thomas on December 21, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: You are advised that in addition to the express amendments, repeals, and modifications as set forth below, this proposal may repeal, change or modify by implication, or may be construed by some persons to repeal, change or modify by implication, Article IV, Section 4, Article V, Sections 8, 19, 25(a), 25(c)(1), 25(c)(2), 25(d), 25(e), 25(f), and 25(g), and Article VIII, Section 23 of the Constitution of Missouri.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

To amend Sections 8, 19, 25(a), and 25(f), and enact Sections 1(a), 25(c)(3), 25(c)(4), 25(c)(5), and 25(c)(6) of Article V of the Constitution of Missouri to read as follows:

Section 1(a). 1. Judges of the supreme court and court of appeals shall be elected in elections conducted in the same manner as contested elections for governor.

2. The election of judges derives from the principle that all political power is vested in and derived from the people, and all government of right originates from the people, is founded upon their will only, and is instituted solely for the good of the whole, and further, that all courts of justice shall be open to every person without sale, denial, or delay. Judges shall therefore be accountable to the citizens of this state, this constitution, and the United States Constitution, and not beholden to any particular association or alliance of lawyers, judges, or interest groups. To accomplish this purpose, as set forth in sections 25(a) through (g), judges of the supreme court and court of appeals shall henceforth stand for election, and shall no longer be selected by the governor from nominations made by commissions of lawyers, judges, and the governor's chosen appointees. Voters in most circuits shall continue to have the ability to choose the method by which circuit and associate circuit judges are selected. Section 1(a) and sections 25(a) through (g) shall be known as the "Missouri Plan for Judicial Fairness and Accountability."

Section 8. [The judges of the supreme court shall elect from their number a] The chief justice [to] shall preside over the supreme court en banc, and the judges of the court of appeals in each district shall elect from their number a chief judge of the district. The terms of the [chief justice and] chief judges shall be fixed by the courts over which they preside. The chief justice of the supreme court shall be the chief administrative officer of the judicial system and, subject to the supervisory authority of the supreme court, shall supervise the administration of the courts of this state.

Section 19. Judges of the supreme court, including the chief justice, and judges and of the court of appeals shall be selected for terms of [twelve] six years, judges of the circuit courts for terms of six years, and associate circuit judges for terms of four years. No supreme court judge, supreme court chief justice, or court of appeals judge shall be elected to a particular judicial seat for more than two consecutive terms.

Section 25(a). Whenever a vacancy shall occur in the office of [judge of any of the following courts of this state, to wit: The supreme court, the court of appeals, or in the office of] circuit or associate circuit judge within the city of St. Louis and Jackson County, the governor shall fill such vacancy by appointing one of three persons possessing the qualifications for such office, who shall be nominated and whose names shall be submitted to the governor by a nonpartisan judicial commission established and organized as hereinafter provided. If the governor fails to appoint any of the nominees within sixty days after the list of nominees is submitted, the nonpartisan judicial commission making the nomination shall appoint one of the nominees to fill the vacancy. Whenever a vacancy shall occur in the office of judge of the supreme court, supreme court chief justice, or judge of the court of appeals, it shall be promptly filled under article 4, section 4 of this constitution and such appointee shall hold office for the remainder of the vacating judge's term.

Section 25(c)(1). Each judge appointed to the office of circuit or associate circuit judge pursuant to the provisions of sections 25(a)-(g) shall hold office for a term ending December thirty-first following the next general election after the expiration of twelve months in the office. Any circuit or associate circuit judge holding office, or elected thereto, at the time of the election by which the provisions of sections 25(a)-(g) become applicable to his office, shall, unless removed for cause, remain in office for the term to which he would have been entitled had the provisions of sections 25(a)-(g) not become applicable to his office. Not less than sixty days prior to the holding of the general election next preceding the expiration of his term of office, any circuit or associate circuit judge whose office is subject to the provisions of sections 25(a)-(g) may file in the office of the secretary of state a declaration of candidacy for election to succeed himself. If a declaration is not so filed [by any judge], the vacancy resulting from the expiration of his term of office shall be filled by appointment as herein provided. If such declaration is filed, his name shall be submitted at said next general election to the voters eligible to vote [within the state if his office is that of judge of the supreme court, or within the geographic jurisdiction limit of the district where he serves if his office is that of a judge of the court of appeals, or] within the circuit if his office is that of circuit judge, or within the county if his office is that of associate circuit judge on a separate judicial ballot, without party designation, reading:

"Shall Judge .....

(Here the name of the judge shall be inserted) of the .....

(Here the title of the court shall be inserted) be retained in office? Yes No

(Mark an "X" in the box you prefer.)" If a majority of those voting on the question vote against retaining him in office, upon the expiration of his term of office, a vacancy shall exist which shall be filled by appointment as provided in section 25(a); otherwise, said judge shall, unless removed for cause, remain in office for the number of years after December thirty-first following such election as is provided for the full term of such office, and at the expiration of each such term shall be eligible for retention in office by election in the manner here prescribed.

Section 25(c)(3). Judges of the court of appeals and supreme court shall be elected at the general election by the voters eligible to vote within the appellate district of the seat being elected as set forth in sections 25(c)(4) and 25(c)(5). Except as set forth in section 25(a), they shall hold office for a term expiring December thirty-first in the sixth year after their election. The provisions of sections 25(c)(1) and 25(c)(2) shall not apply to court of appeals or supreme court judges.

Section 25(c)(4). Supreme court judges shall be elected as follows. If the general assembly has provided by law for three appellate districts, a chief justice shall be elected at large and two supreme court judges shall be elected from each court of appeals district by the voters eligible to vote within that district, but if greater than three court of appeals districts are established or the geographical boundaries of the districts change such that the following divisions cannot be made, then elections for supreme court judges other than the chief justice shall be as established by law, or if no law timely establishes procedures for such elections, then elections for all supreme court seats shall be at large. Seats E1 and E2 shall be elected from the court of appeals district which includes the City of St. Louis. Seats S1 and S2 shall be elected from the court of appeals district which includes the City of Springfield. Seats W1

and W2 shall be elected from the court of appeals district which includes the City of Kansas City. Seat CJ, the seat of the chief judge, shall be elected at large. Seats E1 and S1 shall be known as "Class 1" and elected in 2022 and every sixth successive year. Seats W1 and E2 shall be known as "Class 2" and elected in 2024 and every sixth successive year. Seats S2, W2, and the chief justice's at-large seat, CJ, shall be known as "Class 3" and elected in 2026 and every sixth successive year. A supreme court judge shall be a resident of the appellate district from which he or she is elected no later than the day of his or her election.

Section 25(c)(5). The following transition provisions shall apply: 1. Those supreme court judges holding office as of 5:00 p.m. on December 3, 2020, shall not be required to reside in any particular appellate district but on that date shall nonetheless be assigned the following seat designations for purposes of implementing elections and filling vacancies. The seat designations shall be assigned in the following order: CJ, W2, S2, E2, W1, S1, E1. First, beginning with Seat CJ, seats will be assigned to judges who have been retained by voters, starting with the judge most recently retained by voters. For judges retained at the same time, the judge having served the least time on the supreme court shall be assigned first. After all judges who have been retained have been assigned seats, judges who have been appointed shall be assigned, with judges most recently appointed to be assigned first. If all judges who have been retained or appointed have been assigned seats, and it appears that one or more supreme court seats was vacated on or before December 3, 2020, but remained unfilled by the end of that date, these vacancies will be immediately assigned a class and seat, using the order set forth in this section until all seats through Seat S1 are filled, and in assigning seat designations to vacancies, vacancies created by a judge whose last name is first in alphabetical order will have precedence. A seat held by any judge who lost a retention election in the 2020 general election shall be treated as vacant solely for purposes of assigning a class and seat under this transition provision, even though the judge shall hold office until December 31, 2020, and the seat shall be treated as vacant for purposes of section 25(a) on January 1, 2021, and thereafter filled under the provisions of that section.
2. Court of appeals judges who were last retained in the 2010 or 2012 general elections, or the successors to vacancies left by such judges, shall stand in the 2022 general election, court of appeals judges who were last retained in the 2014 or 2016 general elections, or the successors to vacancies left by such judges, shall stand in the 2024 general election, and court of appeals judges who were last retained in the 2018 or 2020 general elections, or the successors to vacancies left by such judges, shall stand in the 2026 general election. The candidate elected in each such election shall serve for the term prescribed by section 19, and every succeeding six years, a new election shall be held for that judicial office. Court of appeals judges first eligible for retention in the 2022 general election under the immediately prior version of section 25(c)(1), which was effective until the end of thirty days after the election adopting this section, shall stand for election in the 2022 general election. Any seat held by a court of appeals judge who loses a retention election in the 2020 general election shall be treated as vacant on January 1, 2021, and shall thereafter be filled under the provisions of section 25(a). Any law providing for additional court of appeals seats shall specify the first general election at which the seat shall be filled.
3. A supreme court or court of appeals vacancy that opened before the end of thirty days after the election adopting this section but was not yet filled as of that time and date shall be filled by the governor under the provisions of section 25(a).
4. The transition provisions of this section 25(c)(5) shall be severable from the remainder of section 25(a) through (g).

Section 25(c)(6). 1. Elections for the offices of judge of the supreme court and court of appeals shall be partisan elections.
2. All declarations for candidacy for the offices of judge of the supreme court and court of appeals shall be filed in the office of the secretary of state no later than 120 days before the primary election.
3. Political parties shall nominate party candidates for supreme court or court of appeals judge using the same procedures the laws provide for candidates for governor. Additionally, groups of voters may nominate independent candidates. The person so nominated by a group of voters may qualify as an independent candidate in the general election using the same procedures the laws provide for candidates for governor, except that the nominating petition must be signed by at least thirty thousand registered voters in the appellate district, or two percent of the voters who voted in the appellate district in the last election for governor, whichever is less. Notwithstanding the provisions of section 25(d), the governor shall have no power to appoint to any judicial office any person selected by the Appellate Judicial Commission.
4. Unless otherwise provided by law, primary and general elections for the offices of judge of the supreme court and court of appeals shall be held in the same manner as elections for governor. Contests to the results of an election under this section, whether on the basis of qualification, irregularity, or other cause, or for recount other than any automatic recount as may be provided by law, shall be heard and determined in the same manner as contested elections for governor, unless otherwise provided by law.
5. The provisions of this section 25(c)(6) shall be severable from the remainder of section 25(a) through (g).

Section 25(f). No judge of any court in this state, appointed or elected to or retained in office in the manner prescribed in sections 25(a)-(g), shall directly or indirectly make any contribution to or hold any office in a political party or organization, or take part in any political campaign[.] except as provided in sections 25(a)–(g). A judge or judicial candidate may announce his or her views on disputed legal or political issues provided that the judge or judicial candidate does not make pledges or promises to render specific rulings or decisions on pending litigation. Judicial candidates and judges who are judicial candidates shall be allowed to solicit, receive and make campaign contributions, and make and receive the benefit of campaign expenditures for their own campaigns as may be provided by law. Nothing herein shall preclude the application of laws or rules of the supreme court governing judicial participation in specific cases based on a judge's political activity with respect to the subject matter or parties. The provisions of this section 25(f) shall be severable from the remainder of section 25(a) through (g), except that nothing shall prohibit a candidate for the supreme court or court of appeals from making or accepting contributions to or taking part in his or her own political campaign.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-023)

Subject

Initiative petition from Patricia Thomas regarding a proposed constitutional amendment to Article V. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article V of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College, St. Louis County Board of Elections, Board of Election Commissioners City of St. Louis, Kansas City Board of Election Commissioners, Platte County Board of Elections, Jackson County Election Board,** and **Clay County Board of Election Commissioners.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their agency.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of this proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article V of the Constitution of Missouri by requiring partisan elections for judges of the Supreme Court and Court of Appeals. Judges would be elected for six-year terms and would not be allowed to be elected to a particular judicial seat for more than two consecutive terms. Judges would be elected at a general election. The Chief Justice shall be elected at large and two Supreme Court justices will be elected from each Court of Appeals district. This proposal also allows judges to announce their views on disputed legal or political issues; solicit, receive and make campaign contributions; and receive the benefit of campaign expenditures for their own campaigns.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated:

The initiative petition proposing to amend Article V, would require the election of all Supreme Court, Courts of Appeal, Circuit Court and Associate Circuit Court Judges, if approved by the voters.

The proposed legislation would eliminate the appellate judicial commission, which would save $7,741 annually.

Under the proposed legislation a Supreme Court judge, the Chief Justice or court of appeals judge may not serve more than two consecutive terms, which would result in a complete turnover every twelve years. As a result, the cost to training the new judges will increase. New judge orientation class can be from 20 participants to 50 participants and cost $29,168 to $54,568. There are 39 judicial positions in the state that this proposed legislation would affect so the cost of training is estimated to between $29,168 and $54,568 per year.

Judicial vacancies in the Supreme Court, Supreme Court Chief Justice and Court of Appeals, happen throughout the year. Under the proposed legislation, whenever a vacancy shall occur the Governor would appoint the judge to serve the remaining term. Some judicial positions could be vacant for an extended period. During this time, the courts would need to transfer sitting judges or bring in senior judges to handle the existing workload. Since there is no way to quantify the amount of transfers or senior judges that

would be needed, the fiscal impact to the judiciary is unknown at this time. Any significant changes will be reflected in future budget request.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from the **St. Louis County Election Board** indicated they believe this will have no fiscal impact on their board.

Officials from the **Platte County Board of Elections** indicated they expect no fiscal impact from this petition.

Officials from the **Jackson County Election Board** indicated this initiative petition has no fiscal impact to their board.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph**, the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Board of Election Commissioners City of St. Louis, Kansas City Board of Election Commissioners,** and **Clay County Board of Election Commissioners.**

Fiscal Note Summary

State court officials estimate cost savings of approximately $8,000 annually, increased training costs ranging from approximately $29,000 to $55,000 annually, and unknown annual costs related to judicial vacancies. Local governments estimate no costs or savings.

Jefferson City, MO 65101

RE: Petition approval request from Patricia Thomas regarding a proposed constitutional amendment to Article XIV, Sections 1-5 (2020-022)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Patricia Thomas on December 21, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment creates five new sections of one new Article, to be known as Article XIV, Sections 1, 2, 3, 4, and 5. It changes, repeals, or modifies by implication, or may be construed to change, repeal or modify by implication Article I, Sections 29 and Chapters 8, 34, 89, 105, 285, 286, 290, 292, 295, 393, 516, 610, and 630 of the Revised Statutes.

The proposed amendment creates five new sections of one new Article, to be known as Article XIV, Sections 1, 2, 3, 4, and 5.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XIV is created by adopting five new sections to be known as Sections 1, 2, 3, 4 and 5.

ARTICLE XIV, SECTION 1. The provisions of this section shall be known as the Union Abuse Prevention Amendment. It shall be the public policy of this state to promote better jobs and higher pay through labor reforms that help Missouri businesses succeed, allow the state to compete in the national and international market for job creation, and promote the efficient and effective functioning of state and local government.

SECTION 2. Employees shall have the freedom to get jobs and to keep their jobs without being forced to pay any fees to a union or join a union, such that, to obtain or keep a job, no person shall be forced to: (1) become, remain or refrain from becoming a member of a union; or (2) pay any dues, fees assessments, or other similar charges however denominated of any kind or amount to a union or third party in lieu thereof.

SECTION 3. (A) No existing or future law or ordinance of the state or its political subdivisions shall require that workers employed by or on behalf of any public body engaged in the construction, alteration, repair, or maintenance of public works be paid: (1) a wage at or above the prevailing hourly rate of wages for work of a similar character in the locality in which the work is performed, including the prevailing hourly rate of wages for legal holiday and overtime work; or
(2) any wage calculated by reference to any rate of wages for work of a similar or dissimilar character in any location or locations, including the rates of wages for legal holiday and overtime work, except the state minimum wage provided in chapter 290 of the revised statutes, as amended from time to time.

(B) This section shall not apply to the wages paid any contractors or subcontractors for work performed on federally funded or assisted contracts.

(C) For purposes of this section the following terms mean: (1) "Public works", all fixed works constructed for public use or benefit or paid for wholly or in part out of public funds. It also includes any work done directly by any public utility company when performed by it pursuant to the order of the public service commission or other public authority whether or not it is done under public supervision or direction or paid for wholly or in part out of public funds when let to contract by the utility. It does not include any work done for or by any drainage or levee district.
(2) "Public body", the state of Missouri or any officer, official, authority, board or commission of the state, or other political subdivision or special district thereof, any institution supported in whole or in part by public funds, or any public utility performing work pursuant to the order of the public service commission or other public authority whether or not it is done under public supervision or direction or paid for wholly or in part out of public funds when let to contract by the utility;
(3) "Worker", laborers, workmen or workwomen, and mechanics.

SECTION 4. Any person who purposely violates the provisions of sections 1 through 3 of this Article is guilty of a class A misdemeanor. Notwithstanding any other provision of law which bars prosecutions for any offenses other than a felony unless commenced within one year after the commission of the offense, any offense under the provisions of this section may be prosecuted if the indictment be found or prosecution be instituted within three years after the commission of the alleged offense.

SECTION 5. The provisions of this Article are self-executing. All of the provisions of this Article are severable. If any provision of this Article is found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted, the remaining provisions of this Article shall be and remain valid.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-022)

Subject

Initiative petition from Patricia Thomas regarding a proposed constitutional amendment to Article XIV. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article XIV of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest**

Missouri State University, Southeast Missouri State University, and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they defer to OA (Office of Administration) for response to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal adds Article XIV with five sections to the Missouri Constitution and would:

- Prohibit employers from requiring employees to become, remain or refrain from becoming a member of a labor organization or to pay any union dues as a condition of employment.
- Allow any public body engaged in construction, alteration, repair, or maintenance of public works to opt out of prevailing wage requirements.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated it is anticipated savings would occur for their county for this initiative petition if the prevailing wage law were eliminated, but there is no reasonable method to measure those savings. This is due to all projects bid out by the County of Greene have the prevailing wage requirement, and so therefore all bids received have prevailing wage as part of the submitted bid. If it were possible to attain the bids with prevailing wage, as well as without prevailing wage, then it would have provided the needed information to ascertain actual savings to submit for this fiscal note estimate.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-1 School District** indicated they do not see a significant impact on their school with this in the short term. However, they do not know how it will ultimately effect wages (and thus taxes) in the long term.

Officials from **State Technical College of Missouri** indicated this could have a positive fiscal impact on their college. The amount cannot be estimated.

Officials from **University of Central Missouri** indicated they estimate no impact.

Officials from **Missouri State University** indicated there is a positive fiscal impact of an undetermined amount.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the

City of Springfield, the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners, Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University**.

Fiscal Note Summary

State and local government entities estimate no additional revenues, and estimate cost savings of an unknown amount.

RE: Petition approval request from Patricia Thomas regarding a proposed constitutional amendment to Article XIV, Section 1 (2020-021)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Patricia Thomas on December 21, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

NOTICE: The proposed amendment creates one new section of one new Article, to be known as Article XIV, Section 1.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article XIV is created by adopting one new section to be known as Section 1.

ARTICLE XIV, SECTION 1. The provisions of this section shall be known as the Right to Remember Amendment. Missouri has a proud heritage of leadership and volunteerism by private citizens who have helped build this state and nation, and who have ensured that the enduring lessons of our history are remembered and handed down to future generations of Missourians. It shall therefore continue to be the public policy of this state to remember our nation's and state's historic conflicts, events, and figures by preserving the historical memorials and monuments in this state.

(a) No memorial that is, or is located on, public property, may be removed, renamed, un-named, relocated, materially altered, rededicated, or de-dedicated, except in such manner and to such extent as the general assembly may provide by law.

(b) In making provisions by law under subsection (a), the general assembly may pass or repeal a local or special law or repeal in part a general law, notwithstanding that a general law could have been made applicable. However, in passing or repealing such special or local law, the general assembly shall comply with article III, section 42 of this constitution.

(c) Nothing herein shall prevent or prohibit the following acts, so long as the acting entity ensures that any memorial is preserved to the greatest extent possible: (1) a public entity having responsibility for maintaining a memorial, or a nonprofit entity acting with permission of the public entity, taking proper and appropriate measures, and exercising proper and appropriate means, for the upkeep, care, preservation, protection, repair, and restoration of the memorial;

(2) the state relocating, removing, or materially altering a memorial located on public property if it determines that the memorial interferes with the construction, maintenance, or operation of public property or improvements to public property, so long as any such action is also taken consistent with federal historical preservation law;

(3) the general assembly taking any action necessary to comply with federal law or passing general laws necessary to allow the state or persons residing in Missouri to compete for, or maintain eligibility for, federal grants, federal contracts, or other federal funding opportunities; the state from taking any act required by federal law to maintain a state historic preservation officer, as may be defined by federal law, or a state historic preservation program, as may be defined by federal law; any local government from taking any act required by federal law to seek or maintain status as a certified local government, as may be defined by federal law.

(d) For purposes of this section: (1) "Historic conflict" means any war, battle, or military conflict in which citizens of the United States or any state or territory of the United States have participated;

(2) "Historic entity" means any entity recognized as having state, national, military, or historical significance;

(3) "Historic event" means any event recognized as having state, national, military, or historical significance;

(4) "Historic figure" means any individual who has been recognized as having served or participated in any historic conflict, historic event, historic entity, public office, or in public service;

(5) "Historic organization" means any entity that has as one (1) or more of its material missions the recognition of, or preservation of sites, structures, or artifacts relating to, any historic conflict, historic entity, historic event, or historic figure;

(6) "Memorial" means: (A) Any public real property or park, preserve, or reserve located on public property that has been named or dedicated in honor of any historic conflict, historic entity, historic event, historic figure, or historic organization; or (B) Any statue; monument; memorial; bust; nameplate; plaque; artwork; flag; the name of any school, street, bridge, or building; or historical display that has been erected for, named, or dedicated on public property in honor of any historic conflict, historic entity, historic event, historic figure, or historic organization; and

(7) "Public property" means all property owned, leased, rented, managed, or maintained by or under the authority of this state, any county, municipality, metropolitan government, special district, or any other public entity that is created by act of the general assembly to perform any public function.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-021)

Subject

Initiative petition from Patricia Thomas regarding a proposed constitutional amendment to Article XIV. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article XIV of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal adds Article XIV, Section 1 to the Missouri Constitution. It would prohibit the removal, renaming, un-naming, relocation, alteration, rededication or de-dedication of any memorial located on public property except as the General Assembly may provide by law. This would impact state agencies, including the Division of Facilities Management, Design and Construction (FMDC). The proposal provides an exception if it is determined the memorial interferes with the construction, maintenance, or operation of public property or improvements to public property so long as any such action is also taken consistent with federal historical preservation law. Under federal law, the listing of a property in the National Register of Historic Places imposes no restrictions on what a non-federal owner may do with their property up to and including destruction, unless the property is involved in a project that receives federal assistance. Therefore, the meaning of "federal historical preservation law" is unclear.

To the extent that this amendment might prohibit FMDC from removing or relocating a memorial as needed for construction or repair of state property, this bill could result in increased costs to FMDC because FMDC would have to find a way to work around the memorial in question or find an alternative location, if possible. Without more information, however, FMDC is unable to calculate the potential fiscal impact of this petition. The costs would depend upon the nature of the project, the location of the memorial, etc.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment could have a negative fiscal impact on their city by limiting the ability of their city to alter or move a memorial as part of an economic development project or to save money.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District,**

Metropolitan Community College, University of Missouri, and **St. Louis Community College**.

Fiscal Note Summary

State and local government entities estimate no costs or savings from this proposal.

NOTICE: You are advised that the proposed amendment to the constitution changes, repeals, or modifies by implication, or may be construed to change, repeal or modify by implication, Article VI of the Missouri Constitution and section 67.307, RSMo. The proposed amendment revises Article VI of the Constitution by adding one new section to be known as section 34.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article VI is amended by adopting one new section to be known as Section 34.

Section 34. Every municipality and municipal official shall cooperate and comply with requests from United States Immigration and Customs Enforcement (ICE) to detain any alien, maintain custody of any alien, or transfer any alien to ICE. For the purposes of this section, "municipal official" includes any elected official, appointed official, or law enforcement officer serving the municipality, as well as any contractor hired by the municipality. For purposes of this section, "municipality" includes, without limitation, every subdivision and special district.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-020)

Subject

Initiative petition from Patricia Thomas regarding a proposed constitutional amendment to Article VI. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article VI of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri,** and **St. Louis Community College.**

Assumptions

Officials from the **Attorney General's office** indicated based on the text of this proposition, they do not believe that the proposition imposes any obligations on their office or any other statewide agency or officer. On that interpretation, they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated that this legislation does not impact their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated no fiscal impact on their department.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article VI of the Constitution of Missouri by requiring that every municipality and municipal official cooperate and comply with requests from U.S. Immigration and Customs Enforcement (ICE) to detain any alien, maintain custody of any alien, or transfer any alien to ICE.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri,** and **St. Louis Community College**.

Fiscal Note Summary

State and local government entities estimate no costs or savings from this proposal.

NOTICE: You are advised that the proposed amendment to the constitution changes, repeals, or modifies by implication, or may be construed to change, repeal or modify by implication, Article I of the Missouri Constitution and Chapter 290, RSMo. The proposed amendment revises Article I of the Constitution by amending section 29.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I is amended by revising section 29, to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. That every employee shall have the freedom to work without being forced to pay any fees to a union or join a union as a condition of employment, such that no person shall be required as a condition of employment or continued employment to: (1) become, remain, or refrain from becoming a member of a labor organization; or (2) pay any dues, fees, assessments, or other similar charges however denominated of any kind or amount to a labor organization or third party in lieu thereof.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-019)

Subject

Initiative petition from Patricia Thomas regarding a proposed constitutional amendment to Article I. (Received December 27, 2018)

Date

January 16, 2019

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest**

Missouri State University, Southeast Missouri State University, and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, their office can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, their office may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no impact for this initiative petition.

Officials from the **Department of Health and Senior Services** indicated this initiative petition has no impact to their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition does not appear to have a fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they defer to OA (Office of Administration) for response to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated this proposal amends Article I of the Constitution of Missouri by prohibiting employers from requiring employees to become, remain, or refrain from becoming a member of a labor organization or pay union dues as a condition of employment.

This should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY (fiscal year) 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Adair County** indicated they find no known impact.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from **Wellsville-Middletown R-I School District** indicated they do not see a specific fiscal impact on their school other than it has the potential to lower wages. They do have some union members in their community, though none in their school that they are aware of.

Officials from **State Technical College of Missouri** indicated there is no fiscal impact to their college.

Officials from **University of Central Missouri** indicated they estimate no impact.

Officials from **Missouri State University** indicated this initiative petition has no fiscal impact on their university.

The State Auditor's office did not receive a response from **Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police**

Commissioners, Metropolitan Police Department - City of St. Louis, Harris-Stowe State University, Lincoln University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University, and **Truman State University**.

Fiscal Note Summary

State and local government entities estimate no costs or savings from this proposal.

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2020-018)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on December 17, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 4, 5, 6, 7, 9 and 11, to read as follows:

Section 3.

(a) There is hereby established the post of "non-partisan state demographer." The non-partisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing [legislative] congressional redistricting maps on the basis of each federal census [for presentation to the house apportionment commission and the senatorial apportionment commission].

(b) The non-partisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the non-partisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the non-partisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the non-partisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The non-partisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the non-partisan state demographer position an individual shall not have served in a partisan, elected position for four years prior to the appointment. The non-partisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent [legislative] congressional redistricting map [to the house apportionment commission or the senatorial apportionment commission].

(c) [The house of representatives shall consist of one hundred sixty-three members elected at each general election and apportioned in the following manner: as provided in this section.

(1)] Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer shall begin the preparation of [legislative] congressional districting plans and maps using the following methods, listed in order of priority:

([a] 1) Districts shall be established on the basis of total population. [Legislative] Congressional districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census.

([b] 2) Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. Partisan fairness means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. Competitiveness means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the non-partisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the non-partisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. Wasted votes are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the non-partisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the non-partisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The non-partisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

([c] 3) Subject to the requirements of subdivisions (1)(a) and (1)(b), Districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous.

([d] 4) To the extent consistent with subdivisions (1)(a) – (1)(c) of this subsection, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county.

([e] 5) Preference shall be that districts are compact in form, but the standards established by subdivisions (1)(a) – (1)(d) of this subsection take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

([2] d). Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

([3] e) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall make public and file with the secretary of state [and with the house apportionment commission] a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non- 2 partisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.

Section 4. Each representative shall be twenty-four years of age, and next before the day of his election shall have been a qualified voter for two years and a resident of the [county or] district which she or he is chosen to represent for one year, if such [county or] district shall have been so long established, and if not, then of the [county or] district from which the same shall have been taken.

Section 5. The Senate shall consist of thirty-four members elected by the qualified voters of the [senatorial districts] state of Missouri for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter of the state for three years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Section 7.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer authorized in Article III Section 3, shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the House of Representatives.

(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non-partisan state demographer provided that such changes are consistent with this Section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the House of Representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, three more than the number of members to be elected. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.
In each general election, each voter will cast a single vote for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

The surplus votes of any political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election.

The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Section 9. [Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965.] Beginning with the election of representatives in the primary and general elections to be held in the year two thousand and twenty-two the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[Section 10. The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the primary and general elections to be held in the year two thousand and twenty-two senators from each class, will be elected at large on a state-wide basis.

[Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

STATE AUDITORS OFFICE

RE: Petition approval request from Winston Apple regarding a proposed constitutional amendment to Article III (2020-017)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Winston Apple on December 11, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

My commission expires: _____

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article III of the Constitution is revised by repealing Sections 10 and 14 and amending Sections 3, 4, 5, 6, 7, 9 and 11, to read as follows:

Section 3.

(a) There is hereby established the post of "non-partisan state demographer." The non-partisan state demographer shall acquire appropriate information to develop procedures in preparation for drawing [legislative] congressional redistricting maps on the basis of each federal census [for presentation to the house apportionment commission and the senatorial apportionment commission].

(b) The non-partisan state demographer shall be selected through the following process. First, state residents may apply for selection to the state auditor using an application developed by the state auditor to determine an applicant's qualifications and expertise relevant to the position. Second, the state auditor shall deliver to the majority leader and minority leader of the senate a list of at least three applicants with sufficient expertise and qualifications, as determined by the state auditor, to perform the duties of the non-partisan state demographer. Third, if the majority leader and minority leader of the senate together agree that a specific applicant should be selected to be the non-partisan state demographer, that applicant shall be selected and the selection process shall cease. Fourth, if the majority leader and minority leader of the senate cannot together agree on an applicant, they may each remove a number of applicants on the state auditor's list equal to one-third of the total number of applicants on that list, rounded down to the next integer, and the state auditor shall then conduct a random lottery of the applicants remaining after removal to select the non-partisan state demographer. The state auditor shall prescribe a time frame and deadlines for this application and selection process that both encourages numerous qualified applicants and avoids delay in selection. The non-partisan state demographer shall serve a term of five years and may be reappointed. To be eligible for the non-partisan state demographer position an individual shall not have served in a partisan, elected position for four years prior to the appointment. The non-partisan state demographer shall be disqualified from holding office as a member of the general assembly for four years following the date of the presentation of his or her most recent [legislative] congressional redistricting map [to the house apportionment commission or the senatorial apportionment commission].

(c) [The house of representatives shall consist of one hundred sixty-three members elected at each general election and apportioned in the following manner: as provided in this section.

(1)] Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer shall begin the preparation of [legislative] congressional districting plans and maps using the following methods, listed in order of priority:

([a] 1) Districts shall be established on the basis of total population. [Legislative] Congressional districts shall each have a total population as nearly equal as practicable to the ideal population for such districts, determined by dividing the number of districts to be established into the total population of the state reported in the federal decennial census.

([b] 2) Districts shall be established in a manner so as to comply with all requirements of the United States Constitution and applicable federal laws, including, but not limited to, the Voting Rights Act of 1965 (as amended). Notwithstanding any other provision of this Article, districts shall not be drawn with the intent or result of denying or abridging the equal opportunity of racial or language minorities to participate in the political process or diminishing their ability to elect representatives of their choice, whether by themselves or by voting in concert with other persons.

Districts shall be designed in a manner that achieves both partisan fairness and, secondarily, competitiveness. Partisan fairness means that parties shall be able to translate their popular support into legislative representation with approximately equal efficiency. Competitiveness means that parties' legislative representation shall be substantially and similarly responsive to shifts in the electorate's preferences.

To this end, the non-partisan state demographer shall calculate the average electoral performance of the two parties receiving the most votes in the three preceding elections for governor, for United States Senate, and for President of the United States. This index shall be defined as the total votes received by each party in the three preceding elections for governor, for United States Senate, and for President of the United States, divided by the total votes cast for both parties in these elections. Using this index, the non-partisan state demographer shall calculate the total number of wasted votes for each party, summing across all of the districts in the plan. Wasted votes are votes cast for a losing candidate or for a winning candidate in excess of the fifty percent threshold needed for victory. In any plan of apportionment and map of the proposed districts submitted to the respective apportionment commission, the non-partisan state demographer shall ensure the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

To promote competitiveness, the non-partisan state demographer shall use the electoral performance index to simulate elections in which the hypothetical statewide vote shifts by one percent, two percent, three percent, four percent, and five percent in favor of each party. The vote in each individual district shall be assumed to shift by the same amount as the statewide vote. The non-partisan state demographer shall ensure that, in each of these simulated elections, the difference between the two parties' total wasted votes, divided by the total votes cast for the two parties, is as close to zero as practicable.

([c] 3) Subject to the requirements of subdivisions (1)(a) and (1)(b), Districts shall be composed of contiguous territory. Areas which meet only at the points of adjoining corners are not contiguous.

([d] 4) To the extent consistent with subdivisions (1)(a) – (1)(c) of this subsection, district boundaries shall coincide with the boundaries of political subdivisions of the state. The number of counties and cities divided among more than one district shall be as small as possible. When there is a choice between dividing local political subdivisions, the more populous subdivisions shall be divided before the less populous, but this preference shall not apply to a legislative district boundary drawn along a county line which passes through a city that lies in more than one county.

([e] 5) Preference shall be that districts are compact in form, but the standards established by subdivisions (1)(a) – (1)(d) of this subsection take precedence over compactness where a conflict arises between compactness and these standards. In general, compact districts are those which are square, rectangular, or hexagonal in shape to the extent permitted by natural or political boundaries.

([2] d). Within sixty days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within sixty days that such a ruling has been made, the congressional district committee of each of the two parties casting the highest vote for governor at the last preceding election shall meet and the members of the committee shall nominate, by a majority vote of the members of the committee present, provided that a majority of the elected members is present, two members of their party, residents in that district, as nominees for reapportionment commissioners. Neither party shall select more than one nominee from any one state legislative district. The congressional committees shall each submit to the governor their list of elected nominees. Within thirty days the governor shall appoint a commission consisting of one name from each list to reapportion the state into one hundred and sixty-three representative districts and to establish the numbers and boundaries of said districts.

If any of the congressional committees fails to submit a list within such time the governor shall appoint a member of his own choice from that district and from the political party of the committee failing to make the appointment.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

For the purposes of this Article, the term congressional district committee or congressional district refers to the congressional district committee or the congressional district from which a congressman was last elected, or, in the event members of congress from this state have been elected at large, the term congressional district committee refers to those persons who last served as the congressional district committee for those districts from which congressmen were last elected, and the term congressional district refers to those districts from which congressmen were last elected. Any action pursuant to this section by the congressional district committee shall take place only at duly called meetings, shall be recorded in their official minutes and only members present in person shall be permitted to vote.

([3] e) Within six months after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall make public and file with the secretary of state [and with the house apportionment commission] a tentative plan of apportionment and map of the proposed districts, as well as all demographic and partisan data used in the creation of the plan and map.

The commissioners so selected shall, within ten days of receiving the tentative plan of apportionment and map of the proposed districts, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the clerk of the house of representatives within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable.

The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non- 2 partisan state demographer provided that such changes are consistent with this section and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months of receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.

Section 4. Each representative shall be twenty-four years of age, and next before the day of his election shall have been a qualified voter for two years and a resident of the [county or] district which she or he is chosen to represent for one year, if such [county or] district shall have been so long established, and if not, then of the [county or] district from which the same shall have been taken.

Section 5. The Senate shall consist of thirty-four members, divided into two classes of seventeen each, elected by the qualified voters of the senatorial districts for a term of four years. [Senatorial districts shall be apportioned as provided for in Article III, Section 7.]

Section 6. Each senator shall be thirty years of age, and next before the day of his election shall have been a qualified voter of the state for three years [and a resident of the district which he is chosen to represent for one year, if such district shall have been so long established, and if not, then of the district or districts from which the same shall have been taken].

Section 7.

[(1) Within ten days after the population of this state is reported to the President for each decennial census of the United States or, in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within ten days after such a ruling has been made, the non-partisan state demographer authorized in Article III Section 3, shall begin the preparation of senatorial districting plans and maps using the same methods and criteria as those required by Article III, Section 3 for the establishment of districts for the House of Representatives.

(2) Within sixty days after the population of this state is reported to the President for each decennial census of the United States, or within sixty days after a reapportionment has been invalidated by a court of competent jurisdiction, the state committee of each of the two political parties casting the highest vote for governor at the last preceding election shall, at a committee meeting duly called, select by a vote of the individual committee members, and thereafter submit to the governor a list of ten persons, and within thirty days thereafter the governor shall appoint a commission of ten members, five from each list, to reapportion the thirty-four senatorial districts and to establish the numbers and boundaries of said districts.

If either of the party committees fails to submit a list within such time the governor shall appoint five members of his own choice from the party of the committee so failing to act.

Members of the commission shall be disqualified from holding office as members of the general assembly for four years following the date of the filing by the commission of its final statement of apportionment.

(3) Within six months after the population of this state is reported to the President for each decennial census of the United States or in the event that a reapportionment has been invalidated by a court of competent jurisdiction, within six months after such a ruling has been made, the non-partisan state demographer shall file with the secretary of state and with the senatorial apportionment commission a tentative plan of apportionment and map of the proposed districts.

The commissioners so selected shall within ten days of receiving the tentative plan of apportionment and map of the proposed districts required by this subsection, meet in the capitol building and proceed to organize by electing from their number a chairman, vice chairman and secretary. The commission shall adopt an agenda establishing at least three hearing dates on which hearings open to the public shall be held to hear objections or testimony from interested persons. A copy of the agenda shall be filed with the secretary of the senate within twenty-four hours after its adoption. Executive meetings may be scheduled and held as often as the commission deems advisable. The commission may make changes to the tentative plan of apportionment and map of the proposed districts received from the non-partisan state demographer provided that such changes are consistent with this Section and the methods and criteria required by Section 3 of this Article for the establishment of districts for the House of Representatives and approved by a vote of at least seven-tenths of the commissioners. If no changes are made or approved as provided for in this subsection, the tentative plan of apportionment and map of proposed districts shall become final. Not later than two months after receiving the tentative plan of apportionment and map of the proposed districts, the commission shall file with the secretary of state a final statement of the numbers and the boundaries of the districts together with a map of the districts.

Each member of the commission shall receive as compensation fifteen dollars a day for each day the commission is in session, but not more than one thousand dollars, and, in addition, shall be reimbursed for his actual and necessary expenses incurred while serving as a member of the commission.

No reapportionment shall be subject to the referendum.]

An ordered list of candidates, ranked by number of votes received, from most to least, from each political party that is to appear on the ballot for both the senate and the house of representatives in each general election will be determined by means of a primary election, with each party electing a number of candidates up to, but not exceeding, three more than the number of members to be elected. All qualified candidates who file for each party's nomination will appear on the primary ballot for that party. Registered voters will be allowed to vote in one, and only one, party's primary election, and will cast a single vote for a single candidate to be nominated from that party for each office to be elected in the general election to follow.

A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the house in each congressional district by presenting petitions signed by one-half of one per cent of the legal voters in that congressional district. An independent candidate may qualify for a place on the ballot in a congressional district by presenting petitions signed by one-fifth of one percent of the legal voters in that congressional district. A political party having no candidate for statewide office receiving, nor having received as a political party, at least two percent of the total vote in the preceding general election, may qualify for a place on the ballot for the senate by presenting petitions signed by one-half of one per cent of the legal voters in the state of Missouri. An independent candidate may qualify for a place on the ballot for the senate by presenting petitions signed by one-fifth of one percent of the legal voters in the state of Missouri. The number of "legal voters" is equal to, and determined by, the total vote for governor in the general election last preceding. Said petitions are to be delivered to the secretary of state no later than ninety days preceding the general election. At the time the petitions are presented, the political party will also notify the secretary of state of the method to be used by said party in nominating a slate of candidates.

The signatures on petitions submitted by independent candidates and political parties shall be subject to verification according to the procedures in the code of state regulations for independent candidate petitions in force at the time the petitions are submitted.
In each general election, each voter will cast a single vote for the ordered list of a political party, or for a single independent candidate appearing on the ballot, or for a single write-in vote for a candidate not appearing on the ballot, having properly registered with the secretary of state as a write-in candidate.

To determine how many candidates in the house of representatives and the senate will be elected from each political party and which independent or write-in candidates will be elected (if any), the total number of valid votes cast for all parties and independent candidates will be divided by the number of seats to be elected to the house of representatives or to the senate. The resulting number will then be rounded to the nearest whole number. The total number of votes cast for each party or independent or write-in candidate will then be divided by that number and that number of candidates from each party is elected, with any remaining votes for each party above the number needed to elect that many candidates calculated as "surplus votes" for that party. Any independent candidate or valid write-in candidate receiving at least the number of votes needed for a seat is elected. The votes for any party or independent candidate falling short of the number needed to be elected are also treated as surplus votes.

The surplus votes of any political party or independent candidate having surplus votes, but not having enough surplus votes to win an additional seat, or a seat, may have those surplus votes transferred to another political party or independent candidate by notifying the Secretary of State in writing at least fourteen days before the date of the general election.

The number of candidates thus elected is calculated and subtracted from the total number of candidates to be elected. If additional candidates remain to be elected, the highest ordered remaining candidate from a party list, or independent candidate with the highest number of surplus votes, is elected. The number of surplus votes required to be elected is then deducted from that party's total votes and the process repeated until the requisite number of candidates has been elected.

In both primary and general elections, officials shall determine a random selection algorithm, prior to tabulation, to resolve ties between candidates. If a tie occurs at any point in the tabulation procedure and tabulation cannot proceed until the tie is resolved, then the random selection algorithm shall resolve the tie.

If a senator or representative resigns, dies, or is removed from office for any reason during the subsequent legislative sessions, the seat shall be filled by the next candidate from her or his party's ordered list, or in the case of an independent candidate, the candidate who would have been elected had there been one more member elected using the prescribed method for tabulating votes.

Section 9. [Until the convening of the Seventy-fourth General Assembly the House of Representatives shall consist of one hundred sixty-three members elected from the one hundred sixty-three representative districts, as they existed January 1, 1965.] Beginning with the election of representatives in the general election to be held in November of 2022, the House of Representatives shall consist of ten members elected from each congressional district. In the event that members of congress from Missouri are elected at large, congressional district boundaries will still be drawn and used in the election of members of the Missouri House of Representatives.

[Section 10. The last decennial census of the United States shall be used in apportioning representatives and determining the population of senatorial and representative districts. Such districts may be altered from time to time as public convenience may require.]

Section 11. The first election of senators and representatives under this constitution, shall be held at the general election in the year one thousand nine hundred and forty-six when the whole number of representatives and the senators from the districts having even numbers, who shall compose the first class, shall be elected, and two years thereafter the whole number of representatives and the senators from districts having odd numbers, who shall compose the second class, shall be elected, and so on at each succeeding general election. Beginning with the general election to be held in November of 2022, senators from each class, will be elected at large on a state-wide basis.

[Section 14. Writs of election to fill vacancies in either house of the general assembly shall be issued by the governor.]

RE: Petition approval request from Theodis Brown regarding a proposed statutory amendment to Chapter 590 (2020-016)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Theodis Brown on December 11, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

RE: Petition approval request from Michael Louis regarding a proposed constitutional amendment to Article I, Version 4 (2020-015)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Michael Louis on December 6, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No existing or future law or ordinance of the state or its political subdivisions shall impair, restrict or limit the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative according to the terms of that agreement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-015)

Subject

Initiative petition from Michael Louis regarding a proposed constitutional amendment to Article I. (Received December 7, 2018)

Date

December 21, 2018

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest**

Missouri State University, Southeast Missouri State University, and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no cost to their department.

Officials from the **Department of Health and Senior Services** indicated there is no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they defer to the Office of Administration for response to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit any existing or future law or ordinance of the state or its political subdivisions from impairing, restricting, or limiting the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Columbia** indicated they expect no fiscal impact to their city.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State and local government entities expect no costs or savings from this proposal.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest**

Missouri State University, Southeast Missouri State University, and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no cost to their department.

Officials from the **Department of Health and Senior Services** indicated there is no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they defer to the Office of Administration for response to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit any existing or future law or ordinance of the state or its political subdivisions from impairing, restricting, or limiting the ability of employees to negotiate, enter into and enforce any collectively bargained agreement with an employer that provides financial support for the representational services their collective bargaining representative performs.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Columbia** indicated they expect no fiscal impact to their city.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State and local government entities expect no costs or savings from this proposal.

Officials from the **Department of Health and Senior Services** indicated there is no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they defer to the Office of Administration for response to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

The proposed amendment would allow employers, in addition to employees, to organize and bargain collectively. It would also prohibit any existing or future law or ordinance of the state or its political subdivisions from impairing, restricting, or limiting the negotiation and enforcement of any collectively bargained agreement with an employer respecting financial support by employees of their collective bargaining representative.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Columbia** indicated they expect no fiscal impact to their city.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State and local government entities expect no costs or savings from this proposal.

RE: Petition approval request from Michael Louis regarding a proposed constitutional amendment to Article I, Version 1 (2020-012)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Missouri Constitution filed by Michael Louis on December 6, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it resolved by the people of the state of Missouri that the Constitution be amended:

Article I of the Constitution is revised by amending Section 29 to read as follows:

Section 29. That employees shall have the right to organize and to bargain collectively through representatives of their own choosing. No law or ordinance shall restrict or impair an agreement which requires employees to support their chosen collective bargaining representative. The rights guaranteed by this section shall be unalienable. Any restriction on these rights shall be subject to strict scrutiny and the State of Missouri shall be obligated to uphold these rights and under no circumstances decline to protect against their infringement.

MISSOURI STATE AUDITOR'S OFFICE
FISCAL NOTE (20-012)

Subject

Initiative petition from Michael Louis regarding a proposed constitutional amendment to Article I. (Received December 7, 2018)

Date

December 21, 2018

Description

This proposal would amend Article I of the Missouri Constitution.

The amendment is to be voted on in November 2020.

Public comments and other input

The State Auditor's office requested input from the **Attorney General's office,** the **Department of Agriculture,** the **Department of Economic Development,** the **Department of Elementary and Secondary Education,** the **Department of Higher Education,** the **Department of Health and Senior Services,** the **Department of Insurance, Financial Institutions and Professional Registration,** the **Department of Mental Health,** the **Department of Natural Resources,** the **Department of Corrections,** the **Department of Labor and Industrial Relations,** the **Department of Revenue,** the **Department of Public Safety,** the **Department of Social Services,** the **Governor's office,** the **Missouri House of Representatives,** the **Department of Conservation,** the **Department of Transportation,** the **Office of Administration,** the **Office of State Courts Administrator,** the **Missouri Senate,** the **Secretary of State's office,** the **Office of the State Public Defender,** the **State Treasurer's office, Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Greene County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Columbia,** the **City of Jefferson,** the **City of Joplin,** the **City of Kansas City,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, State Technical College of Missouri, Metropolitan Community College, University of Missouri, St. Louis Community College,** the **Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest**

Missouri State University, Southeast Missouri State University, and **Truman State University.**

Assumptions

Officials from the **Attorney General's office** indicated they expect that, to the extent that the enactment of this proposal would result in increased litigation, they can absorb the costs associated with that increased litigation using existing resources. However, if the enactment of this proposal were to result in substantial additional litigation, they may request additional appropriations.

Officials from the **Department of Agriculture** indicated no fiscal impact on their department.

Officials from the **Department of Economic Development** indicated they anticipate no impact as a result of the proposed initiative petition.

Officials from the **Department of Elementary and Secondary Education** indicated no cost to their department.

Officials from the **Department of Higher Education** indicated no cost to their department.

Officials from the **Department of Health and Senior Services** indicated there is no fiscal impact on their department.

Officials from the **Department of Insurance, Financial Institutions and Professional Registration** indicated this petition, if passed, will have no cost or savings to their department.

Officials from the **Department of Mental Health** indicated this proposal creates no direct obligations or requirements to their department that would result in a fiscal impact.

Officials from the **Department of Natural Resources** indicated they would not anticipate a direct fiscal impact from this proposal.

Officials from the **Department of Corrections** indicated no fiscal impact.

Officials from the **Department of Labor and Industrial Relations** indicated this initiative petition has no fiscal impact on their department.

Officials from the **Department of Revenue** indicated this initiative petition will not have a fiscal impact on their department.

Officials from the **Department of Public Safety - Office of the Director** indicated they see no fiscal impact due to this initiative petition.

Officials from the **Department of Social Services** indicated they defer to the Office of Administration for response to this initiative petition.

Officials from the **Governor's office** indicated there should be no added costs or savings to their office.

Officials from the **Missouri House of Representatives** indicated no fiscal impact to their office.

Officials from the **Department of Conservation** indicated that no adverse fiscal impact to their department would be expected as a result of the proposal.

Officials from the **Department of Transportation** indicated no fiscal impact to their department/Missouri Highways and Transportation Commission.

Officials from the **Office of Administration** indicated:

The proposed amendment would prohibit any law or ordinances from restricting or impairing an agreement which requires employees to support their chosen collective bargaining representative. The rights guaranteed by this section shall be unalienable and any restriction on these rights shall be subject to strict scrutiny and the state shall be obligated to uphold these rights.

This proposal should not impact their office.

Officials from the **Office of State Courts Administrator** indicated there is no fiscal impact on the courts.

Officials from the **Missouri Senate** indicated they anticipate no fiscal impact.

Officials from the **Secretary of State's office** indicated unless a special election is called for the purpose, Referendums are submitted to the people at the next general election. Article III section 52(b) of the Missouri Constitution authorizes the general assembly to order a special election for measures referred to the people. If a special election is called to submit a Referendum to a vote of the people, Section 115.063.2 RSMo. requires the state to pay the costs. The cost of the special election has been estimated to be $7.8 million based on the cost of the 2016 Presidential Preference Primary.

Their office is required to pay for publishing in local newspapers the full text of each statewide ballot measure as directed by Article XII, Section 2(b) of the Missouri Constitution and Section 116.230-116.290, RSMo. Funding for this item is adjusted each year depending upon the election cycle. A new decision item is requested in odd numbered fiscal years and the amount requested is dependent upon the estimated number of ballot measures that will be approved by the General Assembly and the initiative petitions certified for the ballot. In FY 2014, the General Assembly changed the appropriation so that it was no longer an estimated appropriation.

In FY19, over 5.8 million was spent to publish the full text of the measures for the August and November elections. They estimate $65,000 per page for the costs of publications based on the actual cost incurred for the one referendum that was on the August 2018 ballot.

Their office will continue to assume, for the purposes of this fiscal note, that it should have the full appropriation authority it needs to meet the publishing requirements. Because these requirements are mandatory, they reserve the right to request funding to meet the cost of their publishing requirements if the Governor and the General Assembly again change the amount or continue to not designate it as an estimated appropriation.

Officials from the **Office of the State Public Defender** indicated this initiative petition will not have any significant impact on their office.

Officials from the **State Treasurer's office** indicated this initiative petition would have no fiscal impact upon their office.

Officials from **Greene County** indicated there are no estimated costs or savings to report from their county for this initiative petition.

Officials from the **City of Columbia** indicated they expect no fiscal impact to their city.

Officials from the **City of Kansas City** indicated this amendment will have no fiscal impact on their city.

Officials from the **State Technical College of Missouri** indicated there is no fiscal impact to their college.

The State Auditor's office did not receive a response from **Adair County, Boone County, Callaway County, Cass County, Clay County, Cole County, Jackson County, Jasper County, St. Charles County, St. Louis County, Taney County,** the **City of Cape Girardeau,** the **City of Jefferson,** the **City of Joplin,** the **City of Kirksville,** the **City of Mexico,** the **City of Raymore,** the **City of St. Joseph,** the **City of St. Louis,** the **City of Springfield,** the **City of Union,** the **City of Wentzville,** the **City of West Plains, Cape Girardeau 63 School District, Hannibal 60 School District, Malta Bend R-V School District, Mehlville School District, Wellsville-Middletown R-1 School District, Metropolitan Community College, University of Missouri, St. Louis Community College, Kansas City Board of Police Commissioners,** the **Metropolitan Police Department - City of St. Louis, University of Central Missouri, Harris-Stowe State University, Lincoln University, Missouri State University, Missouri Southern State University, Missouri Western State University, Northwest Missouri State University, Southeast Missouri State University,** and **Truman State University.**

Fiscal Note Summary

State and local government entities expect no costs or savings from this proposal.

Be it resolved by the people of the state of Missouri that the Constitution be amended:

This measure amends Article III section 50 of the Missouri Constitution by deleting all matters within the enclosed brackets and adding all the underlined matters as required pursuant to Section 116.050 RSMo.
Section 50. Initiative petitions proposing amendments to the constitution shall be signed by eight percent of the legal voters in each of two-thirds of the congressional districts in the state, and petitions proposing laws shall be signed by five percent of such voters. Every such petition shall be filed with the secretary of state not less than six months before the election and shall contain an enacting clause and the full text of the measure. Petitions for constitutional amendments shall not contain more than one amended and revised article of this constitution, or one new article which shall not contain more than one subject and matters properly connected therewith, and the enacting clause thereof shall be "Be it resolved by the people of the state of Missouri that the Constitution be amended:". Petitions for laws shall contain not more than one subject which shall be expressed clearly in the title, and the enacting clause thereof shall be "Be it enacted by the people of the state of Missouri:". A petition may be filed following a November election and no filing fee shall be imposed. Any adult 18 years old or older may collect signatures for any petition approved for circulation. A petitioner may volunteer or be paid. An employer may pay per signature, by the hour, or any way agreed to. Changes to election laws are prohibited without voter approval. The Secretary of State shall host and maintain a web based system for the purpose of providing voters the option to sign petitions electronically. The office of the Secretary of State shall provide a verified voter with a unique identification number and collect identical information as required by existing initiative petition law. The electronic signature process is in addition to existing signature requirements and allows an individual to choose between the electronic signature or personally signing a hard copy of the petition. Voters shall have the option of receiving a confirmation text, confirmation email, or any electronic message within the capacity of Secretary of State or a postcard confirming the electronic signature. Voters are also provided a 20 day period to respond with any corrections or objections to the electronic signature.

Address of notary

Be it enacted by the people of the state of Missouri:

To utilize the Federal Expanded Medicaid Program, Chapter 208.RSMo, is amended by adding thereto one new section, to be known as section 208.207, to read as follows:

208.207. 1. Beginning January 1, 2021, individuals age nineteen to sixty-four, who are not otherwise eligible for MO HealthNet services under this chapter, who qualify for MO HealthNet services under section 42 U.S.C. 1396a(a)(10()(A)(i)(VIII) and as set forth in 42 CFR 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. 1396a(e)(14) and as set forth om 42 CFR 435.603, shall be eligible for medical assistance under Mo HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean, subject to federal approval, benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. 1396a(k)(1).

3. The reimbursement rate to MO HealthNet providers for MO HealthNet services provided to individuals qualifying under the provisions of this section shall be comparable to commercial reimbursement payment levels with trend adjustment for comparable services. The rates shall be determined annually by the department of social services, and the department may develop such rates through a contracted actuary. The higher commercial comparable rates shall only apply for services provided to individuals qualifying under this section.

4. (1) The department of social services shall discontinue eligibility for persons who are eligible under subsection 1 of this section if:

(a) The federal medical assistance percentage established under 42 U.S.C. Section 1396d(y) or 1369d(z) is less than ninety percent as specified for 2020 each year thereafter or an amount determined by the MO HealthNet oversight committee to be necessary to maintain state budget solvency, whichever is lower; and

(b) The general assembly votes to discontinue eligibility for persons who are eligible under subsection 1 of this section. Prior to any vote under this paragraph, the MO HealthNet oversight committee and the department of social services shall provide the general assembly with information on the current and projected expenses incurred due to expanding eligibility to persons under subsection 1 of this section in relation to health-related savings and revenues and health outcomes of individuals and families receiving benefits under subsection 1 of this section.

(2) The department of social services shall inform persons eligible under subsection 1 of this section that their benefits may be reduced or eliminated if federal funding decreases of is eliminate.

5. The MO HealthNet oversight committee shall conduct research and investigate any potential health-related savings and revenues associated with expanding eligibility to persons under subsection 1 of this section. The committee shall investigate the federal matching rate below which the state could not maintain the expanded eligibility to persons under subsection 1 of this section. If the amount is determined to be greater than ninety percent, the committee shall report its findings to the general assembly for its consideration prior to any vote under paragraph (b) of subdivision (1) of subsection 4 of

this section. In conducting its research and investigation, the committee shall also determine the feasibility of:

(1) Implementing capped cost sharing for persons eligible under subsection 1 of this section which may be reduced based on healthy behaviors of participants.

(2) Expanding Medicaid coverage for certain health care services that are currently financed by the state: and

(3) Enrolling persons under subsection 1 of this section in private health benefit plans.

6. Birth control and family planning will be available to all MO women and male residents 13 years of age and over with proof of age and residence. Applications for birth control and family planning will not need permission from family, spouses or guardians (those under the age of 14 will need permission of guardians or parent). Confidentially will be ensured at all levels. If insurance coverage would come from parent or guardian to cover procedure, on request by patient, this charge will go directly to the state to ensure privacy of applicant. Birth control and family planning covered by this bill will begin on April 1, 2021. There will be no cost for family planning services, including office visits and drugs/devices to the patient. The patient will not have to pay a co-payment for family planning services covered by other health insurance as the state will pick up these non-insurance covered expenses. The patient can go to any health provider who offers family planning services such as:

(a) An ob/gyn or gynecologist, a certified nurse-midwife, a nurse practitioner or other advanced practice nurse, a family planning clinic, your regular doctor or primary care provider or Planned Parenthood. The patient may see 'out of network' doctors as the state will be billed directly covering the costs.

(b) Services covered will include:

(1) Birth control pills, Patches (like the OrthoEvra Patch), Vaginal rings (like the NuvaRing), Injections (like the Depo shot), Implants (like Implanon), Intrauterine devices (IUDs – like Mirena or Paragard), Emergency birth control ("the morning-after pill"), Diaphragms, Condoms,

(2) Surgical sterilization for clients 21 years old and older (like vasectomies or tubal ligation, including the Essure procedure) or any future approved medical procedures will be included at the patient's choice.

(3) The state will make available to all schools and health care offices information for teens announcing the birth control plans provided by the state including long-term, reversible contraceptives.

7. If the Missouri State governing body refuses to appropriate the state's share of Medicaid Expansion, then the cost to the state for expanding medical coverage and birth control to all residents will be borne by the hospitals in the state of Missouri as follows:

(a) All hospitals in MO will be assessed a fee to pay for the expense of this expansion. The first year will be an estimate by the 'department of health and senior services'. Assessment will be made based on the most recent records of 'department of health and senior services' for a full year and adjustments for new assessments will begin on the first of April of each following year. Each hospital will pay a share equal to the percentage of patient days of each hospital of the total MO visits. If MO Assembly has not provided appropriations for this measure,then MO Hospitals will begin monthly payments on Jan 1, 2021. Hospitals will make monthly payments to the state of MO into a fund that will only be used for the full Federal Medicaid Expansion, Planned Parenthood and birth control for residents of Missouri.

(b) Missouri will accept the full federal program of Medicaid Expansion. No adjustments will be allotted for employment status of those receiving expansion benefits. If the funds generated by the hospitals will be used to pay for the cost to the state for Medicaid expansion, Missouri will make immediate application and if fees for implementation have not occurred from the hospitals on implementation, the state will borrow from reserve funds to expedite enrollment. These funds will be paid back upon receipt of funds beginning on April 1, 2021 unless the State of Missouri appropriates the necessary funds.

(c)Any savings to the state from Medicaid expansion that is not used for family planning and birth control will go toward the reduction of the levy on hospitals if this bill mandates.

8. If at any time funding for Planned Parenthood by the federal government is discontinued or if it has already been discontinued at the passage of this amendment, the hospital levy will be increased enough to replace the federal funding of Planned Parenthood to a level at least equal to that of 2015 adjusted for inflation. The state of MO will fund Planned Parenthood at a level at least equal to 2015 adjusted for inflation beginning on Jan 1, 2021, and if by the time this measure is accepted, the state of MO has stopped or reduced funding for Planned Parenthood, the state will begin funding Planned Parenthood again at a level equal to 2015 inflation-adjusted.

9. The 'MO HealthNet" oversight committee shall conduct research and investigation for any potential health related savings and revenues associated with expanding Medicaid eligibility and for extended free birth control resulting in fewer births and associated costs as well as savings from continuing 'Planned Parenthood'. Any savings will go to the reduction or elimination of hospital levy if that levy is necessary. Any additional savings will go to the mental health budget. The 'health and senior services' budget in future years will remain at least at the same percent of total MO budget as in 2015 with the excess not needed going to the mental health budget with *priorities* for communities with the highest percent of poverty.

10. No insurance company will be allowed to sell short-term limited-duration insurance (STLDI) plans in the state of Missouri. No insurance company will be allowed to utilize Pre-Existing Conditions to either prevent enrollment or increase prices for any health plan.

11. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

RE: Petition approval request from Gerald Peterson regarding a proposed statutory amendment to Chapter 147 (2020-008)

Dear Auditor Galloway:

Enclosed please find an initiative petition sample sheet for a proposal to amend the Revised Statutes of Missouri filed by Gerald Peterson on December 3, 2018.

We are referring the enclosed petition sample sheet to you for the purposes of preparing a fiscal note and fiscal note summary as required by Section 116.332, RSMo. Section 116.175.2, RSMo requires the state auditor to forward the fiscal note and fiscal note summary to the attorney general within twenty days of receipt of the petition sample sheet.

Thank you for your immediate consideration of this request.

Sincerely,

John R. Ashcroft

Be it enacted by the people of the state of Missouri:

The annual franchise tax of Chapter 147.RSMo will be amended to be reinstated as follows with the revenue to be distributed to the Missouri Road Fund, to the higher education fund and to school districts with a 12% or more poverty level as directed by this amendment:
147.010 1. For the transitional year defined in subsection 4 of this section and each taxable year beginning on or after January 1, 1980, but before January 1, 2000, every corporation organized pursuant to or subject to chapter 351 or pursuant to any other law of this state shall, in addition to all other fees and taxes now required or paid, pay an annual franchise tax to the state of Missouri equal to one-twentieth of one percent of the par value of its outstanding shares and surplus if its outstanding shares and surplus exceed two hundred thousand dollars, or if the outstanding shares of such corporation or any part thereof consist of shares without par value, then, in that event, for the purpose contained in this section, such shares shall be considered as having a value of five dollars per share unless the actual value of such shares exceeds five dollars per share, in which case the tax shall be levied and collected on the actual value and the surplus if the actual value and the surplus exceed two hundred thousand dollars. If such corporation employs a part of its outstanding shares in business in another state or country, then such corporation shall pay an annual franchise tax equal to one-twentieth of one percent of its outstanding shares and surplus employed in this state if its outstanding shares and surplus employed in this state exceed two hundred thousand dollars, and for the purposes of sections 147.010 to 147.120, such corporation shall be deemed to have employed in this state that proportion of its entire outstanding shares and surplus that its property and assets employed in this state bears to all its property and assets wherever located. A foreign corporation engaged in business in this state, whether pursuant to a certificate of authority issued pursuant to chapter 351 or not, shall be subject to this section. Any corporation whose outstanding shares and surplus as calculated in this subsection does not exceed two hundred thousand dollars shall state that fact on the annual report form prescribed by the secretary of state. For all taxable years beginning on or after January 1, 2000, but ending before December 31, 2009, the annual franchise tax shall be equal to one-thirtieth of one percent of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed one million dollars. Any corporation whose outstanding shares and surplus do not exceed one million dollars shall state that fact on the annual report form prescribed by the director of revenue. For taxable years beginning on or after January 1, 2010, but before December 31, 2011, the annual franchise tax shall be equal to one-thirtieth of one percent of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed ten million dollars. For all taxable years beginning on or after January 1, 2010, but before December 31, 2015, any corporation whose outstanding shares and surplus do not exceed ten million dollars shall state that fact on the annual report form prescribed by the director of revenue. For all taxable years beginning on or after January 1, 2011, but before December 31, 2015, a corporation's annual tax liability under this chapter shall not exceed the amount of annual franchise tax liability of such corporation for the taxable year ending on or before December 31, 2010. If the corporation had no annual franchise tax liability under this chapter for the taxable year ending on or before December 31, 2010, because such corporation was not in existence or doing business in Missouri, the annual franchise tax for the first taxable year in which such corporation exists shall be determined by applying the applicable rate of tax provided under the provisions of this subsection to the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed ten million dollars, but in no case shall such corporation's tax liability for any subsequent taxable year exceed the amount of annual franchise tax liability of such corporation for the first full taxable year such corporation was in existence or doing business in Missouri. For taxable years beginning on or after January 1, 2012, the annual franchise tax shall be equal to the percentage rate prescribed in this subsection for the corresponding taxable year of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed the corresponding minimum threshold amount prescribed as follows:
(1) For tax year 2012, the rate shall be one-thirty-seventh of one percent and the threshold amount shall be ten million dollars;
(2) For tax year 2013, the rate shall be one-fiftieth of one percent and the threshold amount shall be ten million dollars;

(3) For tax year 2014, the rate shall be one-seventy-fifth of one percent and the threshold amount shall be ten million dollars;
(4) For tax year 2015, the rate shall be one-hundred-fiftieth of one percent and the threshold amount shall be ten million dollars;
(5) For tax years beginning on or after January 1, 2016, no annual franchise tax shall be imposed under this section until the tax year of 2021.

(6) For the tax year 2021, the rate shall be one percent and the threshold amount shall be ten million dollars and shall remain at that rate unless changed through a ballot of the citizens of the state of Missouri. The first quarterly estimated payments will be due on April 15th of 2021.

(7) Forty percent of the revenue of the annual franchise tax will go into the Missouri State Road Fund.

(8) Fifty percent of the revenue of the annual franchise tax will be to provide funds for the schools with a 12% or more poverty level of the citizens in the Missouri public-school system including pre-kindergarten, elementary and secondary education. The revenue generated from the franchise tax for this section will go to a dedicated fund that will be distributed to these schools with a 12% or more poverty level. Distribution will be to those schools that have met the poverty level in at least 5 of the previous 10 years. Distribution will be the total amount distributed equally based on the average daily attendance of all eligible schools. Each school receiving funds will investigate "Communities in Schools" (https://www.communitiesinschools.org/) and utilize funds if deemed appropriate for this program. To combat the "Pipeline to Prison", a penalty of 10% per year (limited to 30% and cancelled once conditions are met) will be imposed on those schools with a 10% or more minority student representation that does not have an ongoing program of strategic planning with Administrators and School Leaders on Restorative Justice, Discipline and behavior systems including:

- A Peace Room which serves as a hub for restorative practices and interventions including: Peace Circles, Mediations, Restorative Chats & Re-entry Circles
- A disciplinary intervention curriculum which teaches critical social-emotional & leadership skills
- Professional development for teachers and school staff

And for schools with potential of 20 pre-Kindergarten students, this penalty will be imposed for not providing every 4-year-old with high-quality, full-day pre-K.

(9) Ten percent of the revenue of the of the annual franchise tax will go to qualified students from families or individuals with an income below 12% poverty level as scholarships only for public Missouri colleges and universities. Scholarships amounts to each individual will include tuition and associated fees and books with an additional amount equal to that amount for their living expenses. Out of the same fund, scholarships will be available for any Missouri medical school or university providing medical training or Doctors of Medicine degrees. These scholarships will cover all tuition and fees, but only half of that amount for living expenses. These scholarships will also be available for any Missouri student who attended a school that served families with an income below the 12% level. Qualified applicants will be granted in order of receipt of application. At the end of each calendar year, any amounts not used for scholarships will be available to pay off student loans of teachers who have taught at schools serving areas with income areas with an income below 12% poverty level. The debts will be paid off beginning with those teachers who have taught the longest and then proceeding to the next longest serving teachers. Any funds not used from this fund will go into funds for higher education. The Missouri budget for elementary and secondary education will not be replaced by this bill. The elementary and secondary education budgets will remain as specified in Chapter 163. Failure of the legislatures to fulfill this

obligation will require the shortfall to be filled with funds from the Elected Officials, & General Assembly budget.

2. Sections 147.010 to 147.120 shall not apply to corporations not organized for profit, nor to corporations organized pursuant to the provisions of chapter 349, nor to express companies, which now pay an annual tax on their gross receipts in this state, nor to insurance companies, which are subject to an annual tax on their premium receipts in this state, nor to state, district, county, town and farmers' mutual companies now organized or that may be hereafter organized pursuant to any of the laws of this state, organized for the sole purpose of writing fire, lightning, windstorm, tornado, cyclone, hail and plate glass and mutual automobile insurance and for the purpose of paying any loss incurred by any member by assessment, nor to any mutual insurance corporation not having shares, nor to a company or association organized to transact business of life or accident insurance on the assessment plan for the purpose of mutual protection and benefit to its members and the payment of stipulated sums of moneys to the family, heirs, executors, administrators or assigns of the deceased member, nor to foreign life, fire, accident, surety, liability, steam boiler, tornado, health, or other kind of insurance company of whatever nature coming within the provisions of section 147.050 and doing business in this state, nor to savings and loan associations and domestic and foreign regulated investment companies as defined by Section 170 of the Act of Congress commonly known as the Revenue Act of 1942, nor to electric and telephone corporations organized pursuant to chapter 351 and chapter 392 prior to January 1, 1980, which have been declared tax-exempt organizations pursuant to Section 501(c) of the Internal Revenue Code of 1986, nor for taxable years beginning after December 31, 1986, to banking institutions subject to the annual franchise tax imposed by sections 148.010 to 148.110; but bank deposits shall be considered as funds of the individual depositor left for safekeeping and shall not be considered in computing the amount of tax collectible pursuant to the provisions of sections 147.010 to 147.120.

3. A corporation's taxable year for purposes of sections 147.010 to 147.120 shall be its taxable year as provided in section 143.271.

4. A corporation's transitional year for the purposes of sections 147.010 to 147.120 shall be its taxable year which includes parts of each of the years 1979 and 1980.

5. The franchise tax payable for a corporation's transitional year shall be computed by multiplying the amount otherwise due for that year by a fraction, the numerator of which is the number of months between January 1, 1980, and the end of the taxable year and the denominator of which is twelve. The franchise tax payable, if a corporation's taxable year is changed as provided in section 143.271, shall be similarly computed pursuant to regulations prescribed by the director of revenue.

6. All franchise reports and franchise taxes shall be returned to the director of revenue. All checks and drafts remitted for payment of franchise taxes shall be made payable to the director of revenue.

7. Pursuant to section 32.057, the director of revenue shall maintain the confidentiality of all franchise tax reports returned to the director.

8. The director of the department of revenue shall honor all existing agreements between taxpayers and the director of the department of revenue.

9. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

John R. Ashcroft
Missouri Secretary of State
600 West Main Street
Jefferson City, MO 65101

Dear Mr. Ashcroft:

The past millennium Lady Liberty was honored to the core.

"Give me your tired, your poor, your
Huddled masses yearning to breathe
Free. The wretched refuse of your teeming
Shore. Send these, the homeless, tempest-
tossed to me. I lift my lamp beside the
golden door!"

The millennium is new. The responsibility of bringing the honor up to speed is on us the American citizens and officials.

My way as an American citizen is to add a female only clause to Miranda Rights. In 1966 U.S. Supreme Court decided based on the Fifth Amendment, anyone in police custody must be told four things.

1.You have the right to remain silent

2.Any thing you say can and will be used

against you in the court of law

3.You have the right to an attorney

4.If you cannot afford an attorney one

Will be appointed for you

If I had my way a fifth thing would be said to females only. They have right to a big shirt.

The welfare of America can no longer go neglected. Every day the police foot is not in door, sort of speak, of melting pot society homes homeland security suffers. Lets make America Great Again.

Public indecency ordinance reflect moral disapproval of people appearing in the nude, among strangers in public places. This particular law follows a line of state laws dating back to 1831, banning public nudity. The States traditional police power is defined as the authority to provide for public health, safety, and morals. Signatures for Miranda Rights Female only clause can fulfill those obligations.

Sincerely

US Shirts Women

RECEIVED
2019 NOV 13 AM 9:46

Be it enacted by the people of the state of Missouri: without

To utilize the Federal Expanded Medicaid Program, Chapter 208.RSMo, is amended by adding thereto one new section, to be known as section 208.207, to read as follows:

208.207. 1. Beginning January 1, 2021, individuals age nineteen to sixty-four, who are not otherwise eligible for MO HealthNet services under this chapter, who qualify for MO HealthNet services under section 42 U.S.C. 1396a(a)(10()(A)(i)(VIII) and as set forth in 42 CFR 435.119, and who have income at or below one hundred thirty-three percent of the federal poverty level plus five percent of the applicable family size as determined under 42 U.S.C. 1396a(e)(14) and as set forth om 42 CFR 435.603, shall be eligible for medical assistance under Mo HealthNet and shall receive coverage for the health benefits service package.

2. For purposes of this section, "health benefits service package" shall mean, subject to federal approval, benefits covered by the MO HealthNet program as determined by the department of social services to meet the benchmark or benchmark-equivalent coverage requirement under 42 U.S.C. 1396a(k)(1).

3. The reimbursement rate to MO HealthNet providers for MO HealthNet services provided to individuals qualifying under the provisions of this section shall be comparable to commercial reimbursement payment levels with trend adjustment for comparable services. The rates shall be determined annually by the department of social services, and the department may develop such rates through a contracted actuary. The higher commercial comparable rates shall only apply for services provided to individuals qualifying under this section.

4. (1) The department of social services shall discontinue eligibility for persons who are eligible under subsection 1 of this section if:

(a) The federal medical assistance percentage established under 42 U.S.C. Section 1396d(y) or 1369d(z) is less than ninety percent as specified for 2020 each year thereafter or an amount determined by the MO HealthNet oversight committee to be necessary to maintain state budget solvency, whichever is lower; and

(b) The general assembly votes to discontinue eligibility for persons who are eligible under subsection 1 of this section. Prior to any vote under this paragraph, the MO HealthNet oversight committee and the department of social services shall provide the general assembly with information on the current and projected expenses incurred due to expanding eligibility to persons under subsection 1 of this section in relation to health-related savings and revenues and health outcomes of individuals and families receiving benefits under subsection 1 of this section.

(2) The department of social services shall inform persons eligible under subsection 1 of this section that their benefits may be reduced or eliminated if federal funding decreases of is eliminate.

5. The MO HealthNet oversight committee shall conduct research and investigate any potential health-related savings and revenues associated with expanding eligibility to persons under subsection 1 of this section. The committee shall investigate the federal matching rate below which the state could not maintain the expanded eligibility to persons under subsection 1 of this section. If the amount is determined to be greater than ninety percent, the committee shall report its findings to the general assembly for its consideration prior to any vote under paragraph (b) of subdivision (1) of subsection 4 of

this section. In conducting its research and investigation, the committee shall also determine the feasibility of:

(1) Implementing capped cost sharing for persons eligible under subsection 1 of this section which may be reduced based on healthy behaviors of participants.

(2) Expanding Medicaid coverage for certain health care services that are currently financed by the state: and

(3) Enrolling persons under subsection 1 of this section in private health benefit plans.

6. Birth control and family planning will be available to all MO women and male residents 13 years of age and over with proof of age and residence. Applications for birth control and family planning will not need permission from family, spouses or guardians (those under the age of 14 will need permission of guardians or parent). Confidentially will be ensured at all levels. If insurance coverage would come from parent or guardian to cover procedure, on request by patient, this charge will go directly to the state to ensure privacy of applicant. Birth control and family planning covered by this bill will begin on April 1, 2021. There will be no cost for family planning services, including office visits and drugs/devices to the patient. The patient will not have to pay a co-payment for family planning services covered by other health insurance as the state will pick up these non-insurance covered expenses. The patient can go to any health provider who offers family planning services such as:

(a) An ob/gyn or gynecologist, a certified nurse-midwife, a nurse practitioner or other advanced practice nurse, a family planning clinic, your regular doctor or primary care provider or Planned Parenthood. The patient may see 'out of network' doctors as the state will be billed directly covering the costs.

(b) Services covered will include:

(1) Birth control pills, Patches (like the OrthoEvra Patch), Vaginal rings (like the NuvaRing), Injections (like the Depo shot), Implants (like Implanon), Intrauterine devices (IUDs – like Mirena or Paragard), Emergency birth control ("the morning-after pill"), Diaphragms, Condoms,

(2) Surgical sterilization for clients 21 years old and older (like vasectomies or tubal ligation, including the Essure procedure) or any future approved medical procedures will be included at the patient's choice.

(3) The state will make available to all schools and health care offices information for teens announcing the birth control plans provided by the state including long-term, reversible contraceptives.

7. If the Missouri State governing body refuses to appropriate the state's share of Medicaid Expansion, then the cost to the state for expanding medical coverage and birth control to all residents will be borne by the hospitals in the state of Missouri as follows:

(a) All hospitals in MO will be assessed a fee to pay for the expense of this expansion. The first year will be an estimate by the 'department of health and senior services'. Assessment will be made based on the most recent records of 'department of health and senior services' for a full year and adjustments for new assessments will begin on the first of April of each following year. Each hospital will pay a share equal to the percentage of patient days of each hospital of the total MO visits. If MO Assembly has not provided appropriations for this measure,then MO Hospitals will begin monthly payments on Jan 1, 2021. Hospitals will make monthly payments to the state of MO into a fund that will only be used for the full Federal Medicaid Expansion, Planned Parenthood and birth control for residents of Missouri.

(b) Missouri will accept the full federal program of Medicaid Expansion. No adjustments will be allotted for employment status of those receiving expansion benefits. If the funds generated by the hospitals will be used to pay for the cost to the state for Medicaid expansion, Missouri will make immediate application and if fees for implementation have not occurred from the hospitals on implementation, the state will borrow from reserve funds to expedite enrollment. These funds will be paid back upon receipt of funds beginning on April 1, 2021 unless the State of Missouri appropriates the necessary funds.

(c)Any savings to the state from Medicaid expansion that is not used for family planning and birth control will go toward the reduction of the levy on hospitals if this bill mandates.

8. If at any time funding for Planned Parenthood by the federal government is discontinued or if it has already been discontinued at the passage of this amendment, the hospital levy will be increased enough to replace the federal funding of Planned Parenthood to a level at least equal to that of 2015 adjusted for inflation. The state of MO will fund Planned Parenthood at a level at least equal to 2015 adjusted for inflation beginning on Jan 1, 2021, and if by the time this measure is accepted, the state of MO has stopped or reduced funding for Planned Parenthood, the state will begin funding Planned Parenthood again at a level equal to 2015 inflation-adjusted.

9. The 'MO HealthNet" oversight committee shall conduct research and investigation for any potential health related savings and revenues associated with expanding Medicaid eligibility and for extended free birth control resulting in fewer births and associated costs as well as savings from continuing 'Planned Parenthood'. Any savings will go to the reduction or elimination of hospital levy if that levy is necessary. Any additional savings will go to the mental health budget. The 'health and senior services' budget in future years will remain at least at the same percent of total MO budget as in 2015 with the excess not needed going to the mental health budget with *priorities* for communities with the highest percent of poverty.

10. No insurance company will be allowed to sell short-term limited-duration insurance (STLDI) plans in the state of Missouri. No insurance company will be allowed to utilize Pre-Existing Conditions to either prevent enrollment or increase prices for any health plan.

11. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.

Be it enacted by the people of the state of Missouri:

The annual franchise tax of Chapter 147.RSMo will be amended to be reinstated as follows with the revenue to be distributed to the Missouri Road Fund, to the higher education fund and to school districts with a 12% or more poverty level as directed by this amendment:

147.010 1. For the transitional year defined in subsection 4 of this section and each taxable year beginning on or after January 1, 1980, but before January 1, 2000, every corporation organized pursuant to or subject to chapter 351 or pursuant to any other law of this state shall, in addition to all other fees and taxes now required or paid, pay an annual franchise tax to the state of Missouri equal to one-twentieth of one percent of the par value of its outstanding shares and surplus if its outstanding shares and surplus exceed two hundred thousand dollars, or if the outstanding shares of such corporation or any part thereof consist of shares without par value, then, in that event, for the purpose contained in this section, such shares shall be considered as having a value of five dollars per share unless the actual value of such shares exceeds five dollars per share, in which case the tax shall be levied and collected on the actual value and the surplus if the actual value and the surplus exceed two hundred thousand dollars. If such corporation employs a part of its outstanding shares in business in another state or country, then such corporation shall pay an annual franchise tax equal to one-twentieth of one percent of its outstanding shares and surplus employed in this state if its outstanding shares and surplus employed in this state exceed two hundred thousand dollars, and for the purposes of sections 147.010 to 147.120, such corporation shall be deemed to have employed in this state that proportion of its entire outstanding shares and surplus that its property and assets employed in this state bears to all its property and assets wherever located. A foreign corporation engaged in business in this state, whether pursuant to a certificate of authority issued pursuant to chapter 351 or not, shall be subject to this section. Any corporation whose outstanding shares and surplus as calculated in this subsection does not exceed two hundred thousand dollars shall state that fact on the annual report form prescribed by the secretary of state. For all taxable years beginning on or after January 1, 2000, but ending before December 31, 2009, the annual franchise tax shall be equal to one-thirtieth of one percent of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed one million dollars. Any corporation whose outstanding shares and surplus do not exceed one million dollars shall state that fact on the annual report form prescribed by the director of revenue. For taxable years beginning on or after January 1, 2010, but before December 31, 2011, the annual franchise tax shall be equal to one-thirtieth of one percent of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed ten million dollars. For all taxable years beginning on or after January 1, 2010, but before December 31, 2015, any corporation whose outstanding shares and surplus do not exceed ten million dollars shall state that fact on the annual report form prescribed by the director of revenue. For all taxable years beginning on or after January 1, 2011, but before December 31, 2015, a corporation's annual tax liability under this chapter shall not exceed the amount of annual franchise tax liability of such corporation for the taxable year ending on or before December 31, 2010. If the corporation had no annual franchise tax liability under this chapter for the taxable year ending on or before December 31, 2010, because such corporation was not in existence or doing business in Missouri, the annual franchise tax for the first taxable year in which such corporation exists shall be determined by applying the applicable rate of tax provided under the provisions of this subsection to the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed ten million dollars, but in no case shall such corporation's tax liability for any subsequent taxable year exceed the amount of annual franchise tax liability of such corporation for the first full taxable year such corporation was in existence or doing business in Missouri. For taxable years beginning on or after January 1, 2012, the annual franchise tax shall be equal to the percentage rate prescribed in this subsection for the corresponding taxable year of the corporation's outstanding shares and surplus if the outstanding shares and surplus exceed the corresponding minimum threshold amount prescribed as follows:

(1) For tax year 2012, the rate shall be one-thirty-seventh of one percent and the threshold amount shall be ten million dollars;

(2) For tax year 2013, the rate shall be one-fiftieth of one percent and the threshold amount shall be ten million dollars;

(3) For tax year 2014, the rate shall be one-seventy-fifth of one percent and the threshold amount shall be ten million dollars;
(4) For tax year 2015, the rate shall be one-hundred-fiftieth of one percent and the threshold amount shall be ten million dollars;
(5) For tax years beginning on or after January 1, 2016, no annual franchise tax shall be imposed under this section until the tax year of 2021.

(6) For the tax year 2021, the rate shall be one percent and the threshold amount shall be ten million dollars and shall remain at that rate unless changed through a ballot of the citizens of the state of Missouri. The first quarterly estimated payments will be due on April 15th of 2021.

(7) Forty percent of the revenue of the annual franchise tax will go into the Missouri State Road Fund.

(8) Fifty percent of the revenue of the annual franchise tax will be to provide funds for the schools with a 12% or more poverty level of the citizens in the Missouri public-school system including pre-kindergarten, elementary and secondary education. The revenue generated from the franchise tax for this section will go to a dedicated fund that will be distributed to these schools with a 12% or more poverty level. Distribution will be to those schools that have met the poverty level in at least 5 of the previous 10 years. Distribution will be the total amount distributed equally based on the average daily attendance of all eligible schools. Each school receiving funds will investigate "Communities in Schools" (https://www.communitiesinschools.org/) and utilize funds if deemed appropriate for this program. To combat the "Pipeline to Prison", a penalty of 10% per year (limited to 30% and cancelled once conditions are met) will be imposed on those schools with a 10% or more minority student representation that does not have an ongoing program of strategic planning with Administrators and School Leaders on Restorative Justice, Discipline and behavior systems including:

- A Peace Room which serves as a hub for restorative practices and interventions including: Peace Circles, Mediations, Restorative Chats & Re-entry Circles
- A disciplinary intervention curriculum which teaches critical social-emotional & leadership skills
- Professional development for teachers and school staff

And for schools with potential of 20 pre-Kindergarten students, this penalty will be imposed for not providing every 4-year-old with high-quality, full-day pre-K.

(9) Ten percent of the revenue of the of the annual franchise tax will go to qualified students from families or individuals with an income below 12% poverty level as scholarships only for public Missouri colleges and universities. Scholarships amounts to each individual will include tuition and associated fees and books with an additional amount equal to that amount for their living expenses. Out of the same fund, scholarships will be available for any Missouri medical school or university providing medical training or Doctors of Medicine degrees. These scholarships will cover all tuition and fees, but only half of that amount for living expenses. These scholarships will also be available for any Missouri student who attended a school that served families with an income below the 12% level. Qualified applicants will be granted in order of receipt of application. At the end of each calendar year, any amounts not used for scholarships will be available to pay off student loans of teachers who have taught at schools serving areas with income areas with an income below 12% poverty level. The debts will be paid off beginning with those teachers who have taught the longest and then proceeding to the next longest serving teachers. Any funds not used from this fund will go into funds for higher education. The Missouri budget for elementary and secondary education will not be replaced by this bill. The elementary and secondary education budgets will remain as specified in Chapter 163. Failure of the legislatures to fulfill this

obligation will require the shortfall to be filled with funds from the Elected Officials, & General Assembly budget.

2. Sections 147.010 to 147.120 shall not apply to corporations not organized for profit, nor to corporations organized pursuant to the provisions of chapter 349, nor to express companies, which now pay an annual tax on their gross receipts in this state, nor to insurance companies, which are subject to an annual tax on their premium receipts in this state, nor to state, district, county, town and farmers' mutual companies now organized or that may be hereafter organized pursuant to any of the laws of this state, organized for the sole purpose of writing fire, lightning, windstorm, tornado, cyclone, hail and plate glass and mutual automobile insurance and for the purpose of paying any loss incurred by any member by assessment, nor to any mutual insurance corporation not having shares, nor to a company or association organized to transact business of life or accident insurance on the assessment plan for the purpose of mutual protection and benefit to its members and the payment of stipulated sums of moneys to the family, heirs, executors, administrators or assigns of the deceased member, nor to foreign life, fire, accident, surety, liability, steam boiler, tornado, health, or other kind of insurance company of whatever nature coming within the provisions of section 147.050 and doing business in this state, nor to savings and loan associations and domestic and foreign regulated investment companies as defined by Section 170 of the Act of Congress commonly known as the Revenue Act of 1942, nor to electric and telephone corporations organized pursuant to chapter 351 and chapter 392 prior to January 1, 1980, which have been declared tax-exempt organizations pursuant to Section 501(c) of the Internal Revenue Code of 1986, nor for taxable years beginning after December 31, 1986, to banking institutions subject to the annual franchise tax imposed by sections 148.010 to 148.110; but bank deposits shall be considered as funds of the individual depositor left for safekeeping and shall not be considered in computing the amount of tax collectible pursuant to the provisions of sections 147.010 to 147.120.

3. A corporation's taxable year for purposes of sections 147.010 to 147.120 shall be its taxable year as provided in section 143.271.

4. A corporation's transitional year for the purposes of sections 147.010 to 147.120 shall be its taxable year which includes parts of each of the years 1979 and 1980.

5. The franchise tax payable for a corporation's transitional year shall be computed by multiplying the amount otherwise due for that year by a fraction, the numerator of which is the number of months between January 1, 1980, and the end of the taxable year and the denominator of which is twelve. The franchise tax payable, if a corporation's taxable year is changed as provided in section 143.271, shall be similarly computed pursuant to regulations prescribed by the director of revenue.

6. All franchise reports and franchise taxes shall be returned to the director of revenue. All checks and drafts remitted for payment of franchise taxes shall be made payable to the director of revenue.

7. Pursuant to section 32.057, the director of revenue shall maintain the confidentiality of all franchise tax reports returned to the director.

8. The director of the department of revenue shall honor all existing agreements between taxpayers and the director of the department of revenue.

9. All subsections and all clauses of this statute, and the phrases, and the words within them, are severable. If any of the provisions within them are found by a court of competent jurisdiction to be unconstitutional or unconstitutionally enacted or invalid, the remainder of those provisions shall remain valid and the application of such provisions shall not be affected thereby.
